Foreword

It is a pleasure for me to write a foreword for this useful book entitled “Catalogue of Plants of National Botanical Garden, Nepal”. This book documenting the plants conserved in the National Botanical Garden (NBG), Godawari, Lalitpur, Nepal will be of great value for students, botanists, researchers, scientists, conservationists, naturalists, and freelancers working in the field of plant science. In addition to listing the plants maintained in the NBG, this book also categorized them as either *ex-situ* or *in-situ* conserved. The authors also separated plants into categories for trees, shrubs, herbs, and climbers that had been conserved *ex-situ* and *in-situ* in the garden. The classification of *ex-situ* conserved plants into W, Z, U, and G on the basis of provenance, which is a novel notion in the case of Nepal but is in practice in the renowned gardens of Europe and America based on the recommendation of the Botanic Gardens Conservation International (BGCI), particularly impressed me.

The substances necessary to improve any botanical garden are ultimately offered in this book. Additionally, it will serve as a model for other botanical gardens in Nepal to document their flora using the formats that are accepted worldwide. With over 1000 plant species, including angiosperms, gymnosperms, pteridophytes, and bryophytes, conserved in the NBG; it may help in the writing of Nepal’s flora to some extent. However, the rise in the number of invasive species inside this well-managed botanical garden alarms all ecologists, environmentalists, and conservationists who work in this sector.

I really appreciate the authors Dr. Gaurav Parmar, Dipak Lamichhane and Jeevan Pandey of the National Botanical Garden for tireless efforts in creating the book in the form it is in. I also wish to thank Dr. Nirmala Joshi, a former Senior Scientific Officer for the Department of Plant Resources who reviewed this book, for her thorough analysis and insightful advice.

Buddi Sagar Poudel, PhD
Director General
Department of Plant Resources
Thapathali, Kathmandu

Acknowledgements

We must give due recognition to numerous individuals. Since the establishment of the botanical garden in 1962 AD, numerous individuals have contributed to the plantation and conservation of plant species in this botanical garden. We are really very grateful for their work and providing us with this platform to write this book. According to the first author, Dipak Lamichhane, the chief of the National Botanical Garden (NBG) deserves special thanks for facilitating the writing of this book.

The authors appreciate the facilitation and inspiration provided in many ways by Dr. Buddi Sagar Poudel, Director General, and Mr. Saroj Kumar Chaudhary, Deputy Director General, Department of Plant Resources. Special thanks go out to Dhan Raj Kandel, Research Officer at the National Herbarium and Plant Laboratories (KATH), and the NBG's research interns Manisha Nagarkoti and Tulasha Chaudhary, whose assistance and advice were extremely helpful in the creation of this book. The authors also acknowledge the authors of earlier books that featured the floral diversity of this botanical garden.

The authors are very appreciative to the Research Officers Hem Raj Paudel, Amrit KC, Rajendra Acharya, and Pratiksha Chalise of the KATH, as well as to Rashika Kafle and Satya Gupta of the Central Department of Botany, Tribhuvan University for their help with plant identification and for providing Nepalese names for a few plant species. The authors also wish to express their gratitude to Haresh Ray (Head Gardener), and Sudhir Neupane (Assistant Botanist) of the NBG for helping in various ways while the authors were busy writing the book. The authors also want to express their gratitude to Dr. Nirmala Joshi, the former Senior Scientific Officer of the Department of Plant Resources and the book's reviewer, for her suggestions and useful comments.

If any error is detected in this book, the authors would be quite appreciative if you could let them know so that it can be fixed in subsequent printings.

Finally, the authors would like to thank M.S. Offset Press and Mahesh Maharjan for printing the book and making it available in this format.

INTRODUCTION

A botanical garden or botanic garden is a garden with a documented collection of living plants for the purpose of scientific research, conservation, display, and education, that are generally labelled with their botanical or scientific names. It is also known as a museum of living plants. Botanical gardens, with their huge collections of living plants grown for scientific, educational, *ex-situ* conservation, and *in-situ* conservation purposes, have played a vital role in safeguarding the world's valuable plant heritage. They are generally managed by the universities, research institutions, or governmental organizations.

There are 12 botanical gardens in Nepal. The National Botanical Garden (NBG), formerly known as the Royal Botanical Garden (RBG), is the oldest and largest botanical garden in Nepal. The foundation stone for this botanical garden was laid by Khagendra Jung Gurung, Deputy Minister of the Ministry of Forests and Agriculture on July 12, 1961 (Asadh 28, 2018). It was formally established on October 28, 1962 (Kartik 12, 2019) and inaugurated by King Mahendra. It belongs to the Department of Plant Resources (DPR), formerly the Department of Medicinal Plants, under the Ministry of Forests and Environment (MoFE), Government of Nepal. The landscape of this exquisite botanical garden was designed and constructed under the supervision of two British horticulturists, Geoffrey Herklots (1961-1962 AD) and Tony Schilling (1965-1966 AD).

The NBG is also an internationally recognized botanical garden and has been a member of Botanic Gardens Conservation International (BGCI) since 2015 AD. The natural landscape of this botanical garden is developed into 30 different thematic gardens (= subgardens) which occur in between 1480 m to 2000 m. It is well-known as a center of plant conservation, education, research, display, and recreation. It covers an area of 82 hectares with varying topography, ca. 40 hectares of which have been transformed into various thematic gardens. It is surrounded by a natural evergreen forest with *Schima-Castanopsis-*

Alnus as the dominant tree species. It is located at the base of the Mt. Phulchowki (2765 m), the highest peak of the Kathmandu valley, and lies about 10 km southeast of Satdobato, Lalitpur District, Bagmati Province. A natural stream, Godawari, runs through the middle of the garden, adding to its beauty. It is situated between the latitudes of 27°35'40"N to 27°35'53"N and the longitudes of 85°22'37"E to 85°23'17"E.

Nepal is home to 5309 species of angiosperms, 26 species of gymnosperms, 1213 species of bryophytes, and 583 species of pteridophytes; and 1614 of these have been identified as medicinal and aromatic plants (MAPs) (Rajbhandary *et al.*, 2020; DPR, 2021). Plants from different climates, including the tropical, subtropical, temperate, subalpine, and alpine can be seen conserved within the garden's premises. Over 1000 plant species, including endemic, native, indigenous, naturalized, and exotic angiosperms, gymnosperms, pteridophytes, and bryophytes, are conserved in this botanical garden. This garden has conserved ca. 150 species of MAPs, 76 species of orchids, 56 species of climbers, and 51 species of cactus & succulent plants.

