Foreword

The Educational Management Information System (EMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation and application. Especially, EMIS has been used to derive the Flash Reports I and II.

This report (Flash I) provides a snapshot of enrolment, pass rates, repetition and survival rates of students at all levels of the school education system in disaggregate forms-by eco-zone and by districts. Similarly, this report analyses the training status of teachers and considers how well schools are supplied with basic supports from DEOs. Such measures give an indication of the effectiveness of the education system. EMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of school level performance information has been instrumental in evidence based educational planning at district, regional and national levels.

In the process of preparation of this report many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative effort of EMIS core team of DEO, UNESCO Nepal Office team and REDs and DEOs officials. The constructive suggestions and feedback of the Development Partners have also significant role in this process. Therefore, I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for your contributions. Any suggestion and feedback for its improvement is highly appreciated.

SECTION I

1.1 Introduction

The Department of Education (DOE) has published the Flash Report I, 2010-011 with a view to presenting different education statistics to facilitate the planning and monitoring activities of the School Sector Reform Plan (SSRP) 2009-015. The purpose is to furnish a national, ecological and district- level current educational status with their brief analyses in terms of access and equity, efficiency and quality indicators of the SSRP.

This publication is twelfth in the series of Flash Reports I and II produced by the DOE. The publication has focused, largely, on providing information of the following main areas of the school education:

- Early childhood development (ECD) and pre-primary classes (PPCs),
- Alternative schooling programme (SOP/FSP),
- Number of schools by types of schools (community, institutional and religious),
- Student participation by gender, Dalit, Janajati, disadvantaged Janajati and disabilities,
- Number of teachers and their training status by types of schools,
- GIR/NIR in Grade One and GER/NER by gender and levels of education,
- Internal efficiency by grade, gender and level,
- Student-teacher ratios by level of school,
- Student-school and teacher-school ratios by level,
- Delivery of free textbooks to schools within two weeks of the beginning of the school year, and
- Number of schools with transitional language support at primary level.

Since the previous school year 2009-10, the Flash Reports have included the information in line with the SSRP core document that includes Basic education comprising grades 1-8 and Secondary education comprising grades 9-12 with a view to address the SSRP indicators. In addition, this report has also presented the disaggregated information on these two levels: Basic and Secondary.

The information presented in this report includes, unless stated otherwise, facts and figures from all schools running in the country: all types of community schools (aided, managed and unaided), institutional schools (private) and religious schools by levels : ECD/PPC, primary, lower secondary, secondary and higher secondary.

1.2 Process of preparing the report

- All the activities relating to this report were co-ordinated by DOE's Education Management Information System (EMIS) Core Team headed by the Director of Planning and Monitoring Division.
- Flash I questionnaires were updated through wide consultations with central, regional, district and sub-district level personnel.
- Feedback and suggestions received from stakeholders, including development partners were incorporated to improve the Flash I questionnaires.

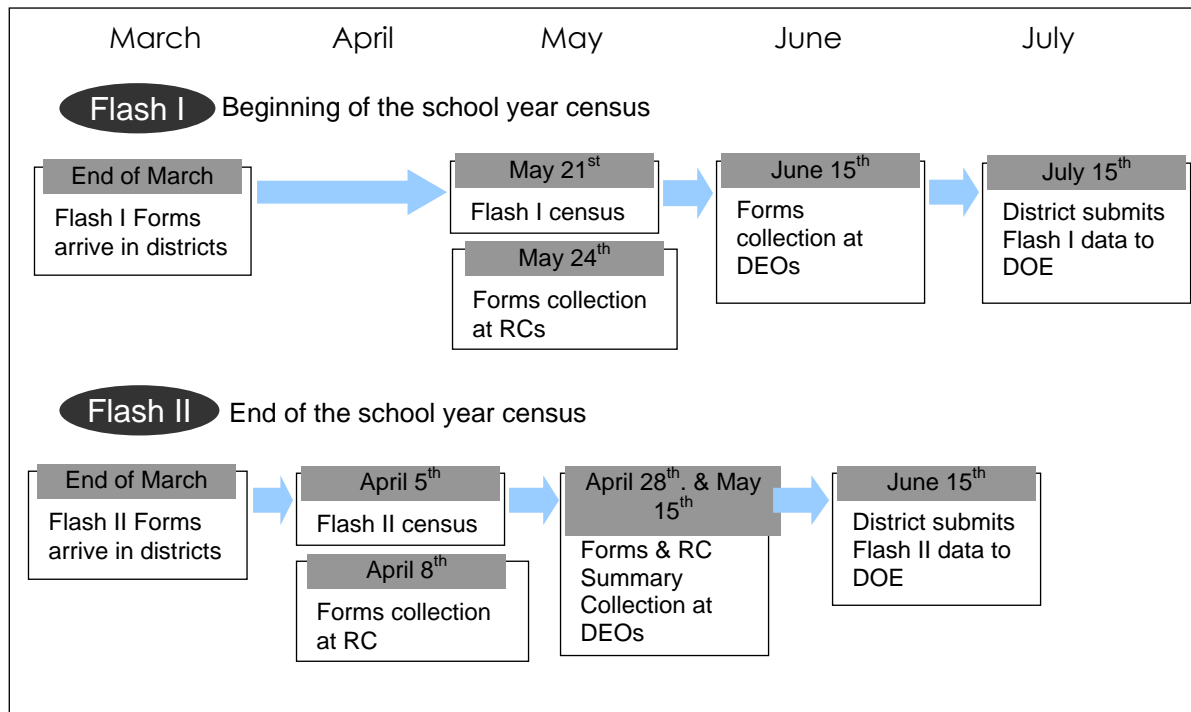

- The Camera-Ready Copy (CRC) of the revised Flash I questionnaires was sent to District Education Offices (DEOs) in the last week of February 2010 for its printing and distribution to schools.
- Guidelines about how to complete the Flash I questionnaires were provided to schools along with the questionnaires and separate instructions to the DEOs to ensure quality and accuracy of data.
- The computer software developed on the PHP (Pretext Hypertext Pre-processor) platform with the back-end support by a MySQL database was updated and used to process the Flash data. The software enabled data entry, processing and standard output generation. There is also a provision to generate additional output tables on the basis of specific user requirements. Small revisions were made in last year's software to accommodate districts' requirements and also due changes were made in this year's Flash questionnaires.
- All districts were able to install the Flash Software by themselves in their own office. They entered the data into software locally and delivered the district Flash database to the DOE by email or FTP (File Transfer Protocol).
- Data entry into the computer began with verifying and updating school codes given to all schools by the DEOs.

1.3 Methodology

- This report has been prepared based on the information gathered during the Flash I School Census covering all levels and types of schools – pre-primary to higher secondary (community aided, community unaided, private or institutional schools, religious schools and alternative schools) running in the country on the reference date of Jestha 7, 2067 (21 May, 2010). However, out of total 33,160 schools with all levels, 32,257 (97.3%) schools reported their information in the Flash I census 2010, and for the rest non-reported schools in the Flash I, 2010 census their information was taken from the previous school census database in order to generate a complete database.
- Information and analyses are presented, mainly, on the basis of ecological belts - Mountain, Hills, Tarai, and a separate fourth category Valley summarises information for three districts (Kathmandu, Lalitpur and Bhaktapur). The detailed information with respect to each district is provided in annexes for further references.
- For the purpose of calculating enrolment rates, medium variant population projection data were obtained from the Population Projection for Nepal 2001-2021 publication, jointly published by the Central Bureau of Statistics (CBS) and Ministry of Population and Environment (MOPE) in the year 2003. This publication provides population projection data by district only on the basis of five years age and five years time interval. Hence, Sprague multiplier coefficients were used to interpolate the district level single-age population from a given five-year age group population data. After obtaining district level single age group population, compound growth rates of the respective district and age group were applied to estimate the district level population for single year (i.e. for the year 2010-2011).
- The specified age groups for students in ECD/PPC, primary, lower secondary, basic, secondary, higher secondary and secondary levels are 3-4, 5-9, 10-12, 5-12, 13-14, 15-16 and 13-16 years respectively.

- Schools are counted according to the level/levels of education they offer and as a unit by the total grades they offer. For example, level-wise, a higher secondary school offering grades 1-12 is counted as having four levels of education – as primary, lower secondary, secondary and higher secondary level respectively.
- The Flash process was implemented as per the following prescribed timeline and schedules.

1.4 Data reliability

In the Flash Reporting system the responsibilities for each agency/level are well defined in order to ensure a high and uniform data quality. At the school level, Head Teachers (HTs) are responsible for filling out the Flash I questionnaire and getting its approval from School Management Committee (SMC) Chairpersons and School Supervisors/Resource Persons on time. Likewise, SMC Chairpersons and School Supervisors/Resource Persons are responsible for assessing and approving the completed Flash I questionnaire before it is submitted to the DEO.

Also, several measures are taken to verify the data by cross checking the accuracy and consistency of the data. In order to minimize the reporting errors and prevent inconsistency in data entry, necessary validation rules have been incorporated into the Flash data entry software.

Furthermore, the DOE has been providing continuous technical support to the district personnel through visits as well as through telephones and emails, which, to a large extent, has helped in improving the data quality. In addition, trainings and on-the-job orientations to the DEO personnel involved in data processing activities have been provided to ensure the reliability of data.

1.5 Lessons learnt

- The districts were able to demonstrate steady progress in timely reporting and also in verifying and validating the data by themselves. This capability enhancement was made possible with the installation of user-friendly and technically sound database management software developed by the DOE.
- Nevertheless, the capacity of schools, RCs and DEOs needs to be further strengthened in most aspects of EMIS activities, such as adequate logistical support for producing quality data and disseminating accurate and timely information to key stakeholders at the local (school, community and district) level that could contribute to better accountability, adherence to results and facilitate informed decision-making at all levels.
- As a preliminary initiative for the establishment of two-way data flow EMIS system, the DOE has developed a School Profile and a District Profile, and distributed the former to each school within last two years. The DOE has also developed a time-series Flash Database CD-ROMs [2063-2065] and distributed these to all relevant MOE institutions as well as Village Development Committees (VDCs) and District Development Committees (DDCs). Preliminary discussions with INGOs on these new EMIS tools have revealed an interest from their side to increase their support to EMIS and the Flash system.

1.6 Key findings

- The total number of community-based and school-based ECD/PPCs is 31,089 of which 4,316 pre-primary classes are running in institutional schools and the rest i.e., 26,773 are running in the community schools and as community based ECDs.
- The average Gross Enrolment Rate (GER) in ECD/PPCs is 70% with 69.2% for girls and 70.9% for boys. (SSR target: 72%)
- The proportion of students in Grade One with ECD/PPC experience is 52.1%, with 52.4% girls and 51.9% boys. (SSR target: 45%)
- Out of the total 33,160 schools 32,684 are primary, 11,939 are lower secondary, 32,685 are basic, 7,266 are secondary, 2,564 are higher secondary and 7,559 are secondary (Grades 9-12) level.
- Out of the total 33,160 schools, 766 are religious schools (Madarasa, Gumba/Vihar and Ashram/Gurukul).
- On average, the school student ratios are 1:152 at primary, 1:142 at lower secondary, 1:202 at basic (Grades 1-8), 1:112 at secondary, 1:124 at higher secondary and 1:150 at secondary (Grades 9-12) levels.
- The total number of students at primary, lower secondary and basic levels are 4,951,956; 1,699,927; and 6,651,883 respectively; these numbers have increased by 3.5% and 2.7% at primary and lower secondary levels as compared to the previous school year. Of total enrolment at primary, lower secondary and basic levels, 88.1%, 86.4% and 87.7% are respectively in community schools and 11.9%, 13.6% and 12.3% are in institutional schools. This shows that the institutional schools serve around 12% of children in basic education.

