The Prime Minister

## MESSAGE

**The National Population and Housing Census 2021** in Nepal has been completed successfully by the government. The census was part of the country's integrated National Statistical System and aimed to gather valuable data about the demographics, social characteristics and economic conditions of Nepal's population. The high-quality diverse data collected from the census will provide insights into how well are able to access basic services and exercise their fundamental rights as outlined in the Constitution of Nepal.

Since the adoption of its new constitution in 2015, Nepal has undergone significant political, economic and socio-cultural changes and is now a federal republic with three levels of government. These governments are responsible for implementing policies, plans and programs that promote good governance together with sustainable and inclusive development in line with the country's priorities and commitments to the national and international development goals including SDGs. The government has also set the goal of achieving lower middle-income country status by 2026 and middle-income country status by 2030 through equitable economic growth. In this context, it is essential that the results of the recent census which provide valuable information about the current demographic status of the country will help to develop evidence-based plans and policies and help for transformation of Nepal into a modern, just and prosperous nation.

I would like to extend my gratitude to all levels of government including federal, provincial, and local governments for their timely guidance and support during the various stages of the census operation. The National Statistics Office team deserves special recognition for successfully completing a large-scale task during the challenging situation of COVID-19 pandemic.

Finally, I would hereby like to express my thanks to all respondents, field staffs, the international agencies and all other stakeholders for their cooperation in this important national effort that occurs once every ten years.

March, 2023

  
Pushpa Kamal Dahal 'Prachanda'

Dr. Min Bahadur Shrestha  
Vice Chairman

Government of Nepal  
**National Planning Commission**  
Singha Durbar, Kathmandu

**FOREWORD**

I am pleased that the National Population and Housing Census 2021, the 12<sup>th</sup> in the series of census taking and first in the federal context of the country, has been successfully accomplished by the National Statistics Office. This census has provided a wealth of invaluable benchmark data about demographic, social and economic characteristics of Nepal's population. It has generated relevant, accurate, timely and comprehensive small area statistics on population such as composition, characteristics, spatial distribution, and organization in terms of families and households that will be used for policy-making, planning and resource allocation, and administrative purposes, providing data for business, industry, and election exercises, providing a master sampling frame for surveys, housing statistics and assessment of the quality of housing, and research among others.

The results of the census are timely in relation to the current political, economic and social transformation that Nepal is undergoing. Nepal is a federalized country with three tiers of government, each responsible for their own policies, plans and programmes, fostering good governance, and accelerating sustainable and inclusive development, including for women, girls and other vulnerable populations. Nepal is aspiring to graduate from Least Developed Country (LDC) status by 2026, to become a middle-income country by 2030. In this regard, the census results will help for tracking progress towards achieving this economic goal. Similarly, the invaluable data and evidence generated from this census will be used across many relevant sectors and for a range of critical policy and planning and resource allocation decisions including for defining the pace of change required to achieve the national development goals; understanding the challenges and gaps in achieving inclusive and Sustainable Development Goals, accelerating the implementation of the Program of Action, leaving no one behind, ensuring rights and choices for all, that Government of Nepal is committed to. Hence, I anticipate that all stakeholders at all levels will use the comprehensive information from the census for evidence-based plan and policies to transform Nepal into a prosperous nation.

I would acknowledge the effort of the entire team of National Statistics Office, that tirelessly led the overall management of this historical and huge statistical operation to a successful end amidst several challenges. I want to appreciate the professional competency of entire census team, then led by the Deputy Chief Statistician (then Director General), Mr. Nebin Lal Shrestha. I also acknowledge the cooperation, technical inputs and support from all levels of governments, the Development Partners for their contributions and all stakeholders for their patience and support.

Finally, I would like to thank all the members of the Steering Committee of the National Population and Housing Census 2021. Also, thanks are due to all who have contributed to the different stages of census process.

Dr. Min Bahadur Shrestha

March 2023

Kathmandu, Nepal

*Chief Secretary*

## FOREWORD

I am pleased to present the National Report of the 12th National Population and Housing Census conducted by the National Statistics Office (formerly known as the Central Bureau of Statistics) in 2021, which also marks the first census conducted under Nepal's federal structure. The purpose of the census is to generate reliable, timely, and comprehensive statistics at the most granular level of administration, which will be beneficial for crafting policies, delivering services, allocating resources, fulfilling national development objectives, and identifying marginalized populations.

Conducting a population census is a massive undertaking, and I would like to express my sincere gratitude to all those who were involved in the planning, implementation, data collection, and data processing activities. I offer my heartfelt gratitude to the Steering Committee of the 2021 National Population and Housing Census, led by the Honorable Vice-Chair of the National Planning Commission, as well as to the members of the Coordination Committees, Technical Committee, Thematic Committees, and Working Groups who have made significant contributions throughout the census process. I would like to extend special thanks to the entire National Statistics Office (NSO) team, then headed by Mr. Nebin Lal Shrestha, deputy Chief Statistician (former Director General), who tirelessly oversaw the management of this significant and ambitious statistical operation despite facing many challenges, including the COVID-19 pandemic, and brought it to a successful conclusion. Furthermore, I acknowledge the cooperation, technical assistance, and support provided by all levels of government, UNFPA, and other development partners. The population census, conducted once every ten years, would not have been possible without the commitment and tireless efforts of everyone.

I am certain that the data outlined in this report will be of great value to policymakers, researchers, and other stakeholders involved, and I encourage them to make use of it. I hope that this timely report generated through reliable census data will be widely used and that it will make a meaningful contribution to the development of our nation.

## Foreword

I am delighted to announce the publication of the results from the latest 12th series of National Population and Housing Census 2021. This census was conducted as part of our integrated national statistical system, in accordance with the provisions of Nepal's Constitution and the purpose of the census.

The census results are timely, given the significant changes in Nepal's political, economic, and social conditions. Following the promulgation of the new Constitution of Nepal in 2015, Nepal transitioned to a federal democratic republic with a three-layered government structure and a development roadmap towards prosperity. Nepal aspires to become a middle-income country by 2030, and tracking progress towards this goal requires robust, reliable and timely data. The census results provide population data to measure progress and assess how well Nepali people are enjoying their fundamental human rights to basic services, as enshrined in the Constitution. I am optimistic that the census data will be used for policy and planning decisions, including achieving national development goals, identifying marginalized populations, and understanding development gaps and challenges.

This census attribute is more important than ever as there is enormous demand for high granularity dataset in Nepal's new context of decentralization in social and economic planning, provision of social services and resource allocation. Accordingly, the census process and results were designed and managed to generate comprehensive demographic, social, and economic data in consultation with stakeholders. Therefore, I urge all stakeholders to make use of the current information for evidence-based planning and policies that can help to achieve its goal of becoming a prosperous nation.

The census process was led by the former Director General of Central Bureau of Statistics (Now National Statistics Office), Mr. Nebin Lal Shrestha, and hence I would like to express my special appreciation to him and the entire team of National Statistics Office, who tirelessly worked for this huge statistical operation to make it successful amidst several challenges. I also acknowledge the cooperation, technical inputs and support from all levels of governments and UNFPA for coordinating the support on behalf of the development partners.

I express my gratitude to the Steering Committee of the National Population and Housing Census 2021 led by the honorable Vice-chair of the National Planning Commission. I also extend my thanks to the members of various Technical Committees, Working Groups, and development partners who have contributed to the different stages of the census process.

Finally, I would like to thank all the respondents who trusted us and provided their truthful information to us to make this census successful.

## Preface

The Statistics Act 2022 led to the establishment of the National Statistics Office (NSO), which replaced the 64-year-old Statistics Act 1958. The former Central Bureau of Statistics (CBS) was headed by the Director General at the Joint Secretary level but has now been upgraded to the Secretary level NSO and placed under the leadership of the Chief Statistician. In 2021, the Director General led the twelfth round of the National Population and Housing Census (NPHC) conducted by CBS.

The 2021 NPHC is the first census conducted under the federal structure of Nepal. The main census enumeration was originally scheduled to take place over 15 days from June 8 to 22, 2021, but due to the COVID-19 pandemic, the enumeration was postponed for five months. Once the impact of the pandemic subsided, the enumeration was carried out according to a new work plan for a 15-day period from November 11 to 25, 2021.