For carrying out the routine activities (i.e., conservation, education, research, display, and recreation), this botanical garden has four different sections, namely (1) Conservation and Education Section, (2) Floriculture Section, (3) Garden Development Section, and (4) Medicinal Plants and Information Section. It also has a seed bank established in 2019 AD which is a landmark for plant conservation and research. It has conserved ca. 158 accessions of seeds belonging to 150 species of indigenous, native, threatened, and other useful plants.

More than 400 thousand visitors, including about 75 thousand students, visit this botanical garden annually, with the exception of pandemic years. Generally, students come here on educational tours; plant researchers come here to observe living plants; general visitors come here to relax and unwind away far away from the humdrum of city life; naturalists come here to watch birds and enjoy the scenery/greenery; and film crews come here to shoot videos and films.

The documentation of the garden flora is equally very essential for plant enthusiasts, students, botanists, researchers, conservationists, and policy makers. Since the garden's establishment, several publications regarding its floral documentation have been written, but this one focuses on the plants that have been conserved *in-situ* and *ex-situ* under different categories like trees, shrubs, herbs, and climbers.

Mission: “*Exploration and conservation of plant resources for a better life*”.

OBJECTIVES OF THE NBG

The major objectives of this botanical garden are:

- To conserve and maintain a diverse living collection of plants
- To develop protocols for plant propagation and seed banking
- To support education and research in the field of plant science
- To promote the development of botanical gardens in Nepal
- To promote understanding and appreciation of plants and the natural environment
- To collaborate with national and international botanical institutions for conservation, research, and knowledge sharing

MAJOR ACTIVITIES OF THE NBG

The major activities carried out by this botanical garden are:

- Collection, introduction and maintenance of native, indigenous, and exotic plants
- *Ex-situ* and *in-situ* conservation of endemic, threatened, and other useful plants
- Collection, germination testing, and storage of seeds in the seed bank
- Education regarding conservation, classification, and uses of plants
- Technology development for plant propagation
- Plant landscape development and beautification to improve the garden's aesthetic appeal for visitors
- Production and sale of ornamental plants and MAPs
- Participation in the flower exhibition

- Dissemination of botanical information to raise awareness
- Extra-curricular activities and plantation on various occasions
- Technical support in plant propagation and garden development

SPECIAL FEATURES OF THE NBG

The special features of this botanical garden are:

- a) Botanical Information and Exhibition Center
- b) Plant Landscape and Thematic Gardens
- c) Plant Conservatories
- d) Seed Bank
- e) Natural Forest and Wetlands
- f) Vertical Gardens
- g) Sales House

a) Botanical Information and Exhibition Center

It is located beside the garden's main entrance gate and comprises a museum for education, research, and display. Visitors can visit this center to learn more about the current roles and activities of the botanical garden as well as the biodiversity it has conserved. Additionally, it works on labelling and tagging every plant inside the garden with its scientific name, including family name and Nepali/local name to justify "*garden speaks for itself when it is labelled and tagged*".

b) Plant Landscape and Thematic Gardens

This botanical garden's real essence is its plant landscape and several thematic gardens that harbor over 1000 species of living plants. There are 30 different plant landscapes and thematic gardens inside the botanical garden:

1. Physic Garden

A type of herb garden featuring medicinal plants is known as a physic garden. It is located adjacent to the garden's main entrance

gate, and it consists of more than 150 species of plants having medicinal and aromatic properties, such as *Acorus calamus*, *Asparagus racemosus*, *Astilbe rivularis*, *Bergenia ciliata*, *Cymbopogon winterianus*, *Ephedra gerardiana*, *Justicia adhatoda*, *Rauvolfia serpentina*, *Taxus mairei*, *Valeriana jatamansi*, *Withania somnifera*, *Zanthoxylum armatum*, etc., conserved in small plots and a green house. This green house was constructed under the supervision of Takashi Watanabe, a volunteer under the Japan Overseas Cooperation Volunteers (JOCV), in May 1987.

2. Edible Plant Garden

It is located between the Physic Garden and the Terrace Garden. It consists of *Berberis asiatica*, *B. napaulensis*, *Camellia sinensis*, *Castanopsis indica*, *Coffea arabica*, *Diospyros malabarica*, *Rubus ellipticus*, etc.

3. Biodiversity Education Garden (BEG)

It is located close to the garden's main entrance gate. It was established by the British Embassy in Kathmandu, the Royal Botanic Garden Edinburgh (RBGE), and the Government of Nepal on the auspicious occasion of 200 years of diplomatic relationship between Nepal and the United Kingdom in 2016 AD. It was inaugurated by the Rt. Hon'ble President of Nepal, Mrs. Bidya Devi Bhandari, on September 22, 2016. It covers an area of 1.3 hectares which harbors more than 100 plant species from the tropical to alpine regions of Nepal, such as *Betula alnoides*, *Cedrus deodara*, *Dipsacus atratus*, *Ephedra gerardiana*, *Pinus roxburghii*, *P. wallichiana*, *Rauvolfia serpentina*, *Taxus contorta*, *T. mairei*, etc.

4. Pergola

A pergola is a type of outdoor garden structure that consists of vertical posts or pillars that hold cross beams and a strong open lattice, frequently upon which woody vines are grown, to create a shaded walkway, passageway, or sitting area. Located beside the

BEG, it is 30 m long, 2 m wide and 2.2 m high. *Wisteria sinensis* has been grown over *Shorea robusta* formed wooden frame.

5. Rock Garden

It is located close to the Pergola and adjacent to the Fern Garden. It was designed and constructed under the supervision of Tony Schilling, a horticulturist from the Royal Botanic Gardens, Kew, in 1965-1966 AD. Major plants of this garden are *Agave americana*, *Bergenia ciliata*, *Cycas revoluta*, *Opuntia ficus-indica*, *Thysanolaena latifolia*, *Yucca gigantea*, and *Y. gloriosa*.

6. School Education Garden

It is located between the BEG and the Special Garden. This garden, which is intended for schoolchildren, is also known as the Child Education Garden. It was established on the occasion of National Plant Resources Day on Chaitra 29, 2078 (April 12, 2022) with an aim of conserving and displaying plants that are commonly taught in schools, such as herbs, shrubs, trees, climbers, epiphytes, hydrophytes, mesophytes, and xerophytes. Algae, mushrooms, lichens, moss, ferns, gymnosperms, monocots, and dicots are all conserved in this garden. In the middle of this garden, there is also a *Bar-Peepal Chautari* (rest area/stop under the shade of Banyan and Sacred fig trees) reflecting Nepalese culture.

