## **Foreword**

The Educational Management Information System (EMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation and application. Especially, EMIS has been used to derive the Flash Reports I and II.

This report (Flash I) provides a snapshot of enrolment, pass rates, repetition and survival rates of students at all levels of the school education system in disaggregate forms-by eco-zone and by districts. Similarly, this report analyses the training status of teachers and considers how well schools are supplied with basic supports from DEOs. Such measures give an indication of the effectiveness of the education system. EMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of school level performance information has been instrumental in evidence based educational planning at district, regional and national levels.

In the process of preparation of this report many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative effort of EMIS core team of DEO, REDs and DEOs officials. The constructive suggestions and feedback of the Development Partners have also significant role in this process. Therefore, I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for your contributions. Any suggestion and feedback for its improvement is highly appreciated.

# SECTION I

## 1.1 Introduction

The Department of Education (DOE) has published the Flash Report I, 2011-012 with a view to presenting different education statistics to facilitate the planning and monitoring activities of the School Sector Reform Plan (SSRP) 2009-015. The purpose is to furnish a national, ecological and district- level current educational status with their brief analyses in terms of access and equity, efficiency and quality indicators of the SSRP.

This publication is fourteenth in the series of Flash Reports I and II produced by the DOE. The publication has focused, largely, on providing information to the following main areas of the school education:

- Early childhood development (ECD) and pre-primary classes (PPCs),
- Alternative schooling programme–School outreach/Flexible schooling programme (SOP/FSP),
- Number of schools by types of schools (community, institutional and religious),
- Student participation by gender, Dalit, Janajati, disadvantaged Janajati and disabilities,
- Number of teachers and their training status by types of schools,
- GIR/NIR in Grade One and GER/NER by gender and level of education,
- Internal efficiency by grade, gender and level,
- Student-teacher ratios by level of school,
- Student-school and teacher-school ratios by level,
- Delivery of free textbooks to schools within two weeks of the beginning of the school year, and
- Number of schools with transitional language support at primary level.

Since the school year 2009-10, the Flash Reports have included the information in line with the SSRP core document that includes Basic education comprising grades 1-8 and Secondary education comprising grades 9-12 with a view to address the SSRP indicators. In addition, this report has also presented the disaggregated information on these two levels: Basic and Secondary.

The information presented in this report includes, unless stated otherwise, facts and figures from all schools running in the country: all types of community schools (aided, managed and unaided), institutional schools (private) and religious schools by levels : ECD/PPC, primary, lower secondary, secondary and higher secondary.

## 1.2 Process of preparing the report

- All the activities relating to this report were co-ordinated by DOE's Education Management Information System (EMIS) Core Team headed by the Director of Planning and Monitoring Division.
- Flash I questionnaires were updated through wide consultations with central, regional, district and sub-district level personnel.

- Feedback and suggestions received from stakeholders, including development partners were incorporated to improve the Flash I questionnaires.
- The Camera-Ready Copy (CRC) of the revised Flash I questionnaires was sent to District Education Offices (DEOs) in the last week of February 2011 for its printing and distribution to schools.
- Guidelines about how to complete the Flash I questionnaires were provided to schools along with the questionnaires and separate instructions were sent to the DEOs/REDS to ensure quality and accuracy of data by monitoring of data verification and validation at schools and RCs level by Resource Persons, School Supervisors and District Education Officers.
- The computer software developed on the PHP (Pretext Hypertext Pre-processor) platform with the back-end support by a MySQL database was updated and used to process the Flash data. The software enabled data entry, processing and standard output generation. There is also a provision to generate additional output tables on the basis of specific user requirements. Small revisions were made in last year's software to accommodate districts' requirements and also due changes were made in this year's Flash questionnaires.
- All districts were able to install the Flash Software by themselves in their own office. They entered the data into software locally and delivered the district Flash database to the DOE by email or FTP (File Transfer Protocol).
- Data entry into the computer began with verifying and updating school codes given to all schools by the DEOs.

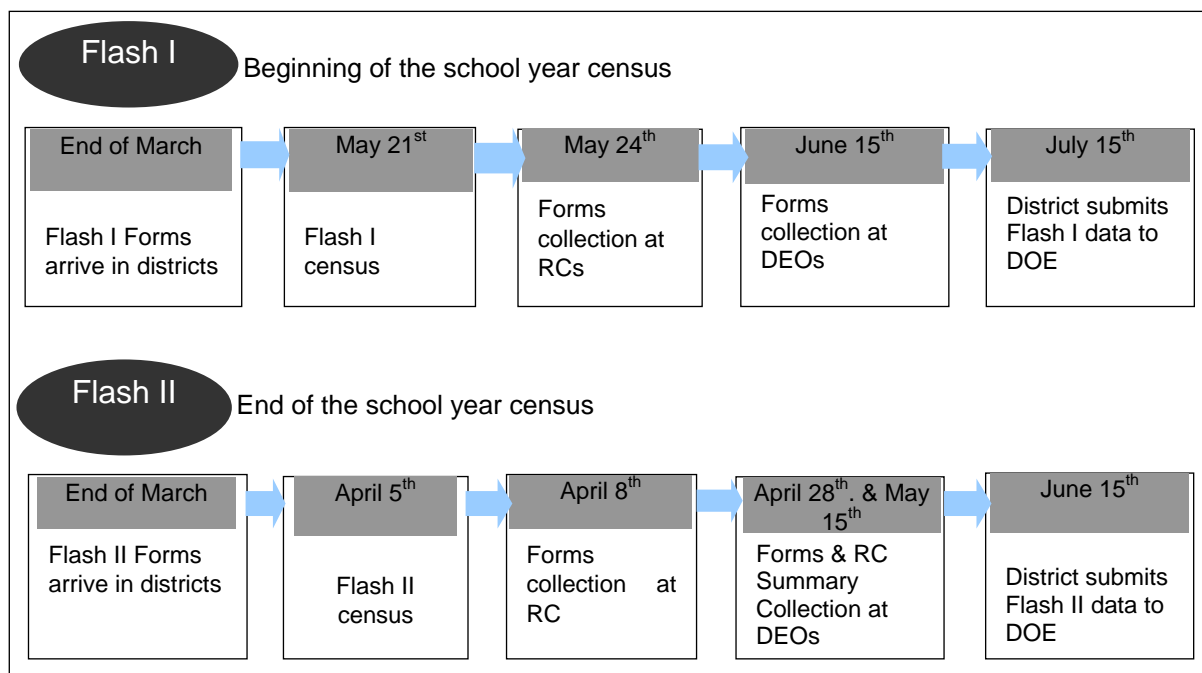

### **1.3 Methodology**

- This report has been prepared based on the information gathered during the Flash I School Census covering all levels and types of schools – pre-primary to higher secondary (community aided, community unaided, private or institutional schools, religious schools and alternative schools) running in the country on the reference date of Jestha 7, 2068 (21 May, 2011). However, out of total 33,160 schools with all levels in the previous school year, 32,390 (97.7%) schools reported their information in the Flash I school census 2011, and for the rest non-reported schools in the Flash I, 2011 school census their information was taken from the previous Flash II school census database in order to generate a complete database.
- Information and analyses are presented, mainly, on the basis of ecological belts - Mountain, Hills, Tarai, and a separate fourth category Valley summarises information for three districts (Kathmandu, Lalitpur and Bhaktapur). The detailed information with respect to each district is provided in annexes for further references.
- For the purpose of calculating enrolment rates, medium variant population projection data were obtained from the Population Projection for Nepal 2001-2021 publication, jointly published by the Central Bureau of Statistics (CBS) and Ministry of Population and Environment (MOPE) in the year 2003. This publication provides population projection data by district only on the basis of five years age and five years time interval. Hence, Sprague multiplier co-efficient were used to interpolate the district level single-age population from a given five-year age group population data. After obtaining district level single age group population, compound growth rates of the

respective district and age group were applied to estimate the district level population for single year (i.e. for the year 2011-2012).