- The total number of students at secondary, higher secondary and secondary (grades: 9-12) levels are 811,910, 318,426 and 1,130,336 respectively; of the total enrolment at secondary, higher secondary and secondary (grades: 9-12), 83.7%, 87.0% and 85.0% are in community schools, whereas 16.3%; 13.0% and 15.3% are in institutional schools. This reveals that the institutional schools serve around 15.0% students in secondary education.
- Of the total enrolment at the school level, girls' enrolment constitutes almost 50.1%, i.e., 50.5% at primary level, 49.9% at lower secondary level, 50.2% at basic level, 48.8% at secondary level, 50.7 at higher secondary level and 49.3% at secondary (grades: 9-12) level.
- Of the total enrolment of 7,782,291 students in school education, more than two thirds are at primary level i.e. 63.6% are at primary, 21.8% are at lower secondary, 85.8% are at basic, 10.4% are at secondary, 4.1% at higher secondary and 14.5% are at secondary level.
- In comparison to their share in the total population at around 12%, the share of Dalit enrolment is 21.5% at primary level, 14.2% at lower secondary, 10.0% at secondary and 6.3% at higher secondary level.
- In comparison to their share in the total population at around 40%, the share of Janajati enrolment is 38.2% at primary level, 41.8% at lower secondary, 40.8% at secondary and 31.0% at higher secondary level.
- Total number of student enrolment by endangered and extremely disadvantaged Janajati (22 ethnic groups) is 91,124 at primary level, 22,672 at lower secondary level, 8,476 at secondary level and 2,449 at higher secondary level.
- Out of the total students at primary, lower secondary, basic, secondary, higher secondary and secondary levels, 1.2%, 1.0%, 1.2%, 0.8%, 0.5% and 0.7% are students with different kinds of disabilities.
- Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One are 142.4% and 89.0% respectively. When compared to the previous school year, the GIR has decreased by 1.6 percent points and the NIR has increased by 2.6 percent points in the current school year. (SSR target: 140% GIR and 86% NIR)
- The Gross Enrolment Rate (GER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 139.9%, 94.5%, 124.4%, 66.3%, 26.0% and 46.2% respectively. Particularly, the GER at the primary level has decreased as compared to the previous school year (141.4%). (SSR target: 128% for Basic education and 47% for Secondary education)
- The Net Enrolment Rate (NER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 94.5% 69.3%, 86.0%, 46.5%, 7.8% and 27.1% respectively. The NER, at all levels, has increased as compared to the previous school year. (SSR target: 96% for Primary education, 77% for Basic education and 23% for Secondary education)
- The gender parity in school education has significantly improved. The Gender Parity Index (GPI) in NER at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 0.98; 0.98; 0.98; 0.98; 1.04 and 0.98 respectively.
- The promotion and repetition rates in Grade One are 69.1% and 22.6%. The promotion rates in the upper grades are better as compared to the grade 1. (SSR target: 8% in Grade One and 7% in Grade 8)

- The repetition rate in grade 8 is 6.6%. (SSR target: 7%)
- The overall survival rate to grade five is 80.6%, with 80.4% for boys and 81.2% for girls. (SSR target: 65%)
- The overall survival rate to grade eight is 66.0%, with 65.2% for boys and 67.2% for girls. (SSR target: 49%)
- The overall Co-efficient of Efficiency at Primary and Basic levels is: 73.4% and 65%. (SSR target: 55% for Primary and 39% for Basic levels)
- The proportions of female teachers by levels, in all types of schools, are: 42.2% at primary level, 25.9% at lower secondary level and 17.3% at secondary level.
- The proportions of female teachers by levels, in all types of community schools, are: 37.5% at primary level, 19.0% at lower secondary level and 13.2% at secondary level.
- The proportions of Dalit teachers at primary, lower secondary and secondary levels are: 4.4%, 2.6%, and 2.7% respectively.
- The proportions of Janajati teachers at primary, lower secondary and secondary levels are: 29.8%, 17.2% and 12.7% respectively.
- The percentage of fully-trained teachers in all types of schools is 80.7% at primary level, 63.6% at lower secondary level and 85.1 at secondary level.
- The percentage of fully-trained teachers in all community schools is 82.9% at primary level, 65.2% at lower secondary level and 87.9% at secondary level.
- The student-teacher ratios (based on the approved positions of the teachers) in community schools are 43:1 at primary level, 57:1 at lower secondary level and 35:1 at secondary level.
- The average percentage of students who received the full sets of textbooks, within the second week of the academic session 2010-011, was 66.3% at primary level, 65.8% at lower secondary level and 35.5% at secondary level.
- The number of primary level grades that used a local language as a transitional language to make the better interpretation of the subject matters in the teaching and learning process is 17,273.

SECTION II

2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)

The EFA goal regarding the Early Childhood Development (ECD) activities is in line with the Dakar Framework for Action for EFA (2001-15). The Early Childhood Development / Pre-Primary Class (ECD/PPC) is regarded instrumental for the social, emotional, intellectual and physical development of children. As such it helps to improve the internal efficiency of primary and basic education. One of the main strategies taken to achieve the EFA goal is to increase the number of ECD centers to ensure access for the most vulnerable and marginalized children. The various forms of ECD/PPCs institutions include school-based ECD centers, community-based ECD centers and privately managed pre-primary classes. Schools give different names to these classes as Nursery, Kindergarten, Montessori, etc).

Table 2.1 and figure 2.1 below show that out of the total 31,089 ECD/PPCs in the country, 26,773 (86.1%) ECDs are running as community-based ECDs and community schools based ECD/PPCs. Thus, the rest (13.9%) of the ECD/PPCs are run under institutional schools (See Annex: I). Although the data shows a low involvement of the private (institutional PPCs) sector in providing ECD/PPC services, the total number of ECD/PPCs has increased by 6.9% as compared to the number (29,089) in the last school year. Out of the total 1,454,046 children of 3-4 years age group, 1,018,543 children are catered by 31,089 ECD/PPCs (Table 2.2). The present ratio of 3-4 years population and the existing number of ECD/PPCs is 1:47 indicating a need for a considerable expansion and strengthening of the ECD/PPCs in the country for ensuring ECD/PPC services to all targeted age groups children. The district-level data show the need of expansion of ECD/PPCs in 45 districts, which have high ECD/PPCs/population ratios (more than 1:40) of 3-4 years population, especially in the Terai and some Mountain and Hill districts (See Annex: I).

Table 2.1
Total number of ECD/PPCs by types and eco-belts

Eco-belts	Community	Institutional	Total
Mountain	2,626	189	2,815
Hill	11,996	1,420	13,416
Valley	715	1,075	1,790
Terai	11,436	1,632	13,068
Total	26,773	4,316	31,089

Figure 2.1
Distribution of ECD/PPC Centres by types and eco-belts

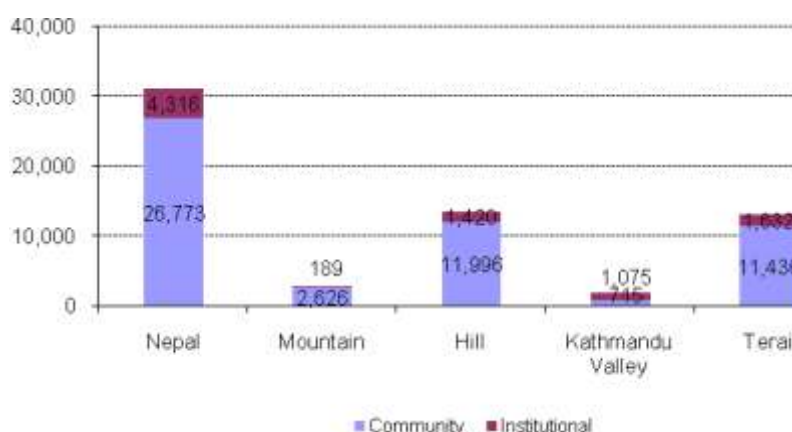

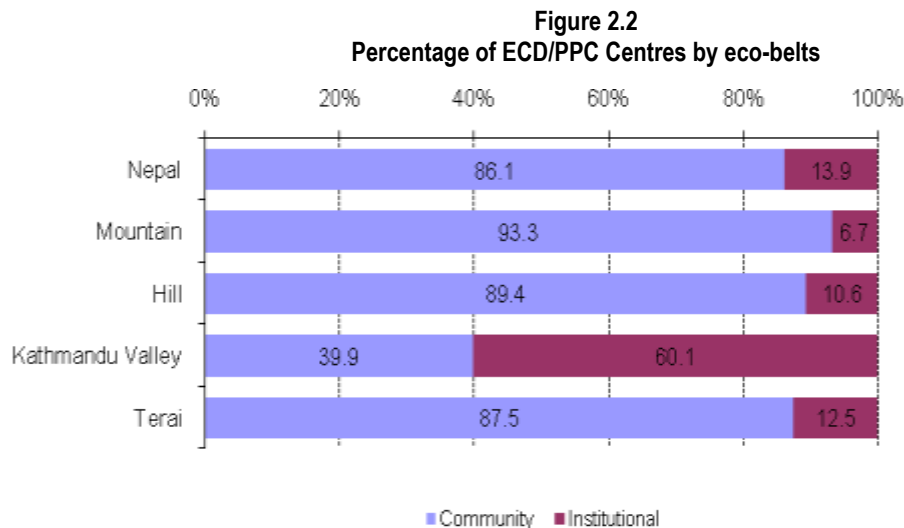

Figure 2.2 below shows the percentages of ECD/PPCs by eco-belts in the total number of ECD/PPCs. It shows that the institutional PPCs are concentrated mostly in Valley (60.1%) while the community-based/community school-based ECD/PPCs are dominant in Mountain (93.3%), Hill (89.4%) and Terai (87.5%) eco-belts.

The following map depicts the distribution of the number of School and Community based ECDs in the school year 2067 (2010-2011) by districts, wherein the status of ECD/PPC programme implemented by the government up to the fiscal year 2066 is also portrayed.

Map: 1 Number of school and community based ECD/PPCs, 2067

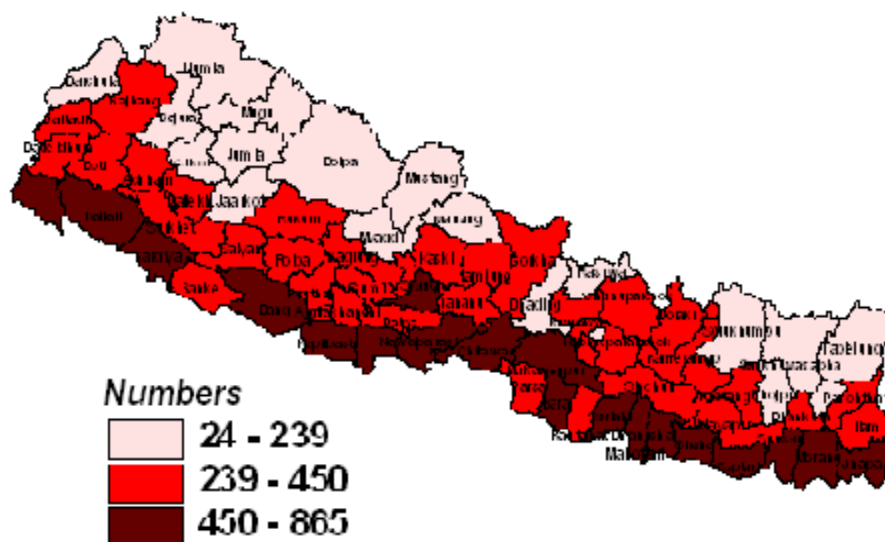

Table 2.2 below shows the total number of 3-4 years age group population, total number of enrolment in ECD/PPCs and the GER in ECD/PPCs by eco-belts and sex, in addition, the figures 2.3 and 2.4 below further elaborate them. As the table indicates, on average, the country has achieved 70.0% GER and thus, the country has already achieved and even gone beyond the set target 64% of the SSRP for 2013-014. Despite this success, it is also true that nearly one-third of the total 3-4 age group children in the country still do not have access to ECD/PPC facilities.

A slight gender difference in ECD/PPC enrolment rate (69.2% for girls and 70.9% for boys) against girls is observed. The Mountain region shows the lowest enrolment rate (62.6%) followed by Hill (63.4%) and Terai (70.4%) eco-belts (See Annex: I). The highest enrolment rate is in the Valley (122.0%) as a result of more institutional (private) PPCs being run in the Valley. In addition, the PPCs run by private institutions include mostly the three-year's program (Nursery classes, Lower K.G. and Upper K.G.), whereas the ECDs run by the community and community schools include one-year program. This explains why the Valley continued to have the highest GER among the stated eco-belts. The ratio of girls to boys, in overall, is 0.98, interestingly, among the eco-belts, the ratio of girls to boys is observed highest in the Hilly belt and the lowest one in the Valley.

Table 2.2
3-4 years' population, total enrolments and enrolment rates in ECD/PPCs by eco-belts

Eco-belts	3-4 Years Population			Number of children in ECD/PPC			Enrollment Rate		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	52,809	54,165	106,973	32,971	34,011	66,982	62.4	62.8	62.6
Hill	264,322	286,904	551,226	169,384	180,088	349,472	64.1	62.8	63.4
Valley	39,610	41,295	80,905	46,634	52,052	98,686	117.7	126.1	122.0
Terai	350,255	364,688	714,942	239,927	263,476	503,403	68.5	72.2	70.4
Total	706,996	747,051	1,454,046	488,916	529,627	1,018,543	69.2	70.9	70.0

Figure 2.3 below depicts the trends of total enrolments by gender in the years 2004 to 2010. The total enrolment in 2004 was 512,151 and reached 1,018,543 in 2010. Thus, it has increased by 98.5% over these five years. In other words, this is an increase of 12.1% per annum. When analyzed from gender perspective, the average annual growth rate of girls (12.9 %) was slightly higher than that of boys (11.4%). The figure shows a sudden jump of enrolment in ECD/PPCs in 2005 and a sharp decline in 2006. However, since 2006 the enrolment trend has been one of encouraging steady growth.