7. Fern Garden

It is located close to the School Education Garden and the Rock Garden. About 40 species of ferns, including *Alsophila spinulosa*, *Cyrtomium caryotideum*, *Dryopteris gamblei*, *Nephrolepis cordifolia*, *Odontosoria chinensis*, *Polystichum lentum*, *P. yunnanense*, *Pteris cretica*, *P. wallichiana*, *Pyrrosia costata*, *Woodwardia unigemmata*, etc. are conserved here out of the 109 species found inside this botanical garden. The tree fern (*Alsophila spinulosa*), a CITES-listed (Appendix-II) endangered plant species, is the main attraction for students and visitors to this garden.

8. Special Garden

This is the main attraction center and the heart of this botanical garden. It is located on the opposite side of the road from the School Education Garden, the Fern Garden and the Japanese Style Garden. The landscape of this beautiful garden was designed by Geoffrey Herklots in 1962 AD. *Castanopsis indica*, *Choerospondias axillaris*, *Ilex excelsa*, *Myrica esculenta*, *Prunus cerasoides*, *Rhododendron arboreum*, *Schima wallichii*, etc. are the common trees inside this garden. Additionally, it features (1) Water Fountain, (2) Seasonal Ornamental Plant Beds, (3) Orchid House, (4) Cyclamen House, (5) Bonsai House, (6) Cactus & Succulent House, (7) Ornamental Plant House, (8) Plant Propagation Houses, and (9) Lawn.

9. Pinetum

It is located behind the Special Garden and consists of *Pinus* species along with *Cupressus torulosa*, *Ginkgo biloba*, *Taxus mairei*, etc. Currently, some part of this area is being managed by the Patale Muldol community forest users' group.

10. Terrace Garden

This garden is designed to represent the hilly terrain of Nepal, so it is also known as the Nepalese Style Garden. It lies eastwards of the Special Garden, consisting of *Berberis napauleensis*, *Buddleja asiatica*, *Hypericum uralum*, *Osbeckia stellata*, *Pyracantha crenulata*, etc.

11. Japanese Style Garden

It is located next to the Fern Garden. This garden was designed by a Japanese scientist Hiromasa Miyazawa, a volunteer under JOCV to Nepal, in 1969–1970 AD. The main features of this Japanese-themed garden are a natural stream, water fall, bamboo & bushes, pond, a wooden bridge, Japanese-styled wooden gate, etc. Major plants of this garden are *Acer palmatum*, *Azalea hybrida*, *Camellia japonica*, *Dendrocalamus hamiltonii*, *Drepanostachyum falcatum*,

Ginkgo biloba, *Metasequoia glyptostroboides*, *Wisteria sinensis*, etc. This garden is home to *Eucalyptus alba*, the tallest tree in the botanical garden which is 46.3 m in height (measured in July 2021 by the Forest Research and Training Centre, Babarmahal, Kathmandu).

12. Nepalensis-Historic Garden

It is located on the opposite side of the road from the Japanese Style Garden and close to the Threatened Plant Garden. It was established on the occasion of 59th anniversary of this botanical garden on Kartik 12, 2078 (October 29, 2021). It consists of plants having “*nepalensis*”, “*napaulensis*”, “*napalensis*”, “*nepalense*” or “*napalense*” as the specific epithet. *Alnus nepalensis*, *Berberis napaulensis*, *Coriaria napalensis*, *Geranium nepalense*, *Lilium nepalense*, *Persicaria nepalensis*, *Rohdea nepalensis*, *Rumex nepalensis*, *Saurauia napaulensis*, etc. are conserved in this garden.

13. Threatened Plant Garden

It is located next to the Nepalensis-Historic Garden. It was established on the occasion of Plant Conservation Day on May 18, 2016. *Ginkgo biloba*, *Juglans regia*, *Magnolia champaca*, *Metasequoia glyptostroboides*, *Orchid* spp., *Podocarpus nerifolius*, *Rauvolfia serpentina*, *Taxus mairei*, etc. are conserved here.

14. Lily Garden

It is located on the opposite side of the road from the Threatened Plant Garden and close to the Taxonomic Family Garden. In this garden, various species of lilies (*Lilium* spp.) and their close relatives from the genera *Agapanthus*, *Hemerocallis*, *Iris*, and *Narcissus* are conserved.

15. Taxonomic Family Garden

It is located close to the Lily Garden. Established on the occasion of National Plant Resources Day on Chaitra 29, 2074 (April 12,

2018), more than 75 species of plants belonging to 50 families are conserved in this garden, all of which are arranged according to the Bentham and Hooker's system of classification.

16. Indigenous Ornamental Plant Garden

It is located next to the Taxonomic Family Garden. It was established on the occasion of Plant Conservation Day on May 18, 2022. *Ardisia macrocarpa*, *Berberis napaulensis*, *Osmanthus fragrans*, *Podocarpus nerifolius*, *Rhaphiolepis dubia*, *Rhododendron arboreum*, etc. are conserved in this garden.

17. Tropical Plant Garden

It is located close to the Indigenous Ornamental Plant Garden and the Coronation Pond. It is a flat area where tropical vegetation like *Bombax ceiba*, *Caryota urens*, *Cassia fistula*, *Eucalyptus alba*, *Murraya koenigii*, *Pandanus furcatus*, *Phoenix sylvestris*, *Trachycarpus martianus*, etc. are conserved. Additionally, it has a tropical house in the center and a lawn around it.

18. Coronation Pond and its surroundings

It is located in between the Tropical Plant Garden, the Indigenous Ornamental Plant Garden, and the Sand Garden. This pond was so named to commemorate the auspicious occasion of the coronation of King Birendra. A majestic pillar of 7 m height with a crown on top stands in the center of this pond to mark the historic event of February 24, 1975 (Falgun 12, 2031). This pond contains *Hydrilla verticillata*, *Myriophyllum aquaticum*, *M. spicatum*, *Potamogeton crispus*, and a variety of algal species. This pond is surrounded by notable plants like *Albizia julibrissin*, *Bauhinia variegata*, *Berberis napaulensis*, *Ficus auriculata*, *Lagerstroemia indica*, *Prunus cerasoides*, etc.

19. Sand Garden

It is located close to the Coronation Pond. This garden features sand, boulders, and bushes of *Drepanostachyum falcatum*, and

Ligustrum confusum. A rest house close by offers stunning views of the Coronation Pond, the Tropical House, and the Pinetum.

20. Wild Plant Garden

It is located on the opposite side of the road from the Sand Garden and the Coronation Pond. Both indigenous and native plants of Nepal, such as *Alnus nepalensis*, *Castanopsis indica*, *Prunus cerasoides*, *Pyrus pashia*, *Schima wallichii*, *Ziziphus incurva*, etc. are conserved in this garden.

