TRAFFIC SIGN MANUAL

TITLE		COLOURS		REGULATORY SIGN NO.
STOP AND GIVE WAY		Background	Red	A1
		Border	White	
<div></div> <p>(All dimensions is in mm)</p>				
Description	Octagonal Sign with red background including stop and give way.			
Application	This sign used at the junction with major roads where visibility is poor or it is unsafe for vehtoo enter the junction without stopping. It instructs drivers to bring their vehicles to a complete stop nad not proceed until is safe to do so. It is recommended that supplementary palte D7 is attached to the post below the sign to add emphasis to the stop sign.			
Location	The sign should be sited on the left hand side 1.5 meters in advance of the stop line. For additional impact an additional sign could be put on the right hand side. The sign must only be used when it is unsafe for vehicle to enter the through road without stopping. The main factor which determine this is how far the driver can see along the road in each direction as they approach the junction. This is called the visibility distance. If the visibility distance is less than that indicated below then there is a case for as stop sign.			
Variation	None

TRAFFIC SIGN MANUAL

TITLE		COLOURS		REGULATORY SIGN NO.
GIVE WAY	Background	White		A2
	Border	Red		
<div><p>(All dimensions is in mm)</p></div>				
Description	Triangular sign with point downwards having a red broder and white background indicating that traffic should give way.			
Application	This sign is used roundabouts and at junctions with major roads or roundabouts where visibility is good. I.e. greater than indicated on the table on page. A1. The sign is used where there is no need for a stop sign. It instructs other drivers not to proceed unless the way is clear. The sign can also be used where the road is too narrow for two way traffic such as narrow bridges in which case the give way sign is only displayed on one approach. It is recommended that supplementary plate D8 is attached to the post below the sign to add emphasis to the Give way			
Location	Sign to be sued in conjunction with a give way line F2 which us two transverse broken white line road marking at a junction. The Sign Should be sited on the left hand side of the road about 1.5 meters in advance of the Give Way Line. For Greater Emphasis an additional sign can be put on the right hand side

NO PARKING	Background	White		A14
	Border, diagonal	Red		
	Letter	Black		
<div><div><div></div><div>(450) 600</div></div><div>(All dimensions is in mm)</div></div>				
Description	Circular sign with the letter P overlaid by a red diagonal line from top left to bottom right indicates no parking of any vehicle is allowed.			
Application	This sign demarcates areas where parking is prohibited at all times. The restriction only applies to the side of the road on which the sign is placed. It should only be used where there would be a serious parking problem such as a narrow,, busy street or too close to a major junction. No Parking road markings (F11) should be used, wherever restrictions apply. Where there are many parking restrictions in a small area it may be sufficient to use no parking road marking (F11) and no signs. Supplementary sign D2 May be used to indicate over what length the restriction is applicable.			
Location	The sign is displayed on the side of the road to which it is applicable. The sign should be repeated each major junction and at 200 meter intervals between junctions.

NO OVERTAKING	Background	White		A16
	Border, diagonals	Red		
	Arrows	Black		
<div><div><div>(450) 600 (750)</div></div><div>(All dimensions is in mm)</div></div>				
Description	Circular sing with two arrows of different sixes overlaid by a red diagonal line from top right to bottom left indicating that no overtaking is allowed.			
Application	This sign indicates to drivers that they are not allowed to overtake motor vehicles travelling in the same direction. The sign is used where visibility for overtaking is less than desirable, where there are side roads within the overtaking zone or it is unsafe to overtake. The No Overtaking sign should not be used unless overtaking is dangerous. In general F6 No overtaking road marking will be sufficient to discourage overtaking.			
Location	The sign should be displayed that the beginning of the no overtaking restriction. The sign should be repeated after every junction and every 400 meter between junctions. The end of the overtaking restrictions is to be marked by a Restriction End Sign No. A 26

TRAFFIC SIGN MANUAL

TITLE		COLOURS		REGULATORY SIGN NO.
MAXIMUM SPEED	Background	White		A22
	Border	Red		
	Number	Black		
<div><div><div></div><div>(450)</div><div>600</div><div>(750)</div></div><div></div><div>(All dimensions is in mm)</div></div>				
Description	Circular sign with number indicating the maximum speed limit.			
Application	The sign shows the maximum speed in kilometers per hour for the section of road ahead. The sign is used to put into effect a speed limit restriction. Maximum speed limit signs with a supplementary plate D18 can be used to limit the speed of trucks or with a supplementary plate D21 to limit the speed of tempos. Do not impose any speed limit unless it is essential for road safety. Unrealistically low speed restrictions will be ignored which will make the signing look silly.			
Location	The sign should be positioned on both sides of the road, for maximum impact. The sign should be repeated after every major junction and about every 500 meters between junctions. The end of speed restriction should be marked sign number A23 or by a change of speed restriction indicated By A22 signs. The 40km/h signs are not usually repeated in towns.

