FOREWORD

The Integrated Educational Management Information System (IEMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation, and application. EMIS has been specifically used to derive the Flash Reports I and II.

This report (Flash I 2021-22) provides a snapshot of schools, enrolments, internal efficiency including promotion, repetition, drop out, survival rate and gender parity index of students at all levels of the school education system i.e. province, Local Level and districts in disaggregated forms. Furthermore, this report analyses the indicators set in the SSDP and assesses their targets based on the achievements to see how well schools are supplied with basic support from EDCUs. Such measures give an indication of the effectiveness of the education system. IEMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of information with regards to school performance has been instrumental for evidence-based educational planning and monitoring at district, regional and national levels.

In the process of preparation of this report even in the unfavourable situation of the COVID-19 pandemic many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative effort of IEMIS core team of Center for Education and Human Resource Development (CEHRD), Province and Local Level officials. The constructive suggestions and feedback of the Development Partners and other stakeholders have played the significant roles in this process. I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for their contribution. Any suggestion and feedback for its improvement is highly appreciated.

KEY FINDINGS

Schools are required to upload their information on web-based Educational Management Information System (EMIS) that provides information on all aspects of schools including the retention, attendance and physical infrastructure details that is required for Flash I reporting.

ECED/PPCs

- A total of 36498 ECD/PPCs reported data in 2020/21 out of which 30450 (83.4%) are schools and community based ECED/PPCs supported by federal, provincial and local government while 6048 (16.6%) are operated through private schools and are Montessori based. Last year, a total of 37130 ECED/PPCs reported the data and upon comparison, there are 680 fewer ECED/PPC in 2020/21.
- A total of 1010195 children are enrolled in ECED/PPCs which is a decline of 150991 children from last 2019/20. Part of the reason for such decline could be the reluctance of parents to send children in ECED/PPCs during the Covid-19 period.
- Out of total 1010195 children in ECED/PPCs, 466314 are girls, with a gender parity of 0.85, which clearly shows that either parent are not enrolling girls in ECED/PPCs or the population dynamics has favored boys in comparison to boys.
- At the national level, the ratio of ECED/PPC center to children is 28:1. Last year this ratio was 31:1.
- The GER of ECED/PPC in 2020/21 is 89.68 which is an increase of 2.08% from last year. The number of enrollment in ECED/PPC has decreased this year; however the GER has increased which suggests that the population of this age group has also decreased.

Chapter 1 : Introduction

1.1 Background

This is the thirty third series of Flash I report that regularly analyzes information on various aspects of schools. This report provides information on following areas:

- The numbers of schools and students from pre-primary level to Grade 12 disaggregated by province, gender, caste and ethnicity, and by various types of schools.
- The prevalence and severity of disparities between the disaggregated categories in relation to their access to, participation in and learning outcomes in school-level education across provinces.
- The participation of local stakeholders and beneficiaries in managing school education through school management committees (SMCs) and parent-teacher associations (PTAs).
- The annual progress against SSDP targets at the macro-level based on school level data on physical infrastructure, school improvement plans, social audit, financial audit and availability of toilet, drinking water, science lab and computers.
- The status of learning outcomes in different grades disaggregated by gender.
- The status of alternative learning modalities that has been used during the time of Covid-19.

This report uses the terminologies such as basic and secondary level to denote the restructured education system that categorize school level education into basic level (Grade 1-8 to serve 5-12 year olds) and secondary level (Grade 9-12 to serve 13–16 year olds). Similarly, this report also uses the term ECED/PPC to denote all the classes that cater the needs of the children that aim to enrol Grade 1 with ECED/PPC experience.

The progress presented in this report is based on information derived from the beginning and end of the school year 2021/22. Schools have their own Excel based EMIS which they use to provide information and which they upload in web-based EMIS. The uploaded information is processed to prepare Flash I report in an annual basis.

1.2 Process of Data Collection

Since the very beginning of the Flash Reporting System (school year 2004) in Nepal, the EHRD has been produce three reports to report the status of the school education for each academic Year:

- Flash report I presents the input data at the beginning of the academic year covering the input and process indicators: numbers of students enrolled, the number of teachers, student-teacher ratios, whether or not textbooks are received on time and other indicators and information.
- Flash report II presents output data at the end of each academic year covering the output/ outcome and programme indicators: including data on student retention, attendance, school performance (SIP, Financial and Social Audits), student achievement and other indicators.
- Consolidated report is prepared each year to present the five-year trend of intake and output data of the school education system.
- These reports present the data submitted by schools via Web-based portal of Integrated Educational Management Information System (IEMIS) to the local, province and federal governments. The data presents the data/information from early childhood education and development (ECED) and pre-lower basic education (PPE) through to the secondary level (Grades 11-12) by types of schools (community (public), institutional (private) and religious and other schools).

1.3 Purpose of Flash reports

The overall purpose of Flash reports is to show trends and provide evidence to inform the policy, planning, programming, resource management, implementation, and monitoring of the school education sector, particularly by identifying gaps in provision and disparities in achievement:

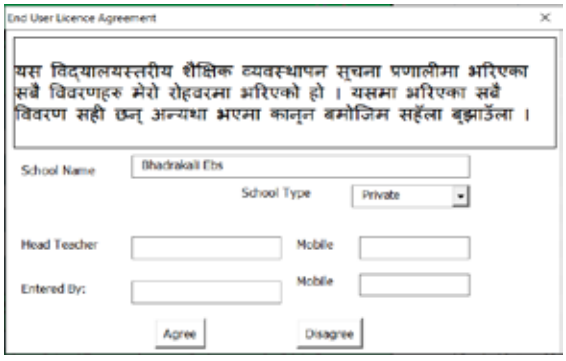
Flash report data is a key means for three tiers of government: federal, provincial and local governments and policy makers to monitor the progress towards achieving the SSDP targets against its Results Framework and Key Performance Indicators (KPIs), and also against the SDG 4 indicator framework and develop further plan accordingly to achieve the gaps against the set targets, which is part of Nepal's National Plan of Action (NNPA) for the education sector to 2030.

This 2021-22 Flash 1 report specifically informs the Annual Strategic Implementation Plan(ASIP) and Annual Work Plan and Budget (AWPB) for fiscal year 2022-23.

1.4 Effects of Covid-19 in data management

In spite of the constraints due to the Covid-19 pandemic effects in the school education, the CEHRD has been able to produce this report based on the information provided in web-based IEMIS. While 2022 remained less challenging in terms of Covid-19, schools, to some extent, had difficulty in finalizing the student details to be updated in web-based IEMIS. As a result, CEHRD had to extend the time period to ensure that schools provided all the required data throughout the year. In addition, the academic session also changed due to Covid-19 which created further confusion amongst schools regarding the timetable of the data submission. Despite such challenge, schools provided information on web-based IEMIS and this information has been used to prepare this report.

1.5 Data reliability



In the traditional approach of paper based data collection system, the signature and the school stamp are often collected to make schools accountable in regards to the submission of the data. In terms of EMIS, such information has been asked in the form of "End User License Agreement" where schools provide the name and contact details of headteacher and the data entry focal person agreeing to a term which state that school, and particularly the headteacher, will be responsible for any financial and legal actions taken by any agencies at all levels of government if the provided data is inaccurate. In another layer of data reliability check, the contact detail of headteacher must match the national database in order to ensure that the data is in fact submitted by schools. Meanwhile, the LGs also use their own approach to check the reliability of the data, often tallying such information with the school attendance data.

1.6 Measures to reduce the loss of learning due to Covid-19

It is certain that Covid-19 has limited the learning environment in schools. In response to this, the Nepal Government with support to the Nepal Education Cluster and the education sector development partners undertook the following activities:

- A **COVID-19 contingency plan** was developed in April 2020, with costed activities and case load to ensure adequate capacity for management and coordination during the response period, strengthen prevention and resilience within the school system and among students, teachers, parents and caregivers, and support continuity of learning for all children in all areas including children with disabilities and from marginalized backgrounds.
- **Guidelines on facilitating students' learning through alternative education** were adopted in May 2020 to support to effectively and systematically facilitate learning through an alternative education system, including distance and open education,in order to resume the learning system disrupted by the COVID-19 infections and to create an environment conducive for children of schoolgoing age to learning in their context until regular teaching and learning activity resumes in school.
- **The school reopening procedure** was approved in June 2020 in line with the school reopening framework that was being developed to guide different levels of governments and school authorities on how to operate schools in a safe environment by providing a clear outline of the pre-school reopening preparation, operation of school during and after reopening and learning management required by both local level and school.
- **The teachers' professional development training** through distance education standard operating procedure was produced in June 2020 as well, specifying the roles and responsibilities among government entities from federal to school level in terms of teacher professional development.
- The **school disinfection guidelines** were approved in September 2020 to support the local governments and schools on operationalizing school disinfection process for reopening and resumption of learning in a safe environment, especially in the cases where schools had been utilized as quarantine centres.
- The **school level education curriculum was formally reduced** from the minimum required 1,024 hours spread across 190 days to 690 hours for class 1-3 and 848 hours for class 4-10, which constituted an overall reduction of around 30%.
- The COVID-19 contingency plan was transformed into a costed **COVID-19 emergency action plan** in October 2020 for the education sector, recognizing that the current context will be a type of crisis that goes beyond a 'normal' contingency period and incorporating the additional support communicated from joint financing partners, including the accelerated COVID-19 response budget.
- The **school reopening framework** was formally approved in November 2020, providing formal procedures and processes for local governments to reopen their schools and detailing what should be assured and undertaken before, during and after the schools reopened.

In addition to these measures, the government and development partners also produced **resources to facilitate learning through alternative modalities** based on the context and needs of the different groups of students in the country. This included the development of self-learning packs, for which the Nepal Education Cluster developed grade-wise learning books from ECED to grade 8 aligned with the formal curriculum, of which up to date radio and television-based education programs and a digital learning portal (https://learning.cehrd.edu.np/) in which interactive modules have been uploaded.

1.7 Preparation of the report

The preparation of this report has been coordinated by the core team of the Education Management Information System (EMIS),[1] headed by the Deputy Director General (DDG) of Educational Planning and Development Division, CEHRD through:

1 Note: In this context the EMIS refers to the Integrated EMIS (IEMIS), which links with other data sets and management information systems in the education sector.

- In 2018, the Flash software was upgraded into a web-based system in line with the requirements agreed in the joint EMIS action plan with support from the Data Must Speak initiative. The web-based system enables schools to upload their education data either directly or supported by local governments and EDCUs into the EMIS. The web-based EMIS generates school-level, local government-level, district-level and provincial-level profiles and report cards, to allow comparison of progress against SSDP's key performance indicators.
- In 2018 the school-level electronic EMISs were updated in consultation with central, provincial, and local government and implemented in all types and levels of schools. In 2019/20, head teachers, principals and teachers were consulted to fulfil their school's needs at province, local government and sub-local government levels.
- Feedback and suggestions received from stakeholders, including development partners were incorporated to improve the school level electronic EMISs.
- The updated Flash software and resource Videos, guidelines were disseminated to all provinces, local governments and education development coordination units (EDCUs) in the last week of February 2019 to support their education units to generate the EMIS from the Flash software to distribute to all schools.
- Guidelines for the reporting and use of the School Level Electronic EMIS were subsequently provided to all schools and instructions were sent to local governments to monitor and verify the data provided by schools, local governments and EDCUs.
- The EMIS core team worked to identify and accommodate requirements at the school, district, local government, and province level in order to address existing and emerging needs related to the ongoing decentralization of planning and implementation. Accordingly, provisions were made within the EMIS to enable local governments and EDCUs to (i) manage data, (ii) verify data and (iii) update schools' codes.

CEHRD has continuously worked to enhance the reporting of school statistics. With the expansion of the ICT infrastructure in schools, paper records of schools have been captured and uploaded into EMIS since school year BS 2071 (2014/15) and was expanded to all 753 local governments in BS 2074 (2017/18).

Chapter 2 : Early Childhood Education and Development

2.1 Introduction

It is widely perceived that a child's early years are the foundation for his or her future development that helps a child to create a strong base for lifelong learning and learning abilities, including cognitive and social development. Efforts to improve the access and quality of ECED/PPCs are therefore, is an investment, not a cost as the consistent and strong evidence clearly shows that children with ECED/PPEs achieve more success at schools in comparison to children without this service.

Nations around the world are becoming aware of the importance of ECED/PPEs. As a result, the SDG target 4.2 has urged every nation to prioritize ECED/PPEs in their plans, programs and policies so that "by 2030, all girls and boys have access to quality early childhood education and development". In the context of Nepal, the School Sector Development Plan (SSDP) has aimed to strengthen ECED/PPEs by a) increasing the access to such centers where access has been a major issue, and b) collaborating with local governments in improving the all aspects of these centers to deliver quality education and care. The SSDP also calls for strengthening equitable access to one-year of ECED/PPE to improve school readiness by expanding appropriate school and community-based models.