- The specified age groups for students in ECD/PPC, primary, lower secondary, basic, secondary, higher secondary and secondary levels are 3-4, 5-9, 10-12, 5-12, 13-14, 15-16 and 13-16 years respectively.
- Schools are counted according to the level/levels of education they offer and as a unit by the total grades they offer. For example, level-wise, a higher secondary school offering grades 1-12 is counted as having four levels of education – as primary, lower secondary, secondary and higher secondary level respectively.
- The Flash process was implemented as per the following prescribed timeline and schedules.

**Figure1**  
**Time line for Flash Data collection**

#### 1.4 Data reliability

In the Flash Reporting system the responsibilities for each agency/level are well defined in order to ensure the uniformity, consistency and quality of data. At the school level, Head Teachers (HTs) are responsible for filling out the Flash I questionnaire and getting its approval from School Management Committee (SMC) Chairpersons and School Supervisors/Resource Persons on time. Likewise, SMC Chairpersons and School Supervisors/Resource Persons are responsible for assessing and approving the completed Flash I questionnaire before it is submitted to the DEO.

Also, several measures are taken to verify the data by cross checking the accuracy and consistency of the data. In order to minimize the reporting errors and prevent inconsistency in data entry, necessary validation rules have been incorporated into the Flash data entry software. Furthermore, the DOE has been providing continuous technical support to the district personnel through visits as well as through telephones and emails, which, to a large extent, has helped in improving the data quality. In addition, trainings and on-the-job

orientations to the DEO personnel involved in data processing activities have been provided to ensure the reliability of data.

## 1.5 Lessons learnt

- The districts were able to demonstrate steady progress in timely reporting and also in verifying and validating the data by themselves. This capability enhancement was made possible with the installation of user-friendly and technically sound database management software developed by the DOE.
- Nevertheless, the capacity of schools, RCs and DEOs needs to be further strengthened in most aspects of EMIS activities, such as adequate logistical support for producing quality data and disseminating accurate and timely information to key stakeholders at the local (school, community and district) level that could contribute to better accountability, adherence to results and facilitate informed decision-making at all levels.
- As a new initiative for the establishment of two-way data flow system, the DOE has developed the School, VDC and a District Profiles, and distributed to each school through DEOs. The DOE has also developed a time-series Flash Database CD-ROMs [2063-2065] and distributed these to all relevant MOE institutions as well as Village Development Committees (VDCs) and District Development Committees (DDCs). Preliminary discussions with INGOs on these new EMIS tools have revealed an interest from their side to increase their support to EMIS and the Flash system.

- The proportions of female teachers by levels, in all types of community schools, are: 37.5% at primary level, 20.1% at lower secondary level and 13.9% at secondary level.
- The proportions of Dalit teachers at primary, lower secondary and secondary levels are: 4.5%, 2.9%, and 3.6% respectively.
- The proportions of Janajati teachers at primary, lower secondary and secondary levels are: 30.0%, 18.1% and 17.6% respectively.
- The percentage of fully-trained teachers in all community schools is 94.1 % at primary level, 79.9% at lower secondary level and 90.1% at secondary level.
- The student-teacher ratios (based on the approved positions of the teachers) in community schools are 40:1 at primary level, 60:1 at lower secondary level and 36:1 at secondary level.
- The average percentage of students who received the full sets of textbooks, within the second week of the academic session 2011-012, was 69.4% at primary level, 68.5% at lower secondary level and 59.9% at secondary level.
- The number of primary level grades that used a local language as a transitional language to make the better interpretation of the subject matters in the teaching and learning process is 19,999.

## SECTION II

### 2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)

The EFA goal regarding the Early Childhood Development (ECD) activities is in line with the Dakar Framework for Action for EFA (2001-15). The Early Childhood Development / Pre-Primary Class (ECD/PPC) is regarded instrumental for the social, emotional, intellectual and physical development of children. As such it helps to improve the internal efficiency of primary and basic education. One of the main strategies taken to achieve the EFA goal is to increase the number of ECD centers to ensure access for the most vulnerable and marginalized children. The various forms of ECD/PPCs institutions include school-based ECD centers, community-based ECD centers and privately managed pre-primary classes. Schools give different names to these classes as Nursery, Kindergarten, Montessori, etc.

Table 2.1 and figure 2.1 below show that out of the total 33,404 ECD/PPCs in the country, 28,773 (86.1%) ECDs are running as community-based ECDs and community schools based ECD/PPCs. Thus, the rest (13.9%) of the ECD/PPCs are run under institutional schools (See Annex: I). Although the data shows a low involvement of the private (institutional PPCs) sector in providing ECD/PPC services, the total number of ECD/PPCs has increased by 7.4% as compared to the number (31,089) in the last school year. Out of the total 1,450,001 children of 3-4 years age group, 1,056,430 children are catered by 33,404 ECD/PPCs (Table 2.2). The present ratio of 3-4 years population and the existing number of ECD/PPCs is 1:43 indicating a need for a considerable expansion and strengthening of the ECD/PPCs in the country for ensuring ECD/PPC services to all targeted age groups children. The district-level data show the need of expansion of ECD/PPCs in 33 districts, which have high ECD/PPCs/population ratios (more than 1:40) of 3-4 years population, especially in the Terai and some Mountain and Hill districts (See Annex: I).