This report contains statistical tables at the national, provincial, district, and municipal levels, derived from the topics covered in the census questionnaires. The work of analyzing the data in detail is still in progress. The report provides insights into the different aspects of the census operation, including its procedure, concepts, methodology, quality control, logistics, communication, data processing, challenges faced, and other management aspects.

This census slightly differs from previous censuses mainly due to the following activities: i. three modes of data collection (CAPI, PAPI, and e-census); ii. a full count of all questions instead of sampling for certain questions, as was done in the previous two censuses; iii. collaboration with the Ministry of Health and Population to ascertain the likely maternal mortality cases reported in the census by skilled health personnel; iv. data processing within its premises; v. recruitment of fresh youths as supervisors and enumerators; and vi. using school teachers as master trainers, especially for the local level training of enumerators.

Many organizations and individuals have made invaluable contributions to the successful completion of this census. The census operation was guided by various committees, including the National Population Census Steering Committee, National Population Census Coordination Committee, and High-level Coordination Committee for Classification of Caste-Ethnicity, Language, and Religion, which were respectively chaired by the National Planning Commission's Honorable Vice-chair, Honorable Member, and Secretary. Professor Dr. Pushpa Raj Kandel and Dr. Biswo Nath Poudel served as chairs of the Steering Committee, while Dr. Ram Kumar Phuyal led the Coordination Committee during their tenure. Mr. Kewal Prasad Bhandari serves as the chair of the Coordination Committee for Classification of Caste-Ethnicity, Language, and Religion. Additionally, the census Technical Committee, led by the Director General of the CBS,

and various Thematic Committees, led by Deputy Director Generals of the CBS, were also active during the operation. Different coordination committees were also present at the Provincial, District, Local, and Ward levels, all chaired by relevant government officials. I am extremely grateful to all the chairpersons and members of these committees for their invaluable contributions.

Mr. Suman Raj Aryal, the then Director General of the CBS, made significant contributions to the initial planning of the census during his tenure. Dr. Hem Raj Regmi, former Deputy Director General of the CBS and Chief of the Social Statistics Division, played an efficient leading role in planning and managing the census. Mr. Dhundi Raj Lamichhane and Mr. Keshab Kumar Gautam, Directors in the Population Section, steered the managerial and technical aspects of the census. I want to express my sincere appreciation to all for their invaluable contributions.

The efforts of Statistics Officers, Mr. Nanda Lal Sapkota, Mr. Deenanath Lamsal and Mr. Nirajan Sharma as well as Statistics Assistant, Mr. Bishnu Raj Regmi, were instrumental in laying the foundation for every census activity. Mr. Dol Narayan Shrestha, the section's Computer Officer, effectively managed every step of data processing, from CAPI and Windows data entry application programming to data cleaning and tabulation. Mr. Kapil Dev Joshi, Statistics Officer, also deserves recognition for his successful management of e-census activities. Similarly, the contributions of Statistics Officers Mr. Prakash Pokharel, Mr. Sabindra Maharjan, and Computer Officer Mr. Khadga Bahadur Rana in various activities such as coding guidance, help desk management, and data processing support were also invaluable. The entire team of census store management, led by the Statistics Officer, Mr. Hari Om Pokharel, and supported by the Statistics Assistant, Mr. Ashok Neupane, performed admirably. The district census officers were responsible for overseeing all aspects of the census at the district level, from recruiting field staff to training supervisors and monitoring their progress. Meanwhile, local census officers played a key role in conducting training for enumerators, managing fieldwork, and ensuring efficient data collection at the local level. I am deeply grateful for the tireless efforts and hard work of everyone involved.

The duo Deputy Director General of the CBS, Mr. Dilli Raj Joshi and Ms. Munni Kumari Chaudhary, provided leadership in various aspects of the census. Mr. Dilli Raj Joshi was involved from the beginning of the census planning phase, while Ms. Munni Kumari Chaudhary was involved during the report preparation phase. The Director of the GIS Section, Mr. Birendra Kumar Kayastha along with Statistics Officers Mr. Tika Ram Mahato, Mr. Jiban Paudel, and Computer Officer Mr. Lilanath Pandey, contributed to the timely production of high-quality Enumeration Area (EA) maps. Similarly, Director Mr. Rishi Ram Sigdel and Statistics Officers Mr. Prakash Poudel and Mr. Bimal Bhattarai were responsible for training management at the central and provincial level. I want to take this opportunity to express my sincere thanks to all of them for their exceptional efforts.

The Under Secretaries, Mr. Bishwaroop Dahal and Mr. Kedar Nath Poudel, and the administration and financial administration teams facilitated procurement, recruitment, and other related activities for the census. Director Ms. Sahanlaxmi Tamrakar and the former Directors Mr. Shanker Lal Shrestha, Mr. Indra Bahadur Karki, and Mr. Lila Prasad Mishra contributed in different activities of the census, which were instrumental in its successful

completion. Mr. Kapil Prasad Timalsena, Under Secretary of the Population Management Division of the Ministry of Health and Population, took a leadership role in coordinating and executing the verbal autopsy, which was carried out by skilled health personnel to ascertain likely maternal mortality cases reported in the census. I am extremely grateful for the commitment and hard work of each and every person involved.

Nepal Telecom and NCELL played a crucial role in promoting the census through CRBT messages on mobile phones, which helped to increase participation and coverage. In addition, various media outlets, including FM radio, television, newspapers, and individuals working in these fields contributed to publicizing and raising awareness about the census at different stages of the process. The National Federation of the Disabled-Nepal (NFDN) and rights organizations from the LGBTIQ+ community also provided support for the census through the provision of experts and materials for distribution, as well as by assisting with training and publicity efforts. My sincere thanks go to all the organizations and individuals involved.

The census was conducted in accordance with the latest recommendations from the United Nations Population Fund (UNFPA). The UNFPA and UNWOMEN country office provided valuable support for the census, including technical and logistical assistance, as well as support for a range of census activities. My sincere thanks go to UNFPA for coordinating their support on behalf of the development partners, including catalytic contributions from the British Embassy in Kathmandu and the Swiss Agency for Development and Cooperation (SDC) for providing assistance that enabled the NSO to carry out the census.

I extend my sincerest appreciation to all respondents for their invaluable contributions, as well as to the dedicated teams of data entry operators, coders, enumerators, supervisors, master trainers, trainers, officers, and officials of the local, district, and provincial census offices, and all others who played a vital role in the collection, processing, and compilation of this essential data.

I hope that this volume will be extremely useful and will meet the needs of the users to the maximum extent. I also would like to request to all the users of this report to provide us with suggestions for any improvement that we can make.

We always like to hear from you!