Figure 2.3
Trend of total number of enrolments in ECD/PPCs

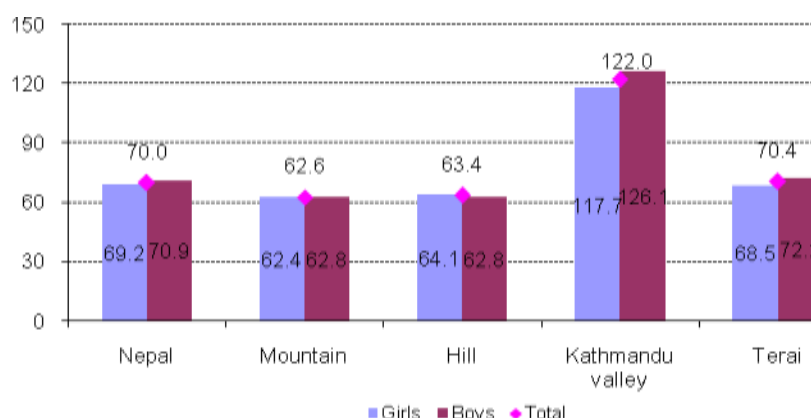

Figure 2.4 below reveals the GER by eco-belts. It shows the fact that the highest enrolment rate is in the Valley (122.0%) and the lowest in the Mountain eco-belt (62.6%). The Hill and the Terai eco-belts have 63.4% and 70.4% GER respectively. An analysis of GER into

ECD/PPCs by district shows that there are 42 districts with a low GER (compared to the 70.0% national average) (See Annex: I).

Figure 2.4
Gross Enrolment Rate in ECD/PPCs

2.2 Dalit and Janajati children enrolled in ECD/PPCs

Table 2.3 below shows that out of the total enrolment of 1,018,543 in 2010 in ECDs/PPCs 17.9% are Dalit and 39.1% are Janajati. Among the Dalit students enrolled, 18.6% are girls and 17.3% are boys. Likewise, for the Janajati 39.6% are girls and 38.8% are boys of the total enrolment. The GPI for ECD/PPC in total, Dalit and Janajati enrolment are 0.92, 0.99 and 0.94 respectively, which shows a higher level of participation of Dalit girls in comparison to the total and Janajati girls. Hence, the data suggests that the gender situation is approaching to parity among the Dalit children but there is still a gap among the Janajati children and the overall enrolment (See Annex: I). Figure 2.5 below presents the number of children in ECD/PPCs by social groups, with the proportion of Dalit and Janajati children in the total enrolment.

Table 2.3
Number of Dalit and Janajati children in ECD/PPCs

Students	Number of children in ECD/PPC			Percentage share in total children	
	Total	Dalit	Janajati	Dalit	Janajati
Girls	488,916	90,830	193,454	18.6	39.6
Boys	529,627	91,803	205,243	17.3	38.8
Total	1,018,543	182,633	398,697	17.9	39.1

Figure 2.5

2.3 Percentage of new entrants in Grade One with ECD/PPC experiences

The following Table 2.4 and figure 2.6 present the overall percentage of new children, with ECD/PPC experiences in Grade One, which is 52.1%, a bit higher than the previous school year (49.9%). Among the eco-belts, the Terai belt shows the highest intake (54.7%) of new children in Grade One with the ECD/PPC experiences. Also, the variation in terms of the GER in ECD/PPCs and the percentage of new children in Grade One with ECD/PPC experiences in the Valley shows the highest GER and the lowest proportion (42.5%) of children with ECD/PPC experiences in Grade One. Both the Mountain and Hilly eco-belts show, the new students in Grade One with ECD/PPC experiences below the national average (See Annex: II).

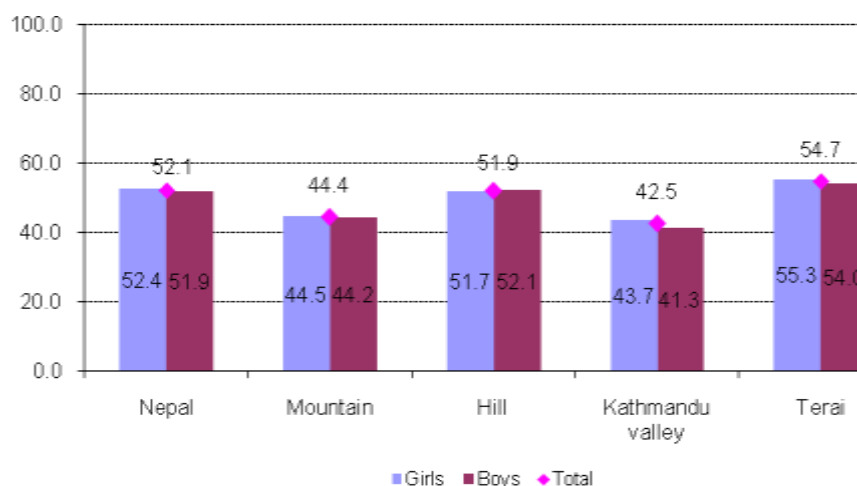

Since there are more Pre-primary classes run by the private institutions e.g., Nursery, L.K.G, and U.K.G. in the Valley, which help increase the GER, whereas the children in Grade One get enrolled only from the UKG, which causes low enrolment in Grade One with ECD/PPC experiences in Grade One in the Valley.

The increasing trends, overall, of ECD/PPC experiences in Grade One might have contributed to reduce the repetition rates (i.e. from 29.4% in 2007 to 28.3% in 2008, 26.5% in 2009 and 22.6% in 2009), dropout rates (i.e. from 16.1% in 2007 to 12.1% in 2008, 9.9% in 2009 and 8.3% in 2010) and increased the retention rates for Grade One (See Table 3.24).

SECTION III

3.1 School education

Since the school year 2009, the government of Nepal has begun to implement the School Sector Reform Programme (SSRP), which aims at restructuring school education with basic education (consisting of grades 1-8) and secondary education (consisting of grades 9-12). Subsequently, in the school education system primary and lower secondary levels are under the basic education and the secondary and higher secondary levels are under the secondary education in the education system in the country. Schools with primary level provide grade one to five years of education, whereas lower secondary schools provide further three years of education. Secondary schools offer two more years of education, while higher secondary schools also offer two more years of education after SLC. As described previously, early childhood development (ECD)/pre-primary classes (PPCs) are offered as building foundation and preparation for grade one.

The prescribed age groups for different levels of school education are 3-4 years for ECD/PPC, 5-9 years for primary, 10-12 years for lower secondary, 13-14 years for secondary and 15-16 years for higher secondary education program.

The majority of schools in the country include primary level (grades 1-5), i.e. most of the lower secondary, secondary and higher secondary schools operate primary level. Very few of them offer only grades 6-8 (lower secondary level) or only the grades 9-10 (secondary level). At the higher secondary level it is more common that some schools offer only grades 11-12.

Broadly, schools are categorized into four types: community-aided (schools, which are fully supported by the government for teachers' salary and other expenses), community-managed (schools, which are fully supported by the government for teachers salary and other funds but their management responsibility lies with the community), community-unaided (schools, which are either getting partial support or no support from the government) and the institutional schools (supported by parents and trustees).

In addition to these broad categories, there are some schools running as the religious schools such as Madarasa, Gumba/Vihar and Ashram/Gurukul that have received support from the government when they have been mainstreamed into the formal education system by registering with the DEO and following the Education Act and Regulation.

3.2 Basic Education

As the School Sector Reform Programme (2009-015) has institutionalized the education sector structure with a basic (grades 1-8) level and secondary (grades 9-12) level, the information in the following sections reflect this new education structure. More particularly, this section presents the status of basic education in terms of schools, students, teachers and other indicators.

3.2.1 Number of schools

The Table 3.1 and the figures 3.1 and 3.2 below present the total number of primary and lower secondary schools by units and levels registered at DEOs throughout the country in the school year 2010-2011. Of the total 33,160 schools, 32,684 are primary and 11,939 are lower

secondary and 32,865 are basic levels of schools. The distribution of schools by eco-belts shows that there are 4,102 schools in Mountain, 17,011 are in Hill, 2,213 are in the Valley and 9,834 are in Terai belt respectively (See Annex: III_A).

Among the eco-belts, the highest number of schools is in Hill and the lowest number is in the Valley. Likewise, there are 32,865 basic levels with Grades 1-8 in the country out of which 4,095 levels are in Mountain, 16,960 levels are in Hill, 2,093 levels are in Valley and 9,717 levels are in Terai belt respectively.

Table 3.1
Number of schools by eco-belts (in units and levels)

Eco-belts	Total School (Units)	Primary level (Grades 1-5)	Lower secondary level (Grades 6-8)	Basic level (Grades 1-8)
Mountain	4,102	4,068	1,221	4,095
Hill	17,011	16,876	5,600	16,960
Valley	2,213	2,076	1,507	2,093
Terai	9,834	9,664	3,611	9,717

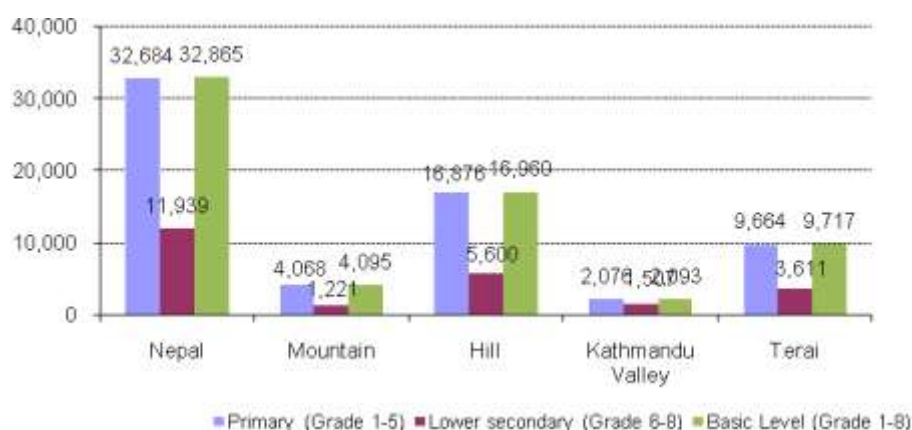

Figure 3.2
Percentage distribution of schools by eco-belts and levels in total levels

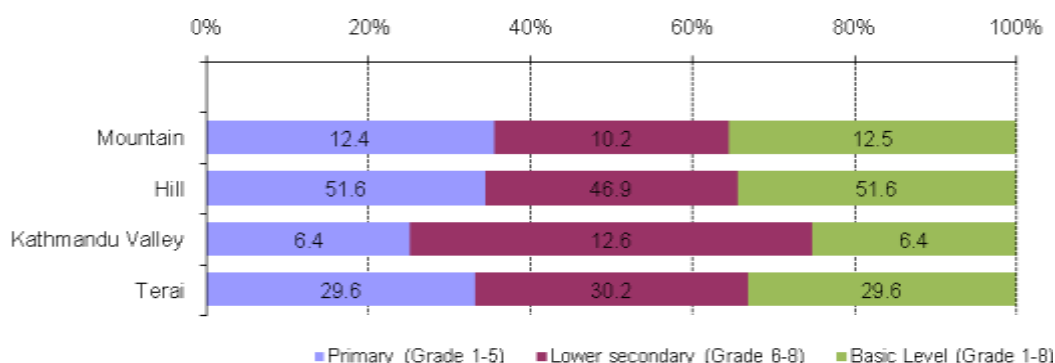

Table 3.2 below shows the distribution of schools running by grades in the school year 2010-2011. Out of the total 25,601 schools at the basic level (grades 1-8), the majority of schools (12,813 schools) are running with grades of 1-5 (primary level). At the primary level, there

are small schools with only grade(s) 1, 1-2, 1-3 and 1-4. At the lower secondary level, the majority of schools are running with grades 1-8; however, there is a significant number of schools with grades 1-7 and less number of school with grades 6-7 and 6-8 (See Annex: III_A).

Table 3.2
Number of schools by units (running by grades)

Grade	Number of schools
1	1012
1-2	1,196
1-3	4,312
1-4	1,593
1-5	12,813
1-6	913
1-7	1,176
1-8	2,578
6-7	3
6-8	5
Total	25,601

The Table 3.3 and the figure 3.3 below explain the number of schools, excluding the religious schools, by types and levels in the school year 2010-2011. At primary level, out of the total 31,929 school levels, 27,093 are community schools and 4,836 are institutional schools. Similarly, at lower secondary level, out of the total 11,901 school levels, 8,823 are community schools and 3,078 are institutional schools. Likewise, among 32,099 basic education levels 27,242 are under community and 4,857 are under the institutional management (See Annex: III_A-C).

Table 3.3
Number of schools by levels and types (Excluding religious schools)

Levels and Types of Schools	Community	Institutional	Total
Primary (1-5) level	27,093	4,836	31,929
Lower Secondary (6-8) level	8,823	3,078	11,901
Basic (1-8) level	27,242	4,857	32,099

Figure 3.3

Table 3.4 below shows the number of religious primary and lower secondary schools by types, units and levels. Out of the total 766 reported religious schools in the Flash I, 2010 school census, 755 primary levels, 38 lower secondary levels, and 766 basic education levels

were reported. The Madarasas are mainly located in Terai, the Gumbas in Hill and Mountain, and the Ashram in Hill and Terai belts (See Annex: IV_A-C).