There are two types of ECED in operation in Nepal and that includes school-based pre-primary classes, and community-based early child development centres. The school-based pre-primary classes are fully funded by the federal government and are free of charge for all children. Textbooks and other materials are provided by the government. The government funded facilitator/teacher facilitates the classroom.

The community based early child development centres are outside of schools often supported by international/non-governmental organizations and/or local governments. The facilitators are appointed locally but are required to meet qualification criteria set by the government. Their salaries are paid partly by the government and partly by I/NGOs with a contribution from parents. In recent times, such centres are being linked with schools to facilitate the effective monitoring and functioning of these centres.

In addition to school and community based ECEDs, there are many privately run kindergartens that are not supported by the government in terms of funding. These ECEDs are mainly focused in urban areas and these centres charge fees from the parents.

2.2 Number of ECED/PPCs

The Flash reporting system reported an altogether of 36,498 ECED/PPCs out of which 32,991 (90.4%) are school and community based centers. This reporting system also showed that 2,541 (6.9%) additional new centers have been established and are funded, operated and supported by local governments. Similarly, out of 30,450 government funded ECED/PPCs, 428 (1.2%) of these centers are operated in religious schools. Meanwhile, this reporting system reported 6,048 (16.5%) privately funded ECED/PPCs across the country. See Annex 1 for disaggregated details on number of ECED/PPCs.

Table 2.1: Number of ECED/PPCs by school type and province

Province	Total	School Based ECED supported by		Religious	Institutional
		Federal Government	Local Government		
Province 1	7297	5990	222	65	1307

Sudurpaschim	4388	3823	510	3	565
Nepal	36498	30450	2541	428	6048

In the academic year 2019-20, there were 36,450 ECED centres and PPE classes in the country, of which 30,039 (82.4%) were community or school-based ECED/PPEs and the remaining 6,411 (17.6%) were operated by institutional schools. Comparison of this data with table 2.1 given above, there has been an increase of 48 ECED/PPCs, with decrease of 363 such centers operated through institutional schools.

Of the total 36498 ECED/PPCs, the highest percentage of those centers are in Province 1 (19.3%) followed by Bagmati Province (17.8%) and Lumbini Province (17.5%). Karnali Province has the least number of these centers (8.7%) followed by Gandaki Province (10.7%), Sudurpaschim Province (12.5%) and Madhesh Province (13.6%).

The highest percentage of institutional schools led ECED/PPCs are in Bagmati Province (26.5%), followed by Province 1 (21.6%) and Lumbini Province (18.2%). Karnali Province has the least number of these centers (2.9%) followed by Gandaki Province (8.9%), Sudurpaschim Province (9.3%) and Madhesh Province (12.6%).

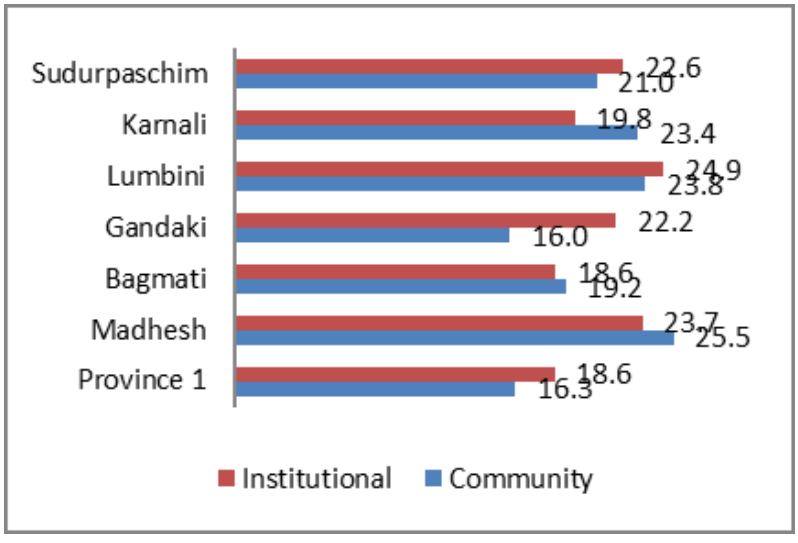

Figure 2-1: ECED/PPC to Children Ratio

Moreover, the figure 2.1 presents the ratio of children enrolled in ECED/PPCs to the existing number of those centers. At the national level, this ratio is 20.6 in case of government funded

ECED/PPCs while this ratio is 21.1 in case of institutional schools. In terms of provinces, this ratio is highest in Madhesh Province (25.5) followed by 23.8 in Lumbini Province in case of government funded ECED/PPCs. In case of centers operated through institutional schools, this ratio is highest in Lumbini Province (24.9) followed by Madhesh Province (23.7) and the lowest in Bagmati Province and Province 1 with 18.6. See Annex 1 for disaggregated details on ECED/PPC to children ratio.

2.3 Number of children in ECED/PPCs

Table 2.2 given below presents the number of children that are enrolled in different types of ECED/PPCs across the country. Out of 1010195 children that are enrolled, Table 2.2 also shows that 466314 (46%) are girls while the remaining 543881 (54%) are boys illustrating that either parents are favouring boys in comparison to girls or the population distribution has skewed in favour of boys compared to their counterparts.

Out of 1010195 children, 627142 (62%) are in government funded ECED/PPCs while the remaining 383053 (38%) are in privately funded ECED/PPCs. In government funded ECED/PPCs the percentage of girls enrolled in ECED/PPCs is 48% while this percentage is 42% in case of institutional schools. See Annex 1 for disaggregated details on number of children in ECED/PPCs along with the gender parity details.

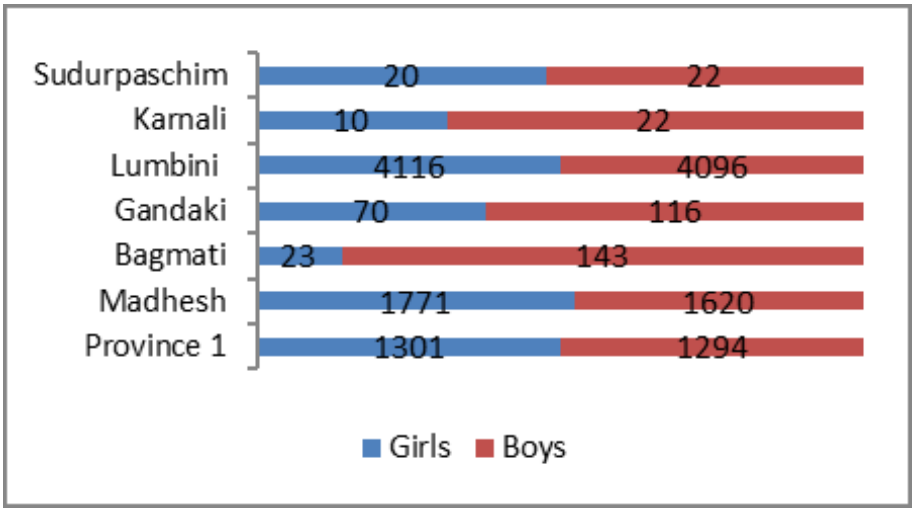

Figure 2-2: Number of children enrolled in religious schools

In 2019-2020, the number of children in ECED/PPCs was 1130521 with 508145 (46%) girls and 622376 (54%) boys. The same gender ratio is also seen in 2020-2021, however, the number of children in these centers have decreased by 120056 within one year. Part of the reason for such decline could be the Covid-19 effect as parents felt it was not necessary to send children into ECED/PPCs during the pandemic. Any other reason behind this pandemic effect can be a topic of further investigation. Nevertheless, Figure 2.2 given in the right shows the number of children enrolled in ECED/PPCs in Madrassas, Gumbas and Ashrams. This number is 14624 (1.4%) at the national level with almost equal number of 7311 (50%) girls and 7313 (50%) boys.

2.4 No. of Children and ECED/PPC Center Ratio

The total number of ECED/PPCs in Nepal is reported to be 36498 with 6048 (16.5%) being run by institutional schools and the remaining 30,450 (83.4%) is being supported by federal government and/or local government. Similarly, the number of children in those ECED/PPCs is 1010196, with 383053 (38.0%) being in institutional schools and the remaining 627142 (62.0%) are in government supported ECED/PPCs. Table 2.3 given below provides the number of ECED/PPCs based on the number of enrolled children in those centres.

Nepal	5635	7876	13077	2536	1482	2385	1548	1955	1255	662	302	326

The minimum required class size for a ECED/PPC is 25 students, and Table 2.3 given above shows that there are 13,511 (41%) government supported ECED/PPCs with less than 20 students while there are 2385 (7.2%) government supported ECED/PPCs with more than 50 children. It is hoped that this information would be helpful in mapping the existing ECED/PPCs in terms of assuring the minimum required children in the centers.

2.5 Children with disabilities in ECED/PPCs

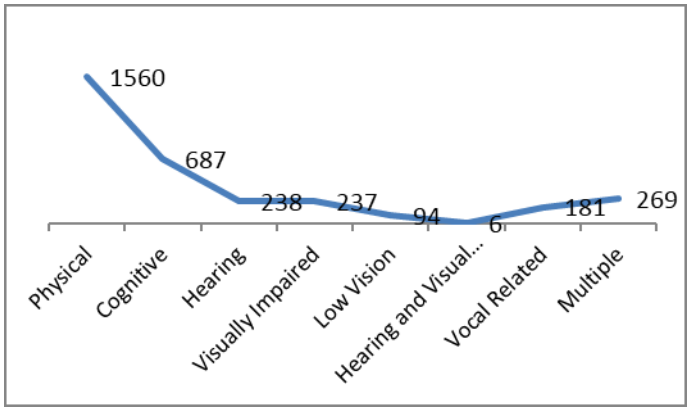

Figure 2-3: Number of children with disabilities

Out of total 1010195 children enrolled in ECED/PPCs, a total of 3272 (0.3%) children has been found to have some sort of disability. Out of those numbers, 2510 (76.7%) are in community schools while the remaining 762 (23.3%) are in institutional schools. In terms of gender, out of 3272 children with disabilities, 1869 (57.1%) are girls while the remaining 1403 (42.9%) are boys. Though the proportion of these children are identical with the population census 2011, these proportion are very low given that an estimated 10-15% (including other categories of the disabilities, which are not included in the current 8 categories of the disabilities in EMIS) of population globally have a disability.

Of the 3272 children with disability, 1560 (47.6%) have some sort of physical disability while 687 (21.0%) children have cognitive disability. Since cognitive and learning difficulties are always hard to identify, the cognitive and learning disability remains the second most reported disability. Meanwhile, the number of children with disability in religious schools remains at 29, with 13 (44.8%) girls and 16 (55.2%) boys. Out of 29 children with disability, 7 (24%) of them have physical disability, 21 (72%) of them have cognitive difficulty, while 1 (3.4%) has a vocal and speech related disability. Table 2.4 given below provides the number of children with different types of disabilities disaggregated by gender and province for community and institutional schools. See Annex 1 for disaggregated details on children with disabilities in ECED/PPCs.

2.6 Prioritized Minimum Standards for ECED/PPCs

The prioritized minimum standards are intended to make sure that all ECED/PPCs are equipped with minimum required facilities that cater to the diverse needs of students. These prioritized minimum standards were finalized in 2075 BS and has five major components and that includes:

- Child friendly seating arrangement: Arrangement of seating to prevent children from dirt and cold
- Qualified Teacher: Availability of a teacher with secondary qualification and 90 hours of basic and practical training
- Six Learning Area: Materials arranged in at least six learning areas (a) Language (b) Maths (c) Acting/ Self-reliant skills (d) Creativity (e) Construction (f) Science
- Child friendly tap: Easy access to pure drinking water
- Toilets: Easy access to soap and water in toilet

The Flash reporting system is not in a position to provide information on child friendly seating arrangement and the six learning area, while the information on remaining 3 standards can be generated. Even in such case, schools are less likely to have separate drinking water or toilet facilities to children enrolled in ECED/PPCs, since such infrastructure is applicable to all the students of schools irrespective of different layers of education system. Table 2.5 given below provides the status of ECED/PPCs in terms of these 3 standards based on the infrastructure details of schools.