**Table 2.1**  
**Total number of ECD/PPCs by types and eco-belts**

Eco-belts	Community	Institutional	Total
Mountain	2,890	158	3,048
Hill	12,873	1,376	14,249
Valley	795	1,099	1,894
Terai	12,215	1,998	14,213
Total	28,773	4,631	33,404

**Figure 2.1**  
**Distribution of ECD/PPC Centres by types and eco-belts**

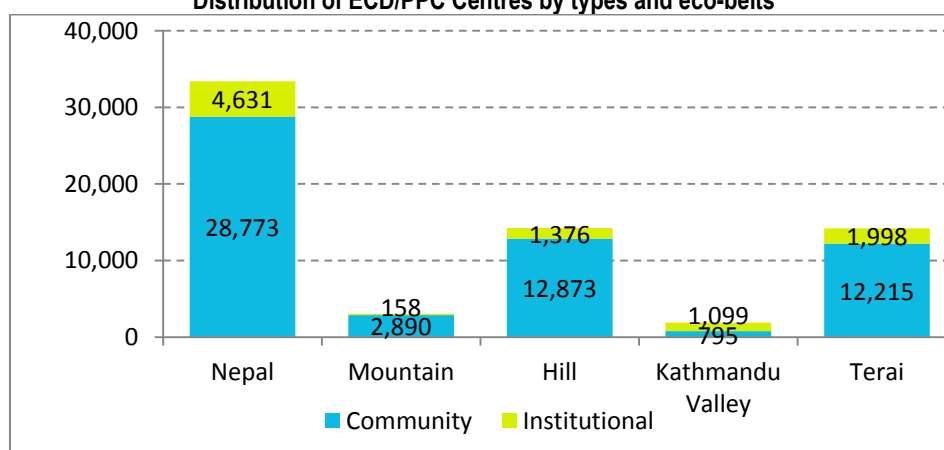

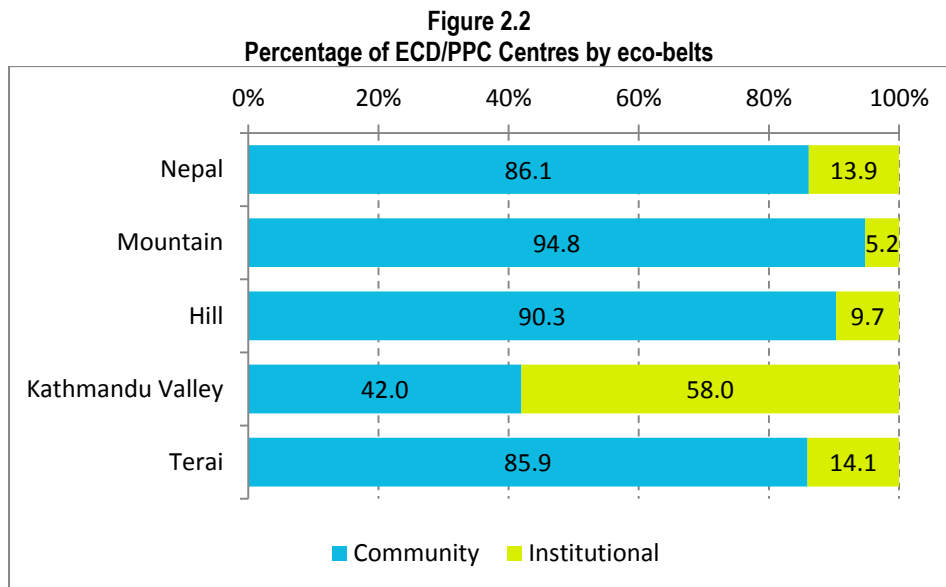

Figure 2.2 below shows the percentages of ECD/PPCs by eco-belts in the total number of ECD/PPCs. It shows that the institutional PPCs are concentrated mostly in Valley (58%) while the community-based/community school-based ECD/PPCs are dominant in Mountain (94.8%), Hill (90.3%) and Terai (85.9%) eco-belts.

The following map depicts the distribution of the number of School and Community based ECDs in the school year 2068 (2011-2012) by districts, wherein the status of ECD/PPC programme implemented by the government up to the fiscal year 2068 is also portrayed.

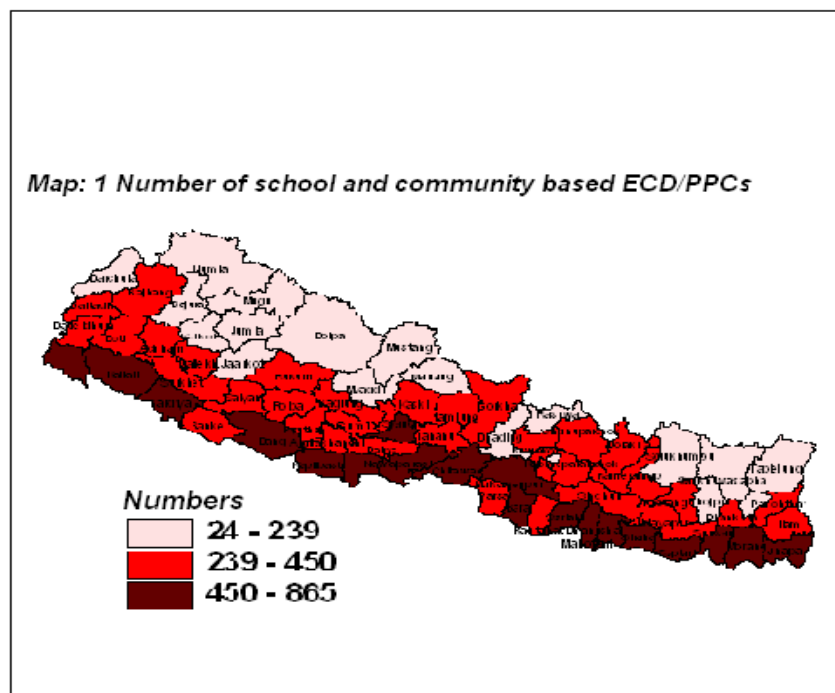

Table 2.2 below shows the total number of 3-4 years age group population, total number of enrolment in ECD/PPCs and the GER in ECD/PPCs by eco-belts and sex, in addition, the figures 2.3 and 2.4 below further elaborate them. As the table indicates, on average, the country has achieved 72.9% GER and thus, the country has already achieved and even gone beyond the set target 64% of the SSRP for 2013-014. Despite this success, it is also true that

nearly one-third of the total 3-4 age group children in the country still do not have access to ECD/PPC facilities.

A slight gender difference in ECD/PPC enrolment rate (72.1% for girls and 73.6% for boys) against girls is observed. The Hill region shows the lowest enrolment rate (66.5%) compared to Mountain (67.7%) and Terai (72.3%) eco-belts (See Annex: I). The highest enrolment rate is in the Valley (127.7%) as a result of more institutional (private) PPCs being run in the Valley. In addition, the PPCs run by private institutions include mostly the three-year's program (Nursery classes, Lower K.G. and Upper K.G.), whereas the ECDs run by the community and community schools include one-year program. This explains why the Valley continued to have the highest GER among the stated eco-belts. The ratio of girls to boys, in overall, is 0.93, interestingly, among the eco-belts, the ratio of girls to boys is observed highest in the Mountain belt and the lowest one in the Valley.

**Table 2.2**  
**3-4 years' population, total enrolments and enrolment rates in ECD/PPCs by eco-belts**

Eco-belts	3-4 Years Population			Number of children in ECD/PPC			Enrollment Rate		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	52,283	53,675	105,958	35,410	36,334	71,744	67.7	67.7	67.7
Hill	260,368	284,072	544,440	175,841	186,268	362,109	67.5	65.6	66.5
Valley	39,613	41,094	80,707	48,420	54,667	103,087	122.2	133.0	127.7
Terai	352,583	366,313	718,896	248,356	271,134	519,490	70.4	74.0	72.3
Total	704,847	745,154	1,450,001	508,027	548,403	1,056,430	72.1	73.6	72.9

Figure 2.3 below depicts the trends of total enrolments by gender in the years 2005 to 2011. The total enrolment in 2005 was 922, 557, which reached 1,056,430 in 2011. Thus, it has increased by 14.5% over these six years. In other words, this is an increase of 2.3 percent points per annum. When analyzed from gender perspective, the average annual growth rate of girls (3.0 %) was higher than that of boys (1.7%). The figure shows a sharp decline in 2006. However, since 2006 the enrolment trend has been one of encouraging steady growth.