The NBG participated to honour Her Majesty Queen Elizabeth II's platinum jubilee, to mark her 70 years on the throne, by planting 70 saplings of indigenous trees of Nepal belonging to ten species under "The Queen's Green Canopy" initiative on March 24, 2022. *Ilex excelsa*, a plant that the Queen planted during her State visit to Nepal in 1986, was one of the ten species that were planted during the platinum jubilee celebration on an area between the Wild Plant Garden and the Aquatic Plant Garden.

21. Aquatic Plant Garden

It is located between the Wild Plant Garden and the Rose Garden. In this garden, *Azolla filiculoides*, *A. pinnata* subsp. *asiatica*, *Equisetum ramosissimum*, *Hydrilla verticillata*, *Nelumbo nucifera*, *Rotala rotundifolia*, etc. can be observed. This garden serves as an example of a pond ecosystem and provides students with practical knowledge, so they make sure to visit it while they are on educational trips.

22. Rose Garden

It is located beside the Manaslu House and the Bista Lineage Temple, where roses of different varieties and colours can be seen flowering in different seasons. Rose beds are on either side of the zigzag paved pathway.

23. VVIP Plantation Garden

It is located between the botanical garden's administrative building, the Manaslu House, and the Bista Lineage Temple. This area is designated for the development of green diplomacy, for the plantation by the Head of State or Head of Government of foreign countries during their State visit to Nepal. Seventeen different Heads of state, and Heads of Government have planted in this garden. The list of the VVIPs who planted in this garden is provided in Annex 1.

24. Canna Garden

It is located on the opposite side of the VVIP Plantation Garden and the Ethnobotanical Garden. It consists of *Canna indica* and *C. hybrida* of different colors. Visitors may take pleasure in the stroll along this garden.

25. Ethnobotanical Garden

It is located on the other side of the Canna Garden. *Alnus nepalensis*, *Berberis asiatica*, *Castanopsis indica*, *Choerospondias axillaris*, *Machilus odoratissimus*, *Prunus cerasoides*, *Pyrus pashia*, *Ziziphus xiangchengensis*, etc. that Tamangs, the local indigenous group residing near the garden area, use for a variety of purposes like fodder, medicine, wood, etc. are conserved in this garden.

26. Coronation Temple and its surroundings

It is located next to the Ethnobotanical Garden. King Birendra delivered his coronation speech on February 24, 1975 (Falgun 12, 2031), from this artistic pagoda temple, famously known as the Coronation Temple, from Tundikhel, Kathmandu. Later, this temple was shifted to the botanical garden. The plant species found in the Narayanhiti Royal Palace are planted and conserved here.

27. Mesozoic Avenue Garden

The vicinity of the 2 km ring road inside the botanical garden has been developed into Mesozoic Avenue Garden on the occasion of

World Environment Day on June 5, 2018. More than 200 saplings of *Ginkgo biloba*, *Metasequoia glyptostroboides*, and *Cycas revoluta* are planted on various occasions by the distinguished visiting guests.

28. Hedge Garden

In this botanical garden, hedges are preferred to iron fencing or concrete boundary walls. *Cuphea hyssopifolia*, *Chaenomeles japonica*, *Drepanostachyum falcatum*, *Duranta erecta*, *Jasminum mesnyi*, and *Ligustrum confusum* are commonly used as hedge inside the botanical garden.

29. Conservation and Education Garden

It is located close to the NBG Seed Bank and the Herbarium Building on the main road. Some ninety species of trees, 26 species of shrubs, 51 species of herbs and 12 species of climbers are conserved in this garden. Endemic species such as *Begonia nuwakotensis*, *B. taligera*, *Hypericum cordifolium*, and *Thunbergia kasajuana* are also conserved here.

30. Arboretum

It is located beside the NBG Seed Bank and the ICIMOD Knowledge Park. More than 100 species of trees and shrubs, including *Aesculus indica*, *Berberis napaulensis*, *Castanopsis indica*, *Cedrus deodara*, *Choerospondias axillaris*, *Metasequoia glyptostroboides*, *Nageia nagi*, *Sequoia sempervirens*, etc. are conserved in this garden.

c) Plant Conservatories

The garden has a variety of conservatories for conserving particular plant species or groups, such as (1) Bonsai House, (2) Cactus & Succulent House, (3) Cyclamen House, (4) Fern House, (5) Orchid House, (6) Ornamental Plant House, (7) Plant Propagation Houses, and (8) Tropical House.

Tropical house is the largest and major conservatory inside the garden, and it is located adjacent to the Coronation Pond. It was built in 1974 AD (2031 BS) by Balaju Yantrashala Private Limited, Kathmandu, which is 12 m tall and covers an area of 294 m². It consists of plants found in tropical region like *Butea monosperma*, *Calotropis gigantea*, *Cassia fistula*, *Cycas pectinata*, *Dalbergia latifolia*, *Litchi chinensis*, *Meizotropis buteiformis*, *Phanera vahlii*, *Rauvolfia serpentina*, *Santalum album*, *Shorea robusta*, *Withania somnifera*, etc.

d) Seed Bank

It is located on the opposite side of the street from the botanical garden's administrative building. Belonging to the Conservation and Education Section, it is one of the key research centers inside the garden. Established in 2019 AD, it has conserved ca. 158 accessions of seeds belonging to 150 species of indigenous, native, threatened, and other useful plants of Nepal.

e) Natural Forest and Wetlands

The garden is surrounded by a natural forest consisting of *Alnus nepalensis*, *Castanopsis indica*, and *Schima wallichii*, among others, and a natural stream runs through it adding beauty to the garden. Around the flowing stream are wetlands, and the garden has a few concrete ponds and ponds that have been preserved naturally.

f) Vertical Gardens

The NBG has always had vertical gardens in the form of pergola harboring *Wisteria sinensis*, and green gates, walls, and fences consisting of *Cissampelos pareira*, *Dolichandra unguis-cati*, *Hedera nepalensis*, *Jasminum mesnyi*, *Rosa banksiae*, *Trachelospermum jasminoides*, etc. However, vertical gardens employing panel support (i.e., metallic frame) and well-managed plastic pots with water facilities was introduced to NBG in 2021 AD. Technically, they are known as living wall systems or modular green walls. It is a unique form of

urban gardening ideal for small spaces. Instead of horizontal spaces, this garden requires vertical spaces. As a result, it is very beneficial in cities with limited space. Two such vertical gardens with panel support can be seen in the NBG, one near the garden's main entrance gate, and the other inside the Special Garden. It has become a new attraction center for visitors inside the NBG.

g) Sales House

The medicinal and ornamental plants for sale are housed in this building, which is close to the main entrance gate of the garden.