TITLE		COLOURS		REGULATORY SIGN NO.
END OF SPEED RESTRICTION		Background	White	A23
		Diagonals, numbers	Black	
<div><div><div></div><div>(450)</div><div>600</div><div>(750)</div></div><div></div><div>(All dimensions is in mm)</div></div>				
Description	Circular sign with four narrow diagonals from toop right to bottom left, and numbers indicating end of speed restriction.			
Application	The sign should be used wherever possible to mark the end of a speed restriction. National speed limits apply for the section of road ahead. the speed limit shown must be the same as the preceding A22 sign. Omission of the sign will cause uncertainty with drivers who will not known where the national speed limits apply.			
Location	The sign should be positioned on the both sides of the road. It can therefore be mounted back to back with the A22 sign and used for vehicle travelling in the opposite direction.			
Variation	None

TURN LEFT <i>(Right if sign reversed)</i>	Background	Blue		A28
	Border, arrow	White		
<div><div><div></div><div>(450)</div><div>600</div><div>(750)</div></div><div></div><div>(All dimensions is in mm)</div></div>				
Description	Circular sign with single arrow indicating left (right) ahead only.			
Application	Vehicular traffic may only proceed in the direction indicated by the arrow. Typically the sign will be used at a junction in a one way system or dual carriageway where there is no gap in the central reservation to indicate the direction of the flow. The sign should be used on roundabout central islands opposite entrances to stop drivers going the wrong way round the roundabout.			
Location	The sign should be seen clearly and easily and should therefore be sited accordingly, for example on an island in the road.			
Variation	Arrow may be pointed to the right.

TRAFFIC SIGN MANUAL

TITLE		COLOURS		REGULATORY SIGN NO.
SPEED ZONE		Background	White	A43
		Number, text	Black	
		Circle border	Red	

Case/Location	Environment	Sign-post Size
Normal cases		450 mm x 600 mm
First repeater	schools, town centres with speed reduction ≤ 20 kph	600 mm x 800 mm
Added emphasis	following expressway, speed reduction ≥ 20 kph	900 mm x 1200 mm
First sign at end of 110 kph high- class expressway	Speed reduction ≥ 20 kph	1200 mm x 1600 mm
Speed Limit (kph)	First Repeater Sign Spacing (m)	Second repeater Sign Spacing (m)
10	site specific	site specific
20	50 m	site specific
40	50	site specific

Note	
Description	Rectangular sign with the speed-limit in black text shown inside a red circle (annulus). The text “ZONE” is indicated below the speed-limit sign as shown.
Application	Installed at the zone entrance and repeated throughout as indicated in table if an uniform speed-limit is mandated. The speed-limit should be consistent with the road hierarchy, environment, local amenities (e.g. residences, schools, etc.). Set the speed-limit in multiple of 10 kph.
Location	Signs should be highly visible and displayed on the left-side of the route it applies to.
Variation	Alternatively, Give Way sign (A2) and D8 can also be installed.

Description	Triangular sign with three curved arrows forming a circle indicating a roundabout.			
Application	This sign warns that there is a roundabout ahead. The sign will not be required where advance direction signs are used. It can be used as additional warning where there is a known accident problem at the roundabout. A supplementary plate D1 may be attached to the post below the sign.			
Location	The sign will be positioned on the left hand side of the road, in advance of the junction. The size of the sign and distance from the hazard will be detailed in table 5.1			
Variation	None

	Diagram	Black		
<div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign with an arrow showing a right hand bend (left symbol reversed).			
Application	This sign warns that there is a right hand (left hand) bend ahead which is likely to have a significantly different design speed to the road on which the driver is travelling. It can also be used where it is difficult to see the bend in advance. Misuse of the sign confuses drivers and makes the signing appear silly and unnecessary.			
Location	The sign will be positioned on the left hand side of the road, in advance of the junction. The size of the sign and distance from the hazard will be detailed in table 5.1			
Variation	The symbol can be reversed to show a sharp left hand bend.

<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div></div></div>				
Description	Triangular sign with a U shaped arrow to the right (left if symbol reversed).			
Application	This sign warns that there is a hairpin bend to the right(left) where the driver will need to significantly reduce his speed of it is different to see the bend in advance. For less tight bend this sign is not required.			
Location	The sign will be positioned on the left hand side of the road, in advance of the junction. The size of the sign and distance from the hazard will be detailed in table 5.1			
Variation	The symbol can be reversed to show a hairpin bend to the left.

	Diagram	Black		
<div><div><div><div></div><div>600 750 (900)</div></div><div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign with arrow showing a tight left (right) followed by a tight right (left) bend.			
Application	This sign warns that there is a double bend ahead first to the left (right) and then to the right (left) which will have a lower design speed than the road on which the driver is travelling. The sign is only used where the distance between the first bend and the second is less than 250 metres. Where there is a series of bends, supplementary plate D2 may be added to the post below the sign indicating over what distance the tight bend continue.			
Location	The sign will be positioned on the left hand side of the road, in advance of the junction. The size of the sign and distance from the hazard will be detailed in table 5.1			
Variation	The symbol can be reversed to show a double bend first to the right.