Table 3.4
Distribution of religious schools by unit and levels

Religious Schools	Total number of schools (in Unit)	Number of school by level		
		Primary	Lower Secondary	Basic
Madarasa	674	674	17	674
Gumba/Vihar	53	51	4	53
Ashram/Gurukul	39	30	17	39
Total	766	755	38	766

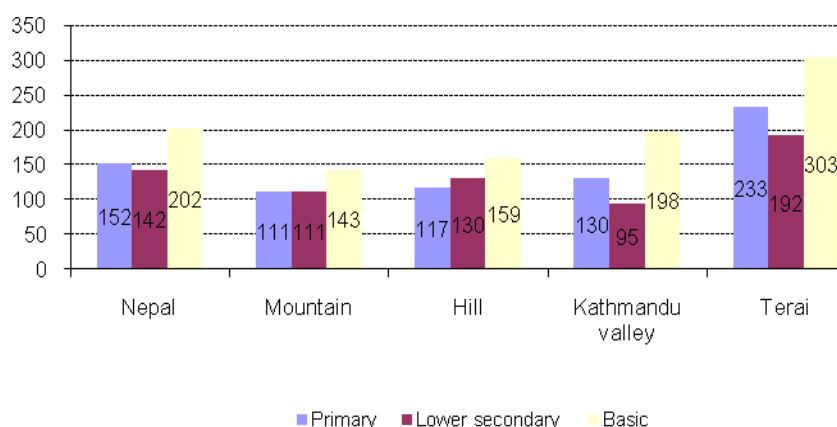

Table 3.5 and figure 3.4 below show the School Student Ratio (SSR)¹ by levels and eco-belts at primary, lower secondary and basic levels. This indicator presents the extent of schools' capacity to accommodate the students. The national average of School Student Ratio at primary level is 1:152. That is, on average, a primary level school is serving 152 children. Similarly, the School Student Ratio at lower secondary level is 1:142 and at basic education level it is 1:202 (See Annex: V).

Table 3.5
School Student Ratios by eco-belts and levels

Eco-belts	Primary	Lower secondary	Basic
Mountain	111	111	143
Hill	117	130	159
Valley	130	95	198
Terai	233	192	303
Total	152	142	202

The highest School Student Ratios are found in the Terai at all levels. It is the only eco-belt which has higher rates than the national average at all levels. The lowest School Student Ratio is found in Mountain in case of primary level and in Valley in case of lower secondary level (See Annex: V).

Figure 3.4
School Student Ratios by eco-belts and levels

¹ This indicator is calculated by taking the total number of schools by level and total number of students in the respective school level.

The Map: 3 below, present the School Student Ratios at primary and basic levels in the school year 2067 by districts. All together, there are 25 districts at primary level and 26 districts at basic level with a high School Student ratio (more than national average). These districts are mostly in the Terai and some of them are in the Hill eco-zone.

3.2.2 Enrolment

This section deals with the enrolment at basic level with the disaggregated information of primary and lower secondary levels in the school year 2010-011.

(1) Total number of enrolments at primary, lower secondary and basic levels

The table 3.6 and figure 3.5 below show the trends of total enrolment at the primary, lower secondary and basic levels since the school year 2004. The overall enrolment at primary level in the school year 2010 reached 4.95 million from 4.03 million in the school year 2004. This is a 22.9% increase as compared to the total enrolment in 2004. The average annual growth rate in enrolment at primary level is 3.5% in this period.

Similarly, the enrolment at lower secondary level reached 1.69 million in the school year 2010 from 1.44 million in the school year 2004. This is, again, a 17.6 % increase as compared to the total enrolment in 2004. The average annual growth rate in enrolment is 2.7% in this period. Likewise, the increment at basic education level in 2010 is 21.5% when compared to the figure in 2004 and the average growth rate during this period was 3.3%. Interestingly, the average annual growth rates for girls are higher than the average annual growth rates of boys at both primary (by 4.2%) and lower secondary (by 4.4%) levels.

Compared to the previous school year, there are 25 districts with an increment of enrolment at primary level. Out of the remaining 50 districts, 4 districts (Salyan, Nuwakot, Khotang and Saptari) report a decreased enrolment by more than 10% at primary level. Similarly, there are 56 districts with an increment of enrolment at lower secondary level and the 3 districts

(Saptari, Nuwakot and Sarlahi) report a decreased enrolment by more than 10% at lower secondary level. The increment on enrolment at lower secondary level indicates a high transition from primary to lower secondary level. At the basic level, the trend of enrolment has absorbed similar pattern as in the primary and lower secondary level.

Table 3.6
Trends of total number of enrolments at primary, lower secondary and basic levels

Level	2004	2005	2006	2007	2008	2009	2010	Average annual growth rate
Primary(1-5)	4,030,045	4,502,697	4,515,059	4,418,713	4,782,313	4,900,663	4,951,956	3.5
Lower secondary(6-8)	1,444,997	1,374,796	1,301,134	1,443,515	1,466,862	1,604,422	1,699,927	2.7
Basic(1-8)	5,475,042	5,877,493	5,816,193	5,862,228	6,249,175	6,505,085	6,651,883	3.3

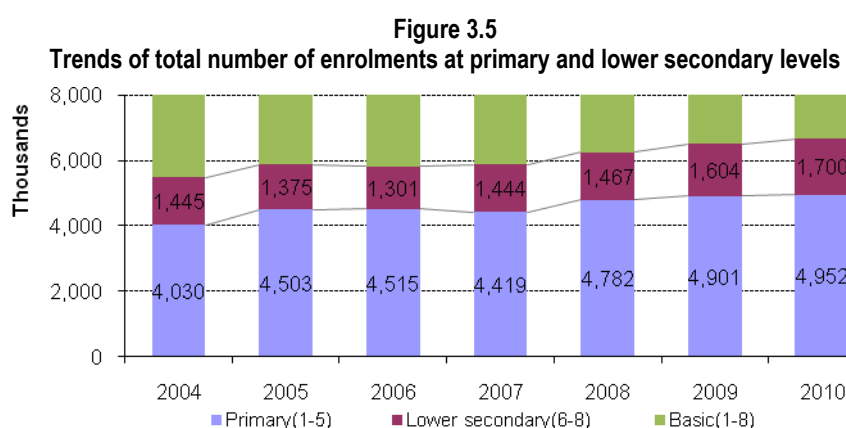

Table 3.7, below, shows that gender equality in terms of enrolment is almost a reality as the enrolment share of girls is 50.4% at primary level, 49.9% at lower secondary level and 50.2% at basic level. These encouraging data show a considerable improvement in the share of girls' enrolment than the share of girls in the last school year (i.e. 50.1% at primary level, 49.0% at lower secondary level and 49.8% at basic level).

Table 3.7

Level	Girls	Boys	Total	% of girls' enrolment
Primary(1-5)	2,494,472	2,457,484	4,951,956	50.4
Lower secondary(6-8)	847,607	852,320	1,699,927	49.9
Basic(1-8)	3,342,079	3,309,804	6,651,883	50.2

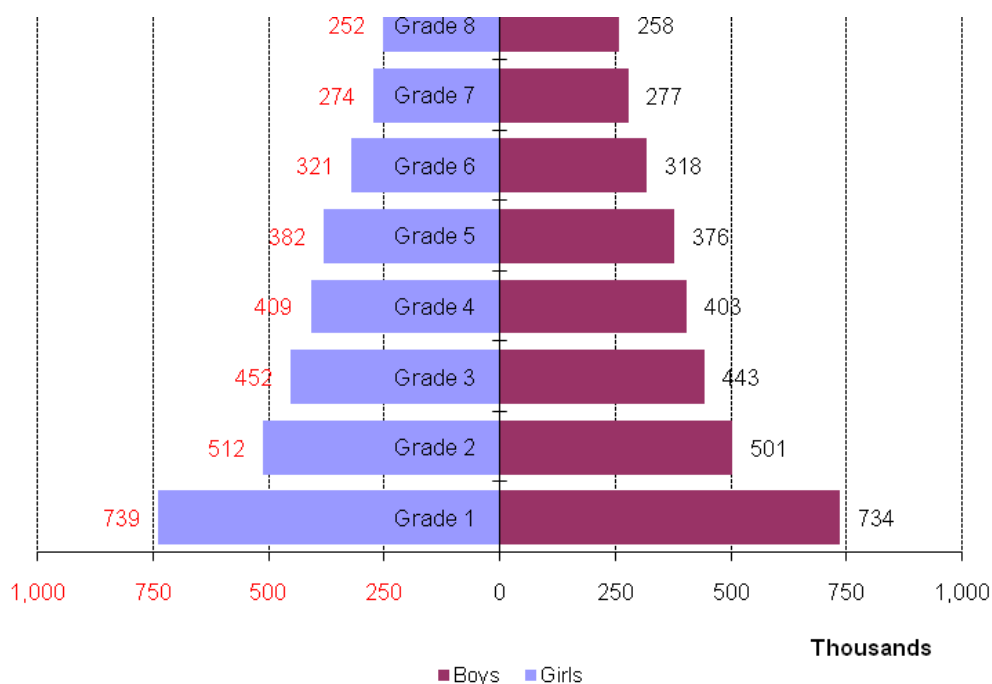

Table 3.8 and figure 3.6 below show the grade-wise composition of enrolment at primary, lower secondary and basic levels. The grade-wise enrolment at primary level depicts that the trends of highest share in Grade One in total enrolment is continuing. But there are beginning signs that the difference of shares within the primary level's grades is narrowing down (i.e. from 33.8% in Grade One and 14.4% in Grade Five in 2004-05 to 29.7% in Grade One and

15.3% in Grade Five in the current school year). The continuous progress on grade-wise higher promotion and lower repetition- and drop-out rates seems to contribute to narrow the gaps in the share of enrolment in all grades for primary level.

Table: 3.8

Figure 3.6
Grade wise composition of enrolments at basic level

Out of total enrolment at basic level (Grades 1-8) more than one fifth (22.1%) of students is in Grade One and 15.2% in Grade Two. Likewise, 11.4% and 7.7% of students are in Grades Five and Eight respectively, i.e. more than one third of the total number of students are in Grades One and Two. From a gender perspective, the composition of grade-wise enrolments is fairly balanced overall and the data shows that gender parity has been achieved in the case of primary level grades (See Annex: VI & XXIX).

The table 3.9, 3.10 and the figure 3.7 below show the number of students and their shares by types of schools. It presents that almost 88.1% of total primary level children are in community schools and the remaining 11.9% in institutional schools. Unlike the overall situation of gender parity, the proportion of girls is lower (10.2%) in institutional schools as compared to the proportion of boys (13.6%), suggesting matters of concerns. For all types of community schools the situation is the opposite; at all levels girls have a higher enrolment rate than boys.

Interestingly, at the primary level, the shares of enrolment in institutional schools have decreased in this school year as compared to the last school year (11.3% for girls and 15.0 for boys) (See Annex: VII, VIII & XXXII & XXXIII).

(2) Dalit and Janajati enrolments at primary, lower secondary and basic levels

Tables 3.11 and 3.12 together with figure 3.8 below show the enrolment of Dalit and Janajati students at primary, lower secondary and basic levels. In comparison to their shares in the total population at around 12%, at primary level the enrolment share of Dalit is 21.5%, whereas the shares at lower secondary and basic levels are 14.2% and 19.6% respectively. When compared to last year's status of shares, a slight increase of 1.5% at primary level and an increase of 1.6% at lower secondary level are noted (See Annex: IX & XXX).

Similarly, table 3.11 depicts the shares of Janajati students by levels. Compared with their shares in the total population at around 40%, the share of enrolment in total enrolment at primary level has slightly decreased than the previous school year (from 38.6% to 38.2%) in the current school year, whereas there has been a slight increase at lower secondary level (from 41.7% to 41.8%). The share at basic level is 39.1% (See Annex: X & XXXI).

(3) Percentage of girls and boys and gender parity indexes in enrolment at primary, lower secondary and basic levels by social groups.

The Gender Parity Index (GPI) is an index that explains the ratio of female to male enrolment and measures progress towards gender equity in enrolment in the education system by grade and level. It also assesses the learning opportunities available to girls compared to those available to boys.

A GPI of 1 indicates parity between sexes, while a GPI between 0 and 1 means a disparity in favour of boys/men and a GPI greater than 1 indicates a disparity in favour of girls/women. For gender parity to exist, the GPI value should be within the range of 0.97 and 1.03.