CATEGORIZATION OF PLANTS

On the basis of life-form, plants are classified into trees, shrubs, herbs, and climbers. In this study, all bryophytes are classified as herbaceous. Shrubs or herbs that are climbers are only documented in the category of climbers. For example, the climbing shrub *Bougainvillea glabra* and the climbing herb *Rubia manjith* are only documented under the climbers to avoid their repetition in this study.

The plants are classified as terrestrial, epiphytic, aquatic, climber, lithophytic, parasitic, and/or creeper depending on their habits. If not otherwise mentioned, plants in this study are terrestrial, such as trees (both *in-situ* and *ex-situ* conserved) and *ex-situ* conserved shrubs.

Table 1. Plant groups found in the NBG

S.N.	Categories	Number of species	Number of taxa
1	Angiosperms	904	913
2	Gymnosperms	29	31
3	Pteridophytes	109	109
4	Bryophytes	46	46
	Total	1088	1099

Table 2. Plant categories found in the NBG

S.N.	Categories	Number of species	Number of taxa
1	<i>Ex-situ</i> conserved trees	161	164
2	<i>Ex-situ</i> conserved shrubs	94	98
3	<i>Ex-situ</i> conserved herbs	330	332
4	<i>Ex-situ</i> conserved climbers	28	28
	Total <i>ex-situ</i> conserved	613	622
5	<i>In-situ</i> conserved trees	40	40
6	<i>In-situ</i> conserved shrubs	52	52
7	<i>In-situ</i> conserved herbs	340	341
8	<i>In-situ</i> conserved climbers	28	29
	Total <i>in-situ</i> conserved	460	462
9	Invasive species	15	15
	Total	1088	1099

PROVENANCE CODES FOR EX-SITU CONSERVATION

Provenance means the place of origin of a species (plant or animal). Provenance is not necessary if the plant is native to a particular country and is conserved *in-situ*, but it is necessary if the plant species is conserved *ex-situ* because it reveals information about the species' origin. The major provenance codes from the BGCI are W, Z, G, and U.

“W” denotes the plant is collected from the wild and its provenance (origin) is known.

“Z” denotes that the plant is a descendant of a known wild origin that was later cultivated.

“G” denotes that the plant is not known to have a wild origin and is instead from a cultivated species (garden origin). Cultivars and hybrids are represented by “G”.

“U” denotes the origin of the plant is unknown.

Table 3. Provenance categories of *ex-situ* conserved taxa in the NBG

S.N.	Categories	Number of “W” taxa	Number of “Z” taxa	Number of “U” taxa	Number of “G” taxa
1	<i>Ex-situ</i> conserved trees	93	58	5	8
2	<i>Ex-situ</i> conserved shrubs	40	43	1	14
3	<i>Ex-situ</i> conserved herbs	124	122	10	76
4	<i>Ex-situ</i> conserved climbers	13	12	2	1
	Total	270	235	18	99

All the cultivars (such as *Duranta erecta* 'Aureovariegata', *Duranta erecta* 'Golden Edge', *Duranta erecta* 'Variegata', etc.) and hybrids (such as *Crocosmia × crocosmiiflora* (Lemoine) N.E.Br., *Magnolia × soulangeana* Soul.-Bod., *Musa × paradisiaca* L., etc.) are treated as “G”.

Based on this study,

The total number of “W” taxa = 270

The total number of *ex-situ* conserved taxa = 270+235+18+99 = 622

Therefore, the percentage of “W” taxa conserved inside the NBG is $270/622 \times 100 = 43.41\%$. Target has been set to have 50% “W” in this garden by 2030 AD and eventually over 70%, as is customary in other international botanical gardens.

TERMINOLOGIES ADOPTED

***Ex-situ* conservation:** *Ex-situ* conservation (also known as “off-site conservation” or “out of place conservation”) is the conservation of species (plants or animals) outside of their natural habitat. For example, *Alsophila spinulosa* from Ilam, Kaski, and Syangja Districts, and *Magnolia kobus* from Japan are *ex-situ* conserved in the NBG. *Ex-situ* conserved plants can all be endemic, indigenous, native, and exotic.

The list of *ex-situ* conserved plants found in the NBG are provided in Tables 4-7.

In-situ conservation: *In-situ* conservation (also known as “on-site conservation” or “in place conservation”) is the conservation of species (plants or animals) in their natural habitat. For example, *Alnus nepalensis*, *Castanopsis indica*, and *Schima wallichii*, all commonly found in the Godawari area, are *in-situ* conserved in the NBG. *In-situ* conserved plants can be endemic, indigenous, and native but not exotic. The list of *in-situ* conserved plants found in the NBG are provided in Tables 8-11.

Endemic plants: Endemic plants are those that can only be found in a single, clearly defined geographic area, such as an island, state, country, or other geographical region. Endemic plants are the local plants found in their original or native area and are restricted to a particular geographic area. For example, *Cirsium phulchokense*, confined to Phulchowki and its adjoining areas, and *Thunbergia kasajuana*, confined to Nagarkot, Bhaktapur District, are the endemic plants of Nepal conserved in the NBG. The Nepalese endemic plants conserved in the NBG are provided in Annex 2.1.

Native plants: Native plants are those that naturally grow in a particular country, though not always throughout the entire nation. They are plants that have existed in a specific habitat and area for a significant amount of time, usually thousands of years or more. They grow naturally in the area where they evolved. For example, *Alnus nepalensis*, *Castanopsis indica*, and *Schima wallichii* are native plants of Nepal conserved in the NBG.

Indigenous plants: Indigenous plants are those that naturally grow in a specific geographic region for a long time. Additionally, that plant can be found in neighboring or distant locations of the state or nation. If a species has only occurred locally through natural evolution, it is said to be indigenous to a certain area or environment. For example, *Juglans regia*, which is native to Northeastern & Eastern Turkey to

Lebanon and West Himalaya, and *Celtis australis*, which is native to Mediterranean to Northern Iran, are indigenous plants of Nepal conserved in the NBG.

Naturalized plants: Naturalized plants are non-native species of a place that have established themselves naturally in that particular place. It differs from a “native plant” in that it could have originated as an unintentionally introduced weed, an agricultural escape, or a garden escape. It is a plant that is often imported from abroad and is not native to the region in which it grows. For example, *Amomum subulatum* is a naturalized plant in Nepal that is conserved in the NBG.

Exotic plants: Exotic plants are those that have been accidentally or purposefully introduced by man and do not exist in the area naturally. They are also known as alien plants. For example, *Ginkgo biloba*, a native of Zhejiang Province of China, and *Zephyranthes carinata*, with a native range from Mexico to Colombia, are exotic plants conserved in the NBG.