**Figure 2.3**  
**Trend of total number of enrolments in ECD/PPCs**

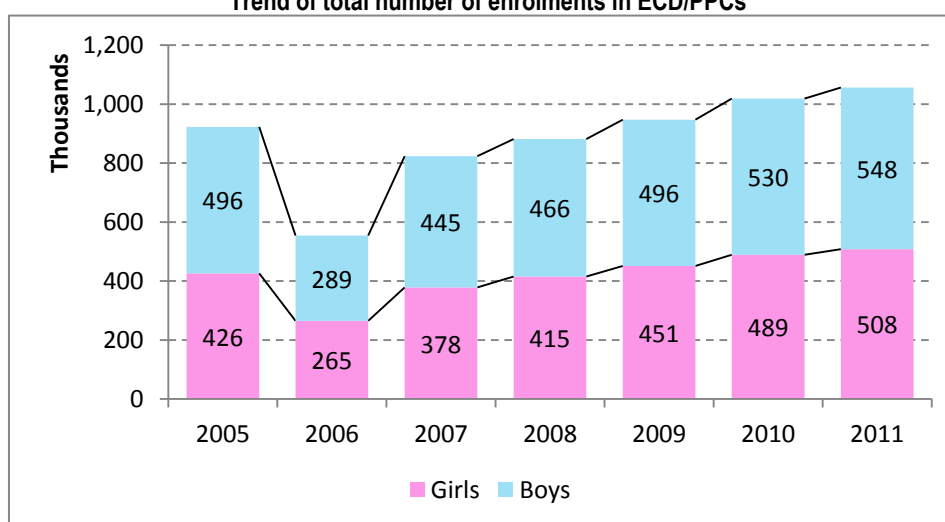

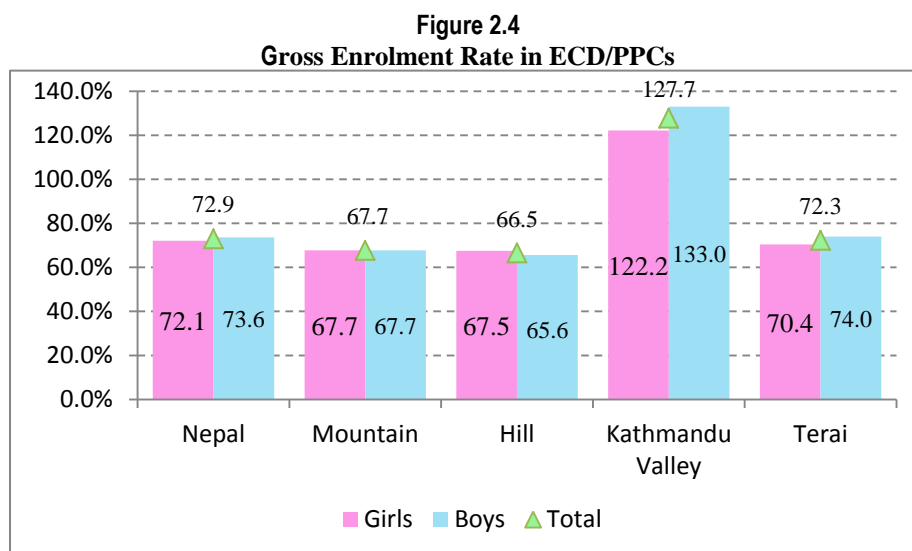

Figure 2.4 below reveals the GER by eco-belts. It shows the fact that the highest enrolment rate is in the Valley (127.7%) and the lowest is in the Hill eco-belt (66.5%). The Mountain and the Terai eco-belts have 67.7% and 72.3% GER respectively. An analysis of GER into

ECD/PPCs by district shows that there are 43 districts with a low GER (compared to the 72.9% national average) (See Annex: I).

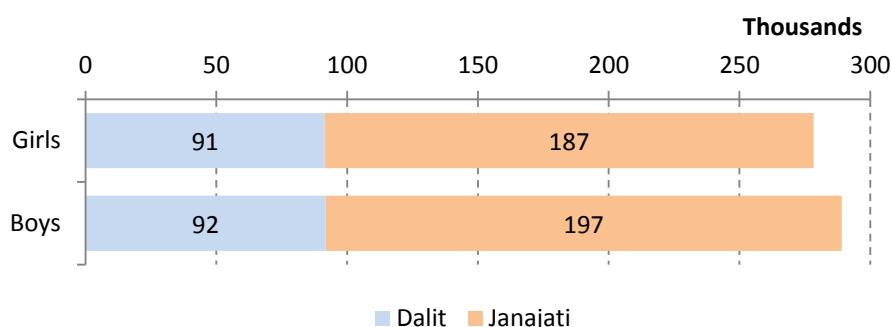

## 2.2 Dalit and Janajati children enrolled in ECD/PPCs

Table 2.3 below shows that out of the total enrolment of 1,056,430 in 2011 in ECDs/PPCs 17.4% are Dalit and 36.4% are Janajati. Among the Dalit students enrolled, 18.0% are girls and 16.7% are boys. Likewise, for the Janajati 36.8% are girls and 36.0% are boys of the total enrolment. The GPI for ECD/PPC in total, Dalit and Janajati enrolment are 0.93, 1.00 and 0.95 which shows a higher level of participation of Dalit girls in comparison to the total and Janajati girls. Hence, the data suggests that the gender situation is approaching to parity among the Dalit children but there is still a gap among the Janajati children and the overall enrolment (See Annex: I). Figure 2.5 below presents the number of children in ECD/PPCs by social groups, with the proportion of Dalit and Janajati children in the total enrolment.

**Table 2.3**  
**Number of Dalit and Janajati children in ECD/PPCs**

Students	Number of children in ECD/PPC			Percentage share in total children	
	Total	Dalit	Janajati	Dalit	Janajati

Boys	548,403	91,832	197,296	16.7	36.0

### 2.3 Percentage of new entrants in Grade One with ECD/PPC experiences

The following Table 2.4 and figure 2.6 present the overall percentage of new children, with ECD/PPC experiences in Grade One, which is 54.3%, a bit higher than the previous school year (52.1%). Among the eco-belts, the Terai belt shows the highest intake (57.2%) of new children in Grade One with the ECD/PPC experiences. Also, the variation in terms of the GER in ECD/PPCs and the percentage of new children in Grade One with ECD/PPC experiences in the Valley eco-belt shows the highest GER and the lowest proportion (55.3%) of children with ECD/PPC experiences in Grade One than in the Terai eco-belt. Both the Mountain and Hilly eco-belts show, the new students in Grade One with ECD/PPC experiences below the national average (See Annex: II).