Table 2.5: Prioritized minimum standards for ECED/PPCs

Province	Total ECED/PPCs	Minimum Standards			Meeting 1 Standard	Meeting 2 Standards	Meeting 3 Standards
		With Water	With Toilet	With Qualified Teacher			
Province 1	6212	3914	4318	5112	1066	1981	3165
Madhesh	4544	2146	2191	3890	1364	1454	1723
Bagmati	5358	3641	4030	4325	824	1734	2800
Gandaki	3623	2753	2942	2730	419	1151	2054
Lumbini	5721	3677	3858	4609	1063	1768	2891
Karnali	3200	1888	2284	2265	669	1141	1391
Sudurpaschim	4333	2473	2755	3198	961	1462	1910
Nepal	32991	20492	22378	26129	6366	10691	15934

The number of ECED/PPCs that have water and toilet facilities is 20492 and 22378 respectively while the number of ECED/PPCs that have qualified teachers is 26129 as given in table 2.5 above. Upon calculation, the above given table 2.5 shows that 6366 (19.2%) meets only 1 standard, 10691 (32.5%) meets 2 standards and 15934 (48.3%) ECED/PPCs meet all three standards. However, it is to be noted that this calculation cannot explain the quality of the drinking water and the toilet facilities in those ECED/PPCs and therefore, such assessment needs to be examined separately.

2.7 Caste/Ethnic Distribution in ECED/PPCs

Table 2.6 given below presents the status of children by caste/ethnic distribution disaggregated at province level. This table also presents the status of children disaggregated by Madhesis which was not available in the earlier report. This caste/ethnic group has also been added in the report so that this information can be used for further plan preparation, which was not available earlier.

Out of 1010195 children that are enrolled in ECED/PPCs, 182189 (18.0%) are from Dalit communities (this percentage was 18.9 last year), 366149 (36.2%) are Janajatis (this percentage was 34.9 last year), 163565 (16.2%) are Madheshis, while the remaining 298292 (29.6%) are Brahman/Chhetris and other categories.

In all three caste/ethnic groups, the gender parity does not favour girls (0.95 in case of Dalit students, 0.93 in case of Janajatis and 0.98 in case of Madhesis) stating that either the number of girls are proportionately low in comparison to boys or the parents are deliberating not sending girls into these ECED/PPCs. Interestingly, out of 109347 Madhesis in community schools, 58962 (54.0%) are girls while this number is 54218 in case of institutional schools with 21254 (39.2%) girls, which clearly indicates that parents from Madhesi community are favouring boys into institutional schools and are sending girls into community schools. See Annex 1 for disaggregated details on caste/ethnic group enrolment in ECED/PPCs.

2.8 GER/NER in ECED/PPCs

The Gross Enrollment Rate is the total number of enrolled children divided by the total eligible population (age 3-4) while the Net Enrollment Rate is the total number of enrolled children of particular age (age 3-4) divided by the total eligible population of ECED/PPCs. Both of these indicators measure the efficiency of the education system and a utopian education system would measure both GER and NER into 100.

The GER of ECED/PPC was 87.6%, with 86.4% girls and 88.7% boys in the school year 2019-2020 while this percentage has improved to 89.68% in 2020-2021 with 86.0% for girls and 93.3% for boys. The NER meanwhile is 69.0% with 66.9% for girls and 71.1% for boys. See Annex 1 for disaggregated details on GER and NER at ECED/PPCs.

2.9 Availability of textbooks and other materials

Textbooks, teacher guide, child materials, curriculum and reference materials are integral part of teaching learning process. Similarly, having a book corner in the classroom is an effective way of engaging children into learning environment. Table 2.8 given below provides the number of schools that reported information on availability of textbooks and other materials related to ECED/PPCs. It is to be noted that the quality of these materials cannot be answered through Flash reporting system and therefore, can be a subject of further study.

As Table 2.8 showed, out of 32991 government supported ECED/PPCs, a total of 6918 (21.0%) reported that they have textbooks; while a total of 3461 (10.5%) said that they have teacher's guide available in their schools. Similarly, a total of 8874 (26.9%) said that they have child materials, 4714 (14.3%) said that they have a functional book corner, 5199 (15.7%) said that they have curriculum and 4200 (12.7%) said that they have reference materials related to ECED/PPCs. See Annex 1 for disaggregated details on availability of relevant materials in ECED/PPCs.

2.10 ECED/PPC Teacher Details

Each ECED/PPC teacher should be a SEE (grade 10) graduate. Similarly, the ECED/PPC teacher is always preferred to be female as it is often argued that females care children the most in comparison to their counterparts. In case where female teachers are not available, then males are recruited to work as ECED/PPCs teachers. Table 2.9 given below provides the reported number of ECED/PPC teachers by gender, caste/ethnicity, level of qualification and by age category.

Out of 29141 ECED/PPC teachers of community schools, 28126 (96.5%) are females while the remaining 1015 (3.5%) are males. Similarly, out of 22074 ECED/PPC teachers of community schools that responded the caste/ethnicity, 1838 (8.3%) are from Dalit community, 10629 (48.1%) are Janajatis, and 9607 (43.5%) are Brahman/Chhetris and other caste/ethnic groups.

In case of educational qualification, 27156 teachers of community schools responded, out of which 1027 (3.8%) are less than grade 10 graduates which clearly shows that federal government and the local government should design qualification enhancing packages to these teachers so that the required minimum qualification can be met. Similarly, out of 27156 teachers, 1459 (5.3%) are less than 25 years of age, while the remaining 25697 (94.7%) are beyond 25 years of age, which also shows that there is a need to encourage youths into the teaching profession.

2.11 Percentage of Grade 1 Students with ECED/PPC Experience

During early childhood years, the minds of children are so lively and imaginative that they explore at every opportunity to discover new experiences, new friends and new environments. It is due to this reason, early childhood education and development has been a major priority for every nation including the commitment to increase as many grade 1 students with ECED/PPC experience. Table 2.10 gives the number of newly enrolled grade 1 students with ECED/PPC experience. See Annex 1 for disaggregated details on this indicator.

Chapter 3 : Schools

3.1 Introduction

This section of the report presents the number of schools that are operating across the country. It is to be noted that schools in Nepal are categorized under two broader terms, one is community schools and the other is institutional schools. Community schools are operated through public or government funds while institutional schools are operated through fees provided by the guardians. There are schools that are religious in nature, however, those schools are also mandated to follow government curriculum and therefore are counted as community schools. The religious schools that are operated through fees or public donations are counted as institutional schools.

3.2 No. of schools

The Flash reporting system captured data of 34,816 schools across the country out of which 27,890 (80%) are community schools while the remaining 6,926 (20%) are institutional schools. The number of community schools that reported data in 2019/20 was 28,941 (81%) and the number of institutional schools that reported data was 6,733 (19%) with an altogether of 35,674 schools being reported last year. In this sense, there are 858 lesser schools than the earlier year, with 1051 lesser community schools but 188 more institutional schools. While counting these numbers, schools that are only operating ECED/PPC or Montessori based PPCs or being downgraded to ECED/PPCs only are not counted as schools. Table 3.1 below shows the number of schools across the country by provinces. See Annex 2 for disaggregated details on the number of schools across the country.

Nepal	**34816**	**27890**	**80.1**	**6926**	**19.9**

As shown in Table 2, the share of community and institutional schools remain at 80.1 and 19.9%. The share of institutional school is high in Bagmati province with 27.8% while this percentage is 6.3 in Karnali province.

3.3 Basic Level Schools

Across the country, there are total 34,816 schools out of which 23,531 (68%) are basic schools that are either running grade 1 only or grade 1-2 or grade 1-8 which means 32% of the remaining schools do not have secondary levels. This number was 24,443 and upon comparison, we have 912 lesser basic schools from last year. It also implies that some of these schools might have been closed or merged or some of these schools might have upgraded into secondary levels.

In terms of community schools, there are 27,890 schools across the country out of which 20712 (74%) are basic level schools while this number is 6,926 and 2819 (40.7%) in case of institutional schools. Comparison of these data shows that community schools are heavily focused basic level of education while institutional schools are interested in secondary level of education.

This analysis also shows that 74% of the students that are studying in community schools need to change their schools if they are to continue their study in secondary level while this percentage remains at 44% in case of institutional schools. This analysis needs to be considered during the planning phase at all tiers of government in order to ensure that students are enrolled and sustained in community schools. See Annex 2 for disaggregated details on the number of basic schools across the country.

3.4 Secondary Level Schools

Meanwhile, table 3.3 given below provides the number of schools that are operating secondary level of grade 10 and grade 12. In other words, there are 6,875 schools across the country that are operating grade 1-10 or various grades in between grade 6 to 10 and similarly there are 4410 schools across the country that are operating grade 1-12 or combinations of grade 6 to 12.

Out of 6875 secondary schools (upto grade 10), a total of 3675 (53%) are community schools while the remaining 3200 (47%) are institutional schools. Similarly, out of 4410 secondary schools (upto grade 12), a total of 3,503 (79%) are community schools and the rest 907 (21%) are institutional schools. Upon comparing table 3.3 with table 3.2, it shows that the share of community schools is high at lower basic level while this share is low in case of secondary level (upto grade 10). See Annex 2 for disaggregated details on the number of secondary schools across the country.

3.5 9-12 Technical streams

The importance of vocational education has been felt at all levels of government as vocational education is a key to preparing skilled labor force required for the country. It is due to this urgency, the CTEVT and CEHRD has pre-diploma, diploma and 9-12 technical streams operated in schools and other institutes. The pre-diploma is 18 month course and is a pre-requisite to diploma which is a four year old course offered by schools and institutes operated under CTEVT. The number of pre-diploma institutes is 455, the number of diploma institutes is 465, and the number of schools that are offering both courses is 186, with an altogether of 1106 schools/ institutes across the country.

Table 3.4: No. of 9-12 technical streams by province

Province	Number of Schools			CTEVT Total	CEHRD Total	Total

Nepal	**465**	**455**	**186**	**1106**	**485**	**1591**

The number of schools offering 9-12 technical stream offered by CEHRD is 485 across the whole country out of which Lumbini Province has the highest share with 20.2% and Karnali Province has the lowest share with 6.2% of these schools. It is to be noted that these schools offer courses in 6 areas and that includes plant science, animal science, computer engineering, electrical engineering, civil engineering, and music.

3.6 Model Schools

The Nepal Government introduced the model school program as part of SSDP in order to increase access of all children to quality school education through strategic assistance and reform initiatives to improve the equitable access, quality, efficiency, governance, management and resilience of the education system. This program aimed to upgrade at least 1000 public secondary school across the whole country during the SSDP period. At present, as table 3.5 showed, there are 422 model schools across the country, but still 578 schools need to be selected in order to achieve the target of this program.

Table 3.5: No. of model schools by province

Province	Model Schools	
	Number	Percentage
Province 1	81	19.2

Out of 422 model schools, 81 (19.2%) are in Province 1 while Karnali Province has the least number of model schools with 37 and share of 8.8% within seven provinces.

3.7 Non-formal Alternative Schools

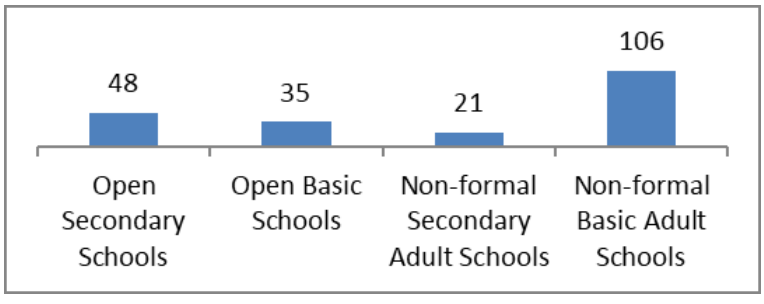

Figure 3-1: Number of non-formal alternative schools

Adults that have not been able to complete their education or wish to study further are often encouraged to join alternative schools as it is not desirable for those adults to study in formal schools. It is due to this reason, open and adult schools are in operation and figure 3.1 given shows the type and number of such schools across the country. As given, the open schools are divided into basic and secondary schools while the non-formal adult schools have also been done the same.

3.8 Special Schools

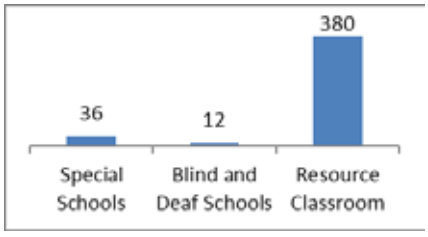

Figure 3-2: Number of special schools

The first attempt of Nepal Government in assuring that students with visual impairment are also included in the regular classroom started in 1960s when those students were taught in the same classroom with other fellow students. Since then, many efforts have been made to bring children with disabilities in regular classrooms or special schools dedicated for those types of students. As a result, 36 special schools are being operated across the whole country. Similarly, 12 such schools are also in operation that are dedicated for blind and deaf students while 380 resource classrooms are also in operation for such kind of students.