Invasive plants: Exotic plants are those that are not local species but have the potential to thrive and proliferate there, displacing local species and changing the ecosystem. Invasive plants are noxious native or non-native (alien) species that are dispersed through gardening, international trade, and human and animal transportation. For example, *Ageratina adenophora*, a perennial herb or small shrub having Mexico as a native range, and *Myriophyllum aquaticum*, an aquatic herbaceous weed having Central and Southern Tropical America as a native range, are invasive plants found inside the NBG. The list of invasive plants found in the NBG are provided in Table 12.

SOURCES OF LIVING PLANTS

Plants were either collected directly from the wild, grown from wild seed, cutting, layering, or provided as gifts. Some cultivars and hybrids were obtained from nurseries. However, the wild collection is preferred for conservation and research purposes.

WHERE ARE THE PLANTS CONSERVED INSIDE THE NBG?

The plants are conserved in various plant landscapes, thematic gardens and conservatories, which may be on soil, soil beds, ponds, walls, tree trunks, wooden baskets, wooden logs, and pots. The seasonal flowering plants mentioned in this book can only be seen during the blossoming season. However, the plants conserved in the form of seeds in the seed bank are excluded in this book. Additionally, this book does not include information on some uncommon ornamental seasonal plants that are only present during specific times of the year but are not preferred during other seasons.

NOMENCLATURE ADOPTED

The Catalogue of Life (<https://www.catalogueoflife.org>), International Plant Name Index (<https://www.ipni.org>), Plants of the World Online (<https://powo.science.kew.org>), and World Flora Online (<http://www.worldfloraonline.org>) were used as the nomenclature sources. For angiosperm nomenclature, the Angiosperm Phylogeny Group IV (APG IV) botanical classification system is adopted.

SCOPE OF THE BOOK

This book is a catalogue of plant species found in the NBG, which is intended for the general public. It aims to provide information on the garden's *in-situ* and *ex-situ* conserved plant species under various categories like trees, shrubs, herbs, and climbers (that are provided in the tables). Besides revealing information on W, Z, U, and G, if conserved *ex-situ*. In addition, the plant names for species that are particularly important, such as plant species endemic to Nepal, CITES-listed plant species, and IUCN Red List plant species, are provided in the annexes. Only the names of plant species are provided in the annexes in order to minimize repetition of information already included in the tables.

15	<i>Pontederia crassipes</i> Mart.	Pontederiaceae	जल कुम्भ	Herb	Aquatic	U	Angiosperm

Annex 1. List of the VVIPs who planted in the VVIP plantation garden

S.N.	Date of plantation	Heads of State/VVIP's Name	Designation	Country	Scientific Name	Nepali Name (नेपाली नाम)
1	04 Feb 1974	Marshal Joseph Broz Tito with Madam Broz Tito	President	Socialist Federal Republic of Yugoslavia	<i>Rhododendron arboreum</i>	Laligurans (लालिगुराँस)
2	07 April 1977	U. Ne Win with Madam Ne Win Yadana Nat Mai	President	Socialist Republic of the Union of Burma	<i>Magnolia champaca</i>	Champ (चाँप)
3	05 Feb 1978	Teng Hsiao Ping	Vice-Premier	People's Republic of China	<i>Metasequoia glyptostroboides</i>	Metasequoia (मेटासेक्वोइया)
4	06 Nov 1978	J.R. Jayawardene with Madam Jayawardene	President	Democratic Socialist Republic of Sri Lanka	<i>Podocarpus neriifolius</i>	Gunsi (गुन्सी)
5	05 June 1981	Zhao Ziyang	Premier of the State Council	People's Republic of China	<i>Ginkgo biloba</i>	Ginkgo (गिंको)
6	10 Dec 1981	Neelam Sanjeeva Reddy with Madam Neelam Sanjeeva	President	Republic of India	<i>Elaeocarpus angustifolius</i>	Rudraksha (रुद्राक्ष)
7	19 Aug 1982	Radovan Vlakjovic	Member of Presidency	Socialist Republic of Yugoslavia	<i>Bauhinia variegata</i>	Koiralo (कोइरालो)
8	12 Nov 1982	Lt. Gen H. M. Ershad with Begam Ershad	PSC Presidency of the Council of Ministers	People's Republic of Bangladesh	<i>Cedrus deodara</i>	Devdar (देवदार)
9	27 May 1983	General Mohammad Zia-ul-Haq with Begam Zia-ul-Haq	President	Islamic Republic of Pakistan	<i>Platanus orientalis</i>	Chinar (चिनार)
10	22 March 1984	Li Xiannian with Madam Lin Jiamei	President	People's Republic of China	<i>Albizia julibrissin</i> var. <i>mollis</i>	Siris (सिरिस)
11	02 May 1985	Maumoon Abdul Gayoom with Madam Nasreen Maumoon Abdul Gayoom	President	Republic of Maldives	<i>Morus alba</i>	Kimbu (किम्बु)

12	20 Feb 1986	Her Majesty Queen Elizabeth II with His Royal Highness Prince Philip	Her Majesty Queen	The United Kingdom of Great Britain and Northern Ireland	<i>Ilex excelsa</i>	Puhanle (पुँवाले)
13	25 July 1986	Giani Zail Singh	President	Republic of India	<i>Aesculus indica</i>	Lekh Pangra (लेख पाड़गा)
14	17 March 1987	Nicolae Ceausescu with Madam Elena Ceausescu	President	Socialist Republic of Romania	<i>Osmanthus fragrans</i>	Siringe (सिरिङ्गे)
15	27 Nov 1996	Prof. Dr. Roman Herzog with Madam Christiane Herzog	President	Federal Republic of Germany	<i>Castanopsis indica</i>	Dhale Katus (ढाले कटुस)
16	16 Aug 2011	Dr. Ram Baran Yadav	President	Nepal	<i>Paulownia tomentosa, Elaeocarpus angustifolius</i>	Paulonia (पौलोनिया), Rudraksha (रुद्राक्ष)
17	22 Sep 2016	Mrs. Bidya Devi Bhandari	President	Nepal	<i>Taxus mairei</i>	Lauth salla (लौठ सल्ला)

Annex 2. Important plants conserved in the NBG

2.1 Endemic Plants to Nepal

S.N.	Scientific Name	Locality
1	<i>Begonia nuwakotensis</i>	Okharpauwa, Nuwakot District, Central Nepal
2	<i>Begonia taligera</i>	Bharat Pokhari, Kaski District, Central Nepal
3	<i>Cirsium phulchokiense</i>	Naturally found in the NBG and its surroundings
4	<i>Hypericum cordifolium</i>	Dolalghat, Kavrepalanchok District, Central Nepal
5	<i>Polystichum annapurnicola</i>	Naturally found in the NBG and its surroundings
6	<i>Stellaria patens</i> var. <i>ovatifolia</i>	Naturally found in the NBG and its surroundings
7	<i>Thunbergia kasajuana</i>	Nagarkot, Bhaktapur District, Central Nepal