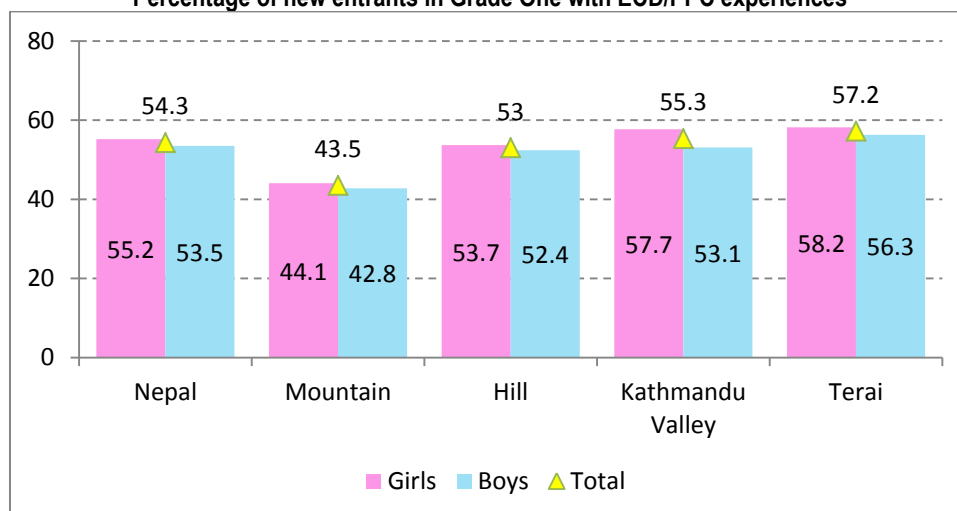

Since there are more Pre-primary classes run by the private institutions e.g., Nursery, L.K.G, and U.K.G. in the Valley, which help increase the GER, whereas the children in Grade One get enrolled only from the UKG, which causes low enrolment in Grade One with ECD/PPC experiences in Grade One in the Valley.

The increasing trends of ECD/PPC experiences in Grade One might have contributed to reduce the repetition rates (i.e. from 29.4% in 2007 to 28.3% in 2008, 26.5% in 2009 and 22.6% in 2010 and 21.3% in 2011), dropout rates (i.e. from 16.1% in 2007 to 12.1% in 2008, 9.9% in 2009, 8.3% in 2010 and 7.9% in 2011) and increased the retention rates for Grade One (See Table 3.24).

**Table 2.4**  
**Number and Percentage of new entrants in Grade One with ECD/PPC experiences by eco-belts**

The Map 2, below, presents the overall percentage of new children in Grade One with ECD/PPC experiences by districts. Out of 75 districts, there are 31 districts with low percentage of new children with ECD/PPC experiences in Grade One in the school year 2011-2012.

## **SECTION III**

### **3.1 School education**

Since the school year 2009, the government of Nepal has begun to implement the School Sector Reform Programme (SSRP), which aims at restructuring school education with basic education (consisting of grades 1-8) and secondary education (consisting of grades 9-12). Subsequently, in the school education system primary and lower secondary levels are under the basic education and the secondary and higher secondary levels are under the secondary education in the education system in the country. Schools with primary level provide grade one to five years of education, whereas lower secondary schools provide further three years of education. Secondary schools offer two more years of education, while higher secondary schools also offer two more years of education after SLC. As described previously, early childhood development (ECD)/pre-primary classes (PPCs) are offered as building foundation and preparation for grade one.

The prescribed age groups population for different levels of school education is 3-4 years for ECD/PPC, 5-9 years for primary, 10-12 years for lower secondary, 13-14 years for secondary and 15-16 years for higher secondary education program.

The majority of schools in the country include primary level (grades 1-5), i.e. most of the lower secondary, secondary and higher secondary schools operate primary level. Very few of them offer only grades 6-8 (lower secondary level) or only the grades 9-10 (secondary level). At the higher secondary level it is more common that some schools offer only grades 11-12.

Broadly, schools are categorized into four types: community-aided (schools, which are fully supported by the government for teachers' salary and other expenses), community-managed (schools, which are fully supported by the government for teachers salary and other funds but their management responsibility lies with the community), community-unaided (schools, which are either getting partial support or no support from the government) and the institutional schools (supported by parents and trustees).

In addition to these broad categories, there are some schools running as religious schools such as Madarasa, Gumba/Vihar and Ashram/Gurukul that have received support from the government when they have been mainstreamed into the formal education system by registering with the DEO and following the Education Act and Regulation.

### **3.2 Basic Education**

As the School Sector Reform Programme (2009-015) has institutionalized the education sector structure with a basic (grades 1-8) level and secondary (grades 9-12) level, the information in the following sections reflect this new education structure. More particularly, this section presents the status of basic education in terms of schools, students, teachers and other indicators.

#### **3.2.1 Number of schools**

The Table 3.1 and the figures 3.1 and 3.2 below present the total number of primary and lower secondary schools by units and levels registered at DEOs throughout the country in the school year 2011-2012. Of the total 34,361 schools, 33,881 are primary and 13,791 are lower

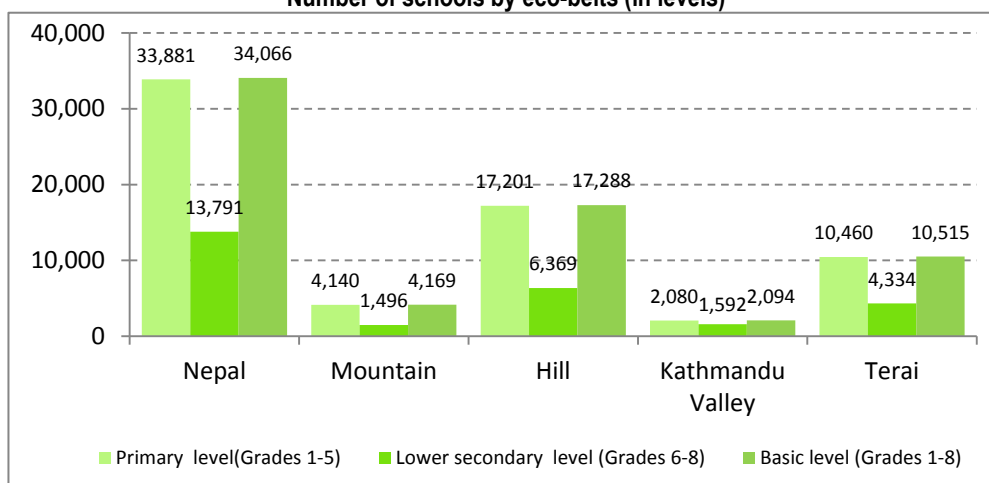

secondary and 34,066 are basic levels of schools. The distribution of schools by eco-belts shows that there are 4,176 schools in Mountain, 17,339 are in Hill, 2,213 are in the Valley and 10,633 are in the Terai belt respectively (See Annex: III\_A).

Among the eco-belts, the highest number of schools is in Hill and the lowest number is in the Valley. Likewise, there are 34,066 basic level schools with Grades 1-8 in the country out of which 4,169 level of schools are in Mountain, 17,288 levels of schools are in Hill, 2,094 levels of schools are in Valley and 10,515 levels of schools are in Terai belt respectively.

