Executive Summary

Current Status of Higher Education

- Nepal has adopted multi-university concept and currently there are 11 universities (Tribhuvan University, Kathmandu University, Purbanchal University, Nepal Sanskrit University, Pokhara University, Lumbini Bauddha University, Agriculture and Forestry University, Far Western University, Mid-western University, Nepal Open University and Rajarshi Janak University) and 6 academies that are equivalent to deemed-to-be universities (B P Koirala Health Science Academy, National Medical Science Academy, Patan Health Science Academy, Karnali Health Science Academy, Pokhara Health Science Academy and Rapti Health Science Academy).
- Some provincial governments have also established new universities and have started some academic programs. Similarly, at the federal level, preparatory activities including the drafting of the Act to establish Madan Bhandari Science and Technology University and Bidushi Yogmaya university are also in progress.
- Last year, there were altogether 4,41,819 students in higher education in Nepal with the highest share in TU and lowest share in Karnali Health Science Academy. In Tribhuvan university alone there were 3,35,543 students where as in Kathmandu University, Purwanchal University, Nepal Sanskrit University, Pokhara University, Lumbini Bauddha University, Agriculture and Forestry University, Far Western University, Mid-western University, Nepal Open University and Rajarshi Janak University, B P Koirala Health Science Academy, National Medical Science Academy, Patan Health Science Academy, Karnali Health Science Academy, Pokhara Health Science Academy and Rapti Health Science Academy, there were 18356, 27527, 3749, 30542, 695, 3871, 10113, 7353, 955, 153, 1528, 447, 931 and 56 respectively.
- Number of higher education institutions has increased to 1432 with the constituent campuses of 147, affiliated community campuses of 538 and private campuses of 747.
- 91.20% of the HEIs run only bachelor level programs (undergraduate) whereas 22.9% HEIs have Bachelor, Masters and above programs. Currently, Bagmati Province has the most number of HEIs (43.37%) and Karnali Province has the least number of HEIs (4.26%).
- In private colleges there are 36.56% students and in community and constituent campuses there are 27.41% and 36.01% respectively. This year, stuents' enrolment has increased in the community campuses but decreased in constituent campuses.
- Regarding the subject choice, most of the students have enrolled in the management subjects with 46.37% share followed by Education (17.19%) and Humanities (10.96%). Similarly, in science and technology, health science and engineering subjects there are 8.38%, 6.39% and 6.57% students respectively. In other subjects (Sanskrit, Agriculture and Forestry, Ayurveda, Buddhism and Law etc.) the enrolment is only 4.13%.
- In the subjects of national priorities the 2020 target was 17% in Bachelor level and 23% at the Masters. The targets have exceeded with 33.85% in Bachelor level but 22.51% at the Masters level.
- Level-wise enrolment of the students is as follows:

Level wise enrolment		
Level	No. of Students	Share
Bachelor	394889	89.38
Masters	43612	9.87
PGD	2019	0.46
Mphil	1075	0.24
PhD	224	0.05
Total	441819	100.00

- Gender Parity Index is 1.09. Share of female students in higher education has been increased with 52.04% enrolment making Gender Parity Index as 1.09.
- Altogether 358 HEIs have been under the process of Quality Assurance and Accreditation (QAA) Program that began about 10 years ago. The plan is to bring all the campuses to the QAA process. Though most of the QAA certified campuses are community and private, constituent campuses and central departments should also be encouraged to go for the QAA process. So far 49 HEIs have received the QAA certificates. The figures below present the status of the HEIs under the QAA process.

Stage Wise No. of Participating HEIs in QAA	FY 2076/77	Total Achievements
No. of HEIs in Nepal	1432	1432

- A total of 9,677 faculty members are teaching in the constituent campuses that include 846 professors, 2345 reseachers, 5099 lecturers, 1252 teaching assistants and 135 instructors. If we combine the teachers of the community and private campuses, there are about 20,500 full-time and part-time teachers in the HEIs. The number of professors and readers has increased recently and this might make the university teaching workforce pyramid imbalanced.
- In the fiscal year 2076/77 UGC received Rs. 16,68, 20,67,000/- from the Nepal government and the actual expenditure was Rs. 15,24,20,48,000/-
- Under the World Bank Loan support, the income of the fiscal year 2076/77 was Rs. 2,29,99,50,000/- and the actual expenditure was Rs. 1,50,10,95,000/- .
- Per student cost invested by the government is Rs. 37,258/- Below is the investment details of the students in the university (except in the Health Academies):

- According to UNESCO statistics, population with the income of \$1.25 per day in developing countries was 47% in 1990 and it has come down to 22% in 2010. In this context, still about 1,00,00,00,000 people are under extreme poverty. Experience from Sub-Saharan Africa shows 10% increase in economic growth with one-level increase in education. This means that higher education plays important role in to minimize poverty. Investment in higher education should, thus, be increased. Currently, Nepal government allocates 4% of the GDP in education and only 0.41% is allocated for higher education. Overall education budget has decreased to 10.68% out of which only 9% is allocated in higher education. Thus, in order to upgrade Nepal from under-developed country to developing country by 2022, allocation in education should be increased to 6% in the GDP and 20% of the national budget.
- Reconstruction of the infrastructure of educational institutions damaged by the 2015 earthquake is in progress which is expected to complete within the current fiscal year.

Policy Achievements

- Mapping of the universities and their constituent units has been completed with the location of all the HEIs in Nepal. The information collected in this process will provide valuable information to make higher education policies and implement the reform agenda including feasibility study, establishment of the new institutions, program expansion, merger of the HEIs and other individuals who are interested in higher education institutions.
- With a view to ensure quality in Nepal's higher education system by empowering the HEIs to get quality accreditations, UGC has developed a QAA Strategic Plan "Destination 2030". It is expected that this plan will

provide directives to the HEIs to make their academic programs of high quality, dignified and respectable.

- In order to minimize the learning loss caused by the Covid-19 pandemic by switching the education delivery from face-to-face mode to online mode, UGC has issued a guideline entitled Alternative Learning Facilitation Guidelines in Higher Education – 2077. The feedback from the HEIs is that this guideline provided clear directives for the HEIs to regulate their educational activities that include the resumption of the classes, exam and research.
- To promote and sustain the research culture and innovation in the higher education through the scholarly activities (fellowship, research grants, thesis writing support, laboratory and library networking and enhancement), UGC has developed and implemented a long term plan. Under this plan, National Research Foundation will be established to coordinate the research activities and mobilizing the research fund throughout the country.
- National Education Policy – 2076 issued by the government on 2076/07/18 has expanded the roles and scope of the UGC. In addition to the current responsibilities, the UGC has also been mandated to accredit equivalence, auditing the qualifications of the people who would like to teach and research in higher education, monitor the higher education system in the country, develop standards for partnership and collaboration with the foreign universities, authorize universities for affiliation. New positions have been approved by the Ministry of Finance to carry out these duties at the UGC.
- Compulsory and Free Education Act – 2075 mentions that children of the martyrs, missing persons, conflict affected, injured and disabled during the people movement will receive special facilities as specified by the government. Following this provision, UGC has prepared this guideline to provide scholarships to these children. The budget allocated for these children by the Nepal government will be channelized according to this guideline.
- In order to make HEIs responsible to ensure quality in their educational services, UGC has issued Internal Quality Assurance Guideline, 2076 upon the recommendation of the QAA Council.
- An agreement has been signed between the UGC and National Assessment and Accreditation Council (NAAC) of India on November 7, 2019 with a view to embrace international best practices in areas of faculty exchange, mutual recognition, assessment and accreditation process.
- Nepal has renewed the membership of Asia-Pacific Quality Network (APQN) and International Network for Quality Assurance and Accreditation (INQAAHE). Nepal has utilized the APQN experience to improve the QAA process in Nepal and exchange the ideas in areas of higher education quality principles and best practices. There are 222 institutions from 41 countries in this network.
- UGC has also gained a new experience by nominating itself to the Board of Directors of the INQAAHE in which three members are elected from the online voting of its members. There were HEIs from nine countries in this process. Though Nepal was not elected, this opportunity as an attempt to project Nepal the QAA leadership in the international arena.
- Communication with Morgan State University, Baltimore, Maryland, USA has been initiated to explore the possibilities of research in Nepal's priority areas, fellowship, interdisciplinary PhD and collaboration opportunities for the faculty members from Nepali universities. Proposal is being developed for the collaboration and resource allocation in this regard and it is expected that this process will help faculty members from Nepal to get exposure to the internationally recognized universities.
- In order to minimize the impact of Covid-19 in higher education, additional DLI was provisioned under the Higher Education Reform Project and a budget of Rs. 47,00,00,000/- has been allocated for the universities, their Schools, Central Departments, Constituent and Affiliated campuses. The fund is has been utilized to develop learning management system, teacher training for online pedagogy, live classes and video recording.

Similarly, process has been initiated to commission three collaborative research projects of Rs. 1,00,00,000/- each related to Covid-19 through competitive bidding by the HEIs.

- Draft of the Higher Education Act has been submitted to the Ministry of Education, Science and Technology including the directives made by the National Education Policy and the constitutional provisions regarding higher education.
- A report prepared by the high level committee has been submitted to the Ministry of Education, Science and Technology detailing out the steps to be taken in order to manage current universities, other degree awarding HEIs and establish new universities.
- In order to bring uniformity in the M. Phil. and PhD degrees to be awarded by all the universities in Nepal, UGC, as mandated by Article 6(1) of the UGC Act – 2050, has developed and implemented Minimum Standards and Guidelines for M. Phil. Degree – 2073 and Minimum Standards and Guidelines for PhD Degree – 2073.
- According to the decision made by the Nepal Government on 18 April 2017, QAA has been established as autonomous unit to ensure quality in the higher education system.
- A report has been submitted to the Ministry of Education, Science and Technology that included the standards and criteria for the appointment of the university and academy authorities.
- In order to make Nepal's higher education qualification systematic and uniform, Higher Education Qualification Framework Nepal has been drafted considering the spirit of the higher education policy of Nepal.
- Out of the 1432 HEIs that include the universities and campuses (constituent, community and private), mapping of the 1356 HEIs has been completed and mobile App has also been developed.
- UGC Structure and Management Survey – 2076 has been carried out including the details of the existing structure, framework, scope of the work, functions and human resources. The recommendations of the survey submitted to the Ministry of Education, Science and Technology have been approved along with the human resource positions by the Ministry of Finance.
- Land for the proposed Yogmaya University has been identified and necessary documents have been submitted to the Ministry of Education, Science and Technology for approval.
- Land for the Central Office and the Academic units of Nepal Open University has been identified and necessary documents have been submitted to the Ministry of Education, Science and Technology for approval.
- To gradually implement the higher education policies outlined in the government's 15th interim plan, Program Guidelines – 2077 has been issued.

UGC Regular Activities

- In the last fiscal year 2076/77, UGC provided 52 M. Phil. fellowships, 10 M. Phil. thesis writing awards and 201 Master's thesis support. Additionally, 3 students with disabilities received Master's thesis writing support. Also, 49 PhD fellowships, 6 partial PhD support, 44 mini-research and 34 faculty research grants were awarded. Three institutions received Covid-19 specific research and 7 institutions received collaborative research support. Thirteen individuals received journal article publication grants. UGC provided 3 scholarships for medicine and 5 scholarship for engineering to the students from the marginalized communities that include Dom, Badi, Chamar and Mushahar.
- Due to the support provided by the UGC in the research activities, 140 articles have been published in the international journals exceeding the UGC's target of 85 articles.
- Laboratory enhancement support was provided to 50 HEIs to improve the laboratories. Similarly, Integrated

Research Laboratory grant has been provided to Agriculture and Forestry University to establish a high class laboratory.

