Acknowledgments

A conceptualisation of an industry, however big or small starts with facts and figures. All the activities like feasibility study and establishing and extension of an industry, marketing of the products etc. are based on database of the similar industries and complimentary industries. The same industrial statistics are required for economic analysis, national policy makers and foreign investors.

These statistics of establishment, production, investors are vital statistics based on which other related activities can be relied. These statistics show the past and present status of the industrial activities and basis for future projections.

The data can be collected only with cooperation from the industries where it is generated. And this aspect has been very disappointing. We hope that the delivery of data from industry side will get better.

It has been an endeavour of Department of Industries to disseminate the data collected from medium and large industries of Nepal.

It is very heartening to present 'Industrial Statistics of the year 2007' you all.

We request you to be considerate to errors and omissions that may have been crept in.

We will be grateful for your kind comments and suggestions for improvements which will be taken due consideration in next publications.

I would like to take this opportunity to express my sincere thanks to all industrial enterprises for providing information/data, without which this publication would be of little value. I am thankful to the directors at the DOI for their cooperation by providing the essential and useful suggestion to the publication. I would also like to commend the staffs of the Planning, Monitoring & Evaluation Section of the Department, especially, Director- Ramesh Ratna Sthapit, Statistician- Sahan Laxmi Tamrakar and Mechanical Engineer- Gambhir Shyam Amatya, for their sincerity and diligence in bringing out the present episode well in time. I would like to thank Mrs. Gindi Baba Bajracharya, Mrs. Sunita Bajracharya and Mr. Birendra Maharjan for their valuable support in compilation and processing of the data.