**Table 3.1**  
**Number of schools by eco-belts (in units and levels)**

Eco-belts	Total School (Units)	Primary level (Grades 1-5)	Lower secondary level (Grades 6-8)	Basic level (Grades 1-8)
Mountain	4,176	4,140	1,496	4,169
Hill	17,339	17,201	6,369	17,288
Valley	2,213	2,080	1,592	2,094

**Figure 3.1**  
**Number of schools by eco-belts (in levels)**

**Figure 3.2**  
**Percentage distribution of schools by eco-belts and levels in total levels**

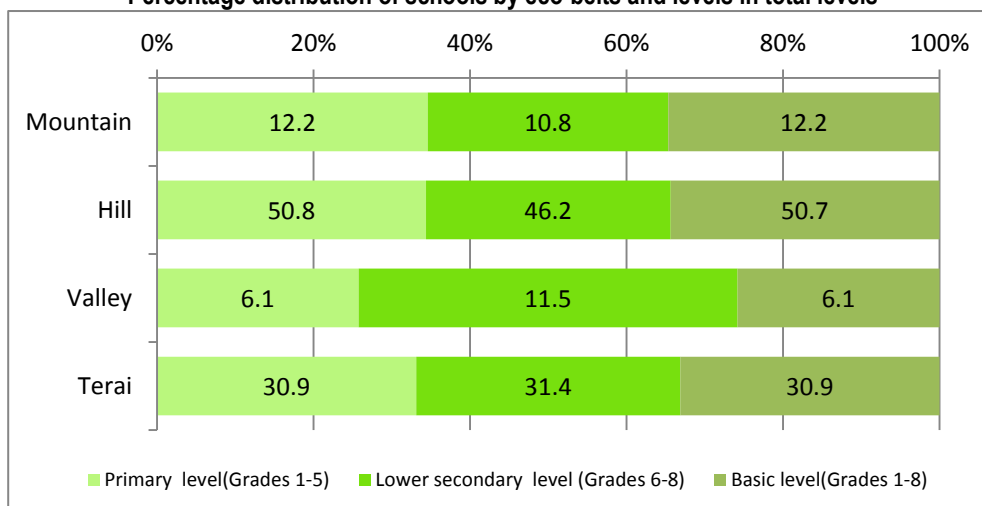

Table 3.2 below shows the distribution of schools running by grades in the school year 2011-2012. Out of the total 26,128 schools at the basic level (grades 1-8), the majority of schools (12,204 schools) are running with grades of 1-5 (primary level). At the primary level, there are small schools with only grade(s) 1, 1-2, 1-3 and 1-4. At the lower secondary level, the majority of schools are running with grades 1-8; however, there is a significant number of schools with grades 1-7 and less number of school with grades 6-7 and 6-8 (See Annex: III\_A).

**Table 3.2**  
**Number of schools by units (running by grades)**

Grade	Number of schools
1	463
1-2	1,384
1-3	4,675
1-4	1,549
1-5	12,204
1-6	790
1-7	1,654
1-8	3,399
6-7	5
6-8	5
Total	26,128

The Table 3.3 and the figure 3.3 below explain the number of schools, excluding the religious schools by types and levels in the school year 2011-2012. At primary level, out of the total 33,881 school levels, 28,075 are community schools and 4,983 are institutional schools. Similarly, at lower secondary level, out of the total 13,791 school levels, 10,431 are community schools and 3,317 are institutional schools. Likewise, among 34,066 basic education levels 28,228 are under community and 5,003 are under the institutional management (See Annex: III\_A-C).

**Table 3.3**  
**Number of schools by levels and types (Excluding religious schools)**

Levels and Types of Schools	Community	Institutional	Total
Primary (1-5) level	28,075	4,983	33,881
Lower Secondary (6-8) level	10,431	3,317	13,791
Basic (1-8) level	28,228	5,003	34,066

**Figure 3.3**  
**Percentage distribution of schools by level**

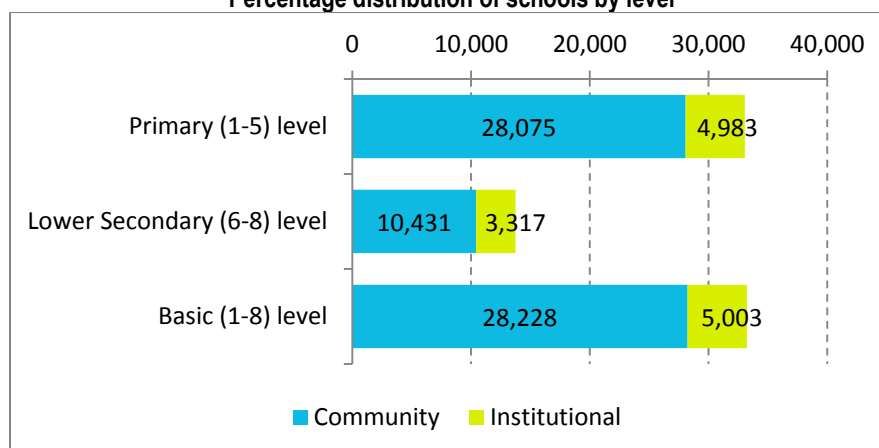

Table 3.4 below shows the number of religious primary and lower secondary schools by types, units and levels. Out of the total 835 reported religious schools in the Flash I, 2011 school census, 823 primary levels, 37 lower secondary levels, and 835 basic education levels were reported. The Madarasas are mainly located in Terai, the Gumbas in Hill and Mountain, and the Ashram located in the Hill and Terai belts (See Annex: IV\_A-C).

**Table 3.4**  
**Distribution of religious schools by unit and levels**

Religious Schools	Total number of schools (in Unit)	Number of school by level		
		Primary	Lower Secondary	Basic
Madarasa	714	712	24	714
Gumba/Vihar	78	77	4	78
Ashram/Gurukul	43	34	15	43
Total	835	823	43	835

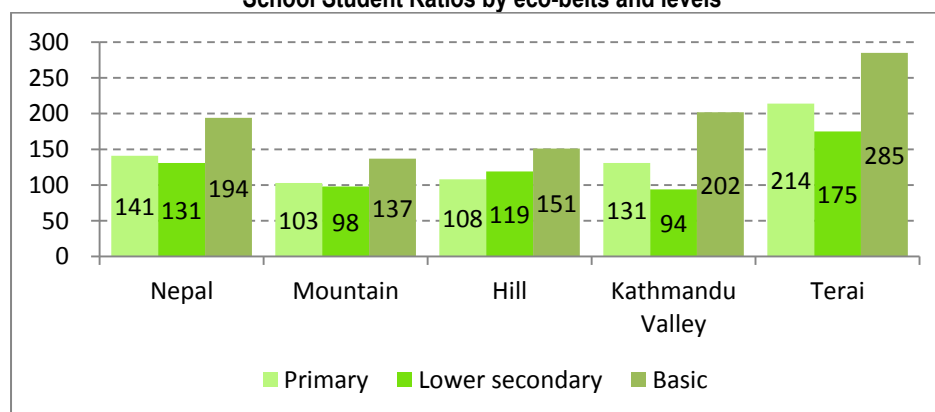

Table 3.5 and figure 3.4 below show the School Student Ratio (SSR)<sup>1</sup> by levels and eco-belts at primary, lower secondary and basic levels. This indicator presents the extent of schools' capacity to accommodate the students. The national average of School Student Ratio at primary level is 1:141. That is, on average, a primary level school is serving 141 children. Similarly, the School Student Ratio at lower secondary level is 1:131 and at basic education level it is 1:194 (See Annex: V).