- Five Innovation and Scientific Research grants have provided in the areas of national priorities.
- Under the physical facilities improvement support, 174 HEIs have received Rs. 40,00,00,000/- and 457 HEIs have received Rs. 38,40,00,000/- regular grants for academic excellent.
- For seminar/workshop, conference (international, national and local), 41 HEIs received the UGC support and some others received grants for short term programs (refresher training – 6, capacity building of teachers and students – 34, research method and laboratory training – 59, industry academia dialogue – 10). Most of these programs were not possible due to the Covid-19 pandemic.
- Partial support was provided to 128 faculty members to attend the international conference/workshop/seminars.
- UGC support was provided to CERID/TU to organize the capacity building training to the campus chiefs of the 62 campuses in areas of educational planning and administration.
- The laboratories of the 24 Science and Technology related campuses (with B Sc and M Sc programs) have been improved with the budget of Rs. 36,85,00,000/- received from the Nepal Government in the fiscal year 2075/76 and 2076/77.
- To support the policy of expanding technical education in community schools, technical schools and the schools under CTEVT by producing technical human resources, approval has been granted to enrol 192 students in Engineering, 110 students in Agriculture, Forestry and Animal Sciences at the Bachelor level. In the last fiscal year 2075/76, there are 122 students in Engineering and 50 students in Agriculture.
- Under the performance grant support, 124 community campuses have received the grants. Under TU, 19 decentralized campuses, 8 autonomous campus and 14 central departments have received the grants. Similarly, out of 210 programs targeted to switch into the semester system, 190 programs have already received the support and rest of them are under the process. Similarly, the target was to implement 140 revised or new programs and the target has already exceeded with the 148 programs which have already received this support. Additional 21 HEIs will receive support for the revised programs in areas of priorities on competitive basis audited by the experts in the relevant subject areas. Under scholarship for economically dis-advantaged students, 7443 students of bachelor level and 2087 students of 10+2 science have received scholarships through the Student Welfare Financial Support Fund Development Committee.
- Calendar of operation has been developed and enforced in the central departments of Tribhuvan University. The average time for results publication in the Office of the Controller of Examination has been reduced to 5 months 13 days in some subjects and 3 months in some other subjects.
- In order to respond to Covid-19 pandemic in the higher education system, 300 HEIs (Dean's Offices, Schools, Central Departments, Constituent and Affiliated Campuses) have received Rs. 12,50,000/- each to manage online teaching and learning. The first instalment of Rs. 10,00,000/- has already been disbursed.
- Twenty five community campuses located in mid-west and far-west have been included to the universities in their respective regions as their constituent campuses.
- Some universities have started merit-based appointment in the executive positions through open competition.

Achievements at the International Level

- High level officials including the Chair of the UGC's visit to China to participate in the programs to foster academic collaboration, quality assurance, higher education policy and agreements signed with different universities.
- A week-long capacity building visit of the Assistant level staff to Malaysia.

- Chair's visit to Bangladesh on the invitation of the UGC Bangladesh.
- Visit to National Assessment and Accreditation Council (NAAC), India and agreement signed to cooperate in the area of accreditation.
- Participation in Asia-Pacific Quality Network (APQN) and International Network for Quality Assurance Agencies in Higher Education (INQAAHE).
- Chairman's visit to Maldives to participate in the Third Meeting of the SAARC Ministers of Education/Higher Education and Meeting of Senior Officials of Education.
- Member Secretary participated in the III International Scientific Forum 'Step into the Future: Artificial Intelligence and Digital Economy' in Moscow, Russia.
- Member Secretary's participation in Business Education and Human Resource Development in Asia Workshop in Nihon University, Japan as a Keynote Speaker and Innovation Management for the Sustainable and Inclusive Development in a Transforming Asia conference organized in Kyoto University.

Challenges

- Gross enrolment in higher education of the developing countries (for example, India, Malaysia, Vietnam) is more than 26% but Nepal has only 14.42%. There has been a slight increase of 0.42% in this year but meeting the target of developing countries through higher education enrolment in Nepal by 2022 is challenging.
- In about 552 HEIs, number of students appearing in the final exam is below 100 and in 277 HEIs the number is between 100 to 200. Due to the lack of standard norms and mapping of the HEIs while establishing and affiliating the new HEI, sustainability of the academic programs and resource mobilization is still difficult.
- Graduation rate in higher education is very minimum. TU's bachelor program occupies 69% of the total students but the graduation rate is 26.1% indicating 73% wastage. In such situation, quality enhancement of the higher education and making it market relevant is equally challenging.
- Despite the expansion of higher education in the country, still a large number of students are going to the foreign countries in search of quality education particularly in the technical and vocational subjects and a huge amount of money is going out of the country.
- Quality Assurance and Accreditation (QAA) system should be made mandatory for all the HEIs. Community and private campuses have shown interest in the QAA but the constituent campuses and central departments need to be sensitized in this process.
- In technical subjects the students enrolment is about 30% in developing countries but in Nepal it is only 23.02%. Increasing enrolment in these subjects is still challenging though there has been some increase in the last few years.
- If we take the figures of the convocation ceremony, the number of graduates in higher education is only 84,510 with gross product of only 19%. Last year, it was 20% . This shows that the investment should be increased. If we include those who did not participate in the convocation ceremony the number is slightly bigger.
- Infrastructure of the HEIs were severely damaged by the 2015 earthquake and the reconstruction is still slow. This has greatly affected the teaching and learning activities and reconstruction should be completed as early as possible.
- Calendar of operation is still a big issues in the HEIs due to which there are delays in enrolment, exam, results and other important work. This has greatly affected the students' future and the investment of the parents in their children's education.
- Due to the ambiguities in the Project Implementation Booklet of the HERP and the internal issues of the

community campuses and universities, budget allocated under the Higher Education Reform Project has not been timely utilized.

- The Covid-19 pandemic has greatly affected higher education disrupting the regular classes and timely operation of exams, research and other activities. There is also a delay in utilizing the development budget.

Measures of Improvement

- It is important to implement the policies outlined by the National Education Policy – 2076.
- In the context of federal structure, restructuring of higher education institutions and their management should be worked in consultation with the relevant stakeholders.
- Clear policy and procedure to establish universities, scoping and specialization of the programs in the existing universities, economic models to operationalize the universities and quality assurance mechanism of the academic programs should be worked out as early as possible.
- Suspension of affiliation without mapping is the need. The standards set for the affiliation need to be strictly enforced and national priorities should be respected in the new academic programs.
- The general education that exist in most of the HEIs need to be revised to make them market relevant. Technical subjects should be prioritized and education should match the skills of the work place.
- Research culture should be inculcated in the higher education by engaging faculty and students while they are in the academic programs.
- Eligibility test should be enforced to employ qualified faculty members and recruitment should be made more transparent and systematic.
- For M Phil and PhD programs, UGC has set the minimum standards and all the HEIs should follow the same.
- Necessary home work should be carried out to manage the physical infrastructure and financial resources of the newly established universities.
- De-politicization of higher education should be approached through the dialogue with the relevant actors and institutions.
- Results-based monitoring and evaluation system should be established in order to regulate the higher education for its quality performance.
- Special incentive package should be developed to attract more female students and students from poor, dalit and disadvantaged communities in higher education.
- Scholarships provided by Nepal government and other institutions should be channelized through integrated one-door-policy system.
- QAA should be made more effective by improving its management structure.
- In the Federal context of Nepal, students should encouraged to attend the HEIs in their respective provinces by making the academic programs more appealing for the students.
- Faculty members who are teaching in the community campuses should be brought under the university structure.

SECTION I

UGC, NEPAL: A BRIEF INTRODUCTION

1.1 Background

Established as an autonomous statutory body under the *University Grants Commission Act, 1993*, UGC has the following broadly envisioned objectives:

- to promote, facilitate, support, and enhance the quality of higher education,
- to enable educational institutions to meet the national need for an educated and trained workforce,
- to develop Nepali academia as per the global standards,
- to solve problems and address the challenges that have been historically impairing the development and quality of higher education in the country, and
- to make higher education inclusive and accessible to disadvantaged and marginalized communities.

1.2 Functions

UGC allocates and disburses grants to universities and higher education institutions to ensure their smooth operation and to help them realize academic excellence. UGC is also expected to define the academic standard of higher education and facilitate good rapport and coordination among the universities in the country, thereby encouraging them to cooperate, collaborate, and exchange their academic experiences. In line with this spirit and expectation, the *UGC Act* (1993) mandates the University Grants Commission to carry out the following functions:

- Formulate policies for allocating government grants to universities and higher education institutions;
- Disburse grants to universities and colleges, and make recommendations to the government for revising the provision of grants;
- Award grants for research, scholarships, and fellowships;
- Take necessary measures to maintain the standards of higher education;
- Advise the government on matters concerning the establishment of new universities, or the operation of an institution of higher education with an affiliation to foreign universities/ institutions;
- Make necessary arrangements for the exchange of resources, funds, and fellowships between universities and educational institutions within and outside Nepal.

1.3 Organizational Structure

The apex body of UGC (the Board) consists of eleven members headed by the Executive Chairman. Some office bearers are nominated by the government while some others are *ex-officio* members. Upon the recommendation of the Ministry of Education, the Council of Ministers nominates the Executive Chairman and the Executive Member Secretary of the commission from among the academic leaders and eminent professors. The secretaries of the Ministry of Education and Ministry of Finance, and a member of National Planning Commission (Social Sector/Education Desk) are the *ex-officio* members. Among the two Vice-Chancellors represented, one is usually from Tribhuvan University. Additionally, two distinguished professors and two prominent educationists are nominated as the members

of the apex body. The tenure of the members, including the Chairman and the Member-Secretary, is four years from the date of their appointments; however, they are eligible to be reappointed.

In order to carry out its duties and responsibilities, UGC has five divisions: Administrative, Planning, Monitoring and Evaluation, Quality Assurance and Accreditation & Research. There are different sections and units under these divisions. In addition, UGC occasionally forms different committees and task-force units to undertake and fulfill various responsibilities. The University Grants Commission Act specifies the provisions for forming different committees and recruiting necessary staff members, hiring service providers, or receiving services of consultants and experts. UGC has the following major committees:

- University Coordination Committee
- Higher Education Reforms Project Steering Committee
- Quality Assurance and Accreditation Committee
- Research Evaluation Committee
- Quality Assurance and Accreditation Technical Committee
- Academic Committee

In addition to these committees, several other teams, task force units, and special task committees, namely the Reform Committee, Cluster Committee, Peer Review Team, Theme/Task Committee, and University Feasibility Study Task Force have also been formed. To create a systematic archive of its activities and achievements, UGC has also formed a publication board which has published historically important documents, research articles, articles on current affairs, and annual reports.

1.4 Duties and Responsibilities

UGC plays an instrumental role in the establishment of new universities; formulation of academic policies in higher education; allocation of budget and distribution of grants; setting up criteria, norms and standards of higher education; and providing funds for research and academic activities.

1.4.1 Role in Establishing a New University

UGC provides expert advice to the Ministry of Education (MoE) while establishing a new university. With the formation of task committees, it carries out various tasks, including feasibility studies, assessment of the infrastructure and prerequisites, and the preparation of a draft act for the proposed university.

1.4.2 Advising on Education Policies

UGC advises the government on higher education policies upon the request of the MoE by creating a policy-drafting committee. Such advisory tasks include bringing about appropriate higher education policies and reviewing and revising existing policies so as to address the emerging national needs.

1.4.3 Budget Allocation and Grants Distribution

UGC also advises the government on the allocation of the national budget for the education sector by forming a task committee responsible for formulating a framework. The committee recommends the allocation for the higher education sector and once the budget is allocated, UGC undertakes the task of systematically disbursing the funds to the higher education institutions.

1.4.4 Assurance of Standards and Quality of Higher Education

In order to ensure Quality Assurance and Accreditation (QAA) process in the higher education institutions, UGC sets up criteria, develops benchmarks, establishes the norms, and sets standards for the QAA certification.

1.4.5 Research Promotion

In order to establish and promote research culture in higher education institutions, UGC provides grants assistance to qualified individuals and institutions to carry out research activities.

1.4.6 Publication and Creation of Archives

Through its periodic and regular publications, including *Abstracts of Mini Research Projects*, *Journal of University Grants Commission*, *UGC Newsletter*, *Annual Report of UGC*, and *Higher Education Information System (HEMIS) Report*, UGC not only disseminates research reports but also maintains records of the information and data related to higher education in the country.

1.4.7 Implementation of Higher Education Reform Project (HERP)

The Government of Nepal, with the support of International Development Agency (IDA) and the World Bank, has been implementing Higher Education Reform Project (HERP, 2015-2020). Since its commencement on 22 May 2015 (Jestha 8, 2072 BS), the project has been implemented on the basis of result-based progress monitoring and fund flow. To oversee the implementation of the project, Seven Disbursement Linked Indicators (DLIs) are agreed upon. As per the financing agreement, the fund flow from the WB to the Government of Nepal is linked to the progress based on the DLIs. The total cost of the DLIs achieved for the base year is SDR 5.95 million, which is approximately US\$ 8.625 million.

