

**Statement of Technical
And
Other Assistance
FY 2018/19**

(From Bilateral and Multilateral Sources
Including INGOs)

**Government of Nepal
Ministry of Finance
May, 2018**

Preface

International development cooperation has been playing an important role to fulfill the resource gap of development financing in Nepal for decades. Such development cooperation is prioritized to mobilize through the national budgetary system. Technical assistance has been utilized to support the capacity development in implementing projects. Additionally, development cooperation is also channelized through Non-Governmental Organizations. Development cooperation received as of technical assistance and mobilized through Non-Governmental International Organizations is not reflected in the annual budget of the Government. However, it is very important to disseminate a complete set of information on development cooperation received by Nepal in order to promote transparency and accountability. For this reason, such development cooperation is presented in the form of the Statements of Technical and Other Assistance and published each year as the "Technical Assistance Book".

This publication includes the projects/programs to be implemented in the upcoming Fiscal Year 2018/19 under the development cooperation received as of technical assistance and mobilized through Non-Governmental Organizations. It covers a brief description of the project/program including major project activities, total/annual budget, areas covered and supporting development partners.

The information received from development partners, reports from sectoral ministries and Social Welfare Council has been taken as the basic source while preparing this book. Furthermore, information is complemented by the data reported in Aid Management Platform of International Economic Cooperation and Coordination Division, Ministry of Finance.

It is expected that this publication will be useful to the government agencies and development partners to implement and monitor the off-budget projects/programs as well as to harmonize the development cooperation among development partners. Likewise, information presented in this publication could be beneficial to researcher, academia and others who are interested about mobilization of international economic cooperation in Nepal.