**Nebin Lal Shrestha**  
Deputy Chief Statistician  
(Former Director General, CBS)

# Part I:

## Key Results

- 1. Population:** The total population of Nepal, as of the census day (25 November 2021) is 29,164,578, of which the number of males is 14,253,551 (48.98 %) and the number of females is 14,911,027 (51.02 %). Accordingly, the sex ratio is 95.59 males per 100 females. The total population was 26,494,504 with sex ratio of 94.16 males per 100 females in 2011.
- 2. Population of other gender:** In the 2021 census, information about the total number of male, female and 'other gender' (sexual and gender minorities) usually living in the households was collected through the house and household listing form in the first phase of census fieldwork. Accordingly, there are a total of 2,928 individuals (0.01 percent of the total population) reported as 'other gender'. However, in the main questionnaire, the detail characteristics of the individuals from this community have been enumerated under male or female category based on their biological sex. By province, among those who reported as 'other gender', the highest number (32.7 %) are in Bagmati province whilst the lowest number (2.8 %) are in Karnali province. The percentage of population of this community in Madhesh, Lumbini, Koshi, Gandaki and Sudur Pashchim provinces are 24.9, 14.8, 10.4, 7.8 and 6.8 respectively out of the total 'other gender' population.
- 3. Annual average population growth rate:** Annual average population growth rate is 0.92 percent in 2021. This rate was 1.35 percent in 2011. By district, the annual average population growth rate is the highest in Bhaktapur (3.35%) and the lowest in Ramechhap (-1.67%).
- 4. Population density:** The population density (number of people per square kilometer of area) is 198 in 2021, which was 180 in 2011. By ecological belt, the highest population density is 460 in the Tarai region and the lowest is 34 in the Mountain region. The highest population density is in Kathmandu district (5,169) and the lowest in Manang district (3).
- 5. Population by broad age group:** The census 2021 shows that 61.96 percent of Nepal's total population is between the ages of 15–59 years. The population of this age group was 56.96 percent in 2011. Currently, the population aged 14 years or below and 60 years or above are 27.83 percent and 10.21 percent, respectively.
- 6. Number of households:** The total number of households has increased from 5,427,302 in 2011 to 6,666,937 in 2021, an increase by 23 percent. The total number of conventional (non-institutional) households in 2021 is 6,660,841 which was 5,423,297 in 2011
- 7. Average household size:** The census 2021 shows that average household size is 4.37 persons per household whereas it was 4.88 in 2011. By ecological belt, average household size is 4.33 persons per household in the Mountain region, 3.99 in the Hill and 4.73 in the Tarai region. The average household size is the highest (5.94) in Rautahat district and the lowest (3.49) in Gorkha and Dolakha districts.
- 8. Urban/Rural municipality population:** In the 2021 census, the population in urban municipalities has reached 66.17 percent, while the population in rural municipalities has reached 33.83 percent. After reallocating the population of 2011 census according to the federal structure, the population in urban and rural municipalities were 63.19 percent and 36.81 percent respectively. The sex ratio of population in urban municipalities in 2011 was 95.89, but it has remained at 96.06 in 2021, while in rural municipalities, it has increased from 91.27 to 95.59.
- 9. Districts with highest and lowest population:** Kathmandu district has the highest population (2,041,587 persons) and Manang district has the lowest population (5,658 persons) among the 77 districts of the country. Morang, Rupandehi, Jhapa and Sunsari districts are the second, third, fourth and fifth most populous districts respectively. Mustang, Dolpa, Rasuwa and Humla are the second, third, fourth and fifth districts in terms of lowest population respectively.
- 10. Population by ecological belt:** As per the 2021 census, 53.61 percent (15,634,006 persons) of the total population live in the Tarai region, 40.31 percent (11,757,624 persons) in the Hill and 6.08 percent (1,772,948 persons) in the Mountain region. The population was 50.27 percent (13,318,705 persons) in the Tarai region, 43.01 percent (11,394,007 persons) in the Hill and 6.73 percent (1,781,792 persons) in the Mountain region in the 2011 Census.

11. **Population by province:** The distribution of population by province in 2021 shows that the share of population is the highest in Bagmati province (20.97 %) and the lowest in Karnali province (5.79 %). Likewise, Madhesh province has the second largest population. Similarly, Koshi, Lumbini, Sudurpaschim and Gandaki Province are the third, fourth, fifth and sixth respectively in terms of population size in 2021.
12. **Number of building structures by main use:** All the building structures of the country have been enumerated for the first time in the census 2021. The building structures have been classified into 12 different types according to their main use. The main use is that for which the most part of the structure is used. There are 75,52,066 building structures in total in the country, out of which, 71.7 percent have been mainly used for residence, 10.1 percent for shed or storage, 6.3 percent vacant, 3.1 percent for business/trade, 1.1 percent for educational purpose, 0.4 percent for industry/manufacturing establishment, 0.4 percent for institutional use, 0.4 percent for government, 0.3 percent for hotel and lodge, 0.2 percent for health related purpose, 0.1 percent for banking and financial institutions and 5.9 percent for other (such as Kitchen) purpose. As regards to the provincial results, 75 percent of the buildings in Lumbini province and 68 percent of the buildings in Sudur Pashchim province have been used mainly for residential purpose.
13. **Ownership of housing unit:** Out of the total 6,660,841 conventional households, 86.0 percent reside in their own housing units while 12.8 percent reside in rented housing units in 2021. In the 2011 census, the proportions of the households residing in their own housing units and rented housing units were 85.3 percent and 12.8 percent respectively. According to the 2021 census, 0.6 percent of households live in institutional housing units and 0.7 percent of households live in other type of housing units.
14. **Main source of drinking water:** The 2021 census shows that tap/piped water (inside and outside household premises combined) is the main source of drinking water for 57.0 percent of the total households (6,660,841). Other main sources of drinking water for households are well/hand pump 29.8%, jar/bottled water 4.6%, spout 3.9%, uncovered well/kuwa 2.1%, covered well/kuwa 1.5% and river/stream 0.4% of the total households. The 2011 census had shown that tap/piped water was the main source of drinking water for 47.8 percent of the total households (5,423,297) while tube well/hand pump was the main source of drinking for 35.1 percent of the total households.
15. **Main source of fuel for cooking:** The 2021 census shows that more than half (51 %) of the total households in the country usually use wood/firewood as the main source of fuel for cooking. Other main sources of fuel for cooking are liquefied petroleum gas-LPG 44.3%, cow-dung 2.9%, biogas 1.2%, electricity 0.5%, kerosene 0.05% and other 0.1% of the total households. The 2011 census had shown that 64.0 percent of the total households usually used wood/firewood for cooking.
16. **Main source of lighting:** The census 2021 shows that the majority of the households use electricity as the main source of lighting. The percentage of the households that use electricity as the main source of lighting has increased to 92.2 percent in 2021 from 67.3 percent in 2011. Other main sources usually used for lighting are solar energy 6.6%, kerosene 0.6% and other sources 0.6% of the households in 2021. The percentages of households that use kerosene, solar, and other sources for lighting were 18.3, 7.4 and 6.1 respectively in 2011.
17. **Household assets/amenities:** The 2021 census results show that 3.88 percent of the total households do not have any of the household assets/amenities while 96.12 percent of the households have at least one household asset/amenity. By type of household assets/amenities, 73.15 percent of households have ordinary mobile phones, followed by 72.94 percent of households with smart mobile phones. Similarly, other assets/amenities available in the households are electric fan 53.1%, television 49.37%, internet facility 37.72%, bicycle 35.21%, motorcycle/scooter 27.3%, refrigerator 23.7%, computer/laptop 15%, washing machine 4.2% and car/jeep/van 3.1% of households.
18. **Toilet facility:** Out of the total 6,660,841 conventional households (excluding institutional households) enumerated in the 2021 census, 95.5 percent of the households use one or the other type of toilet facility, while 4.5 percent of them do not have access to any toilet facility. The 2011 census had shown that 38.2 percent of the total households did not have access to any toilet facility.
19. **Female ownership in house and land:** Overall, 23.8 percent of the total households have ownership of land or a housing unit or both (land & housing unit) in the name of female household member. The percentage of the households with female ownership of both land and housing unit is 11.8 percent, which is an increase of 1.1 percent point compared to that in 2011.