3.9 Multi-Grade and Multi-Level Schools

Multi-grade teaching is gaining a lot of popularity in developed and developing countries. In this teaching approach, a single teacher teaches more than one grade or age group. In the context of Nepal, this approach seems rational as there are shortages of teachers and the declining number of students in the classrooms. At present, there are 269 MGML schools that are being supported by the federal government.

3.10 Community Learning Centers

CLC is a community-based non-formal educational institution or organization that provides a range of services and learning opportunities to out-of-school children, youth and illiterate or semi-literate adults from socially disadvantaged rural and urban communities. These centers operate outside the formal education system and aims to address the basic literacy and educational needs of the learners. As non-formal educational institutions, these centers are usually established and managed by local communities with financial and technical support from various governmental and non-governmental agencies.

Table 3.6: No. of CLCs

	Federal Government	Local Government
Province 1	333	2

Gandaki	248	1
Lumbini	329	0
Karnali	248	0
Sudurpaschim	257	0
Nepal	**2151**	**5**

As given in table 3.6, there are 2151 CLCs that are funded through federal government and 5 CLCs that are operated through local government by their own resources. Meanwhile, out of 2156 active CLCs, 429 are in Bagmati province (21.4%) while Karnali Province has the least number of active CLCs with 248 and a percentage share of 11.5 across seven provinces. See Annex 3 for disaggregated details on the number of CLCs across the country.

Chapter 4 : Basic Level Education

4.1 Introduction

This section of the report presents the number of students that are enrolled in basic level across the country. Similarly, this section also provides information on student teacher ratio and the number and share of students from Dalit, Janajati, Madhesi and other communities that are in schools. The major indicators of education sector and that includes the gross enrollment rate, net enrollment rate, net intake rate, gross intake rate for basic level has also been provided in this section. All the provided information has been disaggregated by types of schools and provinces wherever required.

4.2 No. of students in basic level

Out of 5325980 students in basic level of grade 1-8, 3548636 are in basic level (1-5) and the remaining 1777344 are in basic level (6-8). In terms of percentages, 66.6% of the students amongst grade 1-8 are at basic level (1-5) while the remaining 33.4% of the students are at basic level (6-8). Upon comparing the data from last year, this is an increase of 12,973 students at basic level of grade 1-8.

In terms of community schools, the number of students in basic level (1-5) is 2563205 which correspond to 72.2% of the total enrollment. In institutional schools, this number is 985431 which correspond to 27.8% of the total enrollment. Last year, this number and percentage was 26,28,208 (75%) for community schools and 893,969 (25%) for institutional schools.

The number of students in basic level (6-8) is 1777344 which is a decrease of 39432 students as the reported number of students in basic level (6-8) was 1816776 for last year. In community schools, there are 1316232 students which is 74.0% of the total enrollment while there are 461112 students in institutional schools which is 26.0% of the number of students in basic level of grade 6 to 8.

Table 4 given above shows that the enrollment of girls is high in community schools with 51.1% of girls being enrolled in community schools while this figure is 41.6% in terms of institutional schools. This data clearly shows that parents are favoring girls in community schools and are favoring boys in institutional schools. Figure 4.1 and figure 4.2 given below show the number of students enrolled in mainstreamed religious schools and that includes Madrassas, Gumbas and Ashrams at basic (1-5) and basic (6-8). See Annex 4 for further disaggregation on students.

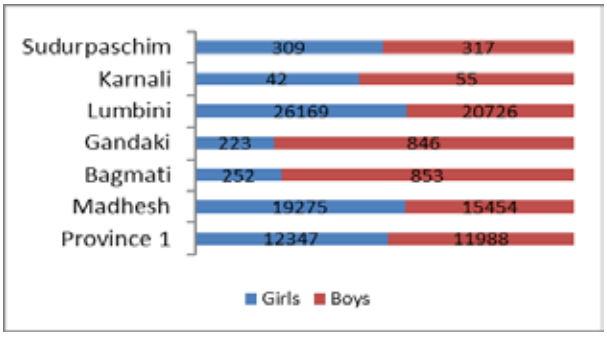

Figure 4-1: Number of students in religious schools (1-5)

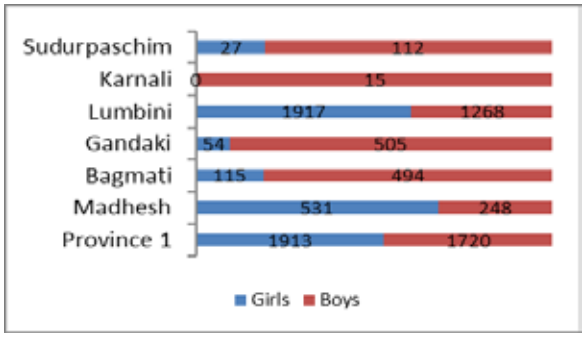

Figure 4-2: Number of students in religious schools (6-8)

It is to be noted that out of 2563205 students enrolled in community schools at basic level (1-5), 108,856 (4.2%) are in mainstreamed religious schools. Out of 1316232 students enrolled in community schools at basic level (6-8), 8919 (0.68%) are in mainstream religious schools. The difference between students in basic level (1-5) and basic level (6-8) in religious schools show that there is a big drop-off in terms of students promoting at basic level (6-8). Meanwhile, table 4.2 given below shows the number of students by grades at the national level followed by the share of students in each grade for both community and institutional schools.

As shown in table 4.2 given above, out of 3879437 students in community schools in grade 1-8, 15.0% of the students are in grade 1 followed by 13.6% students in grade 2. The dropoff of 1.4% students in grade 2 in community schools shows that students are still finding it difficult to progress in grade 2, however, this is an improvement as this percentage was 3.1 last year.

In case of institutional schools, the share of students in grade 2 and 3 is greater than grade 1, which is unusual and therefore needs to be examined and explored further. In the efficient educational system, there is less differences in terms of share of the students in each grade, however, in the context of Nepal, in both community and institutional schools, the gap exists between grades and therefore needs to be studied. The dropoff of students in grade 8 at institutional schools show that the tendency of leaving institutional schools to community schools in that particular grade exists, as students graduating grade 8 from community schools often receive priorities in the future.

4.3 No. of students from Dalit, Janajati and Madhesi communities in basic level

As shown in table 4.3, the number of students from Dalit and Janajati communities is 971026 and 1769095 respectively. In terms of total students at basic level (G1-8), the share of Dalit students remain at 18% and the share of Janajati students remain at 33%. As shown in table 4.3, the number of students from Dalit communities has decreased to 102039 in grade 6 while there are 120407 students in grade 5, which states that students from these communities drop out of schools after they complete grade 5. This scenario is also seen in case of Janajati students.

In all the categories as given in table, the number of girls is lower than boys, with GPI being 0.94 for total students, 0.97 for Dalit students and 0.95 for Janajati students, which clearly shows that either girls are not in schools or the population dynamics has shifted in favour of boys.

Figure 4.3 given in the right shows the number of students from Madheshi community disaggregated by grade and gender. Unlike other caste/ethnic communities, the number of girls is higher in each grade as there are 11,403 more girls in grade 1 and 11,391 more girls in grade 2. Since Madhesh Province has already launched *'Beti Padhao Beti Bachao'* to improve the status of girls in schools, this data could have reflected that result and therefore needs to be further studied. See Annex 4 for further disaggregation on students.

4.4 No. of students from disadvantaged communities in basic level

From the beginning of the EFA, the government has given high priority to ensure universal access, participation and retention of all children including the children from 22 disadvantaged Janajatis like Bankaria, Baramu, Bote, Chepang, Danuwar, Dhanuk, Hayu, Jhangad, Kisan, Kusunda, Lopcha, Majhi, Meche, Musbadiya, Raji, Raute, Satar, Singhsa, Siyar, Surel, Thami and Thunam.

A total of 55015 students from 22 extremely disadvantaged Janajatis are in basic level (1-5) and a total of 21189 are in basic level (6-8) with an altogether of 76204 students in basic level (1-8). Out of those 76204 students in basic level (1-8), 37310 are girls which represent 48.9% of the total students.

4.5 No. of students with disabilities in basic level

Disability is a physical, mental, cognitive or developmental condition. Such condition limits the ability of an individual to engage in certain tasks or actions or participate in typical daily activities and interactions. Disability therefore is any condition of the body or mind (impairment) that makes it more difficult for the person with the condition to do selected tasks. In such case, students with disabilities need more care and support and at the same time schools need to be disability-friendly

so that students with disabilities can perform the way other students do in classroom. Figure 4.4 and figure 4.5 given below provides the number of students with disabilities at basic (1-5) and basic (6-8) across the country.

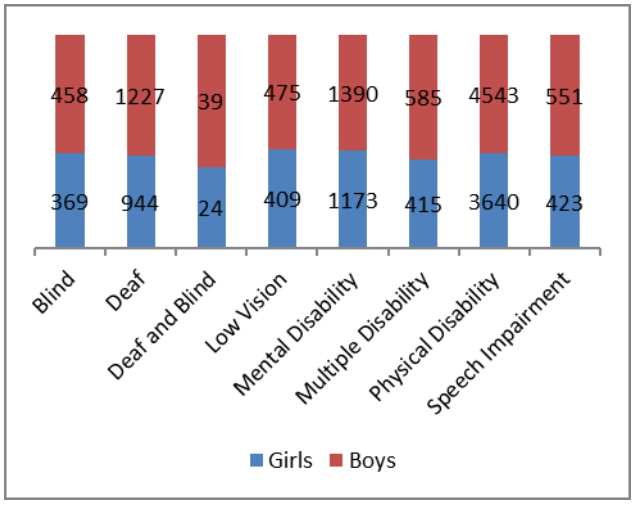

Figure 4-4: Number of students with disabilities (1-5)

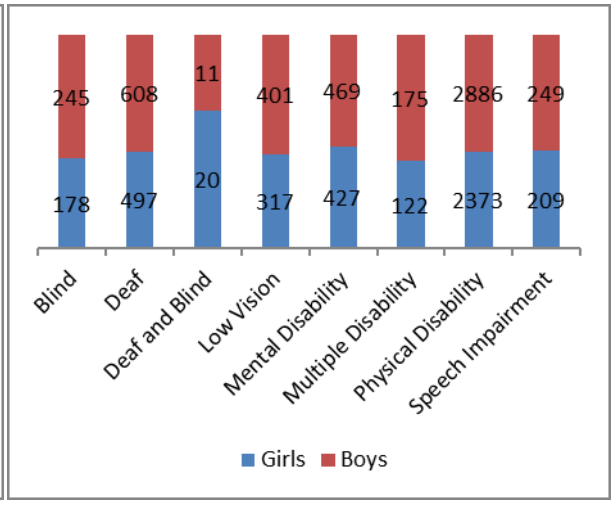

Figure 4-5: Number of students with disabilities (6-8)

Figure 4.4 and figure 4.5 suggest that there are 7508 students that have some sort of disabilities which comprise to 0.2% of the total student at basic (1-5). Similarly, there are 3470 students that have some sort of disabilities at basic (6-8). This number represents 0.19% of the total students in that level of education. As global evidences suggest that around 10% of the students fall under this category, it has been argued that this number has not been properly reported by schools. See Annex 5 for further disaggregation on students with various forms of disabilities.

4.6 Average scores in basic level

Scores are one of many ways to assess the performance of students. Table 4.5 given below provides the average scores for basic level (1-5) in community schools. While calculating the average scores, the sum of all the scores obtained in the final examination has been divided by the number of exam-takers and while calculating these scores, the data of those students that has not appeared in final examination has been omitted to ensure that there is no skew in the output.

Table 4.5: Average score by subjects and by gender (1-5)

The average scores of boys from grade 5 is higher than their counterpart while this pattern is opposite in case of grade 1-4 with an exception of some subjects as given in table above. In another analysis, mathematics seems to be the subject with low scores in all grades in comparison to other grades.

* Data from Karnali Province is missing.

Mathematics seem to be the major subject where the average score is comparatively lower than other subjects as this average hovers around 30 percentile groups. In fact, the average score of all subjects has not even exceeded 50% with an exception of Nepali in grade 8, which shows that quality in teaching learning process is still a major gap in schools.

