

ELECTRICITY TRANSMISSION PROJECT MCC NEPAL COMPACT

DELIVERING

More **POWER** – a high-capacity 400kV transmission line and three new substations benefitting 23 million Nepalis.

More **RELIABILITY** – ensuring that affordable and reliable electricity is available for families, businesses, and schools throughout the year.

More **GROWTH** – harnessing Nepal's huge hydropower potential for the benefit of all Nepali people, now and well into the future.

More **ENVIRONMENTAL SUSTAINABILITY** – reducing reliance on fossil fuels and growing renewable energy opportunities across the country and region.

LINKING

More of the **NATIONAL GRID** – 315km of new transmission lines and three substations that will become the core backbone for the country's infrastructure and energy future.

More **MARKETS** – providing long-term export opportunities in the region, encouraging investment that will contribute to Nepal's economic growth.

INVESTING

More than **\$300M** in Nepali-owned transmission infrastructure to elevate our business environment.

More in **STRENGTHENING CAPACITY** in the energy sector.

More in economic growth so our children have **MORE OPPORTUNITIES** and brighter futures.