20. **Number of households operating small scale enterprises other than agriculture:** The census results show that there are 6,27,887 (9.4 %) households operating small scale enterprise other than agriculture with no paid employee. Among such households, 137,644 (21.9 %) operate cottage industry, 310,651 (49.5 %) operate trade/business, 34,656 (5.5 %) operate transportation, 69,177 (11 %) operate service related and 75,559 (12 %) operate other types of such small-scale enterprise in the country, of which 55 percent are mainly operated by male and 45 percent by female. Province wise, the highest and lowest number of households operating such enterprise are respectively in Bagmati 153,522 (24.5 %) and Karnali 32,463 (5.2 %) households respectively.
21. **Absentees population abroad:** The 2021 census shows that a total of 2,190,592 persons from 1,555,961 households (23.4%) are absent and living abroad. Out of the total absentees living abroad, 1,799,675 (82.2 %) are male and 390,917 (17.8 %) are female. In 2011, 1,921,494 persons from 1,378,678 (25.4%) households were absent abroad of which males were 87.6% and females were 12.4%.
22. **Female household head:** Overall, 31.55 percent of the total households (6,666,937) are headed by female, which is an increase of 5.82 percent points since 2011.
23. **Marital status:** The 2021 census shows that 33.1 percent of the total population aged 10 years or above are never married. By sex, 38.2 percent of the total males and 28.4 percent of the total females aged 10 years or above are unmarried. Similarly, 61.8 percent of the total population aged 10 years and above are married and 4.5 percent are window/widower. By sex, 59.1 percent of the total males and 64.3 percent of the total females of this age group are married.
24. **Age at first marriage:** The 2021 census shows that 34.4 percent (Male: 32.6% and Female: 35.9 %) of the ever-married population aged 10 years and above had their first marriage between the ages of 18 and 20. Similarly, 22.3 percent (Male: 12.3 %; Female: 30.4 %) of them got married for the first time in the ages between 15 to 17 years. Further, 7 percent (Male: 3.0 % and Female: 10.2 %) of them got married for the first time at the ages of 10-14 years. Some of them (0.3 %) got married for the first time under the age of ten years. Overall, the median age at first marriage is 19 years. By sex, the mean age at first marriage is 21 years for male and 18 years for female.
25. **Disability:** The 2021 census shows that 2.2 percent of the total population have one or the other type of disability. Among the total persons with disability, 54.2 percent are males and 45.8 percent are females. The 2011 Census had shown that 1.94 percent of the total population had one or more types of disabilities.
26. **Literacy rate:** The literacy rate of the country's total population aged 5 years and above is 76.3 percent in 2021 census. Male literacy rate is 83.6 percent while female literacy rate is 69.4 percent. In the 2011 census, overall literacy rate was 65.9 percent; while male literacy rate was 75.1 percent compared to female literacy rate of 57.4 percent.
27. **Education level completed:** The largest proportion (28.7 %) of the total literate population have completed primary level (class 1 to 5) of education. Similarly, 19.9 percent of the total literate population have completed lower secondary level (class 6 to 8), followed by 9.5 percent who completed S.L.C (or equivalent). Likewise, 19.5 percent have completed higher levels (above S.L.C or equivalent) of education.
28. **Population by place of birth:** Out of the total population, 69 percent have their place of birth and current residence in the same municipality. By sex, 78.3 percent male and 60 percent female have their birth place in the current residence. Overall, 9 percent of the total population was born in another municipality of the district of current residence, 19.5 percent of the population was born in another district and 2.5 percent was born abroad.
29. **Population by former place of residence for current migration:** Overall, 68 percent of the population have their usual place of former residence in the same place as they were enumerated. This is 77.0 percent for male and 59.4 percent for female. On the other hand, 10.7 percent of the total population had their former usual place of residence in another municipality of the respective district, 18.2 percent of the population had their former residence in another district and 3.1 percent had their former residence abroad.
30. **Population at the current place of residence by duration of last migration:** Out of the total 9,341,408 people who currently migrated, for the highest percentage of the migrants (31.8 %), the duration of stay in the current place of residence is 10-24 years, while for the lowest percentage of the migrants (3.5%) the duration of stay in the current place of residence is less than 1 year. Similarly, for 4.0 percent of the total migrants, the

duration of migration is over 50 years. Likewise, in terms of duration of last migration by sex, for 29.1 percent of males and 33.3 percent of females the duration of last migration is 10-24 years.

31. **Reasons for current migration:** Marriage is the main reason for current migration, which is 38.2 percent. Other reasons for current migration are work/job (15.2 %), trade/business (2.8 %), study/training (7.8 %), dependent family member (19.5 %), natural disaster (0.7 %), agriculture (3.9 %), returnee (4.1 %) and other (6.6 %). By sex, 30.6 percent of male who migrated are due to work/job and 58.2 percent of female are due to marriage.
32. **Fertility status (children Ever Born):** The 2021 census shows that 12.0 percent of the total ever married women aged 15-49 (6,145,039) do not have any children ever born to them. The percentage of the ever-married women aged 15-49 with 2 children ever born to them is the highest at 33 percent. Similarly, 23.1 percent of the total ever married women aged 15-49 have 1 child ever born to them, while 0.1 percent of the women have 9 or more children ever born to them. Overall, a total of 6,145,039 ever married women aged 15-49 have given birth to 12,799,969 children as of the census date. Out of the total children ever born, 52.7 percent are males while 47.3 percent are females.  
  
The data shows that 3.2 percent of the children ever born alive have died. Among the children who died, 57.6 percent are males and 42.4 percent are females.
33. **Current fertility:** A total of 412,935 children were born in the last 12 months preceding the census, of which 218,074 (52.8 %) were males while 194,861 (47.2 %) were females. Among the total children born in the last 12 months preceding the census, 36.8 percent of the children were born to women aged 20-24 years.
34. **Maternal mortality:** The National Population Census 2021 shows that out of the total 12,976 female deaths from fertility age group (15-49 years) in the last 12 months preceding the day of enumeration, 653 (5 percent) deaths were related to pregnancy. Out of the pregnancy related deaths, 622 (95 percent) deaths were found to be maternal mortality by Verbal Autopsy conducted in collaboration with the Ministry of Health and Population. In the same reference period, a total of 412,935 live babies were born from the same age group of mothers. According to this, the maternal mortality ratio is 151 (a total of 151 deaths of mothers per 100 thousand live births).
35. **Status of living arrangement of children:** Among the total 9,869,583 children (population aged below 18 years), 77.9 percent of them live with both parents (father and mother), 17.1 percent live with their mother only, 1 percent live with their father only, and 3 percent live with other relatives.
36. **Duration of economic activities performed:** Out of 23,958,868 aged 10 years or above usually residing population in the country, 14,983,310 were engaged in any kind of economic activities in the last 12 months preceding the census. The census results show that 41 percent of the population aged 10 years or above worked for 6 months or above, 21.5 percent worked for less than 6 months and 37.5 percent did not do any kind of economic work during the reference period.
37. **Economically active population:** Economically active population are those persons aged 10 years or above, who either performed any economic work for any length of time irrespective of whether they searched for work or not, or searched for work (part time or full time) if they had not performed any economic work in the last 12 months preceding the census. While the persons who neither performed any kind of economic work nor searched for any work in the reference period are classified as economically not active population. Of the total 23,958,868 population aged 10 years or above, 15,689,777 persons (65.5 percent) are classified as economically active and 8,211,012 persons (34.3 percent) not economically active based on the above criteria while 58,079 persons did not report their status.
38. **Usually economically active population:** If the total number of months actually worked and searched for work by a person is greater than or equal to 6 months, then the person falls under usually economically active population. In contrary, a person having this total less than 6 months falls under not usually economically active population. In line with this classification, out of the total 15,689,777 economically active population, 11,038,105 persons (70.35 percent) are usually economically active and 4,651,672 persons (29.65 percent) are not usually economically active.
39. **Usually employed population:** Among the total usually economically active population, the usually employed population refers to those persons whose duration of working is equal to or more than the duration of not working while the usually unemployed population refers to those persons whose duration of working

is less than the duration of not working. The census 2021 shows that among the total 11,038,105 usually economically active population, 10,270,447 persons (93.05 percent) are usually employed and 767,658 (6.95 percent) are usually unemployed.

40. **Economically active population by main occupation:** Among 14,983,310 persons engaged in any economic activity during the reference period, highest share of people (50.1%) are agriculture, forestry and fishery skilled workers, second largest share is elementary workers (23.0%) followed by service and sales workers (5.8%), crafts and trade workers (5.6%), managers (5.1%), professionals (3.8%), plant and machine operators (2.7%), technician and associate professionals (1.9%), office assistants (1.3 %) and armed force (0.7%) respectively. The classification of the occupation is based on Nepal Standard Classification of Occupation (NSOC).
41. **Economically active population by main industry:** Industrial division of economic activities have been coded according to Nepal Standard Industrial Classification of all economic activities (NSIC). Among 14,983,310 persons engaged in any economic activity in the last 12 months preceding the census, top five industries are agriculture, forestry and fishing (57.3%); wholesale and retail trade, repair of motor vehicles and motorcycles (12.5%); construction (8.1%); other service activities (3.9%) and manufacturing (3.8%) respectively.
42. **Employment status of economically active population:** Among 14,983,310 persons aged 10 years and above who performed any economic work in the last 12 months preceding the census, the highest number of people worked as own account worker (55.3 %), followed by employee (28.6 %) and contributing family member (14.5 %) and employer (1.4 %). Similarly, 0.1% people have not stated their employment status.
43. **Economically active population by institutional sector:** The household sector is the largest institutional sector with 61.8 percent of total 14,983,310 persons who worked in the last 12 months preceding the census. This is followed by non-financial corporation, government, financial corporation and non-profit institution serving households are in the row with 32.7 %, 3.9%, 1.1%, 0.4% respectively. While 0.1 % have not stated their institutional sector.
44. **Reasons for not being economically active:** Among the population aged 10 years and above who were economically not active (i.e., who did not perform any economic work), 46.9 percent reported being 'student' as the main reason for not working. Similarly, further reasons include: household chores (21.9 %), aged (11.0 %), family care (7.5 %), disability/illness (2.5 %), pensions (2.2%), social work/volunteer service (0.3 %) and other reason (7.4 %).
45. **Birth registration status of children of age 5 years and below:** Of total 30,07,648 children of age five years and below, 74 % are found to have registered their birth and 26 % are still unregistered. Among the registered children, male children are 5.8 percentage points more than female. Similarly, the registration status is 81.9 % in Mountain, 73.1 % in Hill and 73.7 % in Tarai region. By province, the highest percentage of children are registered in Karnali province (87.3%) while the lowest is in Bagmati province (67%).