SECTION II

Budget and Finances

2.1 An Overview of Financing to Universities and HEIs

One of the major responsibilities of UGC is to formulate policies for allocating grants to different higher educational institutions. The Government of Nepal (GoN) provides a higher education budget to the UGC under the budget Head No 350019 classified as capital and operating grants with and without terms. The commission provides grants to institutions and, when necessary, coordinates with concerned bodies to provide additional funding to universities. Based on the requirements of the sector, the government also provides additional grants. Similarly, GoN also provides grants to implement Higher Education Reform Project financed by World Bank as a soft loan. Funds to the universities are made available in the form of block grants, under two categories: operational and developmental.

The operating funds for TU and NSU are estimated on the basis of the salaries and basic logistical support provided to the teachers and other staff members. The autonomous TU constituent campuses have been receiving earmarked grants from UGC based on the number of faculty and administrative positions on campus irrespective of whether they are vacant or filled. In the case of other universities (KU, PU and POKU), funds are provided using an agreed upon formulae based on the principle that undergraduate programs are designed to recover the cost of operation. However, a total of twenty percent of the enrolled students must have the opportunity to receive a scholarship based on their financial status. Master's level programs are to be designed so as to recover 80 percent of the associated cost with a total of twenty percent of the enrolled students receiving need-based scholarships. The formulae consists of core funding for maintaining the university system. LBU has received operating grant equal to the core funding. In a similar fashion, Agriculture and Forestry University, Far Western University, Midwestern University and Nepal Open University are getting funds sufficient to cover the cost of salaries, benefits, as well as other operating costs. Likewise, Medical College Promotion Board has been receiving operating grants sufficient to carry out its activities.

In cases of the community campuses, grants, based on predetermined criteria (formulae), are provided. The formulae consists of minimum grants (currently 300 thousand per campus) plus additional grant on the basis of the number of students enrolled, number of the programs being run, geographical location of the campus, availability of constituent campuses, programs offered on science and technology subjects and so forth. Development funds are provided on the basis of needs as well as the availability of government funds. Basically, the developmental grants focus on the creation of new infrastructure and maintenance of existing ones.

2.2 UGC Program & Budget

University Grants Commission (UGC) had passed an annual budget of Rs. 13,247,700 thousand for the fiscal year 2019/20. The Commission had approved the regular and development budget for the universities, community campuses, other higher education institutions, quality improvement programs and other programs of the UGC. 2.3 Income and Expenditure of UGC in 2019/2020

In the fiscal year 2019/2020 (FY 2076/077), UGC received Rs. 10,244,600 thousand as operating grants and 4,093,800 thousand as capital grants from Nepal Government allocated originally in the Red Book and some additional grants. In addition to this, Rs. 50,00,00000 thousand had been released by the government to reconstruct the HEIs damaged by the earthquake. The internal income of UGC in last fiscal year was NRs. 21,0159.

UGC received Rs. 2,295,800 thousand as operating grants and 4,200 thousand as capital grants from Nepal Government through IDA Source for Higher Education Reform Project activities.

2.4 Grants Disbursed to Higher Educational Institutions

During the last fiscal year, the UGC disbursed a total of Rs. 13,494,478,000 thousand to eleven universities, 4 Medical colleges and Madan Bhandari Technical University. The grant assistance is divided into recurrent and development categories. The list given below specifies the details of the grant assistance to different universities and institutions:

B. Grant to Community Based Campuses

The Commission provided grants of Rs 2,780,37900 to community campuses across the country under different categories in the last fiscal year. The Commission disbursed the grants of Rs. 350,37,900 as regular grants to community campuses and additional Rs. 24,30,00000 for physical facility development of the campuses. The community campuses were selected for regular grants and physical facility development grants on the basis of the evidence through their proposals, number of students, academic programs and the location of the campus (for example: backward areas, remote areas, or hilly regions). Under the physical facility development category of grants, campuses were given funds for the construction of buildings, purchasing books, furniture, or other equipment.

C. Grants for Reconstruction

University Grants Commission made the disbursement of Rs. 50,00,00000 to Tribhuvan University for the reconstruction of physical infrastructures damaged by the earthquake of 2015.

D. Quality Improvement Program (QIP)

The Commission disbursed grants amounting Rs. 15,031,709.87 for Quality Improvement Programs in the previous fiscal year. Under QIPs, the Commission provided grants for fellowships, research projects, refresher courses and different types of capacity development programs for higher education institutions, and their teachers and students.

2.5 UGC Operating Expenses

Most of the income of the UGC was spent on providing grants to universities and campuses, or to fund research activities and higher education quality enhancement programs. Besides, the expenses made in the form of grant assistance, UGC incurred administrative and operational costs amounting to Rs. 33,365,076.76 in the last fiscal year, as the table below explains:

SECTION III

Regular Programs of UGC

3.1 An Overview

The regular programs of University Grants Commission are divided into two sections: (1) Institutional Development Grants and (2) Quality Improvement Programs. The first category consists of five sub-components: i) Grants for Universities, ii) Regular Grants, iii) Physical Facility Development, iv) Special Grants, and v) Performance and Formula Based Grants. The second category consists of eight sub-components: i) Fellowship, ii) Thesis Preparation Grants, iii) Scholarship, iv) Research Promotion, v) Capacity Development Program, vi) Teaching/Study Visit, vii) Research Infrastructure Development Support and viii) Quality Assurance and Accreditation.

3.2 Institutional Development Grants

Institutional development grants consist of four major categories. The fourth category has additional sub-categories.

3.2.1 Grants for Universities

UGC provides grant assistance to the existing universities and the newly established academic institutions and universities. Grants are provided in different forms: bulk grant, formula-based grant, or program grant. Universities must apply with the details of their programs alongside a budget estimate for the grants. UGC, after consultation with the relevant stakeholders, provides the grants as per the set criteria.

3.2.2 Regular Grants

Under this category, affiliated community campuses are provided with regular grants to enhance quality of education. The grant assistance is provided according to the rules and regulations charted out in the manual. Regular grants are provided to the colleges that have completed at least one academic year with the Bachelor's or Master's level programs. The community campuses are selected on the basis of the documented evidences that include the number of students, academic programs, and the location of the campus (for example, backward areas, remote areas, or hilly regions).

List of Community Campuses that received regular grants in 2019/20 is presented in Annex A.

3.2.3 Physical Facility Development Grants

The grants under this category are provided to enhance physical facilities of the campuses in order to foster quality of education and to improve capacity of the campuses to enhance access to quality higher education in the country. The grants are provided to expand physical facilities that include classrooms, library, toilet and administrative buildings. Support for references and textbook is also provided under this grants scheme.

List of Community Campuses that received physical facility development in 2019/20 is presented in Annex B.

3.2.3.1 Library Strengthening and Equipment Grants

In order to enhance the quality, capability, and infrastructure of the community campuses, a number of grants are provided under various headings. The major headings for this type of funding include grants for purchasing books, furniture, computers, physical infrastructure, and teaching materials.

3.2.3.2 Grants for Purchasing Books

Under this program, the UGC provides grants to community campuses to purchase books to enrich their libraries.

List of Community Campuses that received grants for purchasing the books in 2019/20 is presented in Annex B.

3.2.3.3 Grants for Purchasing Furniture

Under this program, grants can be provided to community campuses to purchase furniture for their libraries.

List of Community Campuses that received grants for purchasing the furniture in 2019/20 is presented in Annex B.

3.2.3.4 Grant Assistance for Purchasing Equipment

UGC also provides grants to community campuses to purchase computers and other ICT equipment to help them efficiently execute their administrative and academic activities through a systematic use of information technology.

List of Community Campuses that received grants for purchasing the equipment in 2019/20 is presented in Annex B.

3.2.3.5 Grants for Infrastructure Development for Extra Curricular Activities

Under this program, grants can be provided to community campuses to develop infrastructure specially playground and other necessary materials for extracurricular activities.

3.2.4 Special Grants

Special grants are provided to community campuses which have completed at least two academic years of teaching but have not received any regular grants from the Commission. This type of support is mainly provided for purchasing books, furniture and equipment to accelerate academic and administrative work on campus.

3.2.5 Grants to Institutions Selected for HERP Support

3.2.5.1 Performance and Formula Based Funding

Programs conducted under the HERP, with the financial assistance of the World Bank, will be funded based on the performance of the of the HEIs and the agreed formula. Support for the community campuses will be based on their performance while the funding for the universities and autonomous constituent campuses will be formula based.

- UGC will select the campuses for the performance-based grants and funds will be disbursed during the project period. The number will be flexible.
- Autonomous campuses constituent campuses will receive grants during the project period.
- For the community campuses that have received regular Commission grants, a separate guidelines will be prepared for funding.

Details of the performance and formula funding grants including the indicators, statistics, sources, formula, amount for each indicators and other details will be based on the Project Implementation Guidelines – 2071 (amended).

3.2.5.2 Revision of Existing Programs and Introduction of New Program

For curriculum revision and new program development, HEIs will be provided additional grants and the HEIs will received funding on the condition that they meet the criteria set by the UGC.

3.2.5.3 Grants for Participation in QAA

Those HEIs who are in the process of QAA, will receive funding from the UGC based on their progress made towards receiving the QAA certification.

3.3 Quality Improvement Programs

The University Grants Commission is not only devoted to expanding higher education in the country but also committed to the continuous improvement of its standard and quality. This approach serves a dual objective: meeting the national need for education and competing in the international market. In this regard, UGC has been implementing Quality Improvement Program (QIP), which has the responsibility of modifying and improving the existing curricula of higher education, conducting refresher courses, and launching skills-and-capacity-building programs for teachers.

In addition, QIP promotes the culture of research, and improves academic, educational, and physical capabilities of higher education institutions. Quality improvement programs are organized as per the *Regular Program Guidelines 2076* and necessary endeavors for improvements have been made based on the results of the previous programs and suggestions from the stakeholders.

3.3.1 Fellowship Programs

As an integral part of research funding component of the regular program of the UGC, this subcomponent covers the financial support to the faculty members from HEIs and fresh postgraduate students attending Master's, MPhil or PhD degrees. This program also supports postdoctoral fellowship in large UGC funded research projects. The primary purpose of this program is to support quality research in areas of national priority and academic excellence. Young students as well as faculty members of HEIs of Nepal are the beneficiaries of this program.

This program comprises M. Phil. fellowship for 18 months, PhD fellowships for three years and partial support for research or thesis preparation for Master's, MPhil and PhD students. This support is provided through the host institution. A limited number of postdoctoral fellowships for up to 2 years are provided to qualified researchers to work in the UGC-funded research projects. Candidates from disadvantaged groups (Women, Dalit, Janajati, Madhesi, persons with disabilities, and persons from or working in remote districts) receive extra marks during evaluation of applications. Under special eligibility conditions, upper age limit for candidates from the underprivileged group can be relaxed by 2 years.

3.3.1.1 PhD Study Fellowship

This program primarily aims at supporting qualified junior faculty members and young students pursuing PhD degrees in universities in Nepal or recognized foreign universities with monthly stipend to cover educational expenses. The Faculty members/young students enrolled in MPhil program leading to PhD degree are eligible to apply for the PhD Fellowship program. The allocation of seats to various categories and clusters are based on the scheme outlined in The UGC Research Guidelines, 2019. Selection of candidates for PhD fellowships are based on the competitive evaluation of PhD research proposals along with the academic and research credentials of the candidates. Research proposals are evaluated based on the indicators of academic merit and association of the research project to national priority. Candidates from the underprivileged groups receive preference marks during the evaluation of the applications.

The award consists of a monthly stipend, eligibility for the UGC travel grant and research publication cost. The stipend is offered for a period of three years and the other supports are made available anytime during the PhD program. The PhD Fellowship funding scheme is presented in the UGC Research Guidelines. The awardee enrolled in a university in Nepal should submit a written progress report signed by the Supervisor every six months to receive the installments and make an oral presentation on the progress at the UGC before receiving third installment every year. To receive the subsequent installments of the stipend, the awardee enrolled in a university in a foreign country should submit a written progress report with his or her Supervisor's endorsement every six months.

The list of research scholars awarded under PhD Fellowship in 2019/20 is presented in Annex C.

3.3.1.2 M. Phil. Study Fellowship

This program is targeted to the qualified faculty members of Nepal's HEIs and young students who are pursuing their MPhil degree. The faculty members/young students enrolled in M Phil leading to PhD or PhD integrated M Phil or an MPhil degree are eligible for this fellowship. Fellowship seats are divided equitably between the Faculty category and the Young student category using a mixed proportional method. The selection of candidates is based on the evaluation of candidate's academic and publication records, underprivileged status and interview scores awarded by the relevant Cluster Committee.