SHARP CHANGE OF DIRECTION <i>(Left if symbol reversed)</i>	Background	Black	B13	
	Chevrons	White		

(450)

600

(750)

Single chevron variation

(All dimensions is in mm)

Description	Rectangular sign with white direction chevrons on a black background indicating a sharp change of direction.
Application	This sign should only be used at roundabout and dangerously sharp bend. It warns that a bend ahead is sharp to the left (right) immediately ahead. It is also used to indicate the direction of flow around a roundabout or can be positioned immediately opposite a T junction with a one way street, where there is poor visibility or know accident problems. At a junction with a two way road a B45 sign would be more appropriate. The standard sign is to be increased where extra visual impact is needed.
Location	The sign is positioned immediately before a sharp bend on the outside of the curve and it may be necessary to repeat the sign at intervals around the bend. The preferred mounting height is 2.0 metres to the underside of the sign with sufficient clearance to the edge of the carriageway. At roundabouts the chevron is displayed on the central island opposite each entry point.
Variation	The symbol can be reversed to indicate a sharp bend to the right. For flatter curves (still sharp of dangerous) a single chevron sign is used, which can also be used where there is not sufficient space for a larger sign e.g. in cuttings.

<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign with symbol showing a car with skid marks behind it.			
Application	This sign warns that the section of road ahead is likely to be unusually slippery. The sign will generally be a temporary sign and should be removed as soon as the hazard has been cleared. Where the hazard extends for some distance, supplementary plate D2 may be ahead to the sign.			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	None.

<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign with symbol showing a section through a head hump.			
Application	This sign warns that there are road humps ahead which are designed to slow traffic. This sign must be used whenever road hump are used as a means of reducing traffic speed. Where the hazard extends for some distance, supplementary plate D2 may be added to the sign.			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	None.

LOW FLYING AIRCRAFT		Background	White	B32
		Border	Red	
		Diagram	Black	
<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign showing a symbol of an aircraft.			
Application	This sign warns that the road ahead crosses the flight path of low flying aircraft. This warns drivers to be prepared for the sight and sudden loud noise of low flying aircraft which will usually be where a road passes close to the end of a runway.			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	None.

FALLING ROCKS <i>(Symbol may be reversed)</i>	Background	White		B33
	Border	Red		
	Diagram	Black		
<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign showing rocks falling down a hillside.			
Application	This sign warns that the side slopes alongside the road are unstable and liable to rock falls which may result in debris landing on the road. Where the hazard extends for some distance, supplementary plate D2 may be added to the sign.			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	The symbol may be reversed where rock falls are to the right.

DANGEROUS DIP	Background	White		B34
	Border	Red		
	Diagram	Black		
<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div><div>(All dimensions is in mm)</div></div></div>				
Description	Triangular sign showing a dip in the road filled with water.			
Application	To warn that the road ahead passes through a drift or crosses a low causeway which is prone to flooding. These sections should be properly signed because a dip in the road is difficult to see in advance. Supplementary plate D5 may be added to the sign.			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	None.

NARROW BRIDGE	Background	White		B35
	Border	Red		
	Diagram	Black		
<div><div><div></div><div>600 750 (900)</div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign showing a restriction in the road width ahead.			
Application	To warn that the bridge ahead is a narrower width than the normal road cross section. Please note that the replacement of a shoulder by a footway over the bridge counts as narrowing-even though the running lance may be the same width. Supplementary plate D9 may be added to the sign where the bridge is a single track only.			
Location	The sign be positioned on the left hand side of the road in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1 may also be necessary to position a Give Way (A2) sign and a transverse give way line (F2) on one side of the approach to the bridge.			
Variation	None.

<div><div><div><div></div><div></div><div></div></div><div>600 750 (900)</div></div><div></div></div> <div>(All dimensions is in mm)</div>				
Description	Triangular sign with an exclamation mark.			
Application	A warning sign to be used where other warning signs are inappropriate. A supplementary plate should be used to warn drivers of what hazard to expect. In general this will be a temporary road sign which should be removed after the hazard has been cleared			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	None.

<div><div><div><div></div><div>600</div><div>750</div><div>(900)</div></div><div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Triangular sign with symbol of a workman.			
Application	The sign warns drivers of a temporary obstruction caused by men working in the carriageway ahead. In practice this is used for all roadworks regardless of whether the work is being carried out by manual labour. The sign is a temporary sign. The sign may be used with supplementary sign D24 to mark the end of the roadworks.			
Location	The sign will be positioned on the left hand side of the road, in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1			
Variation	None.

Description	Triangular sign with sketch of fence.			
Application	This rarely used sign warns that there is a railway crossing ahead with gates or a barrier. The sign is to be positioned in advance of the crossing in a prominent location. A give way sign A2 must be used with a Give Way line F2 at the crossing point.			
Location	The sign will be positioned on the left hand side of the road in advance of the hazard. The size of the sign and distance from the hazard will be as table 5.1 if necessary, to provide additional impact, a second sign should be positioned on the right hand side of the road.			
Variation	None.

TEMPORARY DIVERSION AHEAD		Background	Yellow	B42
		Border, text	Black	
<div>(All dimensions is in mm)</div> <div><div><div>650</div><div><div>अगाडि डाइभर्सन</div><div>DIVERSION AHEAD</div></div></div></div>				
Description	Rectangular sign with text stating “Diversion Ahead” in both Nepali and English.			
Application	This temporary sign warns that due to roadworks, of a temporary obstruction of the carriageway, there is a temporary diversion in operation ahead.			
Location	The sign will be positioned on the left hand side of the road in advance of the hazard. The distance from the hazard will be as table 5.1. The normal mounting height is 2.0 metres to the underside of the sign with sufficient clearance to the edge of the carriageway.			
Variation	None.