## Part II:

# An introduction to the National Population and Housing Census 2021

### 1. Introduction

The census taking in Nepal dates back to more than a century. The National Population and Housing Census 2021 (NPHC 2021) is the twelfth decennial census since 1911 A.D. (1968 B.S.) - the first census taking year in Nepal. The four censuses before 1952/54 were simple head counts and they did not have qualities of modern census. But the fifth census conducted in 1952/54 utilized internationally comparable concepts, definitions and classifications as recommended by the United Nations. So it is considered as the first modern census of Nepal. The 1961 census was carried out by the Central Bureau of Statistics after its establishment in 1958 by the Statistics Act 1958. The 1971 census introduced Computer processing for the first time using IBM 1401. The 1981 census introduced questions on economic activities of individuals and maps for field work, and assessment of the quality of census enumeration began from this census. The 1991 census is the first census after the restoration of multiparty democracy and this census introduced, for the first time, collecting details of caste and ethnicity of individuals. The 2001 census introduced sample survey for some of the questions of census for the first time and two types of forms were used: one for full count and the other for sample counts. But the field work for this census could not be completed in 957 wards of 12 districts, due to effect of armed insurgency in the country, for which estimation methodology was adopted. This census introduced the use of modern GIS cartographic maps for the field work, gender friendly concepts, collection of detail socio-economic activities of women and data entry management by a private party. The 2011 census continued the earlier provisions except introducing an independent observation of census field work by civil society. Most noticeable feature of this series is that the whole census operation was almost funded by the domestic resources.

NPHC 2021 is the first national census conducted after the country embarked into federal system of governance formally. The salient features of NPHC2021 are the following:

- Adoption of full census enumeration for household and individual information unlike use of sampling in 2001 and 2011.
- As additional legal framework, introduction of Census Management and Operation Order, 2019 (2076 BS), Census Management and Operation Procedure, 2020 (2077 BS), and administrative management and financial standards for the census, 2019 (2076 BS) by the Council of Ministers, Government of Nepal.
- Introduction of e-census for government personnel working in the diplomatic missions abroad and their dependents usually residing there.
- Introduction of Computer Assisted Personal Interviewing (CAPI) technique using handheld digital device (Tablets).
- Mobilization of local unemployed educated youth for field enumeration and supervision recruited through competitive process unlike using school teachers in the previous censuses.
- Utilization of at least 50 percent female out of the total enumerators and supervisors.
- Extensive layers of trainers were employed at different levels of training including school teachers as master trainers at the district and local levels.
- Use of pre-coded questions.
- Use of additional form for a separate study on cause of death for maternal mortality conducted by the Ministry of Health and Population.
- Use of a community questionnaire to collect basic information for all administrative wards across the country.

- Full enumeration of all types of buildings including their use.
- Use of improved cartographic GIS maps for every Enumeration Areas.
- Adoption of extensive and self participatory communication strategy.
- Special emphasis was given for GESI (Gender Equality and Social Inclusion) and participatory census; as such slogan for the census is ‘My Census, My Participation’.
- Special press appeal released by rural and urban municipality associations, and federation of industry and commerce for the facilitation of census enumeration by their members.
- Establishment of a separate data processing center within the CBS premises.
- Coding and consistency of the questions were rechecked before data entry.
- Coders and data entry operators were freshly recruited through a competitive process and remunerated on key stroke basis.
- Ninety seven percent of the total cost was provided by the government from domestic resources.

**Inter-censal population changes  
(1911 – 2021 A.D.)**

Census year	Population	Inter-censal changes	Inter-censal changes (%)	Annual exponential growth rate (%)
1911	5,638,749	-	-	-
1920	5,573,788	-64,961	-1.15	-0.13
1930	5,532,574	-41,214	-0.74	-0.07
1941	6,283,649	751,075	13.58	1.16
1952/54	8,256,625	1,972,976	31.40	2.27
1961	9,412,996	1,156,371	14.01	1.64
1971	11,555,983	2,142,987	22.77	2.05
1981	15,022,839	3,466,856	30.00	2.62
1991	18,491,097	3,468,258	23.09	2.08
2001	23,151,423	4,660,326	25.20	2.25
2011	26,494,504	3,343,081	14.44	1.35
2021	29,164,578	2,670,074	10.08	0.92

## 2. Organizational structure of NPHC 2021

- 2.1 CBS established 7 Provincial, 87 district and 349 Local Census Offices for the management of census activities of NPHC 2021. More than one district offices were established in districts with larger population, like Kathmandu-5, Lalitpur-2, Morang-2, Jhapa-2, Sunsari-2, Rupandehi-2, Kailali-2, while a Local Census Office covered two or three rural or urban municipalities. The provincial, district and Local Census Offices were coordinated by the Population Section under the Social Statistics Division of the CBS.
- 2.2 A National Census Steering Committee (NCSC) headed by honorable Vice Chair of the National Planning Commission (NPC) was formed that consists of a member of NPC, eight Secretaries of various ministries, heads of Statistics and Population Studies Central Departments of Tribhuvan University and Director General (DG) of the CBS as Member Secretary. The Steering Committee invited subject matter specialists and other distinguished personalities in the meeting. The NCSC, as the high-level advisory committee, issued overall policy directives on census undertakings and acted as the final arbitrator in resolving any impediments to successful completion of census enumeration.
- 2.3 National Census Coordination Committee (NCCC) headed by honorable member of the NPC was formed that consists of Secretaries of the Office of Chief Minister and Council of Ministers of seven provinces,

Joint-secretaries of six federal ministries, presidents of Federation of District Coordination Committee, Urban Municipality Association and Rural Municipality Association, and Deputy Director General of the CBS as Member Secretary. The committee has been instrumental for ensuring necessary facilitating coordination and cooperation at the federal, provincial and local levels in different stages of the census operation.

- 2.4 A Technical Committee headed by the DG of CBS was formed consisting of members from representative of most of the line ministries, statistics, economics and population studies professors. Representatives from some relevant development partners were also invited in the committee as necessary. The committee was mainly responsible for all the technical decisions which were later recommended to the census steering committee for final approval.
- 2.5 Six special thematic committees were formed to work on different subject areas. The six thematic committees were: a) Questionnaire Design and Data Analysis, b) Gender and Social Inclusion, c) Geographic Information and Cartography, d) Training and Publicity, e) Management Information System and Data Processing, and f) Monitoring, Evaluation and Quality Management. The thematic committees were headed by Deputy Director Generals of the CBS and comprise of members from the relevant sections of CBS and outside experts from academia and relevant ministries.
- 2.6 A Provincial Census Coordination Committee (PCCC) was formed to facilitate, coordinate and monitor census activities at the province level. The PCCC was headed by the Principal Secretary of the Office of Chief Minister and Council of Ministers and comprises of Secretaries of three provincial ministries, provincial police chief and provincial census officer as Member Secretary.
- 2.7 A District Census Coordination Committee (DCCC) headed by Chief District Officer was formed at each district consisting of members from main district level offices including the district police chief, representatives of political parties and District Census Officer as Member Secretary. The DCCC was mainly responsible for district level facilitation, monitoring, security management and coordination of census activities.
- 2.8 A Local Level Census Coordination Committee (LLCCC) headed by the Chief Administrative Officer was formed at each local level to facilitate the local census activities.
- 2.9 A Ward Census Facilitation Committee (WCFC) was formed at each ward headed by Ward Chair which was mainly responsible to provide assistance as required by enumerators and supervisors, and ensure completeness of field work.