The selection procedures are similar to that of the PhD Fellowship except for evaluation of research proposal. Research proposal will not be required for this category support. However, research interest and motivation for research are evaluated by the interviewers during the interview. Fellowship seats are allocated to Categories and Subject Clusters using a mixed proportional method. First, available seats are divided equally between the Faculty

Category and the Young Category. Then, from the allocated seats for each category, 50% of seats are divided equally among the Subject Clusters that have successful applicants. The rest of the seats are divided among the Subject Clusters proportionally based on the number of successful applicants in each cluster.

The list of M. Phil. Fellowship winners in 2019/20 is presented in Annex D.

3.3.1.3 Postdoctoral Fellowship

Recognizing that postdoctoral fellowship is a strong support system for promoting research culture in universities and that the universities in Nepal are yet to introduce it, a limited number of postdoctoral fellowships are introduced to promote the culture of postdoctoral fellowship in the HEIs. Initially, the postdoctoral position and fellowship are provided for technical and laboratory-based research among the projects funded by the UGC Collaborative research grant. Research projects in the HEIs funded by sources other than the UGC can also be considered for this support. The Alternative scheme of Appointment and Promotion based on Academic Excellence introduced by Tribhuvan University under the HERP will also be encouraged to link with this postdoctoral fellowship program. The UGC postdoctoral fellowship is for up to two years.

3.3.2 Thesis Preparation Grants

3.3.2.1 Partial Support for PhD Fellow

The purpose of this program is to provide partial support to PhD Fellows who have not received fellowship or financial support from any other sources. A PhD fellow enrolled in a university in Nepal or a recognized foreign university (Public university, Accredited institutions and Ranked universities) who has not received Fellowship and Research Support from any other sources can apply for this support within specified time during the course of his/her PhD program. Application can be submitted to the UGC any time throughout the year. Application should accompany a copy of PhD Thesis proposal/progress report and a recommendation letter from the institution/supervisor and employed institution, if any, certifying that the candidate has not received any other financial support.

SN	Support	Amount (Rs.)	Disbursement
1	Field study	20,000	Upon submission of a plan, together with a recommendation by supervisor (request should be made within 3 years from the date of acceptance of PhD research proposal)
2	Study material	20,000	Reimbursed if requested within 2.5 years from the date of acceptance of the PhD research proposal
3	Typing/binding	20,000	After submission of a copy of the final draft of the thesis

A PhD fellow without fellowship and financial support from any other sources can apply for this support within the specified time during the course of his/her PhD program. Applications can be submitted to UGC any time throughout the year. Applications should accompany a copy of the PhD Thesis proposal/progress report and a recommendation letter from the institution or supervisor, certifying that the candidate has not received any other financial support. Every year, 20 students are supported under this program.

The list of PhD scholars awarded under partial support in 2019/20 is presented in Annex E.

3.3.2.2 Master's/M. Phil. Thesis Preparation Support

This program aims at primarily provide financial support to Masters and MPhil degree students to conduct research in nationally important areas leading to their theses required for the respective degrees. All Nepali students enrolled in Nepali universities for MPhil/Master Degree are eligible to apply for support under this program. Candidates who have received the UGC MPhil Fellowship also can apply for this support. The fund received under this program can be used to cover costs required to complete the research and prepare the thesis.

Eligibility and Requirement

Final year Master's students with at least 70% marks or equivalent CGPA in technical clusters and 60% marks or equivalent CGPA in non-technical clusters, 60% or 3.00 CGPA in to-date final examinations, and MPhil students

without any fellowship and research support are eligible to apply. Applicants are required to submit research proposal together with application during the application season.

The list of the winners of grants for M. Phil. thesis preparation and Master's thesis preparation in 2019/20 is presented in Annex F.

3.3.2.3 Thesis Preparation Support for Persons with Disabilities

Under this program, UGC supports the students with disability for Masters and MPhil theses writing in a non-competitive way. Masters and MPhil students with disability (all kinds of disability) can apply to the UGC for the support anytime after the date of the acceptance of their theses proposals by their respective institution and within six months from the date of their thesis approval. The financial support under this program is the same as that for the Masters/MPhil Research Support. Persons with the disability of the classes 'A' and 'B' are eligible to receive additional fund for a support to have an assistant, if any.

The list of the winners of this financial support in 2019/20 is presented in Annex G.

3.3.3 Research Infrastructure Development Support

The purpose of this program is to provide financial support to higher education institutions to strengthen their research infrastructure. This program also includes a program to support the publication in the national peer-reviewed journals to strengthen and upgrade their quality.

3.3.3.1 Research Laboratory Support

The purpose of this program is to strengthen research laboratories in the HEIs. Under this program, funds are made available to establish and strengthen research laboratories; to purchase laboratory equipment; to purchase service contract and extension; and to strengthen physical infrastructure of research laboratories. Research laboratory service networking and preparation of national inventory of facilities and services are also supported. The UGC will determine the nature and scope of support and will invite application from HEIs.

3.3.3.2 Library Networking

The purpose of this component of research funding is to strengthen the capacity of the central libraries in terms of the library resources and researcher's access to them. Support is provided to increase the subscription capacity of libraries, digitize research literature and develop inter-library and library-to-user networking. UGC will develop a separate guideline for this purpose and central libraries will be invited to submit their proposals.

3.3.3.3 Support for indexing Peer-Reviewed Journal

The purpose of this program is to provide financial support to nationally published peer-reviewed journals to upgrade their quality. The UGC also provides funding to establish new peer-reviewed journals in new discipline or in the area in which currently there is no peer-reviewed journal.

The UGC Minimum Standard for National Peer-reviewed Journal and the UGC Guideline for awarding support to peer-reviewed journals are in progress.

3.3.3.4 Research Management Cell (RMC)

The purpose of this support is to help establish a research management cell, a research infrastructure consisting of management and regulatory structures essential for administrating research programs in the HEIs. The research management cells provide necessary infrastructure and functional support to the respective institutions for better coordination in ongoing research and development activities.

UGC provides funding of Rs. 10,00,000 per institution for this activity on a competitive basis. This funding should be used as an additional source to leverage the functioning of existing research management and infrastructure. The selected institutions may use the provided funds to procure computers and other equipment, upgrade information communication technologies (ICT), purchase essential research literature, and form a Research Committee, Review Committee, Ethics Committee, or Hazard and Safety Committee with well-trained personnel and other related items. The fund will not be used to support recurrent expenses including meeting allowances.

Interested higher education institutions are invited to submit *Strategic Plans*, and after the competitive evaluation and selection of institutions, funds are made available. Disbursement of the funds is made in three installments on progress output basis. An agreement is signed between UGC and the concerned institution before commencing the disbursement of the funds.

The list of higher education institutions that received financial support to establish research management cell in 2019/20 is presented in Annex H.

3.3.4 Research Promotion

The promotion of the culture of research among individuals and institutions is one of the major objectives of the UGC. This statutory body firmly believes that research not only enhances the academic knowledge of an individual but also of the concerned institution. To this effect, UGC has made a provision for research support programs since its inception.

3.3.4.1 Small Research Development and Innovation Grants

The purpose of this program is to support relatively small research projects (Research Category) and small development and innovation activities (Innovation Category) in the higher education institutions. Any research that can be completed within a year is regarded as a small research. In contrast, an innovation project is focused on new technology, product or service of commercial value or application for solving existing problems. Preliminary results or prototype of the product developed by the applicant is the primary criteria for evaluation of the proposals in the Innovation Category. Proposal format and the benchmarks for evaluation are slightly different for Research Project (R-Project) and Innovation Project (I-Project).

The list of individuals who were awarded with the small research development and innovation grants in 2019/20 is presented in Annex I.

3.3.4.2 Faculty Research Grants

The purpose of this program is to foster research collaboration among the faculty members, allow opportunity to train postgraduate students for their theses and make contribution to the national research output. A two-year research project collaboration at least between two faculty members with commitment to train at least two students for their theses is funded with a medium grant under this program. Collaboration involving underprivileged institutions including community campuses is particularly encouraged. Such collaboration gets additional marks during the evaluation for award.

The list of individuals who were awarded with the faculty research grants in 2019/20 is presented in Annex J.

3.3.4.3 Collaborative Research Grants

Funding is offered to collaborative research projects involving more than two faculty members of an institution or collaborating institutions. Such supporting grants are provided for relatively important research areas, identified as areas of national priorities.

Research proposals involving more than two faculty members (a principal investigator and two or more co-investigators from the same or different higher education/research institutions and disciplines) are solicited from faculty members for funding through a competitive selection process once a year. The principal investigator must have been a permanent faculty member for the past five years and have demonstrated a good track record embellished by research accomplishments (at least two original research articles published in indexed journals). The co-investigators must be full time faculty members or have been a research fellow for one full year, and must demonstrate a similar track record with relevant research accomplishments. The involvement of two postgraduate students for PhD degrees or three or more students for MPhil/Master's degree is required. The principle investigator and co-investigators are collectively responsible for all academic and financial obligations. The project must have support from the host institutions.

The fund can be spent only on the approved activities of the approved research project. All the equipment, technologies and resources procured by this fund are the property of the host department(s). The host institution will

receive 10% of the grant as Assistance to Department for covering overhead cost. In cases where more than one host institution is involved, the assistance fund is divided equally among the institutions. A limited number of research projects in technical clusters may apply for a postdoctoral position to be funded by the UGC.

In order to encourage the culture of collaboration in general and also as a tool for motivating relatively disadvantaged community campuses to get into research programs, a provision is included in the evaluation scheme to give additional mark for any collaboration with faculty members from community campuses.

Selection of application for Collaborative Research Grant award is based on academic credentials of the principal investigator, involvement of graduate students and investigators from underprivileged groups and the quality of the proposal.

The list of the research projects awarded under the collaborative research grants in 2019/20 is presented in Annex K.

3.3.4.4 Matching Grants for Research Development and Innovation

In order to encourage University-Industry collaboration, research, development and innovation activities sponsored by industries and public sector agencies are partially funded by the UGC. Such UGC/Non-UGC matching or co-funding are provided for the Faculty Member generated research, development and innovation projects. Eligibility and procedure for application, evaluation and award for this grant are the same as that for Collaborative Research Grant, Faculty Research Grant and Small RDI grant, whichever is closer in terms of the fund pledged by the sponsor. Application can be submitted throughout the year. A proof of sponsorship or the pledge thereof should be presented together with the application for the research grant to the UGC.

3.3.4.5 Special Research

The purpose of this program is to support need-based research. Scientific research works on nationally important and urgent issues as well as policy and program research that are urgent or relevant to the research priorities of the UGC, universities or governmental agencies are supported under this program. Generally, the UGC will solicit research proposals on relevant issues from qualified individuals and institutions. The UGC might also consider investigator-generated research proposals. Research themes for each year and indicative framework for each theme are developed separately and are considered, after approval from the UGC, as a part of the UGC Research Guidelines.

3.3.4.6 Extramural Research Collaboration

Research collaboration between a principal investigator (PI) from the HEI in Nepal and extramural co-investigators (Co-Is) from national research institutions are encouraged under all research support programs. Minimum academic qualification required of extramural Co-Is is similar to that for the PI of Collaborative Research. Under the UGC Collaborative Research Grant program, the Principal Investigator from the HEIs in Nepal can collaborate with researchers from the recognized/accredited foreign research institutions and universities.

In case the extramural Co-Is is from foreign research institutions, the following conditions will apply:

- a. The Principal Investigator (PI) of the research project must be an eligible faculty member from the HEIs in Nepal.
- b. Qualified faculty member or research fellow from foreign university or research institution recognized/accredited by the concerned national board/agency can be included in the research team as a Co-Investigator (Co-I).
- c. Any Co-I from the eligible foreign university must be a permanent/full time Faculty Member/ Research Staff in the institution for the last five years
- d. Any Co-I from the eligible foreign university and research institution must have a doctoral degree and a proven track record of research publication (at least five original research articles published in ranked journals).
- e. Extramural Co-Is must submit a letter of no-objection received from the head of his/her institution

- together with the application form submitted to the UGC.
- f. The bulk of the research must be conducted in the laboratory/field in Nepal.
 - g. Only the experiment and testing that cannot be performed in laboratory and the field in Nepal due to unavailability of such service in Nepal or matter related to quality can be performed in foreign laboratory/field.
 - h. Any transfer of research materials, samples and technology should comply with all applicable national regulations and guidelines.
 - i. It is the responsibility of the university to assist the foreign researchers on travel and immigration matters in connection with the research.

A principal investigator from the HEI from Nepal and one or more extramural co-investigator should submit a joint research proposal under the intended research grants provided by the UGC.