4.7 Use of EMIS in grade VIII examination result

Until centralized governance structure, the final grade VIII examination was held by the then District Education Offices, now called as Education, Development and Coordination Unit (EDCU). After the federal structure, this role has been shifted to the local levels. During this whole process, the examination result was either stored in locally built Excel files and/or privately managed software thus by leading the risk of losing the data for future use. Understanding the importance of this data, the IEMIS has built in a grade VIII examination sub-system that uses the standard procedure to collect, store and generate the result output. The table 4.7 given below provides the grade VIII examination result of one of the LGs of Bagmati Province 2078 as an example to illustrate as to why and how the federal government needs to support LGs in managing this examination result.

Based on the grading structure provided by the Curriculum Development Center (CDC), the table 4.7 given above shows the grading structure of all types of schools for practical and theory exams. Students that have received NG should either pass the re-examination or should repeat the same grade and as shared in the table, majority of the students have NGs in Mathematics and Science.

4.8 Internal efficiency at basic level

Internal efficiency is often related to promotion, repetition and dropout rates at various levels of education. The promotion rate is the percentage of students that were able to promote the upper grade. The repetition rate is the percentage of students that repeated the same grade while the dropout rate is the percentage of students that dropped out of schools for various reasons. In an ideal scenario, the promotion rate is always 100% and the remaining two rates are zero or close to zero. Table 4.8 given below provides these rates for individual grades disaggregated by gender.

Early grades remain to be the major area of concern as repetition rate is 14.4% in grade 1, 9.8% in grade 2 and 9.6% in grade 3. The repetition rate, after grade 3 has decreased by slight less than 50% with repetition rate being 5.0 in grade 4, which clearly suggests that consolidated efforts need to be made in those early grades by all tiers of government. See Annex 6 for further information on promotion, repetition and dropout rates.

4.9 Gross and Net Enrollment Rate at basic level

The Gross Enrollment Rate (GER) is the total enrollment in a specific level of education, regardless of age, expressed as a percentage of the population in the official age group corresponding to this level of education. The GER can exceed 100% because of early or late entry and/or grade repetition. The Net Enrollment Rate (NER) is the total number of students of the official age group for a given level of education who are enrolled in any level of education, expressed as a percentage of the corresponding population. In the context of basic (1-5), the specific age group is 5 to 9 while in the context of basic (6-8), the specific age group is 10 to 12 years. It is to be noted that these rates are calculated on the basis of projected population age group and in the context of this report; these rates are calculated on the basis of projected population data that was collected in 2058 BS.

The ideal scenario for GER and NER is 100%, which means that each grade has age-specific

enrollments and none of the children of the particular age-group is out of school. Greater than 100% GER would mean that there are underage and overage students in the classrooms while lesser than 100% NER would mean that there are still out-of-school children of that particular age group. The GER at basic (1-5) is 121.92 which mean there are under-age and over-age students in the classrooms. The NER at basic (1-5) is 96.90 which mean 3.10% children of age 5-9 are still out of schools. The table 4.9 given above also shows the GER and NER for basic (6-8) level. See Annex 7 for disaggregated details on GER and NER at various levels.

Table 4.10: GER and NER details in basic level (1-8)

4.10 Gross and Net Intake Rate in Grade 1

Gross Intake Rate (GIR) is the total number of new entrants in grade 1, regardless of age, expressed as a percentage of the population at the official school entrance age for that grade. While GIR considers all the students regardless of the age, Net Intake Rate (NIR) only considers the specific age group during the calculation, and in the context of Grade 1 it is age 5.

Table 4.11: GIR and NIR in Grade 1

Province	Gross Intake Rate			Net Intake Rate		
	Girls	Boys	Total	Girls	Boys	Total
Province 1	122.8	127.9	125.3	98.90	98.93	98.92
Madhesh	119.7	123.1	121.4	95.69	95.07	95.38
Bagmati	122.1	122.8	122.5	94.32	96.44	95.38
Gandaki	124.9	130.2	127.6	92.60	96.98	94.79
Lumbini	133.6	137.7	135.6	98.34	97.68	98.01
Karnali	121.0	120.8	120.9	93.93	93.99	93.96

Nepal	124.9	129.1	127.0	95.89	96.72	96.30

Upon calculating the grade 1 new enrollment with the projected population of age 5 children, the GIR in grade 1 remains at 127.0% and the NIR in grade 1 remains at 96.30%, which means parents are still enrolling overage and underage children in grade 1 thus by reflecting lesser NIR in grade 1 with 95.89% for girls and 96.72% for boys. See Annex 7 for disaggregated details on GIR and NIR in grade 1.

4.11 Survival rate at basic level

UNESCO defines survival rate as the percentage of a cohort of students enrolled in the first grade of a given level or cycle of education in a given school year who are expected to reach in a given grade, regardless of repetition. Table 4.12 given below provides the percentage of students that reaches grade 5 (survival rate for grade 5) and percentage of students that reaches grade 8 (survival rate for grade 8) along with other details.

Table 4.12: Survival rates at different levels

Indicators	Girls	Boys	Total
Percentage that reaches Grade 5	89.1	88.7	88.9
Percentage that reaches Grade 8	83.8	83.2	83.5
Percentage that reaches Grade 5 without repetition	59.0	58.5	59.0
Percentage that reaches Grade 8 without repetition	50.1	48.0	49.0
Percentage that drops out	20.4	21.3	20.9

Table 4.12 given above uses the cohort reconstruction method to calculate the required survival rates for grade 5 and grade 8. During this whole process, the promotion, repetition and dropout rate has been plotted for each grade along with the number of students to calculate the required output.

4.12 Student School Ratio at Basic level

The Student School Ratio is calculated by dividing the total number of students by the total number of schools. While preparing this ratio, the number of students has been divided by the total number of schools that have basic level of 1-5 and basic level of 6-8 across the provinces.

Table 4.13: Student School Ratio at basic level

Province	Community		Institutional		Total	
	1-5	6-8	1-5	6-8	1-5	6-8
Province 1	70.6	131.1	134.6	76.8	84.7	85.9
Madhesh	228.2	263.1	159.3	90.5	212.5	176.0
Bagmati	69.9	157.2	150.6	91.2	92.7	88.9
Gandaki	48.8	101.2	154.1	87.4	63.5	76.5
Lumbini	120.3	171.4	157.3	89.2	128.6	116.8
Karnali	86.1	118.7	121.0	73.4	88.3	107.6
Sudurpaschim	89.5	133.6	135.0	75.0	96.6	102.4
Nepal	**97.3**	**152.5**	**147.4**	**85.6**	**107.5**	**104.3**

Table 4.13 given above shows the number of students per community school, per institutional school and at both types of schools. The community schools are less crowded in comparison to institutional schools, as there are 97 students in community schools whereas this number is 147 in institutional schools. This table also shows that community schools are more crowed at basic (6-8) in comparison to basic (1-5) while this tendency is completely reverse in case of institutional schools. This could indicate that there might be a tendency of enrolling students in institutional schools at early grades and enrolling those students in community schools at latter grades.

4.13 Infrastructure Details at Basic level

Buildings, classrooms, computer labs, science labs and equipment-education infrastructure are crucial elements of learning environments in schools. In fact, having quality infrastructure in schools facilitates better instruction, improves student outcomes, and reduces dropout rates. Table 4.14 given below provides the infrastructure details of basic (1-5) community schools at provincial and national level.

Table 4.14: Infrastructure details at basic (1-5) community schools

Out of 15686 basic (1-5) schools, 10881 (69.3%) of those schools have access to electricity. The average number of buildings is 2.4, however, the size and quality of those buildings cannot be answered through this data. A total of 3442 (21.9%) has access to computer with an average of 2.5 computers per school. The number of schools that has drinking water facility is 10712

which is 68.2%; the number of schools that has a library is 1084 which is 6.9%; the number of schools that has a child club is 70.1% and the number of schools that has a toilet is 12157 which is 77.5% of the total schools. Meanwhile, 1080 schools have Internet facility which is 6.8% of the total basic (1-5) community schools across the country. Table 4.15 given below provides the infrastructure details at basic (1-8) community schools. See Annex 8 for further details on all these infrastructures.

There is an average of 4.1 buildings in basic (1-8) community schools across the country. Similarly, out of 5026 basic (1-8) schools in the country, 3246 (64.5%) has electricity, 2875 has computers (57.2%), 3808 (75.7%) has drinking water, 1137 (22.6%) has library, 3401 (67.6%) has child club, 4087 (81.3%) has toilet and 1026 (20.4%) has Internet facility. Those 2875 schools that have computers, they have an average of 5.3 computers for teaching learning and administration purpose. See Annex 8 for further details on all these infrastructures.

4.14 Availability of curriculum and other materials

Like physical infrastructure, schools should also have adequate curriculums, teacher guides, child materials, book corners and reference materials so that these materials can be referred for quality teaching-learning purpose. Table 4.16 given below provides the number of basic (1-5) community schools with those learning materials. It is to be noted that there are 15686 basic (1-5) community schools across the country.

Table 4.16: Infrastructure details at basic (1-5) community schools

A total of 9128 schools (58.2%) have reported that they have teacher guides, 8153 schools (51.9%) have child materials, 4761 schools (30.3%) have book corner, 7026 schools (44.8%) have curriculum and 4543 schools (28.9%) have reference materials. This dataset however, is not a position to state whether those materials are adequate enough for schools. Meanwhile, table 4.17 given below provides the status of relevant materials at basic (1-8) community schools and while presenting the figures, the status for basic (1-5) and basic (6-8) has been provided separately.

Table 4.17: Infrastructure details at basic (1-8) community schools

Out of 5026 basic (1-8) community schools across the country, 2899 of those schools have teachers' guide for the basic (1-5) and 2214 of those schools have teachers' guide for basic (6-8), which implies that schools can have full set of teachers' guide for basic (1-5) and not have the same for basic (6-8) or vice versa. Table 4.17 given above shows the same kind of status for other relevant materials. Since book corners are envisioned for lower grades, the number of basic (1-8) schools that have such corners is only 878 which correspond to 17.4% of the total basic (1-8) schools. See Annex 9 for curriculum, textbook, book corner, reference materials and teachers' guide availability in grade 1-5 and grade 1-8 schools.

4.15 Mid-day Meal Management

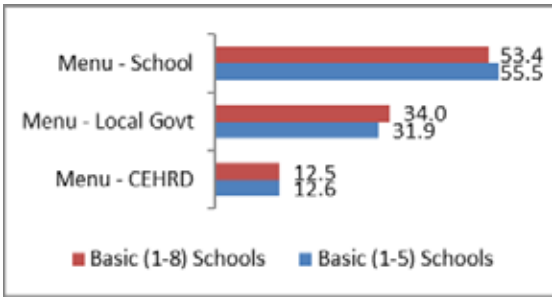

Figure 4-6: Use of mid-day meal menu

The government has provided mid-day meal to all students from early childhood education and development to grade 5 across the country. Relevant to community schools only, schools are being offered choices of menu to be used and that includes menu provided by CEHRD, menu provided by the local government or menu designed by schools itself. As given in Figure 4.6 53.4% of basic (1-8) schools used their own menu while 55.5% of basic (1-5) schools also did the same. Figure 4.6 also shows that schools are using their own locally prepared menu rather than using menus provided by local government and the federal government. Use of menu provided by CEHRD is the least used as only 12.5% basic (1-8) schools and 12.6% basic (1-5) schools have used this menu for mid-day meal purpose.

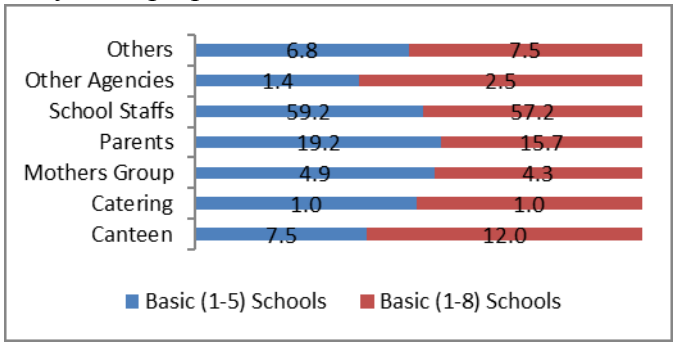

Figure 4-7: Mid-day Meal Management Technique

In another analysis, 59.2% of basic (1-5) schools have used their own resources to manage mid-day meal program while this percentage is 57.2 in case of basic (1-8) schools. Parents are also been used for mid-meal meal management as this percentage is 19.2 and 15.7 in case of basic (1-5) and basic (1-8) schools. Use of canteen is the third option for schools as 7.5% basic (1-5) and 12.0% basic (1-8) schools have used this approach for mid-meal management.