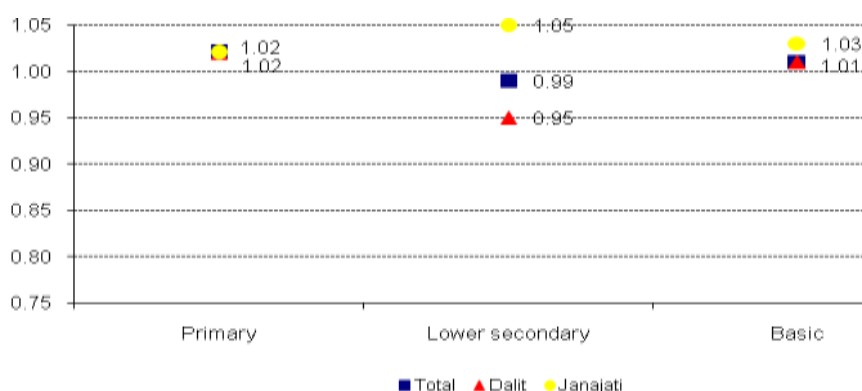

Table 3.13 and figure 3.9 below give the percentage of students by sex and the GPI in enrolments at primary, lower secondary and basic levels of total Dalit and Janajati students based on the 2010-2011 school census. The shares of enrolment of total, Dalit and Janajati girls are 50.4%, 50.6% and 50.5% at primary level, whereas they are 49.9%, 48.7% and 51.2% at lower secondary, and 50.2%, 50.3% and 50.7% at basic levels.

It clearly demonstrates that the gender parity has been achieved in basic education, including primary and lower secondary education (1.02 at primary level, 0.99 at lower secondary level and 1.01 at basic level). It is the same results in Dalit enrolment; whereas, the GPI in Janajati enrolment has also been achieved at all levels. The GPI for Dalit students has increased from 1.01 in 2009 to 1.02 in 2010 at primary level and, again, from 0.91 to 0.95 at lower secondary. Similarly, it has increased from 0.99 in 2009 to 1.01 in 2010 at basic education level (Grades 1-8). The same positive trend is noted for Janajati students as well (1.01 in 2009 to 1.02 in 2009 at primary and 1.02 in 2009 to 1.05 in 2010 at lower secondary). Likewise, the GPI for basic level in Janajati enrolment has increased from 1.01 in 2009 to 1.03 in 2010.

The following Maps 4 and 5 present the status of girls' percentage at primary and basic levels in the total enrolment in the school year 2010-2011. At the primary level, there are 23 districts with girls' percentage below the national average (50.4%). Similarly, at the basic level, there are 23 districts with girls' percentage less than the national average (50.2%). Out of 75 districts, there are 10 districts: namely Rautahat, Bara, Bajhang, Kapilbastu, Mahottari, Humla, Kathmandu, Bajura, Doti and Sarlahi with less than 49% of girls at the basic level.

(4) Enrolment at primary, lower secondary and basic levels by disadvantaged Janajati and disabilities of students

Tables 3.14 and 3.15 below show the status of Janajati students from endangered and extremely deprived groups e at primary, lower secondary and basic level. Based on the categorizations of 59 Janajati groups into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of 22 ethnic

groups, who are under the endangered and extremely-deprived categories (See Annex: XI_A-B & XXXIV_A-B).

In total, from these 22 ethnic groups, there are 91,124 children at primary level, 22,672 children at lower secondary level and 113,796 children at basic level registered at schools in the current school year 2010-2011. The 91,124 children constitute about 2% of the total primary level enrolment. Interestingly, the share of girls (51.7%) is higher than the share of boys in primary education. Even for lower secondary education the share of girls (50.5%) is higher compared to the share of boys.

Table 3.16 below shows the status of children with disabilities at primary, lower secondary and basic levels in the school year 2010-2011. The overall enrolment percentages of children with a disability in total enrolment at primary, lower secondary and basic levels are 1.2%, 1.0% and 1.2% respectively. Of them (60,348 in total) at primary level, 0.4%, 0.4%, 0.2%, 0.1%, 0.0%, and 0.1% have a physical, mental, deaf, blind, deaf and blind, and vocal and speech-related disability respectively. In the same way, out of the total 17,000 students with a disability at lower secondary level, 0.4%, 0.2%, 0.2%, 0.1%, 0.0% and 0.1% has a physical, mental, deaf, blind, deaf and blind, and vocal and speech-related disability respectively. Similarly, out of the total 77,348 students at basic level with a disability, 0.4%, 0.3%, 0.2%, 0.1%, 0.0% and 0.1% have a physical, mental, deaf, blind, deaf and blind, and vocal and speech-related disability respectively (See Annex: XII_A & XII_B).

(5) Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One

The Gross Intake Rate (GIR) is an indicator relating to the enrolment in the first grade at primary level. It explains the total number of new entrants in Grade One, regardless of age, expressed as a percentage of the population of five year age old children (the official primary school-entrance age). It indicates the capacity of the education system to cater the new enrolled children in Grade One.

Likewise, NIR is an indicator related to new entrants in Grade One who are five years of age, expressed as a percentage of the population of the same age. It shows the level of access to primary education of the eligible population of primary school-entrance age.

The tables 3.17, 3.18 and figure 3.10 below show the total number of new enrolment in Grade One, 5 year's age group projected population and GIR in Grade One in the school year 2010-

2011 by eco-belts and gender. Based on the total number of new enrolment in Grade One and the total number of 5 years' age group population, the overall GIR for Grade One is 142.4% with 147.0% for girls and 138.0% for boys. Compared amongst the eco-belts, Mountain belt shows the highest GIR followed by Terai and Hill, whereas the Valley shows the lowest GIR (118.6%). The overall GIR 142.4% is lower than the last school year by 1.8 percent points. However, it is still high and this indicates a late entrance of children into Grade One. This is likely to be affecting the overall internal efficiency of primary education.

There are 41 districts which have achieved a GIR less than national average, while 33 districts mostly from the Hill and Mountain eco-belts, including 5 Karnali-zone districts, have the highest rates of GIR. Out of the total 1,027,668 new enrolments in Grade One, the age-wise enrolment shows that 8.0% students are less than 5 years old. This might also contribute to the relative high repetition rate in Grade One. It is worth noting that the districts which have high GIR also have relatively low percentages of new entrance in Grade One with ECD/PPCs experience (See Annex: XIII).

Similarly, the tables 3.19, 3.20 and figure 3.11 above show the total number of 5 years' age group new enrolment in Grade One, 5 year's age group projected population and NIR in Grade One in the school year 2010-011 by eco-belts and gender.

Based on the total number of 5 years' age group, new enrolment in Grade One and the 5 year's age group population in 2010, the overall Net Intake Rate (NIR) in Grade One is 89.0% with 88.4% for girls and 89.5% for boys. Compared amongst eco-belts, Valley shows the highest NIR (94.2%) followed by Hill and Mountain with Terai having the lowest NIR (86.3%). Compared with the NIR in the last year, it has increased by 2.6 percent points. As compared to the national average there are 51 districts, mostly from the Hill eco-belt, with a high NIR and 24 districts (including 11 Terai districts) with a low NIR (See Annex: XIV).

The following Map 6 presents the Net Enrolment Rate in Grade One by districts. Compared to the national average of NIR (89.0%) all together, there are 41 districts, which have more

than 90% of NIR, whereas there are 24 districts, mostly in the Terai eco-belt, which have a low NIR in Grade One compared to the national average.

(6) Gross and Net Enrolment Rate (GER and NER) at primary, lower secondary and basic levels

GER is an indicator related to total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year. This indicator is widely used to show the general level of participation in a given level of education.

Likewise, NER is an indicator related to total enrolment of the official age-group for a given level of education expressed as a percentage of the corresponding population. NER gives a more precise measurement of the extent of participation of children belonging to the official school age in a given level of education. Practically, a high NER denotes a high degree of participation by the official school-age population. The highest theoretical value is 100%. Increasing trends can be considered as reflecting improving participation at the specified level of education. When the NER is compared with the GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment.

The tables 3.21, 3.22 and 3.23 with the figures 3.12 and 3.13 below show the total number of students, age group wise students at primary, lower secondary and basic levels with the projected population of 5-9, 10-12 and 5-12 years' age groups for 2010 and the status of GER and NER at primary, lower secondary and basic levels by gender in the school year 2010-011. Based on the data presented in the tables 3.21, the overall GER at primary level is 139.5% with 144.8% for girls and 134.5% for boys. When these figures are compared with the figures of last year (141.4% total, 146.1% for girls and 137.1% for boys), the GERs, in total as well as for both girls and boys have been reduced at primary level (See Annex: XIII).

The overall NER at primary level is 94.5% with 93.6% and 95.3% for girls and boys respectively. When compared with the status of the last year (93.7% total, 92.6% for girls and 94.7% for boys), the NERs for both girls and boys as well as the total have increased. The

present status of NER suggests that a total of approximately 196 hundred thousand children (5.5%) are out of formal primary schooling, of them the majority are girls (See Annex: XIV).

The table 3.23 further shows that the total GER at lower secondary level is 94.5% with GER of 97.0% for girls and a GER of 92.1% for boys. When compared with the status of the previous year (88.7% total, 89.3% for girls and 88.2% for boys) the GER in total as well as for both genders has increased this year.

The total NER at lower secondary level is 69.3% with 68.5% for girls and 70.0% for boys in the school year 2010-011. When compared to the status of the previous year, the scenario of this year shows some improvement. Based on the 10-12 years age group population in the school year 2010-011, there are 69.3% students enrolled at lower secondary level. This suggests that almost 30.7% of 10-12 years age group population is not attending at lower secondary level. In the same way, the GER and NER for the basic level are 124.4% and 86.0% respectively.

The district level analysis shows that compared to the national average, there are 38 districts with a low GER at primary level and the rest 37 districts (mostly Hill districts) have high GER rates at primary level. Similarly, 21 districts depict a low NER and the rest have high NER than the national average.

At the lower secondary level altogether 24 districts (including 3 districts from Karnali-zone) have lower GER and NER at lower secondary level. In addition, an almost similar situation is observed for the basic level. Overall, 26 districts mostly from the Hill and Mountain eco-belts (including Karnali zone) have more than 50% over-aged (including 8.0% less than 5 years children in Grade One) children at primary level. This might be one of the causes of the low internal efficiency at primary level.

(7) Internal efficiency at primary level

The term “efficiency” refers to the relationship between outputs and inputs. A process is described as technically efficient if it produces the maximum outputs from a given combination of inputs. Internal efficiency deals with the use of resources and refers to the internal dynamics of the educational system in transforming inputs and processes into outputs. Moreover, it can be defined as the system’s ability to educate the maximum number of children who have entered the system in a specific year in the optimum time with the minimum possible use of human and financial resources.

Operationally, internal efficiency can be described as the number of students graduating from an educational institution (at a particular grade and level of education) expressed as a percentage of the number of students who entered the institution at the beginning of the particular programme.

Table 3.24
Internal efficiency at primary level

	PRD	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Total of Grades 1-5

	Coefficient of internal efficiency	-	-	-	-	-	73.9
	Cohort Graduation Rates						71.8

Table 3.24 above shows the grade wise flow rate of students from school year 2009-10 to 2010-011 for primary grades. These flow rates show the evaluation of internal efficiencies of the students as well as the overall effectiveness of the inputs provided. The table illustrates, out of the total students enrolled in the school year 2009-10 in Grade One, 69.1% were promoted to Grade Two, 22.6% repeated the same Grade in the current school year, and 8.3% dropped out from the school education system (See Annexes XV_A-C).

In other words, altogether 30.9% of the total enrolled students in Grade One of last school year could not continue in Grade Two in this school year. Although the promotion rate has improved as compared to the previous school year, it still demonstrates a high wastage of the inputs provided. However, the promotion rates for upper grades (Grades 2 to 5) are better than for Grade One. The table also suggests that except in Grades One and Three the promotion rates for girls, as compared to that of boys, are slightly better in other Grades (See Annexes XV_A-C). This trend has been continued since the school year 2007. The average survival rate to Grade 5 is 80.6 with 81.2 for girls and 80.4 for boys. This is higher than that of the previous school year (77.9), while the coefficient of internal efficiency is 73.4 of this 73.9 for girls and 73.2 for boys. Similarly, the cohort graduation rate at primary level is 71.3% with 71.8% for girls and 71.0% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2005 altogether slightly more than 71 students successfully completed the primary level in the school year 2009-010.

(8) Internal efficiency at lower secondary level

As shown in the table 3.25, the flow rates for students from school year 2009-010 to 2010-011 at lower secondary level are a bit more encouraging than the ones at primary level. Out

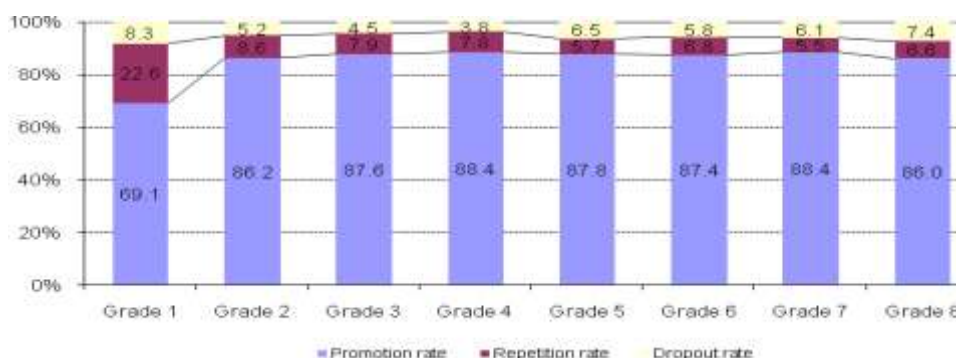

of the total number of students enrolled in the school year 2009-10 in Grade Six, 87.4% are promoted to Grade Seven, 6.8% are repeating the same grade in the current school year, and 5.8% have dropped out from the school education system completely.