### **3. Census questionnaire and other tools**

Census 2021 is in fact three different kinds of censuses combined in one go. The Population Census, Building Census and Live-Stock Census are the part of Census 2021 though limited number of questions were included for the latter two topics. The following are the questionnaires and other tools related to the census 2021:

#### **3.1 Building and Household Listing Form**

The supervisors prepared a complete list of buildings and households about a month prior to the main census enumeration carried out by the enumerators. The Listing form contains questions for Building and Live-Stock Census. In addition, like in the previous censuses this form collected area of agricultural land operated by the household that was later used as a sampling frame for the Agriculture Census. All the buildings in the Enumeration Area (EA), whether they are vacant or not, were listed in the form and basic information like number of floors, year of construction, purpose of use, number of residential households, household members by sex including the other sex category, land used for agriculture, and households engaged in agriculture and livestock owned by households, residential buildings constructed with government grant, household members with bank accounts, household members with Technical and Vocational Education or Training, and information on households who have taken loans from any cooperatives, bank and financial institutions were collected through this form.

#### **3.2 Main Questionnaire**

Unlike in the previous two censuses where sampling was used, the NPHC 2021 is a complete census and the main questionnaire was administered to all the usual resident households in the country. The

questionnaire basically contains housing information and individual information part. The housing part contains questions about ownership of the housing unit, household amenities/assets used, households by female member's ownership of fixed assets (housing unit/land), non-agricultural informal enterprises operated by households and sex of main operator, deaths and causes, and details of absent members of households. The individual part of the questionnaire contains name of every member of the household, relationship to head, sex, age, date of birth, birth registration status of children aged 5 years and below, caste/ethnicity, languages (ancestors language, mother tongue and second language), religion, , country of citizenship, marital status and age at first marriage, type of disability, literacy and level of education, migration, fertility of women 15-49 years of age, employment status, occupation, industry, and living arrangement of children under the age of 18 years. Questions on literacy and level of education were asked to all persons aged 5 years and above. Similarly, questions on marital status, age at first marriage, and economic activities, occupation and industry of currently working were asked of those aged 10 years and above. For economic activities, for those who worked less than 6 months of economic work or did not do any economic work at all were asked why they did so and if they searched for any work part time or full time.

### **3.3 Community Questionnaire**

Collecting basic socio-economic and infrastructure information from each ward was also part of the census operation. A separate questionnaire was administered to the ward chairperson or ward secretary by the supervisors at all the wards.

### **3.4 Enumeration Area (EA) maps**

The Geographic Information System (GIS) section in the CBS constantly works on making EA maps by collecting and digitizing the geographic information on the field and delineate boundaries of EAs suitable for the purpose of the censuses and surveys conducted by the CBS. This section worked hard to produce EA maps for the census 2021 as well. For the purpose of census 2021, the EA maps were prepared such that about 100 to 160 households in Mountain, 170 to 200 households in Hill and 220 to 250 households in Tarai were covered in one EA. As such the wards of all the urban municipalities were divided into smaller areas to form EAs according to these criteria while in the case of rural municipalities the then wards that existed in the village development committee earlier (before the federal structuring) were treated as a separate EA. The formation of EAs as a mutually exclusive area helped conduct the census without omission and duplication and ensured completeness. The printing of the EA maps was a huge task requiring many months of computer works and printing. The GIS section tirelessly prepared and printed about 70,000 maps in high-quality high-speed printer at the office premises.

### **3.5 Digital form of questionnaire**

Digital application for the Building and Listing Form and the main questionnaire were prepared in the CSPro platform that was later installed in tablets for the CAPI census in the selected local levels of Kathmandu district.

## **4. Basic concepts and reference date**

### **4.1 Method of counting**

Like in the previous censuses in Nepal, the Census 2021 also adopted "modified de jure" method in counting the population. Using this method, a person was counted at his/her usual place of residence. Usual place of residence is defined as a place where a person has been living or intends to live usually. If in any case a person cannot specify his/her usual place of residence, then the criterion of at least six months residence is considered. The permanent address or birth place or the legal migration is not considered for the purpose of census counting. A person who is absent from usual place for a short period for the purpose of treatment or pilgrimage or employment or similar reasons is treated as present in the usual place of residence. Persons away or absent from birth place or usual place for employment or study or business purpose for longer than six months' period is considered absent population and thus, not counted as present population. However, homeless or mobile population was counted at the place where they were traced on the last day of enumeration.

## 4.2 Reference date

The reference date for the NPHC 2021 is November 25, 2021 (Mangsir 9, 2078 BS). For questions related to death in the household, birth given by a woman of age 15 to 49 and work done by individuals, the last 12 months preceding the day of enumeration was considered as the reference period.

## 5. Human resource for the field work management

The human resource required for field work was recruited on the basis of merit and competency. For the first time in census history, the educational qualification for the enumerators and supervisors was upgraded by one level to 10+2 and bachelor's degree respectively as compared to requirement for the same post in previous censuses. An online Human Resource Management and Monitoring System (HRMMS) was designed and open application was announced two months before the field work and the applicants were selected on previously notified criteria. Locals and/or persons cognizant of the local language, women and candidates from caste/ethnic groups were as much as considered in selection. A total of 8,545 supervisors and 35,657 enumerators were selected from among the 50,000 and 150,000 applicants in the system respectively. The candidates selected from the system were recruited by the District Census Office after final verification of the credentials uploaded in the system. Besides field staff, a total of 1,800 school teachers were prepared as master trainers who were used especially in enumerators training, 87 District Census Officers for overall management of census at the district, 87 Deputy Census Officers, 349 Local Census Officers to implement field-level activities and about 100 central level staff were engaged in different phases of the census except 10 core-group staff at the center. All levels of census officers were taken from the pool of federal or local level government offices and priority was given to those who have prior experience of census/data collection work or deputed in local area. The work force was ever most inclusive, with participation of Caste/Ethnic groups, Dalits and persons with disabilities, and gender balanced with 50 percent females. Supervisor to enumerator ratio was 1 to 4 in the fieldwork.

## 6. Logistics management

The management of logistics for a huge task like census requires mainly procurement, storage and safe delivery to and from the field. This task is a huge challenge for a country with very difficult terrains, no regular transportation system and high cost. Maintaining the quality and cost effectiveness of materials to be procured in time is also an additional challenge given the time-bound and cumbersome public procurement process and guidelines.

### 6.1 Procurement of logistics

The logistics that were required in large numbers, for example, caps, bags, torch lights, ball pens, markers, stationery and printing of questionnaire and manuals were procured through competitive bidding process in the fiscal year preceding the census year. The laptop computers required for data processing were procured in the census year. Special quality of paper for printing of the questionnaire and cover page for binding of the questionnaire book was ordered keeping in mind the possibility of handling of the questionnaire by many hands in different stages in between dispatching from Kathmandu to receiving back, and during coding and data entry operations. About 58,000 bags; 58,000 caps; 55,000 torch lights; 82,000 red ball pens; 304,000 blue ball pens; 110,000 markers; 168,300 main questionnaire big book (containing 50 set of questionnaires); 51,100 main questionnaire small book (containing 20 set of questionnaires); 41,500 household listing form big book; 51,500 household listing form small book; 13,500 community questionnaire; 56,000 enumerator manuals; 13,000 supervisor manuals and 300 laptops for data processing were provisioned for the census. In addition, other materials like EA maps, District Census Officers manual, training manual, Gender and Social Inclusion manual, note books, record files, envelopes, letter pads, monitoring and supervision forms, sample questionnaire forms for the main questionnaire and household listing, request letter, brochure, pamphlets, stickers, posters, training exercise examples, training evaluation forms, pre-post training evaluation questionnaires, flex print of questionnaire, identity cards, experience certificates, maternal death notification forms, etc. were also procured or printed. All the District Census Offices, except those in Dolpa and Humla districts and other six having regular office vehicle, were provided with contracted out vehicles for two and a half months' period.