4.16 Governance in basic schools

Good governance is the foundation of all schools. In fact, collective participation, accountability, transparency and integrity are major spirits of good school based governance that eventually drives schools to create applicable processes, systems and controls. In the context of Nepal, preparation and update of school improvement plans,

conduction of SMC and PTA meetings, and management of social audit and financial audits are being considered as major elements of school based good governance. Table 4.18 given below provides the number of basic (1-5 and 1-8) schools with details on school based good governance practice. See Annex 9 for governance related details in grade 1-5 and grade 1-8 schools.

As given in table 4.18 above, out of 15686 basic (1-5) schools, 11045 (70.4%) of schools have an updated school improvement plan, 11115 (70.8%) have conducted social audit while 10555 (67.2%) have conducted financial audit. Similarly, out of 5026 basic (1-8) schools across the country, 3671 schools (73.0%) have school improvement plans, 3696 schools (73.5%) have social audit while 3533 schools (70.2%) have financial audits. See Annex 8 for further details on governance details in basic schools.

4.17 Use of local subjects in grade VIII examination

The EMIS has a built-in functionality that supports local government in conducting their annual grade 8 examination through the system. This approach of work has a) discouraged local government in using and storing the data in privately-managed software, b) enabled federal government to store grade 8 examinations in the national database or else this was stored in private computers and c) enabled all tiers of government to use and analyze the available grade 8 examinations data for information and planning. Table 4.19 given below provides the list of subjects that are being used in grade 8 as local subjects.

Table 4.19: Local subjects in grade VIII examination

There is a provision of using local curriculum at school level of education. Based on the existing data, the table given below provides the details of subjects that are being used in grade 8 examination. While preparing this list, the major subjects of grade 8 have not been mentioned and they are: Nepali, English, Mathematics, Science and Environment Education, Social Studies and Population Education, Moral Education, Health and Physical Education, Occupation, Business and Technical Education.

Chapter 5 : Secondary Education

5.1 Introduction

This section of the report presents the number of students that are enrolled in secondary level across the country. Similarly, this section also provides information on student teacher ratio and the number and share of students from Dalit, Janajati, Madhesi and other communities that are in schools. The major indicators of education sector and that includes the gross enrollment rate, net enrollment rate, net intake rate, gross intake rate for basic level has also been provided in this section. All the provided information has been disaggregated by types of schools and provinces wherever required.

5.2 No. of students in secondary level

There are 1769455 students in secondary level of grade 9-12 out of which 1079352 (61.0%) are in secondary level (9-10) and the remaining 690103 (39.0%) are in secondary level (11-12). Upon comparing the data from last year, this is an increase of 24,419 students at secondary level of grade 9-12. Last year, the number of students was 1064815 and 680221 in secondary level (9-10) and secondary level (11-12) respectively.

In terms of community schools, the number of students in secondary level (9-10) is 833472 which correspond to 77.3% of the total enrollment. In institutional schools, this number is 245880 which correspond to 22.7% of the total enrollment. Last year, this number and percentage was 839208 (78.8%) for community schools and 225607 (21.2%) for institutional schools.

Table 5.1 given above shows that the enrollment of girls is high in community schools with 52.5% of girls being enrolled in community schools while this figure is 43.7% in terms of institutional schools. This data clearly shows that parents are favoring girls in community schools and are favoring boys in institutional schools. Figure 5.1 and 5.2 given below show the number of students enrolled in mainstreamed religious schools and that includes Madrassas, Gumbas and Ashrams at secondary (9-10) and secondary (11-12). See Annex 4 for grade distribution of students at secondary level.

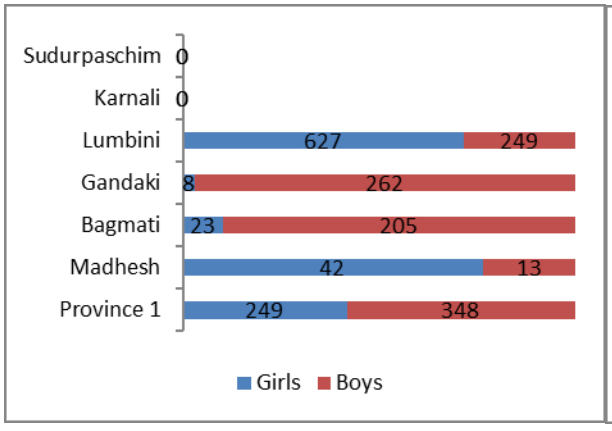

Figure 5-1: Number of students in religious schools (9-10)

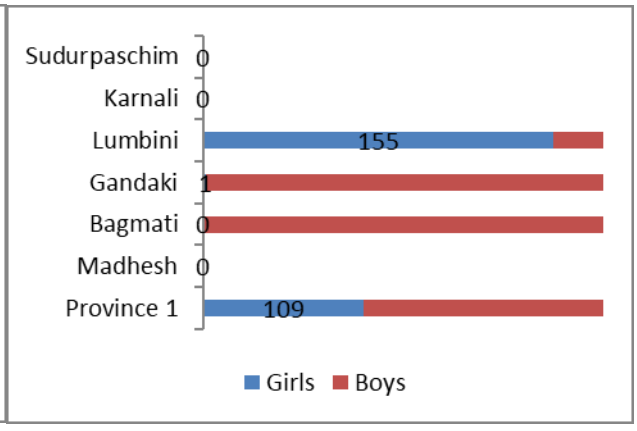

Figure 5-2: Number of students in religious schools (11-12)

Unlike in early grades, the number of students in religious schools is very low at the secondary level. The figures show that a total of 2026 students are at secondary level (9-10) and a total of 699 students are at secondary level of grade 11 and 12. The drop-off of students from early grades of basic level to secondary level clearly shows that once students complete basic level, they enroll in non-religious schools. Such transition from religious to non-religious schools should be noted carefully and the local governments should make enough provisions to ensure that such students do not drop out of schools because of language, culture and teaching-learning barriers. Table 5.2 given below shows the number of students by grades at the national level followed by the share of students in each grade for both community and institutional schools.

As shown in table 5.2 given above, out of 1770154 students in secondary level (9-12), 565058 students are in grade 9, 514294 students are in grade 10, 360521 students are in grade 11 and 330281 students are in grade 12 and these data show that there is a drop off in students between grade 10 and 11. Table 5.2 also shows that certain number of students from grade 10 drop out of schools for various reasons and therefore all tiers of government needs to make special focus on reducing such dropouts.

In other analysis, Table 5.2 also shows that there are more girls in community schools at all grades of secondary level while this tendency is completely opposite in case of institutional schools where the share of boys is greater than the share of girls.

5.3 No. of students from Dalit, Janajati and Madhesi communities in secondary level

As shown in table 5.3, the number of students from Dalit and Janajati communities is 217236 and 630205 respectively. In terms of total students at secondary level (G9-12), the share of Dalit students remain at 12.3% and the share of Janajati students remain at 35.6%. As shown in Table 5.3, the number of students from Dalit communities has decreased to 78899 in grade 9 while there are 93107 students in grade 8, which states that students from these communities drop out of schools after they complete grade 5. This scenario is also seen in case of Janajati students but not in the same trend as in the case of Dalit students. See Annex 4 for caste/ethnic and distribution of students at secondary level.

Table 5.3: No of students by caste/ethnicity in secondary (9-12) level

In all the categories as given in table 5.3, the number of girls is higher than boys, with GPI being 1.01 for total students, 1.06 for Dalit students and 1.09 for Janajati students, which clearly shows that boys, after completing grade 8 either dropout or migrate outside Nepal in search of

jobs. Since GPI is in favour of boys at the basic level, this trend needs to be carried over in the secondary level, however, such is not the case and therefore, the decrease of boys in secondary level needs to be further studied and examined.

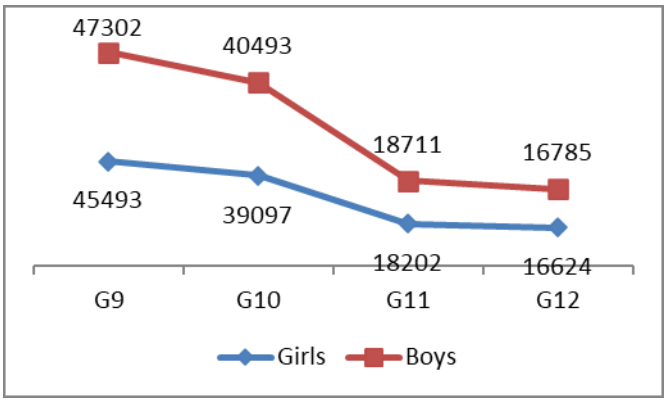

Figure 5-3: Number of students from Madheshi community

Figure 5.3 given in the right shows the number of students from Madheshi community disaggregated by grade and gender. The early grades of basic level had high number of girls from this community, probably because of "*Beti Padhao, Beti Bachao*" program, however, the number of girls is lower than that of boys at the secondary level of all grades. In all other caste/ ethnic groups, the number of girls is higher than the number of boys, and therefore, it is very likely that girls from this community are being discriminated in terms of access to the schools or the population dynamics is highly skewed in favor of boys.

5.4 No. of students from disadvantaged communities in secondary level

At the basic level (1-5), there are 55015 students and at the basic level (6-8) there are 21189 students giving an altogether of 76204 students from these communities. In the secondary level of grade 9-10, the number of students from this community remains at 10593 and in the secondary level of grade 11-12, this number is 5430 with a total of 16023 students from this community. In terms of gender, out of 16023 students, 8751 are girls and 7272 are boys with the percentage of girls being 54.6 and the remaining 45.3 in case of boys. It is to be noted that students from 22 disadvantaged Janajatis like Bankaria, Baramu, Bote, Chepang, Danuwar, Dhanuk, Hayu, Jhangad, Kisan, Kusunda, Lopcha, Majhi, Meche, Musbadiya, Raji, Raute, Satar, Singhsa, Siyar, Surel, Thami and Thunam belong to this category.

Out of 16023 disadvantaged Janajatis enrolled in secondary level, 7893 are in Bagmati province with the highest share of 49.3% followed by 23.8% in Province 1. Lumbini province has the least percentage of these students with 2.98 followed by Karnali province with 3.13.

5.5 No. of grade 9-12 students in TVET streams

The government has provided regular financial and technical support to 485 schools across the country to conduct TVET streams in the schools starting from grade 9 to grade 12. These are 4 year courses offered in animal science, plant science, computer engineering, electrical engineering, civil engineering and music. These schools have an enrollment quota of 48 students per academic session and receive on-the-job training support to the students. In addition to CEHRD, the CTEVT has provisions for 4 year Diploma Courses and 1.8 month Pre-Diploma courses that have total students of 113428 and 20732 in diploma and pre-diploma courses respectively. Table 5.5 given below provides the number of students of TVET streams.

As Table 5.5 shows, the share of students is 33.7% in favor of plant science followed by 30.9% in civil engineering. The electrical engineering has the fewest percentage of students (6.4%) followed by animal science with 7.7% share of students amongst the five major streams. Only one school has implemented music as TVET stream. See Annex 10 for TVET details.

5.6 No. of grade 9-12 students by major subjects

After the completion of grade 10, students are given choices to enroll in different subjects. Unlike in the past, where schools had different faculties in terms of science, humanities, management and education, this is not the case as students now select major subject during the time of enrollment in secondary level of grade 11. At present, there are more than 12 subjects that students can choose upon and table 5.6 given below provides the number of students enrolled in those subjects.

Table 5.6: No of students in Grade 11-12 by major subjects

Out of 360091 students in grade 11, 155157 (43%) are studying management while 129997 (36%) students have education as their major subject of study. The number of students with pure science as the major subject is 41410 which is third amongst the 12 major subjects and represent 11.5% of

the total students in grade 11. Meanwhile, home science and forestry remain the least prioritized subjects. Such detail for grade 12 and the secondary level (11-12) is given in table 5.6 above.

5.7 No. of students with disabilities in secondary level

Like in the case of basic (1-5) and basic (6-8), the number of students with disabilities at secondary (9-10) and secondary (11-12) is below 1% as there are 4385 such students (0.49%) in secondary (9-10) and 1856 such students (0.26%) in secondary (11-12). Amongst the eight types of disabilities, physical disability which is easily identifiable comprise 3239 students (60.1%) while, deaf and blind remain the least category with 13 such students (0.24%) in secondary (9-10) level of education.