**Table 3.5**  
**School Student Ratios by eco-belts and levels**

Eco-belts	Primary	Lower secondary	Basic
Mountain	103	98	137
Hill	108	119	151
Valley	131	94	202
Terai	214	175	285
Total	141	131	194

The highest School Student Ratios are found in the Terai at all levels. It is the only eco-belt which has higher rates than the national average at all levels. The lowest School Student Ratio is found in Mountain in primary level and in Valley with regard to lower secondary level (See Annex: V).

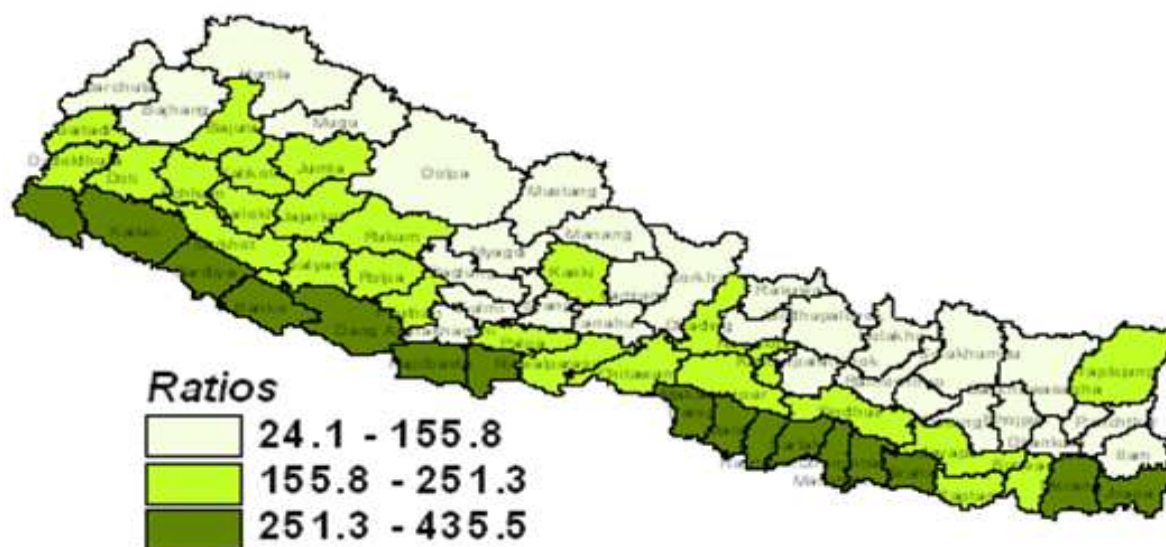

**Figure 3.4**  
**School Student Ratios by eco-belts and levels**

<sup>1</sup> This indicator is calculated by taking the total number of schools by level and total number of students in the respective school level.

The Map: 3 below, presents the School Student Ratio at primary and basic levels in the school year 2068 by districts. All together, there are 25 districts at primary level and 53 districts at basic level with a high School Student Ratio (more than national average). These districts are mostly in the Terai and some of them are in the Hill eco-zone.

**Map:3 Basic level School Student Ratio**

### 3.2.2 Enrolment

This section deals with the enrolment at basic level with the disaggregated information of primary and lower secondary levels in the school year 2011-012.

#### (1) Total number of enrolments at primary, lower secondary and basic levels

The table 3.6 and figure 3.5 below show the trends of total enrolment at the primary, lower secondary and basic levels since the school year 2005. The overall enrolment at primary level in the school year 2011 reached 4.78 million from 4.50 million in the school year 2005. This is a 6.2% increase as compared to the total enrolment in 2005. The average annual growth rate in enrolment at primary level is 1.0% in this period.

Similarly, the enrolment at lower secondary level reached 1.81 million in the school year 2011 from 1.37 million in the school year 2005. This is, again, a 31.9 % increase as compared to the total enrolment in 2005. The average annual growth rate in enrolment is 4.7% in this period. Likewise, the increment at basic education level in 2011 is 12.2% when compared to the figure in 2005 and the average growth rate during this period was 1.9%. Interestingly, the average annual growth rates for girls are higher than the average annual growth rates of boys at both primary (by 2.1%) and lower secondary (by 6.5%) levels.

Compared to the previous school year, there are 58 districts with decreased enrolment at primary level. Out of the remaining 17 districts, 4 districts (Saptari, Sarlahi, Sunsari and Mahotari) report an increased enrolment by more than 10% at primary level. Similarly, there are 56 districts with an increment of enrolment at lower secondary level, of this there are 24 districts with more than 10% increment of enrolment at lower secondary level.

As stated earlier with proper follow up and monitoring of Flash Reporting System at school, RC and district level by the respective person (i.e. Resource Person, School Supervisor and District Education Officer) and also well managed Flash data entry Software with necessary validation rules, the quality of data (with more consistency and accuracy) has improved. In addition to this, regarding the quality of data, there are some areas that need to be improved in the coming school year. The increment on enrolment at lower secondary level indicates a high transition from primary to lower secondary level. At the basic level, the trend of enrolment has absorbed similar pattern as in the primary and lower secondary level.

**Table 3.6**  
Trends of total number of enrolments at primary, lower secondary and basic levels

Level	2005	2006	2007	2008	2009	2010	2011	Average annual growth rate
Primary(1-5)	4,502,697	4,515,059	4,418,713	4,782,313	4,900,663	4,951,956	4,782,885	1.0
Lower secondary(6-8)	1,374,796	1,301,134	1,443,515	1,466,862	1,604,422	1,699,927	1,812,680	4.7
Basic(1-8)	5,877,493	5,816,193	5,862,228	6,249,175	6,505,085	6,651,883	6,595,565	1.9

**Figure 3.5**  
Trends of total number of enrolments at primary and lower secondary levels

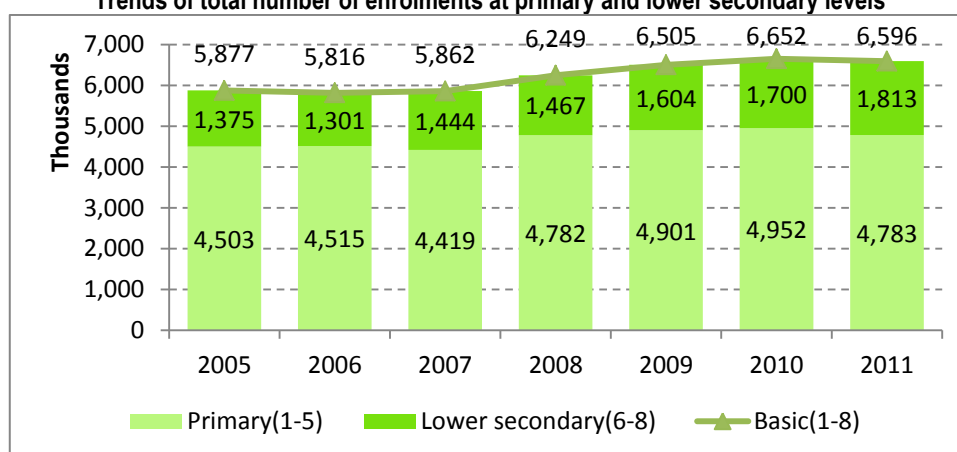

Table 3.7, below, shows that gender equality in terms of enrolment is almost a reality as the enrolment share of girls is 50.4% at primary level, 50.5% at lower secondary level and 50.4% at basic level. These encouraging data show continuity in improvement in the share of girls' enrolment as in the last school year (i.e. 50.4% at primary level, 49.9% at lower secondary level and 50.2% at basic level).