## 6.2 Census Warehouse, Storage, packaging and delivery of census materials

Census warehousing, storage, packing and delivery of logistics was also challenging. A separate building was rented nearby and a team headed by a Statistics Officer was deputed for this purpose. About 25 loaders and helpers were recruited for one year at the storage facility for overall physical handling of the materials like packing, lifting, storing, dispatching to and receiving from the field and the data center. Packaging of the census materials was done very systematically so that the census managers in the field did not have to spend much time in identifying the materials required for the purpose. So the training materials and field work materials were separately packed, listed and marked legibly. Similarly, the materials were packed separately for District Census Office and Local Census Office and marked clearly in the package. Whereas, for Local Census Office covering two or more local levels, the questionnaire books required were packed separately for the respective local level. Dispatching and delivering census materials to the destinations safely in time was also a challenging task of logistical management. The packed materials were transported from the warehouse at Kathmandu to the District Census Office through a contracted-out party which used different means of transportation. The District Census Office delivered the received materials to the Local Census Office under its jurisdiction. The pre-assigned team of enumerators and supervisor submitted the filled-in questionnaire to the Local Census Office. The Local Census Office thoroughly checked the submitted questionnaires and forms, packed them in the same way as had been packed originally, and delivered to the District Census Office. The District Census Office then delivered the materials to the storage facility in Kathmandu where EA wise thorough counting of the questionnaire was done to ensure completeness. The completed forms from Dolpa, Humla and Mugu districts were transported to Kathmandu by using helicopter. The team deputed at the warehouse systematically stored the received forms and questionnaire which eased the handling of questionnaires, including during data entry and verification process.

## 7. Communication and publicity

As pointed out in the organization and management of census order and procedural manual, all kinds of media were fully utilized for the communication of census messages and publicity. Special messages were transmitted through the landline and mobile phone CRBT facility. The Nepal Telecommunication Authority (NTA) coordinated with the national telecom service providers and their service during the field work period was appreciable. All national dailies, weekly papers, magazines, all TV channels, radios, also carried out census message to the public throughout the period of the field work. The transmission of census messages through various FM radios network encouraged the self participation of respondents and the messages especially in local languages was very effective. Radio jingles, posters, stickers, pamphlets for different target groups were also produced and distributed. A number of interviews, talk programs were also organized in the national television to disseminate the census messages and educate the respondents. Similarly, the official census website (<https://censusnepal.cbs.gov.np/>) was also utilized to provide the respondents and census staff an easy access to all census materials. Various caste and ethnic communities, cultural and religious groups, students and various professional and righteous organizations also acted voluntarily to communicate census messages.

A National Communications Expert, recruited by UNFPA, supported CBS for various census publicity and communications work, including media support and finalization of communications materials in line with the overall census publicity and communications strategy.

## 8. Field operation

The Building and Household Listing fieldwork was conducted by the supervisors for 20 days from September 15 to October 4, 2021 (*Bhadra 30 to Ashwin 18 of B.S. 2078*) and the main census enumeration was done by the enumerators for 15 days from November 11 to November 25, 2021 (*Kartik 25 to Mangsir 9 of B.S. 2078*). The supervisors closely supervised the main census fieldwork by the enumerators in the latter period whilst they also administered the community questionnaire from the wards assigned to them. The last day of the census enumeration was set aside for any adjustments due to newly occurred birth or death in the EA.

The Building and Household Listing field work and the main enumeration periods were originally scheduled for the period of May 9 to 28, 2021 (*Baisakh 26 to Jeth 14, 2078 B.S.*) and June 8 to 22, 2021 (*Jeth 25 to Asar 8, 2078*) respectively.

Following the original schedule, the Provincial/District Census Office was established for 4 months on March 14, 2021 (*Chaitra 1, 2077 B.S.*) and the Local Census Office was established for 3 months on April 14, 2021 (*Baisakh 1, 2077 B.S.*). But due to the appalling situation caused by the COVID 19 pandemic, all the field programs of the census were postponed by the government until further notice when the supervisors training was on the final day of completion. The revised schedule was later approved when the government lifted lockdown after the pandemic subsided and the census work resumed with supervisor's refresher training nearly after 5 months.

## 9. Data Processing

- 9.1 Data processing for the NPHC 2021 was done within the CBS premises. The three storey building at the rear side of the CBS premises was renovated and equipped with basic facilities and functionalities like local server, LAN, security cameras, furniture, air conditioner to use as a separate data processing center. The three storeys of the building were utilized for data entry while the ground floor of the main building was used for coding of the paper questionnaires.
- 9.2 The census 2021 questionnaire was fully pre-coded except some provision for recording responses with texts. The CBS recruited 100 coders and 300 data entry operators through a competitive recruitment process. The coders were remunerated according to number of households validated while the data entry operators were remunerated on key stroke basis. The coders validated the codes assigned during the field work by the enumerators and checked for consistency across different parts of the questionnaires before data entry. A separate manual for coding, editing and data entry was prepared and the coders and data entry operators were trained before assigning to actual work. The coding and data entry was managed in two 6-hours morning and day shifts. The coding and data entry activities were closely supervised by 25 supervisors hired temporarily while the overall activities were monitored and controlled by the members of the core census team specially deputed to the dedicated shifts.
- 9.3 The data capturing application was prepared in CSPro, an integrated software platform developed for data entry, editing, verification and tabulation by US Census Bureau, was used for data processing (Key entry, editing and verification). The android version of the same was used for preparing the CAPI application to be used for Tablets. The individual information obtained from e-census was also converted to CSPro format in order to incorporate the records to the database.
- 9.4 The data entry application was fully built-in with range and consistency checks programs and the entry operators were instructed to run the program and make the necessary changes before transferring the data to the server. The consistency checks were done thoroughly during the whole processing operation. The CSPro, SPSS and STATA were used for tabulation of the data. The raw data was further edited and imputed with the consultation with national and international data processing experts.

## 10. Quality management

Realizing that chances of non sampling errors to creep in may be high in case of any mammoth data collection activity like census, various precautionary measures were adopted during the pre-census, during-census and post-census phases. The following activities were in place to enhance the quality of overall data:

- 10.1 National, provincial and district level consultation and roundtable workshops with various stakeholders and data users were carried out to collect user demands and suggestions before finalizing the census tools (questionnaires and manuals).
- 10.2 The questionnaires and manuals were revised and peer-reviewed by the subject matter specialists, language experts and GESI (gender and social inclusion) experts to make the tools more respondents and users friendly including people with disabilities, sexual minorities, women, elderly, ethnic communities.
- 10.3 National and provincial level master trainers were prepared to maintain uniformity and quality in training in different layers. The provincial master trainers, who were taken from the pool of local secondary level school teachers, especially facilitated the enumerator's training at the Local Census Office. In addition to have provision for master trainers, master-slides containing the main messages to be delivered were designed to facilitate the trainers for the uniform delivery of the training

sessions. Pre-training and post-training tests with multiple choice questions were administered for the assessment of the training participants at each level. The training sessions evaluations forms were also designed to assess the quality of training sessions, trainers, and overall training management.

- 10.4 Ward level census facilitation committee were formed at each ward in order to ensure complete enumeration and to provide the necessary support to the census fieldworkers.
- 10.5 A vehicle was provisioned for the District Census Office for closely and timely monitoring of the field work and maintain quality.
- 10.6 A mobile application was designed that was used by the supervisors during the household registry phase and the enumeration phase for daily reporting of progress.
- 10.7 A help desk at the CBS central office was established that provided support to the field work with a dedicated toll-free hotline. Besides, existing social networking platforms were also used by the central and District Census Offices to provide assistance and disseminate new urgent guidelines to the field staff. An official census website was also used to receive suggestions/complaints of any omission/duplication of households throughout the field operation period to ensure the wider participation of the respondents.
- 10.8 The respondents were informed during the enumeration phase by the provision of CRBT (Caller Ring Back Tone) to all the mobile phone holders. The messages played on the phone helped enumerators provide the truthful information and supported the **“No Omission, No Duplication”** policy as well. Similarly, wide range of mass media and publicity materials were circulated that helped enhanced the census 2021 slogan **“My Census, My Participation”** and wider participation.
- 10.9 A **“Form Reception Desk”** with dedicated team was set up at each Local Census Office to receive the questionnaire from the enumerators and supervisors. The team reviewed the completed questionnaires to check if the enumerators had cleanly filled up the questionnaire and provide feedback to rework if necessary.
- 10.10 To minimize errors during the data entry phase, the computer entry application was built-in with minimum and maximum range checks and other programs to validate the consistent relationships among the questions and the operators were closely monitored.
- 10.11 The respondents were massively contacted through telephone during the coding, data entry and validation stages for the clarification of any doubts.
- 10.12 UNFPA in collaboration with the Central Department of Population Studies/Tribhuvan University organized census observations in different local levels spanning in every province of the country. The training, fieldwork and office management were observed for both paper-based and tablet-based enumeration. The rapid feedback received by CBS census team from the independent observation was useful to addressing some of the challenges and trouble-shooting during the fieldwork.
- 10.13 A Post Enumeration Survey (PES) was conducted in early March 2022 by an independent agency from Tribhuvan University (Labor Studies Program) through a G2G (Government to Government) agreement between the two agencies. The findings of the PES that has measured coverage and content errors will help assess the quality of the census data.