T JUNCTION <i>(Turn right or left only)</i>		Background	Black	B45
		Chevrons	White	
(All dimensions is in mm)				
<div><div>400 (600)</div></div>				
Description	Rectangular sign with white arrow shaped stripes pointing to the left and mirrored for the right side of the sign.			
Application	The sign is used at a T junction with a single carriageway to direct traffic to the left or right only. The sign positioned immediately opposite the T junction in a highly visible location. The sign is used at T junction in preference to B13, and is usually used where there is poor visibility at the junction or where there is an accident problem.			
Location	The sign positioned opposite the junction. The preferred mounting height is 2.0 metres to the underside of the sign with sufficient clearance to the edge of the carriageway.			
Variation	None.

SHARP BEND <i>(Temporary diversion)</i>		Background	Black	B46
		Chevrons	Yellow	
<div>(All dimensions is in mm)</div> <div><div><div>(400)</div><div>600</div><div>(750)</div></div><div></div></div>				
Description	Rectangular sign with yellow arrow shaped stripes pointing to the left (right) to indicate the direction of traffic.			
Application	This temporary sign is used at a sharp deviation of route to the left (right) at or near road works of other temporary obstructions. The sign is the temporary version of B13 and indicates in which direction traffic should go.			
Location	The preferred mounting height is 2.0 metres to the underside of the sign with sufficient clearance to the edge of the carriageway.			
Variation	Arrow may point to the right.

DELINEATOR POST		Post	White with Black stripe	B48																																														
		Reflective element	Red on left side facing traffic, White on right side facing traffic																																															
<div></div> <div>Reflective element (100X80) facing approaching traffic</div> <div>(All dimensions is in mm)</div>																																																		
Description		Reinforced concrete post with reflective elements.																																																
Application		Delineators are used to provide singing around the road edges of horizontal curves to distinguish the edge of the road. They can also be used at other locations where their use would increase driver awareness of a potential hazard, at least every other post should be mounted with reflectors. The use of reflectors are strongly recommended, however, they are optional.																																																
Location		<div>Delineators are erected 600mm from the road edge. The following table gives the recommended spacing:</div> <table><tr><th colspan="3">Delineators are to be erected 600mm from the road, the flowing table gives the recommended spacing</th></tr><tr><th>Radius of horizontal curve(m)</th><th>Spacing of post delineators(m)</th><th>Purpose of Delineators(m)</th></tr><tr><td>30</td><td>6.0</td><td>Horizontal curve</td></tr><tr><td>50</td><td>8.0</td><td>Horizontal curve</td></tr><tr><td>100</td><td>12.0</td><td>Horizontal curve</td></tr><tr><td>200</td><td>20.0</td><td>Horizontal curve</td></tr><tr><td>300</td><td>25.0</td><td>Horizontal curve</td></tr><tr><td>400</td><td>30.0</td><td>Horizontal curve</td></tr><tr><td>500</td><td>35.0</td><td>Horizontal curve</td></tr><tr><td>600</td><td>38.0</td><td>Other purpose</td></tr><tr><td>700</td><td>42.0</td><td>Other purpose</td></tr><tr><td>800</td><td>45.0</td><td>Other purpose</td></tr><tr><td>900</td><td>48.0</td><td>Other purpose</td></tr><tr><td>1000</td><td>50.0</td><td>Other purpose</td></tr><tr><td>> 1000.0 and straights</td><td>70.0</td><td>Other purpose</td></tr></table> <div>On vertical curves the spacing of the post delineators is between 30 and 50m. At high embankments and big drops 2 to 3m spacing may be required. Similarly, at problem locations, like causeways, the delineators may be erected at 5 to 10m spacing. An important thing is that the driver should always be able to see at least 3 posts at a time.</div>				Delineators are to be erected 600mm from the road, the flowing table gives the recommended spacing			Radius of horizontal curve(m)	Spacing of post delineators(m)	Purpose of Delineators(m)	30	6.0	Horizontal curve	50	8.0	Horizontal curve	100	12.0	Horizontal curve	200	20.0	Horizontal curve	300	25.0	Horizontal curve	400	30.0	Horizontal curve	500	35.0	Horizontal curve	600	38.0	Other purpose	700	42.0	Other purpose	800	45.0	Other purpose	900	48.0	Other purpose	1000	50.0	Other purpose	> 1000.0 and straights	70.0	Other purpose
Delineators are to be erected 600mm from the road, the flowing table gives the recommended spacing																																																		
Radius of horizontal curve(m)	Spacing of post delineators(m)	Purpose of Delineators(m)																																																
30	6.0	Horizontal curve																																																
50	8.0	Horizontal curve																																																
100	12.0	Horizontal curve																																																
200	20.0	Horizontal curve																																																
300	25.0	Horizontal curve																																																
400	30.0	Horizontal curve																																																
500	35.0	Horizontal curve																																																
600	38.0	Other purpose																																																
700	42.0	Other purpose																																																
800	45.0	Other purpose																																																
900	48.0	Other purpose																																																
1000	50.0	Other purpose																																																
> 1000.0 and straights	70.0	Other purpose