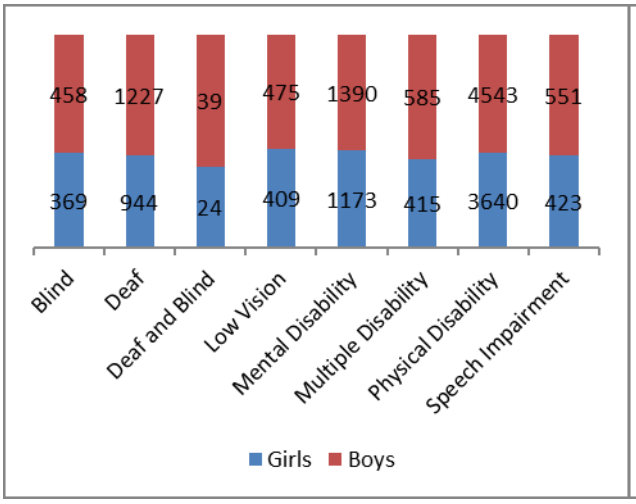

Figure 5-4: Number of students with disabilities (9-10)

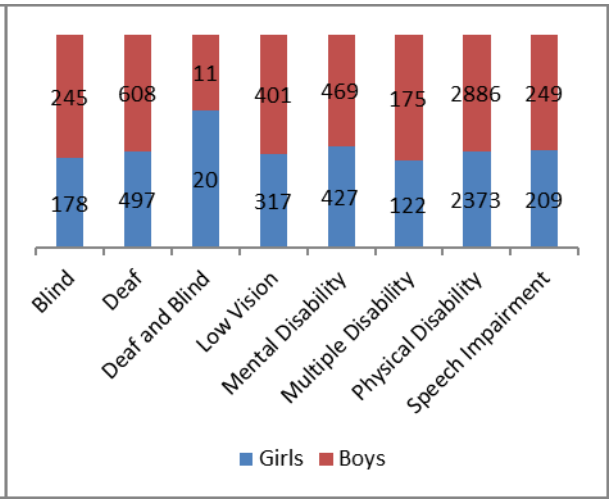

Figure 5-5: Number of students with disabilities (11-12)

The same trend is also seen in the context of students from secondary (11-12) as physical disability tops the list with 872 students (47%) and deaf and blind remaining at the bottom with 9 students (0.48%). In terms of gender, the number of boys with disabilities is 2980 (55% of total) in secondary (9-10) while this number and percentage is 940 and 50.6 in case of boys at secondary (11-12). See Annex 5 for disability related details on secondary level of education.

5.8 Internal efficiency at secondary level

Internal efficiency is often related to promotion, repetition and dropout rates at various levels of education. The promotion rate is the percentage of students that were able to promote the upper grade. The repetition rate is the percentage of students that repeated the same grade while the dropout rate is the percentage of students that dropped out of schools for various reasons. In an ideal scenario, the promotion rate is always 100% and the remaining two rates are zero or close to zero.

Unlike early grades, students from grade 11 and 12 are eligible to promote to the upper grade even if students fail the final examination and therefore, the promotion, repetition and dropout rate for grade 11 and 12 has not been calculated. Table 5.7 given below provides these rates for grade 9 and 10 disaggregated by gender.

Table 5.7: Promotion, repetition and dropout rate at secondary (9-10) level

Grade	Promotion Rate			Repetition Rate			Dropout Rate		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Grade 9	95.2	94.8	95.0	3.7	3.9	3.8	1.1	1.3	1.2
Grade 10	98.3	98.5	98.4	1.4	1.2	1.3	0.3	0.3	0.3
Grade 9-10	96.7	96.5	96.6	2.6	2.7	2.7	0.7	0.8	0.8

As Table 5.7 suggests, the promotion rate for grade 9 is 95% while the repetition rate remains at 3.8% and dropout rate at 1.2%. The promotion rate for grade 10 is slightly higher than grade 9 with 98.4% and 1.3% repetition rate and 0.3% dropout rate. Table 5.7 also shows that once students reach secondary level, the likelihood of them promoting the upper grade is significantly higher. See Annex 6 for PRD details at secondary level.

5.9 Gross and Net Enrollment Rate at secondary level

The Gross Enrollment Rate (GER) is the total enrollment in a specific level of education, regardless of age, expressed as a percentage of the population in the official age group corresponding to this level of education. The GER can exceed 100% because of early or late entry and/or grade repetition. The Net Enrollment Rate (NER) is the total number of students of the official age group for a given level of education who are enrolled in any level of education, expressed as a percentage of the corresponding population. In the context of secondary (9-10), the specific age group is 13 to 14 while in the context of secondary (11-12), the specific age group is 15 to 16 years. It is to be noted that these rates are calculated on the basis of projected population age group and in the context of this report; these rates are calculated on the basis of projected population data that was collected in 2058 BS.

Table 5.8: GER and NER details at secondary (9-10 and 11-12) level

The ideal scenario for GER and NER is 100%, which means that each grade has age-specific enrollments and none of the children of the particular age-group is out of school. Greater than 100% GER would mean that there are underage and overage students in the classrooms while lesser than 100% NER would mean that there are still out-of-school children of that particular age group. The GER at secondary level is below 100% which states that out-of-school is a major concern for these particular groups of students. The NER is also below 100% which means that overage and underage students are an issue in secondary level.

Table 5.9: GER and NER details at secondary (9-12) level

Table 5.9 shows the GER and NER for secondary (9-12) level and as shown table 5.9, both NER and GER is distance away from 100% which suggests that students drop out of early grades and never reach secondary level (9-12). The difference between GER and NER suggests that underage and overage is an issue in secondary level. See Annex 7 for NER and GER details.

5.10 Student School Ratio at Secondary level

The Student School Ratio is calculated by dividing the total number of students by the total number of schools. While preparing this ratio, the number of students has been divided by the total number of schools that have secondary level of 9-10 and secondary level of 11-12 across the provinces.

Table 5.10: Student School Ratio

Province	Community		Institutional		Total	
	9-10	11-12	9-10	11-12	9-10	11-12

Nepal	120.6	159.3	61.7	165.8	99.0	160.7

The secondary level of grade 9 and 10 has two grades and as table 5.10 given above shows, the STR in this level for community school is 120.6 which means there are an average of 60 students per classroom. Similarly, the STR of community schools in secondary (11-12) is 159.3 which mean there is an average of 80 students per classroom.

In comparison to community schools, the STR in institutional schools at secondary level (9-10) is only 61.7 while the STR in institutional school is 165.8 for secondary level (11-12). The national level STR for secondary level (9-10) is 99.0 and the national level STR for secondary level (11-12) is 160.7.

5.11 Infrastructure Details at Secondary level

Buildings, classrooms, computer labs, science labs and equipment-education infrastructure are crucial elements of learning environments in schools. In fact, having quality infrastructure in schools facilitates better instruction, improves student outcomes, and reduces dropout rates. Table 5.12 given below provides the infrastructure details of secondary (9-10) schools but only limiting the presentation for community schools.

Out of 3675 secondary (1-10) schools, 2562 (69.7%) of those schools reported that they have access to electricity. The average number of buildings is 5.6 more than double than the basic (1-5) schools, however, the size and quality of those buildings cannot be answered through this data. A total of 2749 (74.8%) has access to computer with an average of 12.3 computers per school. The number of schools that has drinking water facility is 2855 which is 77.6%; the number of schools that has a library is 2010 which is 54.6%%; the number of schools that has a child club is 70.8% and the number of schools that has a toilet is 3015 which is 82.0% of the total

schools. Meanwhile, 1673 schools have internet facility which is 45.5%% of the total secondary (9-10) community schools across the country. Meanwhile, table 5.13 given below provides the infrastructure details at secondary (1-12) community schools.

There is an average of 7.1 buildings in secondary (1-12) community schools across the country which is 1.5 buildings more than of secondary (1-10) schools. Similarly, out of 3503 secondary (1-12) schools in the country, 2591 (73.9%) has electricity, 2910 has computers (83.0%), 2871 (81.9%) has drinking water, 2638 (75.3%) has library, 2554 (72.9%) has child club, 2953 (84.3%) has toilet and 2239 (63.9%) has Internet facility. Those 2910 schools that have computers, they have an average of 20.7 computers for teaching learning and administration purpose. See Annex 8 for physical infrastructure details.

5.12 Availability of curriculum and other materials

Curriculum is an important and integral part of education. It helps to plan, organize, execute and attain results in a systematic way. In addition to curriculum, adequate child materials, reference materials and teachers' guide are also equally essential in schools to support teachers in delivering the quality teaching learning process. Table 5.14 given below provides the number of secondary (1-10) community schools with those learning materials. It is to be noted that there are 3675 secondary (1-10) community schools across the country.

This clearly suggests that these materials vary across different levels of schools as it is likely that teachers' guide for basic (1-5) level might be sufficiently available in schools, while those materials for basic (6-8) and secondary (9-10) might not be available in a sufficient way or vice versa. Table 5.13 given above provides the same kind of response for child material and book corner.

Tables on availability of relevant materials in schools show a major trend. The likelihood of schools having these materials at basic (1-5) is higher in comparison to other levels except to curriculum where this number is higher at basic (6-8) and lower at basic (1-5). In all other cases, these materials are much more available at basic (1-5), however, there are still many schools, as per this reported data, that do not have the required materials in schools. Meanwhile, table 5.16 given below provides the status of relevant materials at secondary (1-12) community schools and while presenting the figures, the status for basic (1-5), basic (6-8), secondary (9-10) and secondary (11-12) has been provided separately.

There are 3503 secondary (1-12) community schools across the country, and out of which 2026 schools reported that they have teachers' guide available for basic (1-5) and basic (6-8); a total of 1986 schools reported that they have teachers' guide available for secondary (9-10) and a total of 185 schools reported that they have such materials for secondary (11-12). Like in the case of secondary (1-10) schools, the tendency of having these materials at basic (1-5) is higher than basic (6-8), secondary (9-10) and secondary (11-12). In fact out of 3503 secondary (1-12) schools, only 185 of those schools (5.2%) reported that they have teachers' guide available for teachers to support them during their class. Table 5.15 given above also shows the status of child material and book corner in secondary (1-12) schools. Meanwhile, table 5.17 given below provides the status of curriculum and relevant materials for secondary (1-12) schools. See Annex 9 for further details on these materials.

Unlike teachers' guide and child materials, the curriculum and reference materials seem to be equally available up to secondary (1-10) level. Out of 3503 secondary (1-12), 2131 schools (60.8%) reported that they have curriculum available for basic (1-5), 2101 schools (59.9%) reported that they have curriculum available for basic (6-8), 2108 schools (60.1%) said that they have curriculum available for secondary (9-10) while only 1416 (40.4%) said that they have curriculum available for secondary (11-12) level.

5.13 Governance in secondary schools

All schools across the country need to create school improvement plans, form school management committee and parent teacher association, conduct regular meetings with SMC/PTA members and prepare social audit and financial audit in an annual basis. All these are the criteria of good governance, which then drives schools to create applicable processes, systems and controls. Table 5.18 given below provides the number of secondary (1-10 and 1-12) schools with details on school based good governance practice.

Table 5.17: Status of SIP, social and financial audit in secondary (1-10 and 1-12) community schools

Similarly, out of 3503 secondary (1-12) schools across the country, 2575 schools (73.5%) have school improvement plans, 2615 schools (74.6%) have social audit while 2519 schools (71.9%) have financial audits. See Annex 9 for further details on governance related activities in secondary level schools.

Chapter 6 : Teacher Management

6.1 Introduction

Teachers are the core of education system. Having skillful teachers in schools help create skillful students and it has been seen that an inspiring, informed, qualified and trained teacher is the most important school-related factor influencing student achievement. This section therefore deals with teacher related information at province and national level disaggregated by gender and types of schools.

6.2 Number of teachers in community schools at basic level

Teachers in community schools are of three major types. The first is the federal government appointed teachers categorized as permanent, temporary and rahat teachers. The second is the locally hired teachers based on the grants provided by the federal, provincial or local level government. The third is the privately funded teachers that are paid by schools. In the context of institutional schools, all teachers are privately hired. Table 6.1 given below provides the number of government approved teachers in community schools at basic (1-5) and basic (6-8).

Table 6.1 given above shows that there are 102035 government approved teachers in basic (1-5) while this number is 25861 for basic (6-8) and a total of 127896 for basic (1-8). Upon comparing these numbers with the number of students in community schools, the data shows the student teacher ratio of 25:1 at basic (1-5), 51:1 at basic (6-8) and 30:1 at basic (1-8). Meanwhile, table 6.2 given below provides the disaggregation of government approved teachers by gender. See Annex 11 for further disaggregation on this information.

As given in the table, the share of female teachers in basic (1-5) is 38.3% while this share is down to 25.3% in basic (6-8) and is 35.7% in case of basic (1-8). In comparison to the basic (6-8), the number of female teachers in basic (1-5) is comparatively better. Table 6.3 given below provides the number of privately hired teachers in community schools.