Likewise, the promotion rates in Grade Seven and Grade Eight are 88.4% and 86.0% respectively. When the data given below are analyzed from the gender perspective, no significant differences are noted (See Annexes XVI_A-C). The average survival rate to Grade 8 is 66.0 with 67.2 for girls and 65.2 for boys. The coefficient of internal efficiency is 65.0 of this 65.4 for girls and 64.6 for boys. Similarly, the graduation rate of basic level (grades 1-8) is 56.8% with 57.4% for girls and 56.3% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2002, altogether more than 57 students successfully completed the basic level in the school year 2009-010. The Figure 3.14 shows the internal efficiencies at both primary and lower secondary levels and also presents the grade wise progress of students from Grade One to Grade Eight. The flow rates by districts show that the promotion, repetition and dropout rates vary from district to district.

3.2.3 Teachers information at primary, lower secondary and basic levels

This section contains information on teachers at primary, lower secondary and basic levels by school type, level, sex and other indicators related to the teachers. Teachers are defined as persons whose professional activity involves transmitting knowledge, attitudes and skills that are stipulated in the approved curriculum to students enrolled in a formal educational institution.

(1) Total reported number of teachers by sex at primary, lower secondary and basic levels in all types of schools

Table 3.26
Total number of teachers by levels (based on reporting) in all types of schools

Level	Female	Male	Total
Primary(1-5)	70,645	96,571	167,216
Lower secondary(6-8)	11,908	34,124	46,032
Basic(1-8)	82,553	130,695	213,248

Figure 3.15
Total number of teachers by levels (based on reporting) in all types of schools

The table 3.26 and figure 3.15 above present the total number of teachers reported at primary, lower secondary and basic levels in the beginning of the school year 2010-011. As a whole, there are 167,216 teachers at primary level; 46,032 teachers at lower secondary level and 213,248 teachers are at basic level. Of them, the numbers of female teachers are 70,645; 11,908 and 82,553 respectively at primary, lower secondary and basic levels. Likewise, the shares of female teachers are 42.2%, 25.9% and 38.7% at primary, lower secondary and basic levels respectively (See Annex: XVII & XXI).

Table 3.27
Total number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Primary(1-5)	23,168	17,497	40,665
Lower secondary(6-8)	5,745	7,849	13,594
Basic(1-8)	28,913	25,346	54,259

Out of total number of teachers (Table 3.26) reported in the beginning of the school year, the number of teachers in the institutional schools are presented in the above table 3.27, where a total of 40,665; 13,594 and 54, 259 teachers were reported at primary, lower secondary and basic levels. The shares of female teachers in total number of teachers at primary, lower secondary and basic levels are 57.0%, 42.3% and 53.3% respectively. This is higher than the share of female teachers for all schools and for community schools (See Annex: XVIII & XXII).

Likewise, out of total number of teachers (table 3.26), the table 3.28 below shows the reported number of teachers in all types of community schools in the beginning of the school year. The numbers of teachers given include all types of teachers (i.e. teachers working in approved positions, Rahat teachers and teachers appointed by the community from their own sources). A total of 158,989 teachers with 53,640 female and 105,349 male teachers were reported for the basic level schools (See Annex: XVIII & XXII).

Out of the total numbers of teachers in community schools, the shares of female teachers are 37.5%, 19.0% and 33.7% at primary, lower secondary and basic levels respectively. The shares of female teachers at all level have increased as compared to the shares of female teachers in the last school year.

Basic(1-8)	42,407	85,315	127,722

Figure 3.16
Total numbers of teachers in all types of community schools by levels (based on approved positions)

² The numbers of female teachers are presented based on the reporting in the community schools working in the approved positions and Rahat Quotas.

Table 3.29 and figure 3.16 above show the numbers of teachers in all types of community schools based on the numbers of teachers working in approved positions and Rahat positions by levels. Overall, 101,950 teachers with 37,666 female teachers at primary level, 25,772 teachers with 4,741 female teachers at lower secondary level and 127,722 teachers with 42,407 female teachers at basic level are working in the current school year. Out of the total numbers of teachers by levels 36.9% at primary, 18.4% at lower secondary and 33.2% at the basic level are female teachers (See Annex: XXVIII_B).

(2) Percentage of teacher and the gender parity indexes in all types of schools

As discussed previously, the ratio of female to male of a given indicator is termed as GPI. Hence, to assess the level of participation of female teachers against male teachers in the education system, the GPI indicator is one of the most important indicators.

The table 3.30 below shows the shares of teachers by gender and GPI at primary, lower secondary and basic levels by types of schools. The overall GPI in total number of teachers is 0.73 at primary level, 0.35 at lower secondary and 0.58 at basic level respectively. Likewise, the GPI for institutional schools is 1.32 at primary level, 0.73 at lower secondary level and 1.09 at basic level. Hence, the GPI for institutional schools is higher than the GPI in total number of teacher at all levels.

Compared to the GPIs in total and institutional schools, the GPIs in the reported number of teachers in community schools and the total number of teachers working in approved positions and Rahat quotas are comparatively low.

Table 3.30

(3) Percentage of teachers by Dalit and Janajati

Table 3.31 and figure 3.17 below show the percentage shares of teachers by Dalit and Janajati by levels and sex in total number of teachers. The proportion of Dalit and Janajati teachers remain low in teaching profession as compared to their overall proportion of the total population. The percentage shares of Dalit teachers at primary, lower secondary and basic levels are 4.4%, 2.6% and 4.0% respectively.

Likewise, the percentage share of Janajati teachers at primary level is 29.8%, at lower secondary level 17.2% and at the basic level it is 27.1% respectively. However, compared to

last school year, there is a slight increment in the percentage shares of Dalit and Janajati teachers (See Annex: XVII & XXI).

Table 3.31

Table 3.32 above shows the total number of teachers³ by training status and sex in the school year 2010-011 in all types of schools at primary, lower secondary and basic levels. Out of the total 167,216 teachers at primary level 134,991 are trained, 16,221 are partially trained, and 16,004 are untrained. Again, the figures by training status show that out of the total number of teachers at lower secondary level 29,265 are trained, 6,015 are partially trained and 10,752 teachers are untrained. At the basic level there are 164,256 trained, 22,236 are partially trained and 26,756 are untrained teachers (See Annex: XIX & XXIII).

The percentages of teachers by training status and sex are illustrated in Table 3.33 below. At the primary level, 80.7%, 9.7% and 9.6% of teachers are trained, partially trained and

³ The numbers of teachers at all levels are based on the reporting in the Flash I survey 2009-10.

untrained respectively. Similarly, at lower secondary level, 63.6% are trained, 13.1% are partially trained, and 23.4% are untrained. Again, at basic level, out of total number of teachers, there are 77.0% trained, 10.4% partially trained and 12.5% teachers are untrained. The figures in the table suggest that more teachers, except at lower secondary level are trained and almost 23% of the teachers at lower secondary level are still untrained (See Annex: XX & XXIV).

Table 3.33

The table 3.34 below shows the status of training in community schools at all levels and sex. Out of the total 126,551 teachers at primary level 104,937 are trained, 15,003 are partially trained, and 6,611 are untrained. Again, the figures show that out of the total number of teachers at lower secondary level 21,163 are trained, 4,383 are partially trained and 6,892 teachers are untrained. Similarly, , at the basic level there are 126,100 trained, 19,386 are partially trained and 13,503 are untrained teachers (See Annex: XIX & XXIII).

Table 3.34
Number of community schools' teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	39,597	65,340	104,937	4,163	17,000	21,163	43,760	82,340	126,100
Partially trained	5,070	9,933	15,003	1,052	3,331	4,383	6,122	13,264	19,386
Untrained	2,810	3,801	6,611	948	5,944	6,892	3,758	9,745	13,503
Total	47,477	79,074	126,551	6,163	26,275	32,438	53,640	105,349	158,989

Table 3.35
Percentage of community schools' teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	83.4	82.6	82.9	67.5	64.7	65.2	81.6	78.2	79.3
Partially trained	10.7	12.6	11.9	17.1	12.7	13.5	11.4	12.6	12.2
Untrained	5.9	4.8	5.2	15.4	22.6	21.2	7.0	9.3	8.5

The status of teachers in terms of training in community schools by level and sex are shown in the above table 3.35. At primary level 82.9%, 11.9%, and 5.2% of the teachers are trained, partially trained and untrained respectively. At lower secondary level 65.2% of the teachers are trained, 13.5% are partially trained and 21.2% are untrained. Similarly, at the basic level among the total number of teachers 79.3% are trained, 12.2% are partially trained and 8.5% are untrained. Hence, almost 80% of the teachers in community schools, except at lower secondary level are trained in the beginning of this school year (See Annex: XX & XXIV).

(5) Teacher Ratio

This section deals with the Student Teacher Ratios (STR) at all levels by types and levels of schools.

(5)-1 Student Teacher Ratio in all types of schools

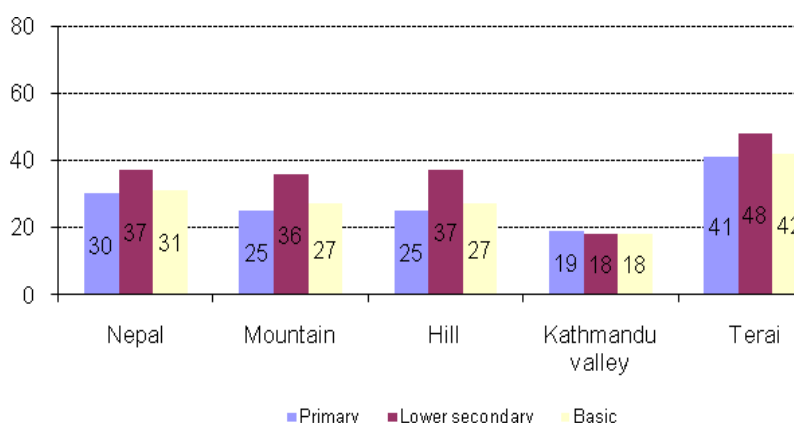

The table 3.36 and figure 3.18 below present the STR⁴ for all types of schools by eco-belts and levels in the school year 2010-011. On average the STR at primary level is 30:1, at lower secondary level 37:1 and at the basic level 31:1. The highest STR at primary level is found in Terai eco-belt with 41:1, while the lowest is in Valley by 19:1. Similarly, at the lower secondary level the highest STR is in Terai belt at 48:1 and the lowest is in Valley at 18:1.

Likewise, at basic level, the highest STR is in Terai (42:1) and the lowest is in Valley (18:1). As in previous years, the analysis shows that more crowded classes are observed in the Terai belt at all levels than in other eco-belts. It is worth mentioning that the STRs, in all eco-belts and at all levels, have decreased this year (See Annex XXVII).

Table 3.36
Student teacher ratio in all types of schools by level

Eco-belts	Primary	Lower secondary	Basic
Mountain	25	36	27
Hill	25	37	27
Valley	19	18	18
Terai	41	48	42
Total	30	37	31

Figure 3.18
Student teacher ratio in all types of schools

(5)-2 Student Teacher Ratios in community schools

The table 3.37 and figure 3.19 below show the STRs by eco-belts for all types of community schools based on the reported number of teachers. On average, the STR in community schools is 34:1 at primary, 45:1 at lower secondary, and 37:1 at basic level. At the primary level the highest STR (51:1) is in the Terai eco-belt and the lowest (19:1) is in Valley.

⁴ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2010-11.

Similarly, at both lower secondary and basic levels, the highest STR is observed in the Terai belt and the lowest one in Valley. The data reveals that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.36) and that the highest STR is in the Terai belt and the lowest STR is in Valley (Table 3.36) at all levels of schools in both scenarios (See Annex XXVIII_A).

Table 3.37
Student Teacher Ratios in all types of community schools (based on reporting)

Eco-belts	Primary	Lower secondary	Basic

Eco-belts	Primary	Lower secondary	Basic
Mountain	36	47	38
Hill	36	53	39
Valley	20	30	23
Terai	58	72	61
Total	43	57	46

Figure 3.20
Student Teacher Ratios in community schools (based on the approved positions of teachers)

Table 3.38 and figure 3.20 above show the STR for all types of community schools based on the approved positions of teachers by levels in the school year 2010-011. On average, the STRs at primary, lower secondary and basic levels are 43:1, 57:1 and 46:1 respectively. The Terai belt shows the highest STR (58:1; 72:1; and 61:1) at all levels, whereas the lowest STR (20:1, 30:1 and 23:1) is found in Valley at all levels. It illustrates that students in the Terai belt do not get the same opportunity of interaction with the teachers as compared to the students in Valley. This fact is further illustrated that there are 33 districts with a higher STR than the national average and most of these districts are in the Terai belt (See Annex XXVIII_A).