TRAFFIC SIGN MANUAL

TITLE		COLOURS		WARNING PLATE NO.
Series of curves	Background	White		B50
	Border	Red		
	Vehicle	Black		
<div><div><div>600 (750) (900)</div></div><div>(All dimensions is in mm)</div></div>				
Note	First dimension is for urban roads with limited space. Second dimension is for all road types (strategic, rural and urban). Third dimension is all roads where additional impact is required.			
Description	Triangular sign with red border and a graphic of a road with a series of bend in black laid over a white border as shown.			
Application	This sign warns the driver that a series of curves or winding alignment extend ahead. A supplementary plate D2 should be installed underneath this sign showing the distance up to which the hazard extends to.			
Location	This sign should be located in the left hand side of the road in advanced of hazard. The size of sign and distance of the hazard will be as per Table 5.1.			
Variation	None.

NO THROUGH ROAD		Background	Blue	C1
		Border	White	
		Diagram	Red crosshead White leg	
<div><div><div>300 (400)</div></div><div>(All dimensions is in mm)</div></div>				
Description	Square sign with T junction indication no through road.			
Application	This sign indicates that the road ahead is not a through route. On high-speed roads it is helpful in situations where drivers cannot see where the road ends.			
Location	The sign is located on the left hand side at the entrance to roads where there is no trough road for vehicle. It can be positioned on both sides of the road if considered necessary.			
Variation	None

ROUTE CONFIRMATION SIGN- AFTER JUNCTIONS	Background	Green		C23
	Border, symbols text	White		
<div><div><div><div>रा१ H1</div><div>महेन्द्र राजमार्ग</div><div>Mahendra Rajmarg</div></div><div><div><div>(हेटौडा ७७)</div><div>पथलैया १०६</div><div>Hetauda 77)</div><div>Pathlaiya 106</div></div></div></div><div>(All dimensions is in mm)</div></div>				
Description	Route conformation sign to be used after junctions on National Highways. The sign indicates the National road number, the road name, the next destinations and the distance they are from the sign, in kilometres, in Nepali and English			
Application	This sign is used on major routes after a junction and repeats the destinations given on the advance direction sign. It is recommended that the first destination be the next destination (repeating the advance direction sign) and the last destination be the final destination on the road. Destinations in brackets are connected by another road which is accessed via a junction ahead. No more than four destinations should appear on the signs for clarity. Lists of towns to be indicated on directions signs are to be found at the end of Section J			
Location	The sign should be positioned at the left hand side of the road. The sign is normally sited 100 metres after a junction and should be beyond any bus bay or carriageway widening associated with the junction. Between junctions, signs should be sited at intervals of no more than 20 kilometres.			
Variation	The design of the sign will vary according to the locations in which it is used.

TRAFFIC SIGN MANUAL

TITLE	COLOURS	TRAFFIC LIGHT PLATE NO.
TRAFFIC SIGNALS	<div>Lights</div> <div>Red</div> <div>Amber</div> <div>Green</div>	E1
<p>(All dimensions is in mm)</p>		
Description	Traffic light signals for the control of vehicular traffic at road junctions.	
Application	Traffic lights are used to control conflicting streams of traffic at a junction in order to minimize delay and reduce accidents. They are only worth considering where there is serious congestion and it is not possible to improve the junction layout.	
Location	The location of the primary and secondary signals is discussed in detail at the beginning of this section. The primary signal is located 1.3m in advance of the F1 stop line.	
Variation	None	

Ministry of Physical Infrastructure And Transport
Department of Transport Management

TRAFFIC SIGN MANUAL

TITLE	COLOURS	REGULATORY SIGN NO.
STOP (GO LEFT)	<div>Lights</div> <div>Red</div> <div>Amber</div> <div>Green</div>	E2
<p>(All dimensions is in mm)</p>		
Description	Traffic light signals for the control of vehicular traffic at road junctions. A left filter may be used to indicate to drivers that vehicles can turn left when the main signal is red.	
Application	A left filter may further reduce congestion where a traffic survey shows that there is a large number of vehicles turning left at a junction. The left turn may be allowed when movements straight ahead are prohibited. For this reason the left lane should be dedicated for left turning vehicles by using the appropriate F11 lane marking. The left filter may only be used when there are no conflicting traffic movements during the period when it is lit. with a signal controlled pedestrian crossing, the signals will need to be carefully phased to avoid a conflict with left turning vehicles.	
Location	The location of the primary and secondary signals is discussed in detail at the beginning of this section. The primary signal is located 1.3m in advance of the F1 stop line.	
Variation	None

