COVID-19 STATISTICS BY REGION*

Source: Johns Hopkins University, HungerMapLIVE analysis
Countries are aggregated according to WFP regions

NOTES:

This snapshot provides daily updates on COVID-19 statistics with a focus on countries where WFP operates and low- and lower-middle income countries, as analyzed by HungerMap LIVE (hungermap.wfp.org). It also provides a daily snapshot of the impacts of the outbreak in countries where WFP's Hunger Monitoring Unit conducts remote near real-time food security monitoring. In light of COVID-19, these systems have been expanded to monitor impacts on households, specifically the access and availability of health care, access to markets and livelihood coping. Data is collected on a rolling basis via live telephone interviews and updated daily. This will help WFP to monitor the situation prior to large scale outbreaks, capture problems in real time and provide the necessary information for early action and mitigation. Covid-19 data valid as of 2020-06-02

TOP 20 COUNTRIES WITH THE HIGHEST DAILY INCREASE IN COVID-19 CASES

	confirmed cases	deaths	(no. of days) for cases to double		
1. Suriname (2.7 days)	54	1	11. Burundi (10.0 days)	63	1
2. Zimbabwe (3.0 days)	206	4	12. Yemen (10.2 days)	399	87
3. Malawi (3.3 days)	358	4	13. Central African Republic (10.3 days)	1,069	4
4. Nepal (4.8 days)	2,099	8	14. Nicaragua (10.6 days)	1,118	46
5. Mauritania (5.3 days)	668	31	15. Oman (10.6 days)	12,799	59
6. Libya (5.5 days)	182	5	16. Comoros (10.8 days)	132	2
7. Uganda (7.2 days)	489	0	17. Kenya (11.0 days)	2,093	71
8. Haiti (7.4 days)	2,226	45	18. Bolivia (Plurinational State of) (11.2 days)	10,991	376
9. Ethiopia (7.4 days)	1,344	14	19. Djibouti (11.3 days)	3,779	25
10. Bhutan (8.4 days)	47	0	20. Iraq (11.5 days)	7,387	235