3.3.4.7 Support for Publication of Research Articles in Ranked Journals

Under this program, the UGC provides a limited financial assistance for the publication or the handing fee charged by the publisher towards publishing their research work in ranked journals. This support can also be provided to the research funded by agencies other than the UGC, upon availability of the fund. The limit of funding per eligible research article is Rs. 50,000.

The applicant is required to submit a completed form and supporting documents. The application can be submitted any time after the acceptance of the research article by the publisher. In order to be eligible for this support, the applicant must have made at least one request to the publisher for the Fee waiver.

3.3.5 Refresher Course/Capacity Development Program/Research Methodology Training

To enhance the capability of teachers and staff members of the universities and constituent campuses, several programs such as Refresher Course, Capacity Development Trainings, Research Methodology Training are conducted.

The objective of “refresher training programs” is to make university teachers aware about the recent changes in the course contents and teaching methods and to identify the best approach in the classroom. Such programs also help teachers enhance their academic capability by making them familiar with the latest teaching, trends.

Different authorities such as universities, subject committees, dean’s offices, departments, campuses, or other higher education institutions can conduct refresher training programs with grant assistance from the UGC. The program-hosting institution or authority can submit a grant proposal to UGC along with an outline of the programs. If the proposal meets the set standards of the UGC, it provides a specified grant amount

The lists of the higher education institutions that received grants for conducting Refresher Course/Capacity Development Program and Research Methodology Training is presented in Annex L.

3.3.6 Teaching/Study Visit

Under this grant support program, the following activities are funded by the UGC:

3.3.6.1 Visit by Professors in Higher Education Institutions

Under this program, senior professors and subject teachers are provided with grants for short-term teaching visits to constituent and/or affiliated campuses of universities in order to improve their teaching.

3.3.6.2 Visit to Institutions of SAARC Countries for Special Study/Research

Under this program, financial support is offered to teachers of universities or affiliated campuses to participate in short-term special studies or research programs within SAARC countries.

3.3.6.3 Travel Grants to Participate in Foreign Seminars and Conferences

Under this program, partial financial support is offered to teachers invited by international institutions to participate in conferences, workshops, or seminars to present their papers or posters. The proposals should be

submitted in the specified format.

The mode of support is as follows:

SN	Country	Maximum Amount (Rs.)
1.	Bhutan, Bangladesh, and India	30,000
2.	Pakistan, Sri Lanka, Maldives, Thailand, Burma, Malaysia, and Cambodia	45,000
3.	Country expect 1 and 2	60,000

The details of travel grants provided to teachers in the last fiscal year are presented in Annex M.

3.3.7 Grants Assistance for Workshops, Seminars, and/or Conferences

Under this program, partial financial support is provided to academic societies of universities, campuses, departments, and related agencies to host a seminar, workshop, and or conference to study and analyze contemporary issues or problems in a specific area. The societies should organize such events jointly with the campus or concerned department.

The list of the higher education institutions that received grants for conducting a seminar, workshop, or conference is presented in Annex L.

3.3.8 Special Scholarships

Provision has been made to cover the higher educational expenses of the students from low income band from the educationally disadvantaged dalit communities that include Dom, Badi, Chamar, Mushahar in the field of Engineering and Medicine provided that the candidates meet the minimum eligibility criteria for the admission. Tuition other education institution related fees will be paid directly to the institution's bank account and Rs. 5,000/- monthly stipend will be paid to the students' account in two instalment per year. The institution related fee will be of Rs. 35,00,000/- for Medical subjects of the Medical colleges of the Kathmandu valley. In case of the Medical colleges outside the valley additional education related expenses will also be paid to the institution as decided by the Faculty Board. In case of Engineering field maximum amount Rs. 12,00,000 will be paid to the institution.

SECTION IV

Quality Assurance and Accreditation (QAA)

4.1 Introduction

The University Grants Commission (UGC) was established in Nepal under the University Grants Commission Act 1993 on 22 November 1993 mainly to coordinate among the universities; advise the Government of Nepal on the establishment of new universities; formulate policy for the allocation of government grants to the universities and higher education institutions; disburse grants to universities and make recommendations to the concerned bodies for additional grants; take necessary steps for determination; and maintenance of standards of higher education. Additionally, formulation of necessary policies and programs and taking appropriate steps for the promotion and enhancement of quality and standards of higher education; and making necessary arrangement on the exchange of scholarships, and fellowships between the universities and educational institutions within or outside the country are also the major functions of the UGC Nepal.

As mandated by the article 6 (1) (Cha) of the UGC Act 1993, the system of Quality Assurance and Accreditation in higher education was formally initiated in Nepal through the implementation of the Second Higher Education Project (SHEP) in 2007 by the UGC. The University Grants Commission had formed a 21-member Quality Assurance and Accreditation Committee (QAAC) under the Chairmanship of UGC Chairman. The committee established QAA Division (in 2066/09/06) as its secretariat and formally, begun QAA process by facilitating the HEIs intended to participate in the QAA process. The QAA Committee has been transformed to HEQAAC with 11 members with the endorsement of the Educational Quality Assurance and Accreditation Regulations (EQAAR), 2018 (2074 BS). Now, the QAAD is working as the secretariat of the council and implementing as well as monitoring QAA related activities in the country.

The Higher Education Quality Assurance and Accreditation Council (HEQAAC) is a functionally autonomous agency of the UGC Nepal provisioned by the Educational Quality Assurance and Accreditation Regulations (EQAAR), 2018 (2074 BS) of the Government of Nepal. The council formulates necessary policies and strategies to implement the Quality Assurance and Accreditation System in the country. Preparation of necessary criteria - setting benchmarks and indicators for the quality of higher education and the implementation of the National Quality Framework (NQF) to ensure that all the Higher Education Institutions (HEIs) are operating as guided by the framework, is the primary functions of the council.

The HEQAAC has the rights to formulate a Technical Committee (TC) for technical facilitation of its works and activities. For this purpose, a seven-member TC has been formed associating the renowned experts working in the field of QAA. The TC mainly gives approval of the Self Study Report (SSR) submitted by HEIs and recommends HEQAAC to form Peer Review Team (PRT) for quality assessment of the institutions of which, SSR met the technical requirements. The TC can also provide the HEQAAC other technical inputs related to QAA of higher education.

The QAA Division (QAAD) of the UGC works as the secretariat of the HEQAAC. The division performs daily and regular activities related to QAA. The division is headed by the Director, who is also the Member Secretary of both the HEQAAC and the TC. A categorically defined Job Description (JD) has been given to all the experts and the personnel working in the division.

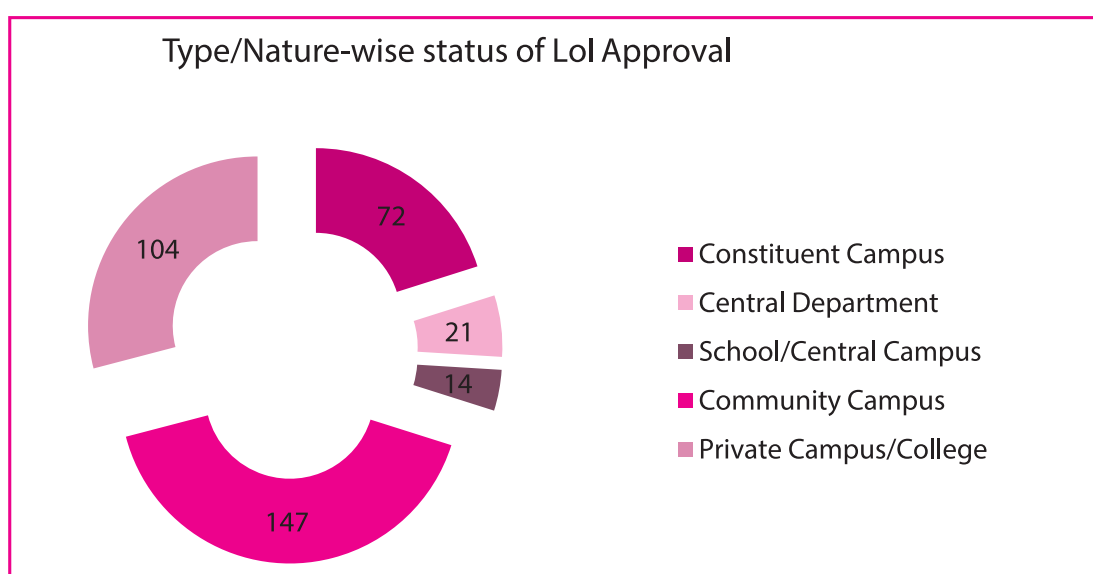

The Higher Education Reform Project (HERP) (2015-2020) implemented by the UGC has taken the Institutionalization of Quality Assurance and Accreditation System as major thrust of the project and it conditioned as a requirement under Disbursement Linked Indicator (DLI) – 1 of the Project Agreement Document (PAD). Based

on this, EQAA Regulations (2018) was endorsed that brought the system into practice. The EQAA Regulations (2018) from the Government of Nepal and HEQAA Directives (2018) endorsed by the UGC have provided Functional Autonomy (FA) to the HEQAAC to conduct quality assessment related affairs freely.

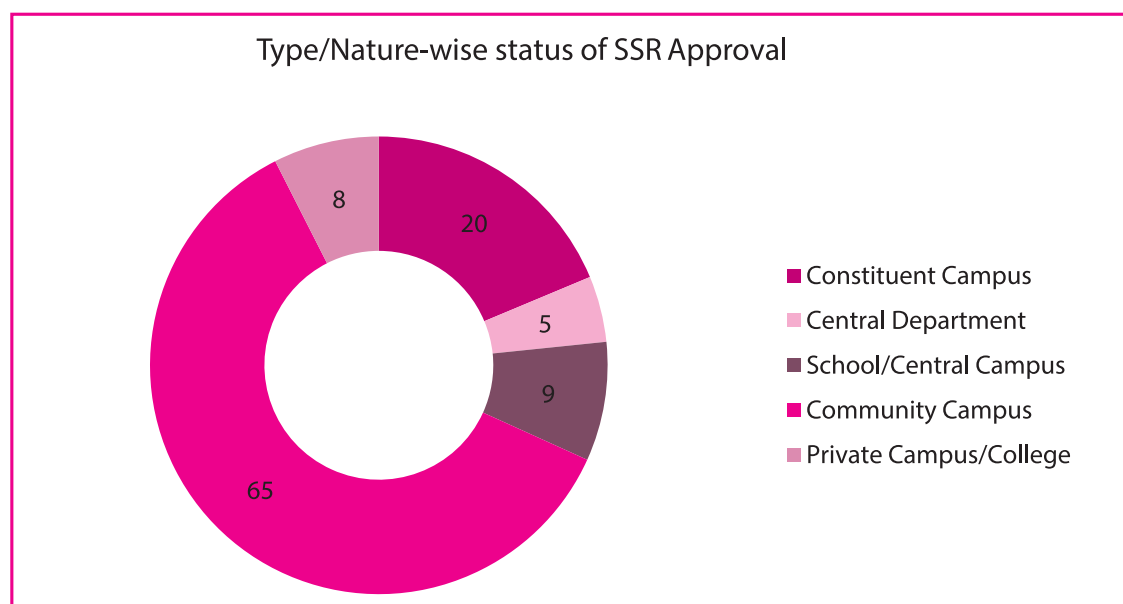

Nepali QAA system is adopting the formative strategies of the QAA meaning that the QAAD staff and external QAA experts (consultants) facilitate the participating HEIs in various ways to make them able to reach to the state of accreditation, after they submit the LoI.