TRAFFIC SIGN MANUAL

TITLE	COLOURS	TRAFFIC LIGHT PLATE NO.
STOP (GO WAY & GO LEFT)	<div>Lights</div> <div>Red</div> <div>Amber</div> <div>Green</div>	E4
<p>(All dimensions are in mm)</p>		
Description	Traffic light signals for the control of vehicular traffic at road junctions. An amber left filter arrow may be used to indicate to drivers that vehicles can turn left when the main signal is red, provided they give way to other vehicles moving through the junction.	
Application	A left filter may further reduce congestion where a traffic survey shows that there is a large number of vehicles turning left at a junction. The amber left arrow indicates that it is permissible to go left provided that vehicles give way to traffic using the junction. It is not used in conjunction with a pedestrian crossing. The left turn may be allowed when movements straight ahead are prohibited. For this reason the left lane should be dedicated for left turning vehicles only by using the appropriate F11 lane marking.	
Location	<p>The location of the primary and secondary signals is discussed in detail at the beginning of this section. The primary signal is located 1.3m in advance of the F1 stop line. The amber left arrow should be used sparingly and only when:</p> <ul style="list-style-type: none"> • The left turn on red will be of great benefit for traffic flow through the junction. • The left-turning vehicles will not conflict with large numbers of pedestrians crossing the road (approach arm and exit arm). • There is no pedestrian crossing on either the approach or the exit arm, or if there is, it is controlled by signals in such a way as to avoid conflicts between pedestrians and left-turning vehicles.

TRAFFIC SIGN MANUAL

TITLE		COLOURS		TRAFFIC LIGHT PLATE NO.
PEDESTRIAN SIGNALS		Lights	Red	E6
			Green	
<div></div> <p>(All dimensions is in mm)</p>				
Description	Pedestrian signals for controlling pedestrian crossing showing two alternative arrangements.			
Application	Pedestrian signals can only be used in conjunction with traffic. Signals controlled pedestrian crossings are appropriate where traffic speeds are high or where pedestrian flow is very heavy. Crossings with pedestrian signals can also be incorporated into junctions controlled by traffic lights.			
Location	The location of the pedestrian signals is discussed in detail at the beginning of this section.			
Variation	None			

Ministry of Physical Infrastructure And Transport
Department of Transport Management

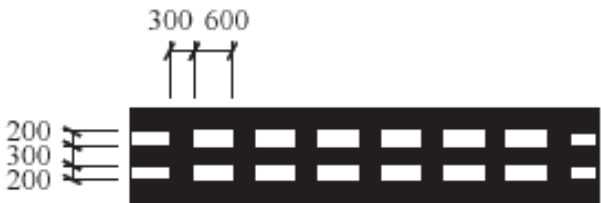

TRAFFIC SIGN MANUAL

TITLE		COLOURS		ROAD MARKING NO.
STOP LINE AT STOP SIGN OR TRAFFIC LIGHTS		Road marking	White	F1
 <p>(All dimensions is in mm)</p>				
Description	The stop line is a continuous white line 400mm wide at right angles to the flow of the traffic. It is recommended that all stop lines are reflectorized.			
Application	This line is used wherever there is a stop sign or a junction controlled by traffic light singles. The line extends from the edge of the road of the road to the center line. If the length of the line is 2.75 metres or less it should be extended across the whole road.			
Location	The stop line will normally be market in line with the edge of the through road carriageway. A stationary be marked in line with the edge of the through road carriageway. A stationary vehicle in advance of the stop line will then be in the best position to see in all directions at the junction. The stop line can be 500mm in advance of the edge line if there is a risk of collision with through road traffic (see F10 for diagram). At traffic light junctions with pedestrian crossing, the stop line will be 1.5m in advance of the F4 pedestrian crossing. Figure F3 shows the use of a stop line at a signal-controlled junction.

TRAFFIC SIGN MANUAL

TITLE		COLOURS		ROAD MARKING NO.
GIVE WAY TO TRAFFIC ON MAJOR ROAD OR ROUNDABOUT		Road marking	White	F2
 <p>(All dimensions is in mm)</p>				
Description	The give way line is a double white line at right angles to the flow of traffic. The two lines are 200mm wide 600mm marks and 300mm gaps. It is recommended that these lines be reflectorized.			
Application	This line is used at all junctions except those controlled by a stop sign. It is used where there is a give way sign or a roundabout. It is also used in advance of a pedestrian crossing type F3 where drivers must give way to pedestrians on the crossing. The line extends from the road edge to the centre line of the road. If the length of the line is 2.75metres or less it should be extended across the whole road.			
Location	The give way line will normally be marked in the line with the edge of the through road carriageway or circulatory edge of a roundabout. The Give Way line can be 500mm in advance of the edge line if there is a risk of collision with through road traffic (see F10 for diagram). At F3 type pedestrian crossing it will be 1.5m in advance of the crossing marking. Figure F4 to F10 give examples of where give way transverse lines are used.			
Variation	None			

Ministry of Physical Infrastructure And Transport
Department of Transport Management