## **11. Census results and related products**

### **11.1 Preliminary census results**

The preliminary results of census 2021 were released in January 2022, after about 60 days of the final day of enumeration in November 2021. The preliminary census results were based on the summary sheets (control forms) filled in by the supervisors/enumerators in the field. The total number of households and population in the preliminary counting were 6,761,059 and 29,192,480 respectively. There has been negligible discrepancy between the preliminary and the final results which is mainly due to the fact that the final results have been prepared by scrutinizing the main questionnaire in detail while the preliminary results were based on quick counts from the summary sheets.

## **11.2 Final census results**

The final result of the census is planned to be released in different phases. Major information, such as number of houses and households, age and sex-wise population and other important demographic characteristics up to the lowest administrative area i.e. Ward have been released in the first phase. The following statistical reports have been released in the first phase:

- i) National report-1
- ii) Provincial reports that incorporate districts and local levels -7
- iii) Urban Rural report-1
- iv) Brief census report in Nepali

## **11.3 Other statistical reports**

It has been planned that the subsequent volumes, that will be released soon, will cover the remaining information from the household listing, main questionnaire and community questionnaire.

## **11.4 Thematic reports**

Apart from statistical reports, a number of thematic reports on different census topics will be produced which will be a kind of analytical report containing detail analysis of the census data triangulated with other available relevant information. Based on users' feedback and also observing good practices in other countries, for the 2021 census, the CBS plan to publish one report for each thematic topic. The collection of the theme specific reports is expected to replace the Population Monograph that the CBS had been producing traditionally in the previous rounds of the censuses. The idea is that the separate thematic reports will be user-friendly, contain deeper analysis to generate more nuanced information on policy implications. The CBS will engage national authors from the academic community and policy experts. Both national and international reviewers will technically support the thematic analysis for quality assurance purposes to international standards.

## **11.5 Digital data file**

After having released the final census results of all the characteristics, it is planned to make available Public Use Micro-data (PUM) file in the usable format. The digital PUM is expected to benefit the academia, researchers and other practitioners.

## **11.6 Dissemination of results and census data literacy**

The statistical and thematic reports will be disseminated at the Federal, Provincial, District and Local level as much as available in printed and digital format. The printed copies will be distributed on First Come First Served basis and some for prioritized users from the government and universities. The digital copies will be made available in the NSO website ([www.cbs.gov.np](http://www.cbs.gov.np)) and census website ([censusnepal.cbs.gov.np](http://censusnepal.cbs.gov.np)). The area specific census results and related reports can be accessed through digital medium by the public on the day of final release ([censusnepal.cbs.gov.np/results](http://censusnepal.cbs.gov.np/results)). Census data literacy and dissemination programs are planned at the federal, provincial and district levels covering users from the local levels, researchers and academia.

## **12. Cooperation of international development partners**

- 12.1 Development partners especially from UN organizations are very supportive of the census process and are very much appreciated. The UNFPA and UNWOMEN were very generous to provide technical and logistics support to the census. The UNFPA organized the Envisioning Census 2021 program at the very beginning planning stage in August 2018 and supported the preparation of Census Project Document (CPD) which was approved by the National Planning Commission. The UNFPA's support in collaboration with the Central Department Population Studies/Tribhuvan University for the census consultations and sensitization workshops that were undertaken with a range of stakeholders at national and provincial level on the importance of the census, and the utilization of census data for the SDGs have been noteworthy. The IT equipment provided by the UNFPA has strengthened the CBS's infrastructure and capacity, and complements its efforts to modernize the census operation through a multi-method

approach of data collection, including the digital census (CAPI) in the selected local levels of Kathmandu district. Likewise, the Human Resource Management and Monitoring System (HRMMS) prepared by the UNFPA's assistance was a game changer in solving the intricacies of recruitment process of field staff that had been the main burden for District Census Offices in the earlier censuses. The UNFPA has been continually supporting capacity development programs and study tours which helped census staff learn good practices and skills.

The UNWOMEN provided technical support to prepare the GESI friendly training and communication materials, including: leaflets, brochures, audio and video PSAs in different local languages. Other technical support provided by the UNWOMEN are the development of training video, training manual, training slides and GESI manual.

The development partners are welcome to provide generous support especially for the local-level results dissemination, thematic analysis and capacity development programs.

## **13. Challenges faced during the census operation**

### **13.1 Impact of COVID-19**

The main challenge to be faced was conducting census activities amid threat to life for respondents as well as field staff from the COVID 19 pandemic. But the provision of face mask, face shield and hand sanitizer to the field staff helped boost their will-power and a sense of security to the respondents as well. The COVID also caused uncertainty among census managers particularly at local and district level. The postponement of census activities caused cost over-run of field-based offices established for the census.

### **13.2 Use of multi-mode data collection simultaneously**

Three modes of data collection namely paper based, computer-based CAPI and web-based e-census were simultaneously launched to collect data. This was like conducting three censuses at the same time and management of the activities required for each of them, which were of different and independent nature, with limited human, technical and financial resources, was in fact a great challenge.

### **13.3 High expectation of users from the census**

There have always been huge demands for more questions to be included in the census questionnaire. The demand has become more pronounced in census 2021 in the context of federal structure of governance and raised expectation of the public after the new constitution. The decennial population census is also under pressure to include more questions in the absence of well-organized and regular survey and administrative record processing and data flow systems system to supply data demanded for wider use. The questions that are included were finalized based on several rounds of discussions and feedback from stakeholders and testing. However, the number of questions could not be reduced and had to incorporate more than 55 questions in the main questionnaire. This added respondent burden to some extent and it was a great challenge to monitor and enhance the quality of field work. The quality of data would not have been at its present level had the respondents not cooperated very well and the enumerators not kept patience while conducting field work.

### **13.4 Collecting information from respondents in highly urban areas**

The respondents in the highly urban areas are naturally busy and away from home for employment. In case of nuclear family, the house was even locked during the day time. So choosing an appropriate time to make an appointment with them for collecting information was challenging. People have security concern in highly urban areas and it was a challenge to build their confidence especially if the enumerator is not very familiar to the area. But through the massive airing of the census sensitization messages this was overcome and most of the respondents participated in the census.

### **13.5 Pressure from interest groups**

People's aspirations and expectations have been elevated by the new Constitution. Issues of identities and capturing government's attention are high. As a result, some interest groups tried to manipulate the respondents' independent answers and dictated the enumerators to write a particular response. But

this was independently verified and a press note was released from the CBS notifying all the concerned parties for possible legal action if they did not cease campaigning with prejudice. Moreover, a number of interest groups especially related to caste/ethnicity, religion and language have shown serious concern on census results and presented their specific demands which need to be dealt with higher government or political level.

### **13.6 Meeting users' expectation of census data**

There has always been a comparison and confusion with the voters list and census data. These two actually serve different purpose so they have different concepts. The voters list is prepared on the basis of permanent address and in order to be included in the voters list one should have either acquired citizenship certificate from that place or migrated legally to that place. But in practice the people may be living somewhere and their voters list may be anywhere. They can just come for voting and may or may not usually live there. But the purpose of census is to know the number of actually living current population of a place to manage physical amenities, and economic, educational, health and other facilities for them. So the census in Nepal is carried out in "Usual Residence" basis. The usually residing population may have their permanent address or birth place or voter name anywhere other than they are usually living. Also, it is not necessary to show legal residency status to be included in the census. So the data from census and voters list do not match and the users should take this into account and use the figures with caution.

**Part III:**  
**Major Statistical Tables**

---

**Table 01: Number of households by type of ownership of housing unit, NPHC 2021**

Area	Total	Type of ownership