4.2 Major Annual Activities

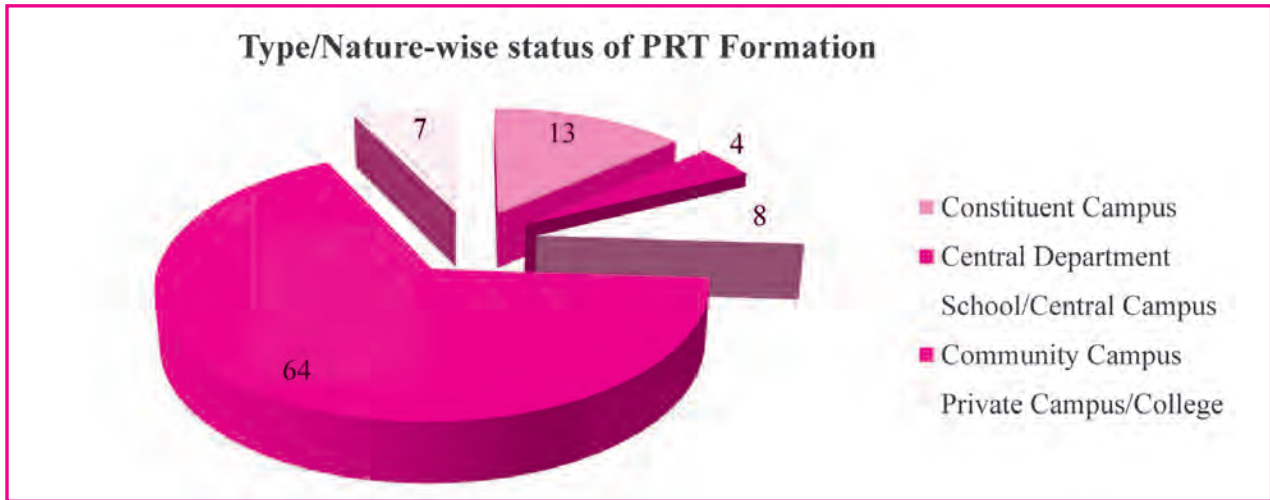

The QAAD has been facilitating the entire QAA related activities administratively. In the last fiscal year (2076/077 BS), it has performed varieties of activities. Among them, the division has given approval of the LoI to 33 different HEIs (4 central departments, 4 constituent campuses, 2 schools/central campuses of the universities, 12 affiliated community campuses and 11 private campuses/colleges). By this, total number of LoI approved HEIs in Nepal became 358 by the end of this FY. The following figure has presented the nature/type wise status of LoI approved HEIs in the country:

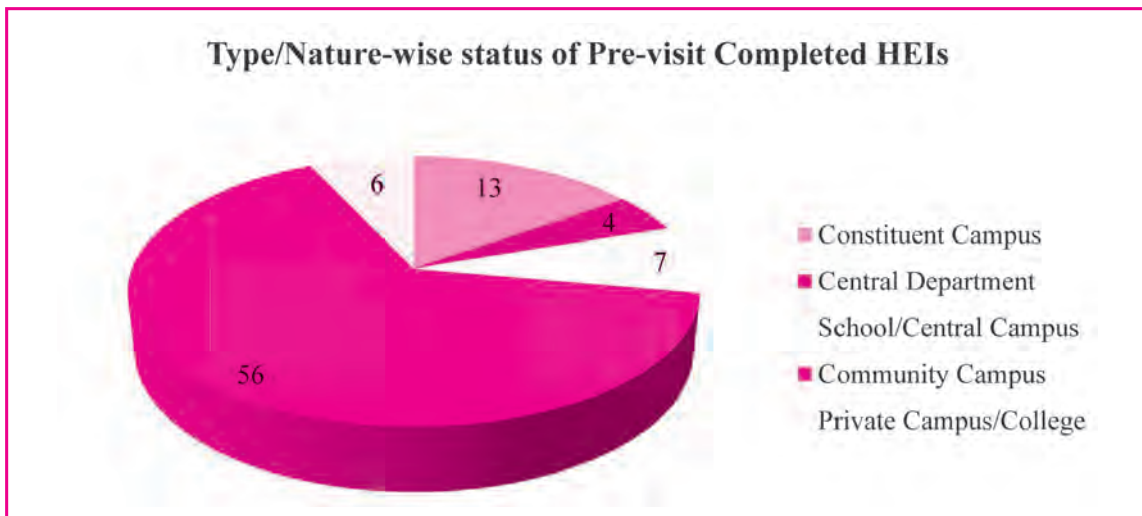

The QAAD has facilitated nine different meetings of the Technical Committee during the reported year, in which the TC has given approval of the SSRs to 30 different HEIs and recommended for the formation of PRT. By this, a total of 107 HEI's SSRs have been approved till the date, which the following figure has presented more intelligibly:

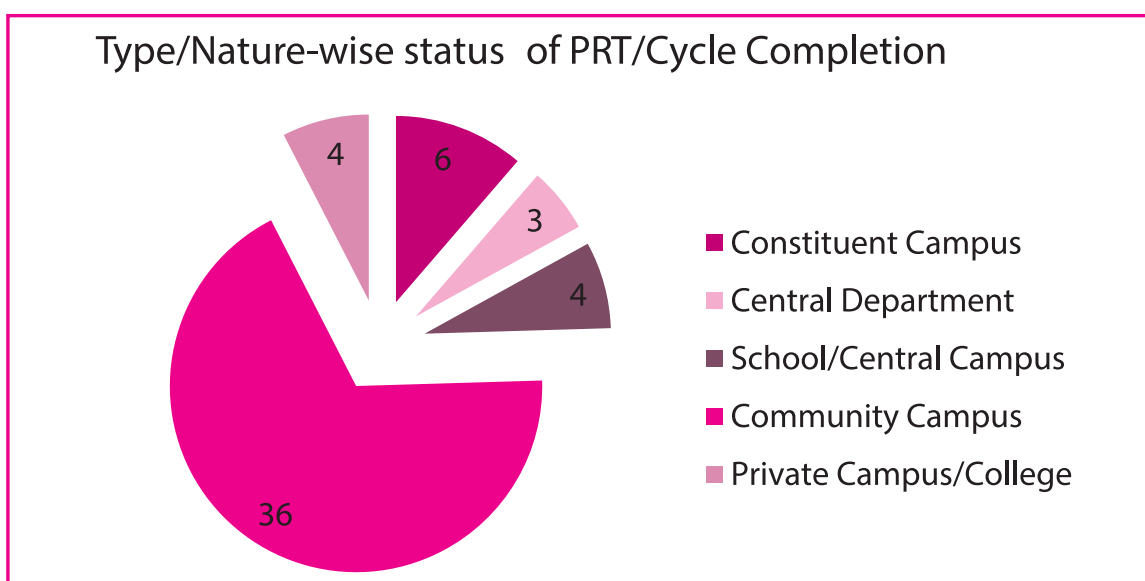

The division has facilitated seven different meetings of the HEQAAC during 2076/077 and made decision on 30 important agendas. Among them, the meetings have decided to form the peer review team (PRT) for the institutional quality assessment of 20 HEIs, based on the recommendation of QAA-TC. Thus, a total of 96 HEI's PRT has been formed by the end of the FY 2076/077. The type/nature wise status of PRT formed HEIs are as mentioned in the following figure:

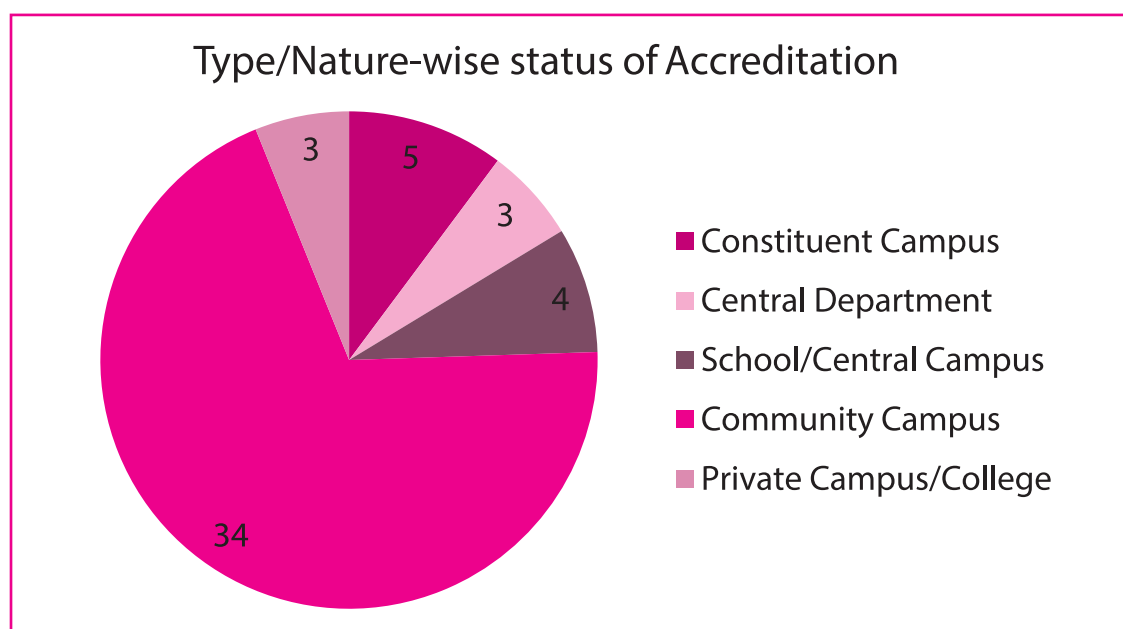

The division has facilitated the assessment/review visits of the PRT in order to assess the institutional quality of the participating HEIs. For this purpose, the HEQAAC has provisioned three-stages review process – Preparatory Review, Peer Review, and the Follow-up Review in order to validate the claims of the HEIs on their SSRs. As these reviews are concerned, 16 different teams have completed the preparatory assessment of 16 HEIs during the reported year. The following figure presents the total number of Pre-assessment completed HEIs in Nepal by the nature/types of the HEIs:

The HEQAAC conducts the peer review of those HEIs that submit the satisfactory progress on the recommendations of the preparatory assessment. It is generally conducted for 30 working hours; however the review periods depend on the nature and size of participating HEIs. After the successful completion of the Peer Review, the HEQAAC acknowledges the completion of QAA Assessment Cycle of those HEIs whose review process has been completed. As the data of FY 2076/077 is concerned, the peer review of 7 HEIs have been completed and the HEQAAC has acknowledged the completion of QAA assessment cycle for 11 HEIs – the 4 from the previous year as well. The figure below has presented the nature/type wise status of peer review/cycle completed HEIs during the reported year:

As per the practice of the assessment process, the HEI responds to the given recommendations and submits the PRT response report, after completion of the PRT's assessment. The HEQAAC decides whether to conduct a follow-up visit or to proceed without the visit, based on the progress reported in the response report. The QAAD has conducted/completed 6 such follow-up visits during the year. By this, a total of 16 HEIs received the award of Institutional Quality Assurance and Accreditation in 2076/077. The following figure has presented the nature/type wise status of the accredited HEIs in Nepal:

4.3 Orientation and Workshops

The QAAD has organized two different orientation programs to the HEIs that have received approval of the Letter of Intent for the QAA participation. Approximately, 100 participants from 17 different HEIs were participated in those one-day orientations. Further, the QAAD has conducted on-the-spot individual facilitation to the 3 HEIs during the year of 2076/077 concentrated on orienting the management and administrative team of the concerned HEIs regarding the system and process of QAA along with some current policy-level developments.

The QAAD has organized 7 different provincial technical workshops in managerial assistance with the local HEIs. Sukuna Multiple Campus, Morang (Province 1), JS Murarka Multiple Campus, Siraha (Province 2),

Saptagandaki Multiple Campus, Chitwan (Bagmati), Janapriya Multiple Campus, Kaski (Gandaki), Siddhartha Gautam Buddha Campus, Rupandehi (Lumbini), IQAC (QAD) of Mid-western University, Surkhet (Karnali), and Aishwarya Multiple Campus, Kailali (Sudurpaschim) have supported the QAAD/UGC to conduct those workshops. Total numbers of 936 stakeholders from 200 HEIs were benefitted by the provincial workshops conducted to facilitate the self-study process of the participating HEIs. Similarly, two separate facilitation workshops were conducted in Mid-western University and Far-western University, particularly focusing their respective constituent campuses. Total number of 80 participants (including the university authorities) from 15 HEIs and 85 participants (including the university authorities) from 14 HEIs were benefitted from the workshops from MWU and FWU respectively.

4.4 Other Activities

The QAA Division has organized different in-house programs for the betterment of the QAA implementation process. These programs include: organization of facilitation programs, orientation programs, interactions, and training. In this bedrock, the QAAD has organized an orientation program on QAA System and Peer Review Practices on 22 Mangsir, 2076 for the roster assessors (peer reviewers) regarding the system and process of peer review for accreditation of HEIs. The program was facilitated by Prof. Shiba Kumar Rai, and Prof. Mana Prasad Wagley, the TC members. An international expert, Prof. Dr. E. B. Khedker from A. J. Y. Patil University, India (the VC) has played the role of key note speaker in the program.

Similarly, the QAAD has organized a separate orientation programs on 15 Mangshir, 2076 for the QAA participating HEIs. This was a refresher program as well as a technical facilitation for the preparation of SSR. A total of 50 individuals representing 10 different HEIs attended the program who were the new HEIs just been entered into the QAA process by getting approval of their LoI.