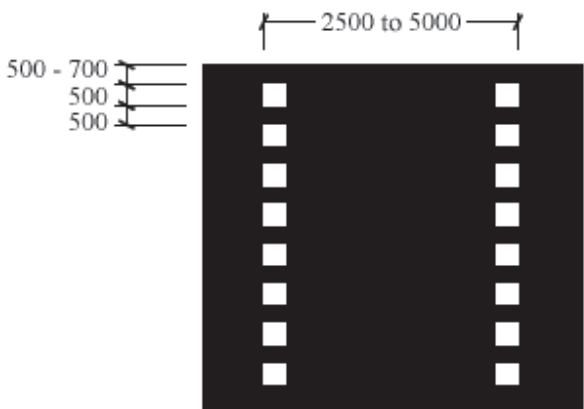

TRAFFIC SIGN MANUAL

TITLE		COLOURS		ROAD MARKING NO.
DRIVERS MUST GIVE WAY TO PEDESTRIANS ON THE CROSSING		Road marking	White stripes	F3
 <p>(All dimensions is in mm)</p>				
Description	The uncontrolled pedestrian crossing is indicated by white paint marking the dimensions of which depend upon the number of pedestrians using it, traffic speed and the width of the road at that point. The width of the crossing will generally be of 3500 with a minimum of 3000 for pedestrian crossing which are little used. The stripe nearest the kerb should be black.			
Application	The pedestrian crossing which is not controlled by traffic should be installed on a busy road where it most benefits the pedestrian movements in the area. It is unlikely to be justified if the average hourly two-way vehicle flow is less than 400 or the average hourly crossing movements are less than 150. However, there may be circumstances where it is safer to channel pedestrians to use one crossing point.			
Location	The crossing should be installed where it most benefits pedestrian movements provided that the crossing point has good visibility for both road users and pedestrians alike. The width of the crossing will generally be of 2500 with a maximum of 5000 for a very busy pedestrian crossing. Pedestrian crossing type B23 will be used in advance of the crossing to warn drivers if the pedestrian crossing is on a National Highway. Information C2 pedestrian crossing signs may be positioned at the crossing site. Figure F9 gives an example of the layout of this type of pedestrian crossing.			
Variation	None

Department of Transport Management

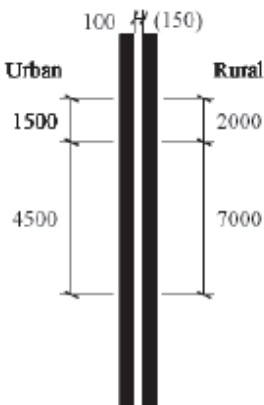

TRAFFIC SIGN MANUAL

TITLE		COLOURS	ROAD MARKING NO.
PEDESTRIANS CAN CROSS WHEN THE TRAFFIC IS STOPPED		Road marking White	F4
 <p>(All dimensions is in mm)</p>			
Description	Pedestrian crossings controlled traffic lights are marked by two 100mm wide broken lines at right angles to the traffic flow with a 500mm mark and a 500mm gap. The width of the crossing will generally be 2500 with a maximum of 5000 for a particularly busy crossing.		
Application	The pedestrian crossing is controlled by E6 type pedestrian signals which are linked into the phasing of traffic lights. They are justified at junctions where there are large numbers of pedestrians crossing the road and also away from road junctions where large numbers of pedestrians are regularly crossing a heavily trafficked road.		
Location	B17 traffic light warning signs with possibly B23 pedestrian crossing signs will be used in advance of the crossing. C2 pedestrian crossing signs can be attached below traffic lights. Figure F3 and F9 give examples of the layout of this type of pedestrian crossing.		
Variation	None		

Ministry of Physical Infrastructure And Transport

TRAFFIC SIGN MANUAL

TITLE	COLOURS	ROAD MARKING NO.
LANE LINE	Road marking White	F5
 <p>(All dimensions is in mm)</p>		
Description	Broken longitudinal white line 100/150mm wide (or 150mm where additional impact is needed) along the Centre line of the road. Lane lines have a 1.5metre gap in rural areas.	
Application	This line is used to divide the carriageway into traffic lane. On a two lane road it is used as a Centre line. Centre line marking are not usually used on roads with a carriageway width of less than 5.5metres. The line thickness will normally 100mm. Where additional impact is required the line thickness should be increased to 150mm.	
Location	The lane line markings are used on all roads of 5.5metres or wider, where hazard lines or barrier lines are not used, to mark the Centre line and lane widths where additional lines are delineated.	
Variation	None	

Ministry of Physical Infrastructure And Transport
Department of Transport Management

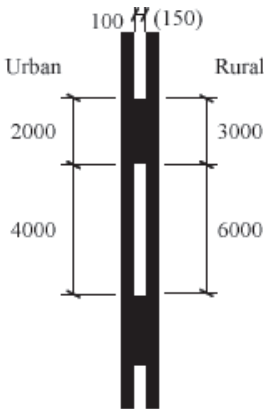

TRAFFIC SIGN MANUAL

TITLE		COLOURS		ROAD MARKING NO.
BARRIER LINE DO NOT CROSS		Road marking	White	F6
 <p>(All dimensions is in mm)</p>				
Description	Continuous longitudinal white line 100/150mm wide (150mm where additional impact is needed) along the centre line of the road. It is recommended that these lines are reflectorised .			
Application	The prohibition or barrier line is used to stop overtaking on sections of single carriageway road where it is unsafe to do so. this usually because it is not possible to see far enough ahead. Overtaking should only be prohibited where it is clearly unsafe. The table below gives details of where the barrier line is used and is related to the visibility length distance. Where a barrier line is used it should be a minimum of 100 meter in length. If the calculated barrier line length is less than 100 meters. the ends of the barrier line should be extended equally beyond the calculated length of the barrier line.			
Location	<p>Visibility distance below which a prohibition line is justified:</p> <p>The visibility distance is measured along center line at a height of 1.05meter above the carriageway and should be checked wherever there is a bend, hill crest or dip in the road.</p>			
Variation	None			