3.2 Secondary Education

This section deals with the information regarding secondary and higher secondary schools in the country as a part of school census 2010-011. While secondary refers to Grades 9-10, higher secondary refers to Grades 11-12. In view of the school restructuring as envisaged in the SSRP 2009-2015, a comprehensive secondary education level refers to Grades 9 to 12.

3.2.1 Number of schools

The Table 3.39 and the figures 3.21 and 3.22 below present the distribution of secondary level (Grades 9-12) schools by eco-belts functioning throughout the country in the school year 2010-011. The total number of schools is 33,160. Of the total schools, 645 secondary with 229 higher secondary levels are in the Mountain belt, 3,249 secondary level with 1,120 higher secondary levels are in the Hilly belt, 1,170 secondary with 365 higher secondary in the Valley and 2,202 secondary with 850 higher secondary levels are in the Terai belt. Among the total schools, the highest numbers of secondary schools are concentrated in Hill, whereas the thinly populated Mountain belt has the lowest number of secondary school's levels (See Annex: III_A). The figures 3.21 and 3.22 further elaborate the distribution of schools by eco-belts in number and their percentage in the total number of schools.

Table 3.39
Distribution of schools by eco-belts by units at secondary level

Eco-belts	Total School (Units)	Secondary level (Grades 9-10)	Higher secondary level (Grades 11-12)	Secondary level (Grades 9-12)

Figure 3.22
Percentage distribution of schools by eco-belts at secondary level

The Table 3.40 below explains the distribution of schools running by grades in the school year 2010-011. Currently, none of the schools are running with Grades 9-11 and 9-12 at the secondary level. In total, 7,559 secondary schools are running throughout the country (including 2,564 higher secondary grades) (See Annex: III_A).

11-12	293
Total	7,559

The Table 3.41 above explains the distribution of schools, excluding religious schools, by types and levels of schools in the school census 2010-011. At secondary level, out of the total 7,252 school levels, 4,946 are community and 2,306 are institutional school levels. Similarly, at higher secondary level, out of the total 2,563 school levels, 1,878 are community school levels and 685 are institutional schools.

Likewise, among 7,545 secondary (Grades 9-12) levels 4,995 are under community and 2,550 are under the institutional management (See Annex: III_B & C).

Table 3.41
Distribution of schools by levels (Excluding religious schools) at secondary level

Level	Community	Institutional	Total
Secondary (9-10) level	4,946	2,306	7,252
Higher secondary (11-12) level	1,878	685	2,563
Secondary (9-12) level	4,995	2,550	7,545

The Table 3.42 below shows the number of religious schools by types and levels. A total of 14 secondary and 1 higher secondary level religious schools are reported in the School Census 2010-011. Of them, at secondary level 5 are Madarasas, 8 are Ashram/Gurukul and 1 Gumba/Vihar, whereas at higher secondary level 1 is Madarasa School. Mostly, the Madarasa

schools are found in the Terai eco-belt, the Gumba/Vihar are in Hill and Mountain eco-belts and the Ashram are found in Hill and Terai eco-belts (See Annex: IV_A-C).

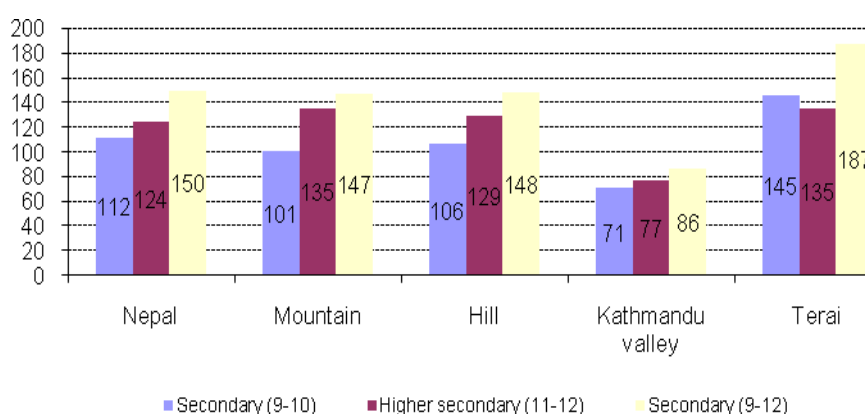

Table 3.42

Total	112	124	150

Figure 3.23
School Student Ratios by eco-belts at secondary level

The Table 3.43 and figure 3.23 above show the Student School Ratios by levels and eco-belts of secondary and higher secondary schools in the school year 2010-011. The national average of secondary level School Student Ratio is 1:112. That is, on an average, a secondary level is serving 112 students. Similarly, the ratio at higher secondary level is 1:124 and at secondary (Grades 9-12) as a whole is 1:150 (See Annex: V). When analyzed by eco –belts, the highest School Student Ratio is found in the Terai eco-belt at secondary level, which is higher than the national average. The lowest School Student Ratio is found in the Valley at both levels.

This shows that schools in the Terai are crowded and, therefore, need ample attention for adequate facilities, including classroom and space (See Annex: V).

3.2.2 Enrolment

This section contains the information on enrolments of students and the enrolment related indicators at secondary level.

(1) Total number of enrolment at secondary level

Table 3.44
Total number of enrolment at secondary level

Level	Girls	Boys	Total	% of enrolment in total	% girls
Secondary (9-10)	395,945	415,965	811,910	71.8	48.8
Higher secondary (11-12)	161,486	156,940	318,426	28.2	50.7
Secondary (9-12)	557,431	572,905	1,130,336	100.0	49.3

The Table 3.44 above shows the total enrolment at the secondary and higher secondary levels in the beginning of the school year 2010-011. The enrolment at secondary level is 811,910, which is higher than the total enrolment (790,348) of the previous school year 2009-10, whereas the enrolment at the higher secondary level of this school year is 318,426⁵. When the data are analyzed from gender perspective, the share of enrolment for girls at secondary level (grades 9-10) is 48.8%, whereas it is 50.7% at the higher secondary and 49.3% at secondary level (grades 9-12) (See Annex: XXIX).

(2) Total number of Dalit and Janajati enrolment at secondary level

The Tables 3.45 and 3.46 below show the numbers and shares of Dalit and Janajati enrolment in total enrolment at secondary level in the school year 2010-011. On average, the share of Dalit enrolment in total enrolment at the secondary level is 10.0%. When compared to the previous school year (8.6%), the share of Dalit enrolment has increased by 1.4% points. The Dalit enrolment at the higher secondary level is 6.3%, which is also higher than in the previous year (4.2%) (See Annex: XXX).

Similarly, the Table 3.46 presents the total 331,343 enrolment of Janajati students at the secondary level, which is 40.8% of the total enrolment and has increased from the previous school year (39.5%) 2010-011 by 1.3% points (See Annexes: XXXI). Likewise, the enrolment of Janajati students at the higher secondary level is 98,838 in the school year 2010-011, which is 31.0% of the total enrolment at this level. Moreover, the overall share of Dalit and Janajati enrolment at secondary education (Grades 9-12) is 9.0% and 38.1% respectively.

Table 3.45
Dalit enrolment at secondary level

Level	Girls	Boys	Total	% of enrolment in total

(3) Total number of enrolment at secondary level by school types

The tables 3.47, 3.48 and the figure 3.24 below show the total number of enrolments and the percentage of enrolment by types of schools in total enrolment at secondary and higher secondary levels in the school year 2010-011. At the secondary level, of the total 811,910 students reported in Flash I, 2010-011, 83.7% students are in all types of community schools and 16.3% in institutional schools. Compared to the last school year 2009-10, the share of enrolments in institutional schools has slightly decreased in the current school year at the secondary level. Similarly, at higher secondary level, of the total 318, 426 students, 87.0% are in all types of community schools and the rest (i.e.13.0%) in institutional schools. The data also reveal that the shares of girls in all types of community schools are higher than the shares of boys at both levels (See Annexes: XXXII & XXXIII). The figure 3.27 provides information with respect to the share of enrolment by types of schools.

Table 3.47

(4) Enrolment at secondary level by disadvantaged Janajati and disabilities of students

The Table 3.49 (A&B) below shows the status of Janajati students by castes at secondary level (grades 9-12). Based on the categorization of 59 Janajati castes into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of following 22 castes, which are classified as the endangered and extremely deprived categories (See Annex: XXXV_A-B).

In total, there are 8,476 students (i.e., 1.04% in total enrolment) at secondary level from the following castes studying in the current school year 2010-011. The participation of girls from these groups in secondary education is 48.9%. It indicates the share of enrolment by sex is very much encouraging in the total enrolment. Similarly, there are 2,449 students (i.e., 0.77% in total enrolment) from these categories at the higher secondary level wherein the majority is of boys.

The Table 3.50 below shows the status of students with disabilities at both secondary and higher secondary levels in the school year 2010-011. Overall, students with disabilities at secondary and higher secondary levels are 0.84% and 0.47% respectively in the total enrolment. When taken as a whole, the percentage of students at secondary level (Grades 9-12) with disabilities is 0.74%. Out of the total 6,838 students with disabilities at secondary level, 0.41% students have physical disability, 0.12% is mentally retarded, 0.11% is deaf, 0.12% is blind, 0.04% is deaf and blind and 0.05% has vocal and speech-related disability. Similarly, of the total 1,495 students with disabilities at higher secondary level, 0.28% students have physical disability, 0.06% is mentally retarded, 0.04% is deaf, 0.05% is blind and 0.02% is deaf and blind and 0.03 has vocal and speech-related disability. Of the total students at secondary level (Grades: 9-12), 0.74% (i.e., 8,333) of the students are with all types of disability (See Annex: XXXVI & XXXVII).

5) Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level

The table 3.51 and the figures 3.25 and 3.26 below show the GER and NER at secondary and higher secondary levels in the school year 2010-011. At secondary level, on average, the GER is 66.3%, of this 66.5% GER is for girls and 66.1% GER is for boys. Likewise, the average NER at secondary level is 46.5%, of this 45.9% is for girls and 47.0% is for boys. The NER suggests that, based on the 13-14 age group students enrolled at secondary level in the school year 2010-011, a big number of secondary age group population is out of school or enrolled as average students at the lower secondary level in the country.

Similarly, the average GER at the higher secondary level is 26.0%, of this 26.9% is for girls and 25.2% is for boys. Also, the NER at the higher secondary level is 7.8%; of this 7.9% NER is for girls and 7.6% NER is for boys. Thus, the data illustrate that more attention needs to be paid to expand the opportunities of education for secondary and higher secondary level

school going age group population. However, there has been a very narrow gender gap between the girls and boys at the secondary and the higher secondary levels in terms of NER.

Compared to the status of the previous school year at the secondary level, both the GER and the NER have increased (the GER from 65.7% to 66.3%, whereas the NER from 40.8% to 46.5% (See Annex: XIII & XIV). Similarly, the figures 3.25 and 3.26 present the status of GER and NER by levels in the school year 2010-011.

3.2.3 Teachers information at secondary, higher secondary and secondary levels

This section contains information on teachers at secondary, higher secondary and secondary (grade 9-12) levels by school types, levels, sex and other indicators related to teachers.

(1) Distribution of teachers by sex at secondary, higher secondary and secondary levels

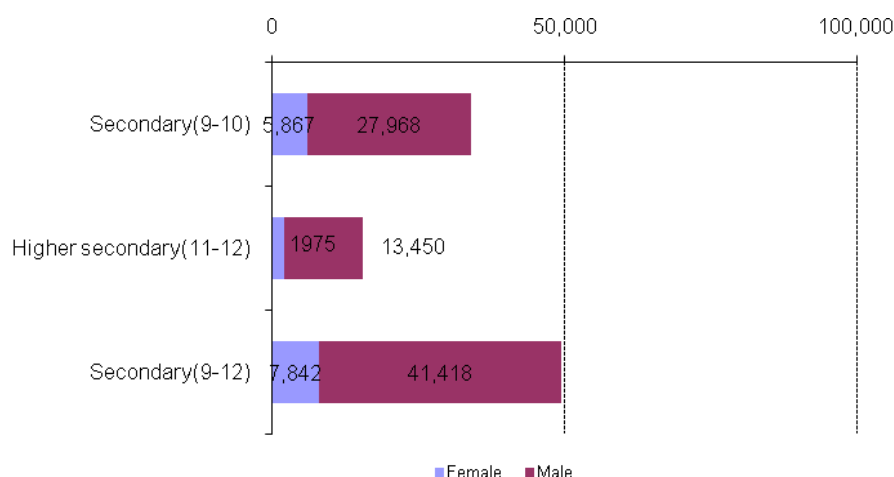

The table 3.52 and figure 3.27, below, show the total numbers of teachers reported at secondary, higher secondary and secondary levels in the beginning of the school year 2010-011. In total, there are 33,835 teachers at secondary level, 15,425 teachers are at higher secondary level and altogether 49,260 teachers are in the secondary level (Grades 9-12). Of them, the numbers of female teachers are 5,867; 1,975 and 7,842 respectively at secondary, higher secondary and secondary (Grades 9-12) levels.