2.2 CITES-listed Plants

- **Appendix I:** *Paphiopedilum insigne*, *Paphiopedilum* sp.
- **Appendix II:** *Alsophila spinulosa*, *Cycas pectinata*, *C. revoluta*, *Dalbergia latifolia*, *D. sissoo*, *Dioscorea deltoidea*, *Euphorbia ammak*, *E. canariensis*, *E. milii*, *E. obesa*, *E. royleana*, *E. tirucalli*, *E. tithymaloides*, Orchid spp., *Rauvolfia serpentina*, *Sinopodophyllum hexandrum*, *Taxus contorta*
- **Appendix III:** *Gnetum montanum*, *Magnolia hodgsonii*, *Podocarpus neriifolius*

2.3 IUCN Red List Plants

- **Extinct in the Wild:** *Brugmansia suaveolens*
- **Critically Endangered:** *Lathyrus odoratus**
- **Endangered:** *Ginkgo biloba*, *Metasequoia glyptostroboides*, *Paphiopedilum insigne*, *Sequoia sempervirens*, *Taxus contorta*, *Zamia furfuracea*

- **Vulnerable:** *Cycas pectinata*, *Dalbergia latifolia*, *Ephedra gerardiana*, *Euphorbia ammak*, *Taxus mairei*
- **Near Threatened:** *Abies spectabilis*, *Cryptomeria japonica*, *Nageia nagi*
- **Least Concern:** *Acmella paniculata*, *Adenanthera pavonina*, *Agave americana*, *Albizia lebbeck*, *Alstonia scholaris*, *Araucaria bidwillii*, *A. columnaris*, *Bergenia ciliata*, *Bischofia javanica*, *Bixa orellana*, *Borassus flabellifer*, *Bougainvillea glabra*, *Brunfelsia pauciflora*, *Camellia japonica*, *C. kissii*, *Caryota urens*, *Cascabela thevetia*, *Cassia fistula*, *Cedrus deodara*, *Celosia argentea*, *Cereus repandus*, *Chlorophytum tuberosum*, *Choerospondias axillaris*, *Citrus maxima*, *Cupressus torulosa*, *Cycas revoluta*, *Dalbergia sissoo*, *Desmostachya bipinnata*, *Dumasia villosa*, *Erythrina crista-galli*, *Euphorbia canariensis*, *E. milii*, *E. tirucalli*, *E. tithymaloides*, *Ficus benjamina*, *Gnetum montanum*, *Harrisia martinii*, *Hydrilla verticillata*, *Jatropha curcas*, *Juglans regia*, *Juniperus communis*, *J. horizontalis*, *J. indica*, *J. recurva*, *J. squamata*, *Lagerstroemia indica*, *Lindenbergia indica*, *Macropanax dispermus*, *Magnolia champaca*, *M. grandiflora*, *M. hodgsonii*, *M. insignis*, *Mentha arvensis*, *M. spicata*, *Mimosa pudica*, *Myriophyllum spicatum*, *Nasturtium officinale*, *Nerium oleander*, *Nymphaea lotus*, *Oplismenus compositus*, *Opuntia microdasys*, *Osmanthus fragrans*, *Persicaria hydropiper*, *Picea smithiana*, *Pinus patula*, *P.roxburghii*, *P. wallichiana*, *Plumeria rubra*, *Poa annua*, *Podocarpus nerifolius*, *Polygonatherum paniceum*, *Pteris vittata*, *Senegalalia catechu*, *Syzygium jambos*, *Tectaria coadunata*, *Vachellia nilotica*, *Vicia sativa* subsp. *nigra*, *Vitex negundo*, *Zantedeschia aethiopica*
- **Data Deficient:** *Gossypium herbaceum*, *Magnolia coco*, *M. kisopa*, *M. kobus*, *Opuntia ficus-indica*, *Platanus orientalis*, *Thunbergia kasajiana*

Annex 3. Fact sheet of the NBG

Foundation laid	July 12, 1961 (Asadh 28, 2018) by Deputy Minister Khagendra Jung Gurung of Ministry of Forests and Agriculture	Renamed as National Botanical Garden on July 3, 2006 (Asadh 19, 2063)
Established	October 28, 1962 (Kartik 12, 2019) as Royal Botanical Garden; NBG Day	Inaugurated by King Mahendra
Access	10 km southeast from Satdobato, Lalitpur District	
Area covered	82 hectares	About 40 hectares used as garden
Location	Godawari-2 & 3, Lalitpur District	
Altitude	1480–2000 m	
Climatic Zone	Sub-tropical to Temperate	
Longitude	85°22'37"E to 85°23'17"E	
Latitude	27°35'40"N to 27°35'53"N	
Temperature	20°C to 30°C during summer, and -5°C to 20°C during winter	
Annual Rainfall	2595 mm	
Special Day	Plant Conservation Day (May 18)	
Logo	<i>Lilium nepalense</i> D.Don	Khiraul, Banlasun - Nepalese lily
Plants	1088 species (1099 taxa)	613 <i>ex-situ</i> conserved, 460 <i>in-situ</i> conserved & 15 invasive species
Angiosperms	904 species (913 taxa)	541 <i>ex-situ</i> + 357 <i>in-situ</i> conserved + 15 invasive taxa
Gymnosperms	29 species (31 taxa)	31 <i>ex-situ</i> conserved
Pteridophytes	109 species (109 taxa)	73 <i>ex-situ</i> + 36 <i>in-situ</i> conserved
Bryophytes	46 species (46 taxa)	46 <i>in-situ</i> conserved
Trees	201 species	161 <i>ex-situ</i> + 40 <i>in-situ</i> conserved
Shrubs	147 species	94 <i>ex-situ</i> + 52 <i>in-situ</i> conserved + 1 invasive species
Herbs	684 species	330 <i>ex-situ</i> + 340 <i>in-situ</i> conserved + 14 invasive species
Climbers	56 species	28 <i>ex-situ</i> + 28 <i>in-situ</i> conserved
Endemic plants	7 species	4 <i>ex-situ</i> + 3 <i>in-situ</i> conserved
CITES-listed plants	94 species (Including orchid species)	Appendix I- 2 species Appendix II- 89 (16+73) species Appendix III- 3 species