Ministry of Physical Infrastructure And Transport
Department of Transport Management

TRAFFIC SIGN MANUAL

TITLE		COLOURS		ROAD MARKING NO.
HAZARD LINE WARNUNG		Road marking	White	F7
 <p>(All dimensions is in mm)</p>				
Description	Broken longitudinal white line 100 mm wide (150mm where additional impact is needed) along the center line of the road. Hazard lines have a 4 meter line while with a 2 meter gap in urban areas and a 6 meter line with a 3 meter gap in rural areas. It is recommended that these lines are reflectorised.			
Application	<p>This line is a traffic lane, marking for use where there is a hazard ahead. It tells drivers that crossing the line, although not prohibited,, may be dangerous. It is used as</p> <ul style="list-style-type: none"> • a center line and lane line on the approach to junctions and pedestrian crossings, • a center line on the approach to the prohibition line. <p>The line thickness will normally be 100mm. where additional impact is required the line thickness should be increased to 150mm. If the calculated length of the hazard line between two length of barrier line is less than 100 meter it should be replaced by a continuous length of barrier line</p>			
Location	Where it is used as an approach to a junction or pedestrian crossing it should be 40 meter long. Where it is used on the approach to a prohibition line the following visibility/distance are required.			
Variation	None			

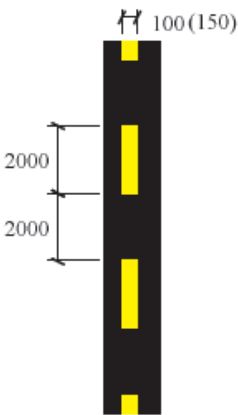

Ministry of Physical Infrastructure And Transport
Department of Transport Management

TRAFFIC SIGN MANUAL

TITLE		COLOURS	ROAD MARKING NO.
TRAFFIC ISLAND- DO NOT ENTER PAINTED AREA EXCEPT IN AN EMERGENCY		Road marking White	F8
<p>(All dimensions is in mm)</p>			
Description	The markings take the form of diagonal hatching bordered by a warning line and the diagonals are angled to deflect traffic. The across hatching should taper at rate of 1 in 20 (or 1 in 30 where additional impact is required) until the full width is reached. It is recommended that These markings are reflectorised.		
Application	The marking should be used to guide vehicles past a traffic island in the center of the carriageway. It may also be used on its own to from a ghost island which is an effective means of providing a safe refuge for right turning vehicles. Cross hatching can also be provided in the center of the carriageway on a tight bend to help ensure vehicles do not encroach into the opposite carriageway.		
Location	The markings will normally be symmetrical about the road and will be constructed in the locations noted above. Figure F gives an example of a ghost island.		
Variation	None

Department of Transport Management

TRAFFIC SIGN MANUAL

TITLE	COLOURS	ROAD MARKING NO.
EXTENDED TRANSVERSE LINE <i>(Extended across side road junction)</i>	Road marking White	F10
<p>(All dimensions is in mm)</p>		
Description	The extended transverse line is a single white line 100mm wide extending across a side road junction from the centre of the side road, in line with the F1 stop line or F2 Give Way line	
Application	The line is used to indicate the extent of a side road junction beyond the Stop or Give Way transverse line. It is used for two way roads and indicates that vehicles may turn from the main road into the side road, crossing the extended transverse line. It is not used at junctions controlled by traffic light signals.	
Location	The line marked in line with the front of the Stop line or Give Way line across side road junctions.	
Variation	None	

Ministry of Physical Infrastructure And Transport

TRAFFIC SIGN MANUAL			
TITLE	COLOURS		ROAD MARKING NO.
NO PARKING	Road marking	Yellow	F11
 <p>(All dimensions is in mm)</p>			
Description	Edge of carriageway road marking where parking is prohibited. The no parking section is marked by a continuous yellow line 100/150mm wide.		
Application	The edge marking which prohibits parking is used when it would be dangerous for vehicles to park and is also used to prohibit parking to prevent traffic congestion. A14 signs may be used to delineate the lengths of no parking.		
Location	This line is used on tight bends and across bridges. In urban areas where parking is prohibited it may be used in conjunction with A14 no parking signs. For greater visibility the line can be marked along kerbs instead of the carriageway. Where the marking is used across bridges it should be 150mm wide and extent for 30 metres either side of the bridge

TRAFFIC SIGN MANUAL

TITLE	COLOURS	ROAD MARKING NO.
YELLOW BOX MARKING AT FOUR WAY INTERSECTION	Diagonal, border Yellow	F27
<p>(All dimensions is in mm)</p>		
Description	Rectangular box inscribed within the four corners (three corners in the case of T intersection) with diagonal grids placed at every 2000 -2500 mm interval as shown.	
Application	This yellow box is marked inside the intersection area within its corners. It signifies that no vehicle should enter the box if the vehicle is forced to stop inside due to presence of stationary or oncoming vehicle inside or outside the box. However, a vehicle waiting to turn right (except at a roundabout) may stop within the box for as long it takes to complete its right-turn.	
Location	Applied at intersection to mitigate blockade and to regulate traffic.	
Variation	None.