In other words, in addition to 102035 government appointed teachers in basic (1-5) level, these schools have additional 16528 teachers giving an altogether of 118563 teachers and a STR of 22:1 in basic (1-5) level. In basic (6-8) level, the community schools have 32893 teachers with a STR of 40:1. In overall basic (1-8) the total number of teachers is 151456 with STR being 26:1.

6.3 Number of teachers in institutional schools at basic level

In institutional schools, there are 34889 teachers at basic (1-5) out of which 25684 (73.6%) are females while the remaining 9205 (26.4%) are men. In basic (6-8), there are 20492 teachers in institutional schools, out of which 11160 (54.4%) are females and the remaining 11160 (54.4%) are males.

In total, the number of teachers in institutional schools at basic (1-8) is 55381, out of which 35009 (63.2%) are females and the rest 20365 (36.8%) are males. In another analysis, the STR of institutional schools at basic (1-5) is 59:1; the STR at basic (6-8) is 28:1 and the STR at basic (1-8) is 23:1 at the national level.

6.4 Number of teachers in community schools at secondary level

Like in the context of basic level, teachers in community schools at secondary level (9-12) are of three major types that includes the federal government appointed teachers categorized as permanent, temporary and rahat teachers; locally hired teachers based on the grants provided by the federal, provincial or local level government and the privately funded teachers that are paid by schools. In the context of institutional schools, all teachers are privately hired. Table 6.5 given below provides the number of government approved teachers in community schools at secondary (9-10) and secondary (11-12), excluding TVET instructors that are available in 485 9-12 TVET schools across the country. See Annex 11 for further details.

Table 6.5 given above shows that there are 19520 government approved teachers in secondary (9-10) while this number is 5859 for secondary (11-12) and a total of 25379 for secondary (9-12). Upon comparing these numbers with the number of students in community schools, the data shows the student teacher ratio of 39:1 at secondary (9-10), 80:1 at secondary (11-12) and 49:1 at secondary (9-12). Meanwhile, table 6.6 given below provides the disaggregation of government approved teachers by gender.

As given in table 6.6, the share of female teachers in secondary (9-10) is 19.4% while this share is down to 11.0% in secondary (11-12) and is 17.5% in case of secondary (9-12). Table 6.6 further show that the percentage of female teachers has gone done as the level of the school progresses and therefore, all tiers of government needs to take this into account while devising plans and programs.

In addition to 21492 teachers in secondary (9-10) and 6804 teachers in secondary (11-12), community schools have also privately hired 3300 teachers in secondary (9-10) and 1057 teachers in secondary (11-12) with an altogether of 4357 such teachers in community schools. In other words, in addition to 21492 government appointed teachers in secondary (9-10) level, these schools have additional 3300 teachers giving an altogether of 24792 teachers and a STR of 33.6 in secondary (9-10) level. In secondary (11-12) level, the community schools have 7861 teachers

with a STR of 69:1. In overall secondary (1-8) the total number of teachers is 32356 with STR being 42:1.

6.5 Number of teachers in institutional schools at secondary level

In institutional schools, there are 22079 teachers at secondary (9-10) out of which 4375 (19.8%) are females while the remaining 17704 (80.2%) are men. In basic (11-12), there are 3437 teachers in institutional schools, out of which 526 (15.3%) are females and the remaining 2911 (84.7%) are males.

Chapter 7 : Alternative Learning Modality

7.1 Introduction

The Covid-19 pandemic disrupted the education of more than 1.5 billion students across the world including 8 million students of Nepal. This disruption prompted all nations to look at all modalities of alternative learning approaches, including online, offline and remote and informal learning outside of the classroom. The Nepal Government, with support of the Nepal Education Cluster and the education sector development partners developed a) covid-19 contingency plan, b) guidelines on facilitating students' learning through alternative education, c) the school reopening procedure, d) the teachers' professional development training, e) the school disinfection guidelines, and f) the Covid-19 emergency action plan to support schools in minimizing the educational loss that was created as a result of the global pandemic.

The need to capture the response on alternative learning modality was immediately felt and EMIS was modified accordingly to ensure that all relevant information is collected from schools. The questionnaire was shared with relevant departments and stakeholders to ensure that the collected information provided required output. Once the questionnaire was finalized, it was addressed in EMIS and local levels were informed accordingly. The major part of the questionnaire was to identify the number of students that were reached through different alternative learning modalities which has been discussed below.

7.2 Use of self-learning materials

Use of self-learning materials was one of the ways that was identified in order to engage schools and students during the time of Covid-19. The schools were encouraged to develop self-learning materials on their own. Similarly, the students were also encouraged to study their textbooks and were also encouraged to use self-learning materials during the time of pandemic. Teachers were asked to follow-up with students regarding their issues and progresses.

Table 7.1: Percentage of students that were supported through self-learning materials

Nepal	23.8	30.4	31.5	31.6	28.5	24.9	24.4	22.0	18.7	17.7	16.3	16.7

The percentage of students that used self-learning materials were found to be 23.8% in grade 1, 30.4% in grade 2, 31.5% in grade 3, 31.6% in grade 4 while this number has gone down to 28.5% in grade 5. Table 7.1 provides such information across different grades and provinces.

7.3 Tole Sikai

Tole Sikai approach uses teachers to help, support and facilitate students by gathering them in a Tole (a meeting place). This approach of work has been used mostly in non-formal education sector but has been used during the time of Covid-19.

Table 7.2: Percentage of students that were supported through Tole-Sikai

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	18.4	23.2	24.1	23.4	21.0	18.1	17.3	15.5	13.2	12.0	8.9	8.0

Unlike self-learning materials where the percentage of grade 1 student was 23.8, this is not the case in case of Tole Sikai as only 18.4% of grade 1 students were supported through Tole Sikai modality. Table 7.3 provides such information across different grades and provinces.

7.4 Mobilization of Volunteers

Retired and non-retired teachers, community volunteers and other concerned authorities were voluntarily mobilized to help support students during the time of Covid 19. Many organizations were also requested for such kind of volunteer support.

Table 7.3: Percentage of students that were supported through volunteers

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	4.3	2.9	2.6	1.4	1.9	1.3	1.3	1.4	1.7	1.8	1.1	0.7

The use of this approach to support students has not been seen as only 4.3% grade 1 students have received such support. Table 7.3 provides this detail for all grades and all provinces.

7.5 Use of Offline Materials

One of the alternative modalities that were used during the Covid-19 was to provide offline materials to students. Students were requested to visit school in selected day and time and during that time period, they were provided with offline materials. These materials were paper-printed in case of lower grades but were provided in electronic basis (through pen-drives) in case of upper grades and in case where schools and students had the required facility.

Table 7.4: Percentage of students that were supported through offline materials

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	6.6	6.3	6.1	5.9	6.2	6.8	6.9	7.5	7.8	7.7	12.8	12.0

The use of offline materials is comparatively better than the use of volunteers but not like use of

self-learning materials as 6.6% students at the early grade received such support. In the case of grade 11 and 12, this has been effective in comparison to early grades. Table 7.4 provides such details for all grades and provinces.

7.6 Use of Televisions

All three tiers of government made contract with television companies to telecast grade-specific lectures in the televisions. The CEHRD published a notice regarding such broadcast in its official web-site. While this was a limitation for poor households that do not have televisions, it was certainly an effort to engage students in learning process, particularly for secondary level students.

Table 7.5: Percentage of students that were supported through television

Nepal	4.9	4.0	3.9	3.4	4.1	4.6	4.7	5.1	5.2	5.5	3.9	3.6

While use of offline materials has been effective in higher grades, the use of televisions has not been the case in grade 11 and 12 as only 3.9% and 3.6% students from grade 11 and 12 used this facility. Table 7.5 has details on all such information by grades and by provinces.

7.7 Use of Radios

Like in the context of television, all three tiers of government made contract with radio stations and companies to telecast grade-specific lectures in the radios. The CEHRD published a notice regarding such broadcast in its official web-site. Since radio is more accessible than television, it was expected that this modality would support many students, including students from poor households.

Table 7.6: Percentage of students that were supported through radios

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	5.9	5.1	5.0	5.0	5.3	6.0	6.2	6.3	6.6	7.0	4.3	3.5

The use of radios has been more effective in comparison to the use of televisions. Since there is likelihood that all households have radios, this could have been reflected in Table 7.6 given above. There is likelihood that parents might not have televisions, and therefore use of radios is more effective than use of televisions. All such details are provided in Table 7.6

7.8 Use of Cluster User Group (CUGs)

The use of mobile and telephone was one of many ways through which schools were requested to support students. The CUG Sim-cards were provided to students so that teachers can support them as required.

Table 7.7: Percentage of students that were supported through CUGs

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

The use of CUGs has been less effective in early grades but has been effective from grade 6 onward as 11.2% of grade 6 used this service, 11.5% of grade 7 did the same and 11.0% of grade 8 students also used CUG for this purpose. Table 7.7 provides such information by grade and by province.

7.9 Use of Online Classes

Use of Zoom, Microsoft Teams and Google Meet was also proposed during the time of Covid-19. Such online classes however, required computer and internet facility in case of teachers and the students.

Online classes are always challenging as everyone needs to have electronic devices. However, the percentage of students that used online classes in grade 11 and 12 remained at 44.5% and 49.1% respectively. Such detail is given in Table 7.8 by provinces and by grade.

7.10 Use of Learning Portal

The CEHRD has created a learning portal https://learning.cehrd.edu.np/home to help schools and students learn different contents. This learning portal has grade-specific contents and is available to everyone. Orientations on the use of such learning portal were also conducted during the pandemic.

Table 7.9: Percentage of students that were supported through learning portal

While online classes also demand electronic devices much like learning portal, the percentage of students using learning portal has remained low in comparison to the online classes. It could be perhaps, schools and students are less aware of this learning portal, and therefore, information about this learning portal needs to be shared amongst wider forum so that high percentage of students access this learning portal (the way students used online classes). Table 7.9 has further details by grade and province.

7.11 Use of Youtube Channel

The CEHRD has also created a Youtube Channel that was also used during this Covid-19 pandemic. Schools and students were encouraged to listen and view Youtube channels that were prepared using the grade specific contents.

Table 7.10: Percentage of students that were supported through Youtube Channel

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

The percentage of students that benefitted from Youtube channels remained at 3.8% for grade 1, 2.3% for grade 2, 1.9% for grade 3, 0.9% for grade 4 and 1.6% for grade 5. This detail along with details for other grades and province is given in Table 7.10.

7.12 Use of eClass Nepal

The use of eClass Nepal was also encouraged during this pandemic. Schools and students were encouraged to use eClass lessons to ensure that they get the grade specific contents.

Table 7.11: Percentage of students that were supported through eClass Nepal

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	4.0	2.5	2.1	1.2	1.7	1.6	1.5	1.8	2.2	2.5	1.7	1.9

Like in the case of Youtube Channel, the percentage of students using this modality has remained below 5% in all grades with as high as 4.0% in grade 1 and as low as 1.2% in grade 3. Table 7.11 further details this information.

7.13 Remedial Instructions

Remedial instruction to the students was part of the alternative learning modality to ensure that students do not lose the required learning during the period of Covid-19.

Table 7.12: Number of students that were supported through remedial instructions

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	4.9	3.8	3.5	2.4	2.8	2.5	2.5	2.5	2.6	2.8	1.4	1.5

This modality of support is seen effective in grade 1 to 3 but is less effective in the case of grade 11 and 12 as only 1.4% students from grade 11 and 1.5% students from grade 12 received this service during the Covid-19 pandemic. Table 7.12 provides such details.

7.14 Tutorial Class

Like remedial instruction, tutorial class to the students was part of the alternative learning modality to ensure that students do not lose the required learning during the period of Covid-19.

Table 7.13: Percentage of students that were supported through tutorial class

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	6.3	5.8	5.6	4.8	4.8	4.5	4.3	4.3	4.1	4.3	3.4	3.1

This modality of support is seen effective than the remedial instruction as 6.3% students from grade 1 received such support while the percentage of grade 1 students that received remedial instruction was only 4.9%. Table 7.13 provides such details.

7.15 Additional Class

Like remedial instruction and tutorial class, additional classes were also taken to ensure that students get the required knowledge that was lost as a result of the pandemic.

Table 7.14: Number of students that were supported through Tutorial Class

Province	G1	G2	G3	G4	G5	G6	G7	G8	G9	G10	G11	G12

Nepal	6.2	5.5	5.4	4.5	4.8	4.4	4.5	4.8	4.7	5.0	4.1	4.3

The percentage of students in additional class and tutorial class is higher in comparison to remedial instruction and therefore, it can be said that remedial instruction was less effective. The percentage of students that joined tutorial class falls between 6.2 to 4.1 with 6.2% for grade 1 and 4.1% for grade 11.