The shares of female participation in total number of teachers are 17.3%; 12.8% and 15.9% at secondary, higher secondary and secondary level respectively. It shows there has not been any change in the share of female teachers at secondary level than in the previous school year (See Annex: XXI).

Table 3.52
Distribution of total teachers at secondary level (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	5,867	27,968	33,835
Higher secondary (11-12)	1,975	13,450	15,425
Secondary(9-12)	7,842	41,418	49,260

Figure 3.27
Distribution of total teachers at secondary level (based on reporting)

Out of the total number of teachers (Table 3.52), the table 3.53 below depicts the number of teachers in institutional schools, wherein the total 12,179; 3,441 and 15,620 teachers were reported at secondary, higher secondary and secondary levels in Flash I, 2010-011. The percentages of female teachers in total number of teachers at secondary, higher secondary and

secondary levels are 24.8%, 10.3% and 21.6% respectively, which are higher than the percentage of female teachers in the total and community schools (See Annex: XXII).

Table 3.53
Number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	3,018	9,161	12,179
Higher secondary(11-12)	355	3,086	3,441
Secondary(9-12)	3,373	12,247	15,620

Likewise, the Table 3.54 given below shows the number of teachers reported in Flash I, 2010-011 in all types of community schools. The numbers of teachers given in the table are based on the reporting in the Flash I, 2010-011 censuses, which includes all types of teachers (i.e. teachers working in the approved positions, Rahat teachers and teachers appointed by the community from their own sources).

In total 21,656 with 2,849 female, 11,984 with 1,620 female and 33,640 with 4,469 female teachers were reported at secondary, higher secondary and secondary (Grades 9-12) level in the Flash I, 2010-011 school census. Out of total, the percentages of female teachers are 13.2%, 13.5% and 13.3% at secondary, higher secondary and secondary levels respectively. The shares of female teachers have increased at all levels than in the previous school year (See Annex: XXII).

Table 3.54
Distribution of teachers in all type's community schools at secondary level (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	2,849	18,807	21,656
Higher secondary(11-12)	1620	10364	11,984
Secondary(9-12)	4,469	29,171	33,640

Table 3.55 given below provides the number of teachers in all types of community schools based on the number of teachers working in the approved number of positions and Rahat quotas by levels. Overall, there are 19,584 with 2,563 female teachers at secondary level, 1,954 teachers at higher secondary level and altogether 21,538 teachers at secondary (Grades 9-12) level working in the current school year (See Annex: XXVIII_B).

Table 3.55
Number of teachers in all type's of community schools by levels (based on approved positions)

Level	Female ⁶	Male	Total
Secondary(9-10)	2,563	17,021	19,584
Higher secondary(11-12)	-	-	1,954
Secondary(9-12)	2,563	17,021	21,538

⁶ The numbers of female teachers are presented based on the reporting in the community schools working in the approved positions and Rahat Quotas.

(2) Percentages of teachers and the gender parity indexes in all types of schools by levels

The Tables 3.56, 3.57 below demonstrate the percentage of teachers by sex and GPI at secondary, higher secondary and secondary levels by types and levels of schools based on the reporting in Flash I, 2010-011. The overall GPI in total number of teachers is 0.21 at secondary level, 0.15 at higher secondary and 0.19 at secondary level respectively. Moreover, almost similar situation of GPI is found in the shares of female teachers in total number of teachers in the community schools (table: 3.57). Compared to the GPIs at primary, lower secondary and basic levels, the GPI at secondary and higher secondary levels are very low. This shows that the participation of females in teaching profession at secondary education is very poor.

Table 3.56
Percentage shares of teachers in all types of schools at secondary level

Level	Female	Male	GPI
Secondary(9-10)	17.3	82.7	0.21
Higher secondary(11-12)	12.8	87.2	0.15
Secondary(9-12)	15.9	84.1	0.19

(3) Percentage of Dalit and Janajati teachers

Table 3.58

Janajati	11.6	12.9	12.7	11.9	8.2	8.7	11.7	11.4	11.4

Figure 3.28
Percentage of Dalit, Janajati teachers in total teachers at secondary level

Table 3.58 and figure 3.28 above present the shares of teachers by social groups (Dalit and Janajati) and levels. The shares of Dalit and Janajati teachers are very low in teaching profession. The shares of Dalit teachers at secondary, higher secondary and secondary (Grades 9-12) levels are 2.7%; 0.8% and 2.1% respectively. Likewise, the shares of Janajati teachers at secondary level are 12.7%, with 8.7% at higher secondary level and 11.4% at the secondary (Grades 9-12) level. Compared to the figures of the last school year, both the shares of Dalit and Janajati teachers have increased at secondary and higher secondary levels in the current school year 2010-011 (See Annex: XXI).

(4) Teacher training

Table 3.59, below, shows the total number of teachers⁷ by training status and sex in the school year 2010-011 in all types of schools at secondary, higher secondary and secondary levels. Out of the total 33,835 teachers at secondary level (9-10) 28,780 are trained, 2,278 are partially trained, and 2,777 are untrained. Again, the figures by training status show that out of the total number of teachers 15,425 at higher secondary level 7,802 are trained, 1,851 are partially trained and 5,772 teachers are untrained. At the secondary level (9-12) out of the total teachers 49,260 there are 36,582 teachers trained, 4,129 partially trained and 8,549 teachers are untrained (See Annex: XXV_A & XXV_B).

Table 3.59
Number of teachers by training status (all types of school) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total

Partially trained	549	1,729	2,278	82	1,769	1,851	631	3,498	4,129
Untrained	394	2,383	2,777	573	5,199	5,772	967	7,582	8,549

The percentages of teachers by training status and sex are illustrated in Table 3.60 below. At the secondary level (9-10) 85.1%, 6.7% and 8.2% of teachers are trained, partially trained and untrained respectively. Similarly, at higher secondary level, 50.6% are trained, 12.0% are partially trained, and 37.4% are untrained. Again, at secondary level (9-12), out of total number of teachers, there are 74.3% trained, 8.4% partially trained and 17.4% teachers are untrained. The figures in the table suggest that more teachers, except at higher secondary level are trained and more than 37% of the teachers at higher secondary level are still untrained (See Annex: XXVI_A & XXVI_B).

Table 3.60
Percentage of teachers by training status (all types of schools) at secondary level

The table 3.34 below shows the number of teachers by training status in community schools at secondary, higher secondary and secondary (9-12) levels. Out of the total 21,656 teachers

⁷ The numbers of teachers at all levels are based on the reporting in the Flash I survey 2009-10.

at secondary level (9-10) 19,038 are trained, 1,800 are partially trained, and 818 are untrained. Again, the figures show that out of the total number (11,984) of teachers at higher secondary level 6,290 are trained, 1,642 are partially trained and 4,052 teachers are untrained. Lastly, at the secondary level (9-12) there are 25,328 trained, 3,442 partially trained and 4,870 are untrained teachers (See Annex: XXV_A & XXV_B).

Table 3.61

Partially trained	12.6	7.7	8.3	3.0	15.4	13.7	9.1	10.4	10.2
Untrained	5.5	3.5	3.8	21.4	35.8	33.8	11.3	15.0	14.5

The status of teachers in terms of training in community schools at secondary level (9-12) by sex are shown in the above table 3.62. At secondary level (9-10) 87.9%, 8.3%, and 3.8% of the teachers are trained, partially trained and untrained respectively. At higher secondary level 52.5% of the teachers are trained, 13.7% are partially trained and 33.8% are untrained. Similarly, at the secondary level (9-12) among the total number of teachers 75.3% are trained, 10.2% are partially trained and 14.5% are untrained. Hence, almost 88% of the teachers in community schools at secondary level (9-10) are trained in the beginning of this school year (See Annex: XXVI_A & XXVI_B).

(5) Teacher Ratio

(5)-1 Student Teacher Ratios in all types of schools

This section deals with the Student Teacher Ratios (STR) at all levels: secondary, higher secondary and secondary level by types of schools. The STR assesses the level of human resources input in terms of number of teachers in relation to the number of students.

The following Table 3.63 and figure 3.29 present the STR⁸ in all types of schools by eco-belts and levels in the school year 2010-011. On average, the STR at secondary level is 24:1, at higher secondary level 21:1 and at the secondary (Grades 9-12) level 23:1 respectively. Likewise, the highest STR at secondary level is found in the Terai belt, whereas at higher

secondary level, the highest STR is found in the Mountain belt. Like in previous years, the lowest STR is found in the Valley (See Annex XXVII).

(5)-2 Student Teacher Ratios in community schools

Table 3.64 and figure 3.30 below present the STR⁹ in all types of community schools by eco-belts and levels in the school year 2010-011 based on the reported number of teachers in Flash I, 2010-011 school census. On average the STR at secondary level is 31:1, at higher secondary level 23:1 and at the secondary (Grades 9-12) level 28:1 respectively. As in the previous situation, the highest STR at secondary level is found in the Terai belt (See Annex XXVIII_A).

(5)-3 Student Teacher Ratios in community schools based on the approved teachers positions

The Table 3.65 below shows the STR by eco-belts for all types of community schools at secondary (Grades 9-10) level based on the number of approved teacher positions. On average, the STR in secondary community schools is 35:1. As the table depicts, at the secondary level, the highest STR (42:1) is in the Terai and the lowest one (20:1) is in the Valley. The data also reveal that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.63 & 64) (See Annex XXVIII_A).

(6) Internal efficiency at secondary level

The Table 3.66 given below shows the flow rates of students from the school year 2009-10 to 2010-011 along the grades at secondary level and the examination pass rate at higher secondary level. The table illustrates, out of the total students enrolled in the school year 2009-10 in Grade Nine, 88.5% are promoted to Grade Ten, 4.9% are repeating the same grade in the current school year, and 6.7% dropped out from the school education system.

The table also indicates that the girls' repetition rate in Grade 9 is slightly higher, whereas the dropout rate is slightly lower as compared to that of boys (See Annexes XVI_A-C).

Table 3.66

¹⁰ The percentage of promotion rates for grade 11 and 12 is based on the reporting of total number of students appeared and passed in the exam in Flash I census 2010-11.

SECTION IV

4.1 Availability of textbooks at primary, lower secondary and secondary levels

Textbooks are the main instructional materials for classroom teaching/learning activities in the schools. The Ministry of Education has made commitment, especially for primary school children, to deliver the textbooks within the second week of each new school year.

Table 4.1 presents the status of availability of textbooks within the second week of this school year at primary, lower secondary and secondary levels. It shows that out of the total number of enrolled children at the primary level in the country, 66.3% children received a full set of textbooks within the second week of the school year 2010-011 (i.e. 2067/01/15), 2.7% children received a partial set of textbooks and 31.0% children did not receive even a single textbook by the above reference date (See Annex: XXXIX_A & XXXIX_B).

When compared with the status of the previous school year, the percentage of children receiving a full set of textbooks has increased from 57.6% to 66.3% in the current school year. The highest percentage of children receiving a full set of textbooks by the reference date was Grade 5 children with 72.5%. The highest percentage of the children not receiving even a single textbook was the Grade One children with 37.7%. However, this is less than 4.6% of the Grade One children not receiving any textbooks in the last school year.

Table 4.1
Availability of textbooks at primary, lower secondary and secondary levels by grades

Grades	Total students enrolled in 2010-011	Number and percentage of students receiving textbooks within the second week (2067/01/15) of academic session, 2010-011

9	363,431	130,890	36.0	6,487	1.8	226,054	62.2
10	316,423	110,668	35.0	5,460	1.7	200,295	63.3
9-10	679,854	241,558	35.5	11,947	1.8	426,349	62.7
Total	6,512,430	4,099,241	62.9	197,405	3.0	2,215,784	34.0

The analysis also suggests a low scenario at lower secondary level with respect to the availability of textbooks by the particular date of 2067/01/15. Again, the scenario with respect to secondary level is a bit worsening than the primary and lower secondary levels.

To sum up, though there has been some progress made in the availability of textbooks in the current school year, still a lot has to be done to make the availability of full sets of textbooks in time as per the reference date for all students.

4.2 Number of classes with transitional language support at primary level

Nepal is a multilingual country, where groups of people speak many different languages as their mother tongue in daily practices. Table 4.2 below shows the number of classes which used a local language in the teaching and learning process at the primary level as a transitional language to make better interpretation of the subject matters for those students who did not have Nepali as their mother tongue.

In total there are 22 local languages at primary level which have been widely used as the medium of instruction in the classroom teaching and learning activities. Out of total 32,684 primary levels in the school year 2010-011 the following local languages were used as the medium of instruction in 17,273 classes at primary level in teaching and learning activities.

The data shows that the local languages were mainly used in the early grades at primary level. Among the following reported local languages, Maithili, Tamang, Bhojpuri, Tharu, Awadhi and Doteli languages were used widely in the Terai and Far-Western Hilly districts.

Table 4.2