Furthermore, two different intensive facilitation workshops were conducted to assist the preparation and finalization of the SSR of participating HEIs on 23 Bhadra, 2076 and 28 Ashwin, 2076 respectively. The first program was particularly conducted for those HEIs whose pre-visits have been conducted and recommended for re-writing the SSR along with other recommendations. A total of 125 participants from 25 different such HEIs were participated in the program. The second program was particularly designed to assist the SSR preparation/finalization process of the participating HEIs, who were entitled to complete writing their SSR. Twenty seven stakeholders from 9 different HEIs were attended the program.

SECTION V

Higher Education Reform Project (HERP) Implementation Progress Status in 2019/20

5.1 Introduction

Background

The Government of Nepal initiated Higher Education Reforms Project (HERP, 2015-2020) with the financial and technical assistance of the World Bank as a priority project to support the implementation of National Higher Education Policy (HEP) framework and the National Program for Higher Education Reform and Development (NPHRD). The policy and project both aim to address the issues and needs of higher education reform and development in the country in a comprehensive way, focusing on sectors of national priority, mainly the need for economic growth and development, expansion of employment opportunities, poverty-reduction, and the growth of a sustainable economy in the country. The national program consists of four major components: (i) *Higher Education Reforms* to bring a series of systemic, institutional and academic reforms for relevance, equity, and academic excellence in research and HEIs at large; (ii) *Centers of Excellence* to develop national hubs of academic excellence, research and innovation in areas of national priority; (iii) *System Strengthening* to enhance the governance and management capabilities of HEIs; and (iv) *Regular Program Enhancement* to improve effectiveness and efficiency of government funding.

The total budget of HERP is 65 Million USD. The implementation of the project began in May 2015 and is projected to complete by June 2020.

Project Components, Areas and DLIs

The HERP has two main components: (1) Implementation of Reforms and (2) Project Management and Capacity Development. It comprises of four additional result areas: (i) Systemic/Institutional Reforms; (ii) Academic Reforms and Relevance; (iii) Equity; and (iv) Academic Excellence and Research.

The project has set seven target areas under component one (1). The World Bank's soft loan credit support release is based on observed progress in terms of the following seven Disbursement Linked Indicators (DLIs).

DLI	Total DLI disbursement value, US\$
DLI 1. A national accreditation system established and functioning	9.00
DLI 2. Performance based financing, extended to higher education	16.875
DLI 3. Autonomy extended to additional campuses/schools	7.50
DLI 4. Examination reforms implemented and academic calendar enforced in TU	6.375
DLI 5. Academic reforms introduced	9.00
DLI 6. Poverty targeted financial support for disadvantaged students	4.50
DLI 7. Institutions supported for academic excellence in priority areas through research, development and innovation	6.750
Total DLI based allocations	60
Total expenditure for Project Management and Capacity Development	5.00
Total project cost	65.00

The project is being implemented on the basis of Project Implementation Manual (PIM). Regulations and guidelines are drafted as necessary while undertaking different project activities.

5.2 Implementation Arrangement

University Grants Commission (UGC) along with Tribhuvan University and Student Financial Assistance Fund Development Board (SFAFDB) are entrusted with the successful implementation of HERP. UGC is responsible for the overall project coordination and its progress. The following table lists the DLI-specific responsibilities of the three implementing agencies:

Implementing agency	Responsible for achieving DLI
UGC	DLI 1, 2, 3 (Part relating to universities other than TU), 5 and 7a (All except TU related part)
TU	The DLI 3 (All except relating to other universities), DLI 4 and DLI 7b (Relating to academic excellence based promotion)
SFAFDB	DLI 6

Project implementation is assisted by various committees and experts, such as project steering committee, joint coordination committee of UGC and TU, research council, QAA council, research evaluation committee, QAA Technical committee, research cluster committees, peer review teams, reform committee, and QAA experts.

Role of the University Grants Commission in the HERP

UGC plays its role in the HERP through Quality Assurance and Accreditation Division (QAAD), Research Division (RD), Monitoring Division (MD), Education Management Information System (EMIS) section, Reform Unit (RU), Procurement Section, Finance Division and Administration Division. The Reform Unit coordinates and compiles the information for preparing baseline and progress data. UGC also receives information and data from TU PIO as well as SFAFDB to prepare a comprehensive report.

Tribhuvan University's Role

TU has set up TUPIO with Finance Section, EMIS Section, Administrative Section, Procurement Section and Monitoring Section to implement HERP activities. It has also mobilized Office of the Controller of Examination (OCE), TU Finance Division, Central Departments, Autonomous and Decentralized campuses, as well as affiliated campuses. The TUPIO monitoring section, in coordination with EMIS, finance and other sections, maintains records relating to all TU components of HERP, including grant provision, progress, and monitoring. TUPIO coordinates and compiles information to prepare baseline and progress data from all these entities. TUPIO's report and the collected data are submitted to UGC to prepare a comprehensive baseline and progress report.

Student Financial Assistance Fund Development Board Components

This component has the following objectives:

- i) establishing a pro-poor targeting method for scholarship distribution, and
- ii) ensuring that students from disadvantaged groups have an opportunity to obtain higher education through financial assistance provided by the project.

Provisions under student financial assistance consist of student scholarships for: a) higher secondary school students in science streams and b) Bachelor students through student loans for Bachelor students or support for work-study schemes.

SFAFDB has a Finance Section, EMIS Section, Administrative Section, Procurement Section and Monitoring Section to assist in implementing the HERP. It has also mobilized the support of the Department of Education (DEO), Rastriya Banijya Bank (RBB), Higher Secondary Education Board (HSEB) and other stakeholders. SFAFDB coordinates and compiles information to prepare baseline data from all these entities. SFAFDB's report and data are submitted to UGC so that it can prepare a comprehensive baseline report.

Monitoring Provisions

A comprehensive system of monitoring and feedback has been developed. Regular trimester progress reviews, donor review missions and mid-term evaluations will be conducted to ensure implementation progress. An independent impact study will be conducted for final assessment.

The project monitoring will be based on the following:

- Project Development Objectives (PDOs)
- Key Project Indicators (KPIs)
- Intermediate Indicators
- Disbursement Linked Indicators
- Other activity based indicators

5.3 Description of the Achievements against the DLI Targets

5.3.1 Target achievements related to Disbursement Linked Indicators (DLIs) covering the period of May 16, 2019 (Jestha 2, 2076) to January 24, 2020 (Magh 10, 2076).

The following are the descriptions of the achievements of the DLI targets and accordingly the relevant DLI claim.

DLI 2

All the targets related to the first part of the DLI 2 till the fourth year have been achieved and DLI claims including the disbursements have been carried out accordingly. In this reporting period 105 participating community campuses and 22 participating TU constituent campuses / central departments have received performance based grants (see Annex 1 and Annex 2). Thus, total of 127 participating HEIs have received the performance grants under the DLI 2 which has surpassed the final year target of 45 HEIs. Therefore, the total DLI claim for this part of the DLI 2 is SDR 776,333.33.

Regarding the second part of this DLI, guidelines for enhanced regular grants to accredited and academically autonomous community campuses was approved by the UGC board in the meeting dated Poush 15, 2076. The implementation of the guidelines have been initiated by publishing notice to the accredited and academically autonomous community campuses to submit relevant data and documents. Some of the campuses have been provided first tranche of the enhanced regular grants during the reporting period (see Annex 3). In line with this, we claim the attainment of the fifth year target of the second part of the DLI 2 and thus the SDR 517,555.57.

With the attainment of the targets related to the first and the second part of the DLI 2, the total claim is SDR 1,293,888.90.

DLI 3

As per the target set for the first part of the DLI 3, two additional campuses / schools should be granted the institutional autonomy. Mid-Western University has granted institutional autonomy to its constituent campus i.e. School of Management. Both entities have signed Memorandum of Understanding (MoU) related to the same (see Annex 4.1). Thus, we claim SDR 258,750.00 as against the achievement of the minimum target of at least one institution granted autonomy.

In the second part of the DLI, 7 programs are being implemented under academic autonomy by accredited / autonomous institutions (see Annex 5). In line with this, the minimum threshold of 50% of the fifth year annual target has been attained. Thus, SDR 1,358,437.50 (SDR 194,062.50 for each of the 7 academically autonomous programs) is claimed during this period.

With the achievement of the targets related to the first and the second part of the DLI 3, the total claim is **SDR**

1,617,187.50 in this reporting period.

5.3.2 Target achievements related to Disbursement Linked Indicators (DLIs) covering the period of January 24, 2020 (Magh 10, 2076) to May 12, 2020 (Baishakh 30, 2077).

The following are the descriptions of the achievements of the DLI targets and accordingly the relevant DLI claims.

DLI 1

UGC has completed the setup for functional autonomy to the QAA System at the UGC in accordance with the regulation endorsed by the government of Nepal. The UGC board has made decision regarding the delegation of the financial autonomy to the QAA division. According to the decision, a separate bank account will be established for the division. The director of the QAA division and an account officer will be the signatories of the bank account. In line with this arrangement, the QAA division operates autonomously in terms of conducting its activities with the operational and financial decisions. With this, the baseline target of establishing the functional autonomy to the QAA division at UGC has been attained. Therefore, the allocated amount of SDR 1,035,000 is claimed in this reporting period.

DLI 3

The cumulative target set for the first part of the DLI 3 is to grant institutional autonomy to the total of 9 campuses / schools by the end of the project. By the previous reporting period (eighth report), a total of 8 campuses / schools had been granted the autonomy and the SDR claims were made accordingly. In this reporting period, Dhawalagiri M Campus - a constituent campus of TU has been granted the autonomy. With this, the remaining target has been achieved. Therefore, the claim for this part of the DLI 3 is SDR 258,750.

In the second part of the DLI 3, the total of 14 autonomous/ accredited campuses/ schools/ central departments/ programs should be exercising the academic autonomy. By the earlier reporting periods, a total of 10 programs were considered under the academic autonomy and the SDR claims were made accordingly. In this reporting period, additional 2 programs are being conducted in the autonomy viz. BBA and MBA both of which are run by Mid Western University - School of Management (MUSOM). With that, we have been able to implement 12 programs under the academic autonomy. The remaining 2 programs are in the pipeline to be implemented. Thus, SDR 388,125 (SDR 194,062.50 for each of the 2 additional academically autonomous programs) is claimed during this period.

With the achievement of the targets related to the first and the second part of the DLI 3, the total claim is SDR 646,875 in this reporting period.

DLI 7

As for the first part of the DLI 7, final funds for more than 350 active projects have been released. Additionally, the sustainability plan for the RDI has also been approved by the UGC board. Therefore, the allocated amount of SDR 775,833.33 is claimed in this reporting period for the attainment of the targets of the first part of the DLI 7.

DLI 5

In the sixth report, additional 27 programs were reported as newly introduced or revised programs. Earlier 56 new or revised programs received support under the DLI. The cumulative number of the supported programs was 83 by the sixth report which was the achievement of over 100% of the year 2 target against the target of introducing or revising 80 programs cumulatively. The DLI achievement claim was made accordingly. The remaining 3 new / revised programs were rolled over and not claimed for the DLI earning.

As per the restructured target for this DLI, additional 60 programs need to be revised or introduced and implemented. The following table illustrates the details of revised and introduced programs in the reporting period:

SN	Type	Number of Programs / Institutions*	Remark
1	Revised Programs	7	4 programs from Health Science + 3 programs from Education (see Annex 6.1)
2	Revised Programs under STEM / Computer Applications	41	BSc CSIT – 4 (TU), BSc – 2 (TU, FWU), BSc Ag. – 3 (TU), BIT – 5 (TU), BCA – 21 (TU), BIM – 5 (TU), B.Arch – 1 (TU) (see Annex 6.2)
3	Newly Introduced Programs	9	see Annex 6.3
4	Rollover Programs from Sixth DLI Report	3	Reported in the sixth DLI report
Total		60	

As per the aforementioned table 4 programs in the health sciences stream of Pokhara University and 3 programs in the education stream of Kathmandu University totalling to 7 programs have been revised. The grants support for the revisions has been decided by UGC. There are 41 HEIs that are implementing revised programs in the STEM / Computer Applications disciplines. Additionally, 9 new programs were introduced. There are 3 new programs that were reported in the sixth DLI achievement report but were not counted for the disbursement. Thus, there are altogether 60 new or revised programs that have been claimed in this report as the achievement as against the fifth year target of 60 new / revised programs. Therefore, we claim SDR 2,587,500.00 for this DLI.

5.3.3 Target achievements related to Disbursement Linked Indicators (DLIs) covering the period of May 13, 2020 (Baisakh 31, 2077) to November 10, 2020 (Kartik 25, 2077).