IUCN Red List plants	102 species	Extinct in the Wild = 1 species Critically Endangered = 1 species* Endangered = 6 species Vulnerable = 5 species Near Threatened = 3 species Least Concern = 79 species Data Deficient = 7 species
Number of “W” taxa	270	93 trees + 40 shrubs + 124 herbs + 13 climbers
Number of “Z” taxa	235	58 trees + 43 shrubs + 122 herbs + 12 climbers
Number of “U” taxa	18	5 trees + 1 shrub + 10 herbs + 2 climbers
Number of “G” taxa	99	8 trees + 14 shrubs + 76 herbs + 1 climber
Largest family	Orchidaceae (76 species)	<i>Ex-situ</i> conserved: 69 species, <i>In-situ</i> conserved: 7 species
Largest genus	<i>Coelogyn</i> e (16 species)	<i>Ex-situ</i> conserved: 11 species, <i>In-situ</i> conserved: 5 species
Mammals	25 species	
Birds	290 species	
Butterfly	250 species

Photographs

(Plants)

Acmella paniculata

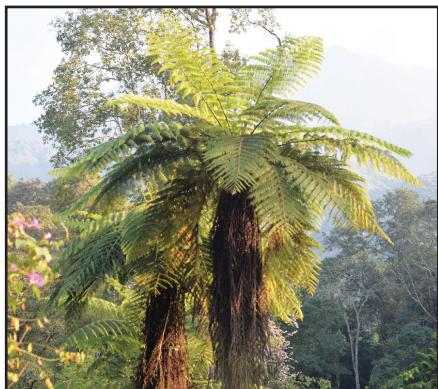

Aesculus indica

Albizia julibrissin

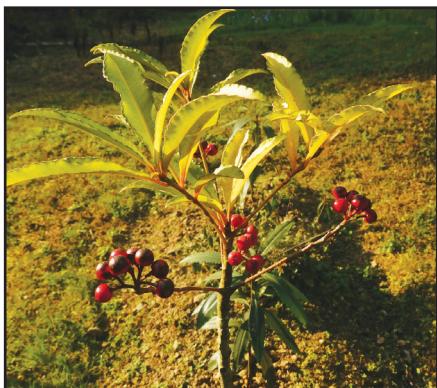

Alnus nepalensis

Alsophila spinulosa

Angiopteris helferiana

Ardisia macrocarpa

Asparagus racemosus

Astilbe rivularis

Bauhinia purpurea

Begonia taligera

Berberis aristata

Bischofia javanica

Brugmansia suaveolens

Brunfelsia pauciflora

Bulbophyllum umbellatum

Carex cruciata

Castanopsis indica

Chaenomeles japonica

Chlorophytum nepalense

Choerospondias axillaris

Chrysanthemum x morifolium

Cinnamomum glanduliferum

Cleisostoma racemiferum

Clematis buchananiana

Coelogyne cristata

Coelogyne flaccida

Coelogyne fuscescens

Coelogyne stricta

Colquhounia coccinea

Cuphea procumbens

Cymbidium elegans

Cymbidium erythraeum

Dendrobium amoenum

Dendrobium chrysanthum

Dendrobium densiflorum

Dendrobium fugax

Dendrobium heterocarpum

Dendrobium longicornu

Drynaria coronans

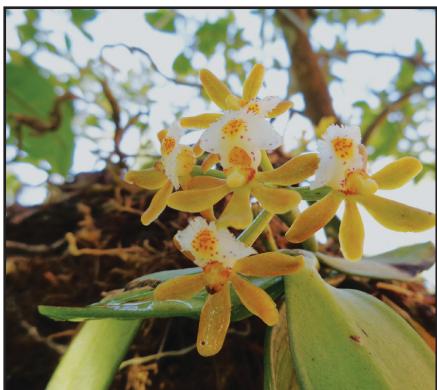

Eria coronaria

Ficus auriculata

Fraxinus floribunda

Gastrochilus acutifolius

Ginkgo biloba

Girardinia diversifolia

Hedychium gardnerianum

Holmskioldia sanguinea

Hypericum cordifolium

Hypericum podocarpoides

Imperata cylindrica

Iris domestica

Juglans regia

Leucaena leucocephala

Leucosceptrum canum

Leycesteria formosa

Lilium nepalense

Liparis viridiflora

Lonicera japonica

Luculia gratissima

Magnolia hodgsonii

Magnolia kobus

Melastoma malabathricum

Myrica esculenta

Opuntia ficus-indica

Osmanthus fragrans

Paphiopedilum insigne

Paris polyphylla

Platycodon grandiflorus

Pogostemon plectranthoides

Prunus cerasoides

Pyracantha crenulata

Rauvolfia serpentina

Rhododendron arboreum

Rhynchosystylis retusa

Rosa banksiae

Rosa moschata

Roscoea purpurea

Rubus ellipticus

Saccharum spontaneum

Salvia coccinea

Saurauia napaulensis

Schima wallichii

Solidago canadensis

Spiraea bella

Spiraea japonica

Taxus mairei (female)

Taxus mairei (male)

Thunbergia coccinea

Thunbergia kasajuana

Thysanolaena latifolia

Vanda cristata

Wisteria sinensis

Woodfordia fruticosa

Zanthoxylum armatum

Zehneria japonica

About Authors

Dr. Gaurav Parmar works as a researcher at the National Botanical Garden, DPR, MoFE, Nepal. He earned his Masters in Botany from the Central Department of Botany, Tribhuvan University, Nepal in 2013 and his PhD in Plant Systematics from the Institute of Botany, University of Chinese Academy of Sciences, China in 2021. His primary areas of research interest include the plant systematics and Nepalese flora documentation, with a focus on the floras of the Vitaceae, Zingiberaceae, and Musaceae. He has published more than 15 research papers in reputed journals, such as *Taxon*, *Journal of Systematics and Evolution*, *Microscopy Research and Technique*, *Edinburgh Journal of Botany*, *PhytoKeys*, and others.

Dipak Lamichhane is the Chief and Senior Garden Officer of the National Botanical Garden, DPR, MoFE, Nepal. He earned his Masters in Botany, with specialization in plant ecology, from the Central Department of Botany, Tribhuvan University, Nepal in 2002. His main research interests include the conservation of native, indigenous, endemic and threatened plants of Nepal, besides the management and development of botanical gardens in Nepal. He has participated in various national and international conferences and has authored a number of research articles and books.

Jeevan Pandey works as a Garden Officer at the National Botanical Garden, DPR, MoFE, Nepal. He earned his Masters in Botany, with specialization in plant taxonomy, from the Central Department of Botany, Tribhuvan University, Nepal in 2007. His primary areas of interest in research are ethnobotany, floristics, agrotechnology and the medicinal values of plants. He has taken part in both national and international conferences and has written both a book and a number of research papers.