Below are the descriptions of the achievements of the DLI targets and accordingly the relevant DLI claim.

DLI 1

By the reporting period, additional 19 HEIs have been accredited. Likewise, 7 HEIs have been re-accredited. Further, 4 HEIs have completed QAA cycle. With this, 26 HEIs are newly accredited and 4 HEIs have completed the QAA cycle totalling to 30 HEIs as the further added HEIs in the accreditation pool.

As per the minimum threshold of the year five target, at least 48 HEIs should be accredited or complete the QAA cycle out of which at least 23 HEIs are newly accredited. In line with the target, there are 26 newly accredited HEIs including the 7 re-accredited HEIs and 4 cycle completed HEIs surpassing the minimum threshold. Therefore, the total claim related to the DLI 1 in this reporting period is SDR 980,526.30 (i.e., SDR 32,684.21 x 30 HEIs).

DLI 3

In the second part of the DLI 3, the total of 14 autonomous/ accredited campuses/ schools/ central departments/ programs should be exercising the academic autonomy. By the earlier reporting periods, a total of 12 programs were reported being conducted under the academic autonomy. In this reporting period, Kailali M Campus has signed Memorandum of Understanding (MoU) with Tribhuvan University regarding the academically autonomous program viz. Master's in Business Studies – Entrepreneurship (MBA-E). As the minimum threshold has been attained, the claim for this part of the DLI is SDR 194,062.50 in this reporting period.

DLI 6

In this DLI, grants had already been released to 2,087 students as per the schedule. The sustainability plan of the scheme has been recently approved. Therefore, as per the Financial Agreement the claim of SDR 517,500.00 has been made in this reporting period.

DLI 7

As for the second part of the DLI 7, additional 18 faculties have been recruited based on excellence. Further, 11 recruited faculties were reported in the earlier reporting period as against the target of ten faculties in the year 1. Therefore, one of the faculties was rolled over. With this, there are 19 faculties recruited based on the excellence in this period. With surpassing the minimum threshold of the fifth year, the total claim for this part of the DLI 7 is SDR 491,361.09 (i.e. SDR 25,861.11 x 19 faculties).

DLI 8

The block grants were released to 300 HEIs for the extension and strengthening of the online teaching and learning. Among the 300 HEIs, 195 HEIs / units of Tribhuvan University (TU), 31 HEIs/ units of Agriculture and Forestry University (AFU), 21 HEIs/ units of Far Western University (FWU), 17 HEIs/ units of Mid-Western University (MWU), 10 HEIs/ units of Nepal Sanskrit University (NSU), 8 HEIs/ units of Purbhanchal University (PU), 7 HEIs/ units of Kathmandu University (KU), 4 HEIs/ units of Pokhara University (PoKU), 4 HEIs/ units of Rajarshri Janak University (RJU), 2 HEIs/ units of Lumbini Buddhist University (LBU) and 1 HEI of Nepal Open University (NOU) were provided the grants. UGC released the grants to 78 TU's affiliated campuses directly. The grants to the remaining HEIs were provided through the concerned universities.

Out of the supported HEIs, the following table presents the details regarding the HEIs/units of the concerned universities that implemented online classes and submitted the progress report regarding the same:

SN	University	Number of HEIs/ units that implemented online classes and submitted the progress report	Remarks
1	Tribhuvan University	124	71 constituent campuses, central departments, schools and faculties + 53 affiliated community campuses
2	Pokhara University	67	4 constituent schools + 1 PhD unit + 4 joint constituent campuses + 58 affiliated campuses
3	Agriculture and Forestry University	45	8 departments of faculty of forestry + 11 department of faculty of agriculture + 11 departments of faculty of animal sciences, veterinary sciences and fisheries + 8 constituent colleges + 7 affiliated campuses
4	Far Western University	21	All constituent campuses and units
5	Mid Western University	20	19 constituent campuses and units + 1 affiliated campus
6	Lumbini Buddhist University	5	All constituent units
7	Kathmandu University	3	All constituent schools
8	Nepal Open University	1	Constituent unit
Total		286	

As of the date, 286 HEIs/ units have successfully implemented the online teaching learning system according to the progress reports submitted by the concerned universities regarding the implementation status+6 of the online classes. The progress in the online teaching learning at the HEIs have been found to be satisfactory. With this, the minimum target threshold set for this DLI has exceeded. Therefore, as per the Financing Agreement SDR 2,148,506.36 (i.e. 286 HEIs/ units x SDR 7,512.26) is claimed in this report as against the attainment of the target set for this DLI.

23	PhD-76/77-H&S-10	Young	Pabitra Prasain	लक्ष्मीप्रसाद देवकोटाका खण्डकाव्यमा पर्यावरण	Faculty of Humanities and Social Science, Tribhuvan University	Ramechhap, Bhatauli-5	C
Science & Technology							
24	PhD-76/77-S&T-1	Faculty	Drona Adhikari	Geological Evolution of Barahakshetra-Dummana Area, Eastern Nepal	Central Department of Geology, Tribhuvan University	Dulari-02, Morang	A
25	PhD-76/77-S&T-2	Faculty	Ajay Kumar Chaudhary	Some Common Fixed-Point Theorems in Probabilistic Metric Space and Its Application	School of Science, Kathmandu University	Sarlahi, Kaudena-3	C
26	PhD-76/77-S&T-3	Faculty	Ramji Gautam	Population structure, Breeding success and Human Dimension of White-Rumped Vulture <i>Gyps bengalensis</i> in West Nepal	Central Department of Zoology, Kirtipur, Kathmandu, Tribhuvan University	Pokhara-1, Simpani, Anandabasti	B
27	PhD-76/77-S&T-4	Faculty	Niraj Singh Thakuri	Geological Evolution of Chitwan Dun Valley	Central Department of Geology, Tribhuvan University	Hetauda-02, Makwanpur	A
28	PhD-76/77-S&T-5	Faculty	Dinesh Shah	Fabrication of Essential Oil (EO)/Polymer Composite Electro spun Nanofibrous Membrane for Biomedical Applications	Department of Applied Science, Tribhuvan University	Thapathali Campus, Thapathali, Kathmandu, Nepal	A
29	PhD-76/77-S&T-6	Faculty	Nirmala Sharma	Green Synthesis of Silver Nanoparticles Using Lichen Extract and Application for the sensing of Heavy Metals in Water Samples	Central Department of Chemistry, Tribhuvan University	Dhapasi-6, Tokha	A
30	PhD-76/77-S&T-7	Faculty	Puspa Man Shrestha	Molecular Characterization of Antimicrobial Resistant <i>Pseudomonas aeruginosa</i> Isolates At a Tertiary Care Hospital In Kathmandu.	Central Department of Microbiology, Tribhuvan University	Pasikot, Budhanilkantaha-4, Kathmandu, Bagmati, Nepal	A
31	PhD-76/77-S&T-8	Faculty	Purushottam Adhikari	Neogene Climate History from The Siwalik Group of Nepal on the Basis of Plant Fossils	Central Department of Geology, Tribhuvan University	Rajapur-06, Bardiya	A
32	PhD-76/77-S&T-9	Faculty	Hari Krishna Neupane	Effect of Defects on Structure, Electronic and Magnetic Properties of 2D Heterostructure Materials Graphene Hexagonal Boron-Nitride	Central Department of Physics, Tribhuvan University	Amrit Campus Thamel, Kathmandu Nepal, Central Department of Physics, Kirtipur.	C
33	PhD-76/77-S&T-10	Faculty	Krishna Prasad Kandel	Characterization of bast fiber of <i>Sterculiavillosa</i> (RoXb.) <i>Bauhinia vahlii</i> and Fabrication of Biomass -Based Nano-Composite Membrane	Central Department of Chemistry, Tribhuvan University	Baidek Nagar, Bharatpur-4, Chitwan, Nepal	A
34	PhD-76/77-S&T-11	Faculty	Anil Kumar Khadka	Study on Boundary Layer Transport Processes Over Mid Hills of Nepal Himalaya: Numerical Simulation and Observational Analysis	Central Department of Physics, Tribhuvan University	Sunkoshi-03, Kalika, Sindhupalchok	C
35	PhD-76/77-S&T-12	Faculty	Basanta Kumar Sapkota	Screening, Kinetics and In vivo Studies of Secondary Metabolites of Medicinal Plants for the Inhibition of Diabetic Target	Central Department of Chemistry, TU, Tribhuvan University	Butwal Multiple campus, Department of Chemistry, Butwal-3, Rupandehi	A
36	PhD-76/77-S&T-13	Faculty	Jhulan Powrel	Mechanical, Thermal and Transport Properties of Mutated Hemoglobin Protein of Sick Cell.	Central Department of Physics, Tribhuvan University	Physics Department, Butwal Multiple Campus, Butwal	C

SN	Award No.	Category	Name	Title	Registered Institution & University	Employed Institution / Address	Grant Category
37	PhD-76/77-S&T-14	Faculty	Madhab Prasad Baral	Estimation of Climate Change Impact on Migration in Western in Western Nepal.	Central Department of Statistics, Tribhuvan University	Pokhara Metropolitan Ward-15, Rambazar, Kaski	B
38	PhD-76/77-S&T-15	Faculty	Bhumi Raj Budhathoki	Impact of Climate change on Hydrological Regimes in Southern Slopes of Central Himalayas	Central Department of Hydrology and Meteorology, Tribhuvan University	Manthali Municipality-12, Rameccap	A
39	PhD-76/77-S&T-16	Faculty	Narayan Panthi	Study of Thermodynamic and Structural Behavior of Binary Liquid Alloys of The Type A_1B_2 Using Quasi-Lattice Model	Central Department of Physics, Tribhuvan University	Tulsiपुर-17, Dang, Nepal	C
40	PhD-76/77-S&T-17	Faculty	Rabindra Kumar Gupta	Mathematical Modelling of Infectious Disease	Department of Mathematics, Banara Hindu University, Varanasi	Butwal-02, Gadhi Tole, Rupandehi, Province-05	-
41	PhD-76/77-S&T-18	Faculty	Laxman Bahadur Kunwar	Mathematical Modelling of Some Infectious and Non-Infectious Diseases.	Department of Mathematics and Statistics, Deen Dayal Upadhyaya Gorakhpur University	Parsa, Birjung, Brahma Tole-12	-
42	PhD-76/77-S&T-19	Young	Anima Shrestha	Bacterospermia in Men Among Infertile Couples in Nepalese Community and Its Relation to Sperm DNA Integrity	Central Department of Microbiology, Tribhuvan University	Sahankhamul, New Baneshwor, Kathmandu	A
43	PhD-76/77-S&T-20	Young	Pusp Raj Joshi	Characterization of Bioactive Compounds Isolated from Selected Dendrobium Species and Application of Hydrogel to Evaluate Their Biological Activity for Suitable Biomedical Applications.	Central Department of Botany, Tribhuvan University	Central Department of Botany, Tribhuvan University, Kirtipur	A
44	PhD-76/77-S&T-21	Young	Arjun Dhungana	Study of Thermo-Physical Properties of Al-based ternary Liquid Alloys	Central Department of Physics, Tribhuvan University	Biratnagar-11, Morang, Nepal	C
45	PhD-76/77-S&T-22	Young	Manoj Kumar Jha	Fabrication of Ceramics Nano Particle on the Surface of Activated Carbon for Water Treatment	Department of Applied Science, IOE, Tribhuvan University	Balwa-7, Mahottary	A
46	PhD-76/77-S&T-23	Young	Ram Sharan Dani	Floral Diversity and Distribution on Chandragiri Hill, Kathmandu Valley, Nepal.	Central Department of Botany, Tribhuvan University	Tinthana Colony 110, Chandragiri-15, Kathmandu	A
47	PhD-76/77-S&T-24	Young	Rajesh Shrestha	Studies on Process Optimization for the Preparation of Instant Fermented Radish (Gundruk and Sinki)	Central Department of Biotechnology, Tribhuvan University	Tokha-2, Kathmandu, Nepal	A
48	PhD-76/77-S&T-25	Young	Ram Darash Pandey	Natural Product Discovery and Characterization of Bioactive Compounds from Nepalese Medicinal Plants.	Central Department of Chemistry, Tribhuvan University	Department of Chemistry, Amrit Campus, Thamel, Kathmandu	A
49	PhD-76/77-S&T-26	Young	Janta Raut	A Mathematical Study on Mucus Transport in Human Respiratory Tracts	Department of Mathematics and Statistics, Deen Dayal Upadhyaya Gorakhpur University	Birjunj-4, Birta, Parsa	-