**Table 3.7**  
Total number of enrolments at primary, lower secondary and basic levels by sex in 2011-012

Level	Girls	Boys	Total	% of girls' enrolment
Primary(1-5)	2411849	2371036	4782885	50.4
Lower secondary(6-8)	914909	897771	1812680	50.5
Basic(1-8)	3,326,758	3,268,807	6,595,565	50.4

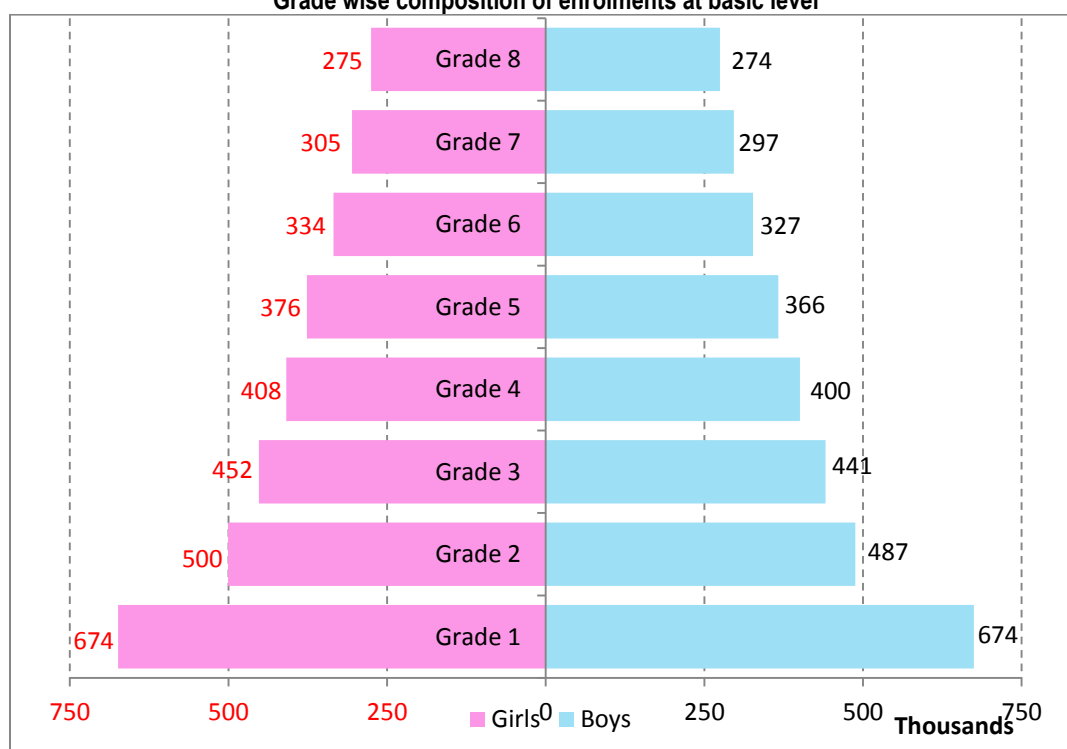

Table 3.8 and figure 3.6 below show the grade-wise composition of enrolment at primary, lower secondary and basic levels. The grade-wise enrolment at primary level depicts that the trend of highest share in Grade One in total enrolment is continuing. But there are beginning

signs that the difference of shares within the primary level's grades is narrowing down (i.e. from 33.8% in Grade One and 14.4% in Grade Five in 2004-05 to 28.2% in Grade One and 15.5% in Grade Five in the current school year). The continuous progress on grade-wise higher promotion and lower repetition- and drop-out rates seems to contribute to narrow the gaps in the share of enrolment in all grades of primary level.

**Table: 3.8**  
**Grade wise composition of enrolment at basic level**

	Girls	Boys	Total	Share of girls by grades and levels	Grade wise share in total enrolment at primary and lower secondary levels	Grade wise share in total enrolment of Basic level

**Figure 3.6**  
**Grade wise composition of enrolments at basic level**

Out of total enrolment at basic level (Grades 1-8) more than one fifth (20.4%) of students is in Grade One and 15.0% in Grade Two. Likewise, 11.3% and 8.3% of students are in Grades Five and Eight respectively, i.e. more than one third of the total number of students are in Grades One and Two. From a gender perspective, the composition of grade-wise enrolments is fairly balanced overall and the data shows that gender parity has been achieved in all grades at basic level (See Annex: VI & XXIX).

The table 3.9, 3.10 and the figure 3.7 below show the number of students and their shares by types of schools. It presents that almost 86.0% of total primary level children are in community schools and the remaining 14.0% in institutional schools. Unlike the overall situation of gender perspective, the proportion of girls is lower (12.1%) in institutional schools as compared to the proportion of boys (16.0%), suggesting matters of concerns. For all types of community schools the situation is the opposite; at all levels girls have a higher enrolment rate than boys.

Interestingly, at all levels, the shares of girls are considerably low in institutional schools compared to the shares of enrolment in institutional schools in the previous school year (11.9% in primary level, 13.6% in lower secondary level and 12.3% in basic level) the enrolment share in institutional schools have increased in the current school year as (See Annex: VII, VIII & XXXIII & XXXIV).

## (2) Dalit and Janajati enrolments at primary, lower secondary and basic levels

Tables 3.11 and 3.12 together with figure 3.8 below show the enrolment of Dalit and Janajati students at primary, lower secondary and basic levels. At the primary level the enrolment share of Dalit is 21.7%, whereas the shares at lower secondary and basic levels are 14.6% and 19.7% respectively. When compared to last year's status of shares, a slight increase of 0.2% at primary level and an increase of 0.4% at lower secondary level are noted (See Annex: IX & XXXI).

Similarly, table 3.12 depicts the shares of Janajati students by levels. Compared with the share of janajati enrolment in the total in the previous school year, the share of enrolment in total enrolment at primary level has slightly decreased than the previous school year (from 38.2% to 37.6%) in the current school year, whereas there has been a slight decrease at lower secondary level (from 41.8% to 40.8%). The share at basic level is 38.5% (See Annex: X & XXXI).

### (3) Percentage of girls and boys and gender parity indexes in enrolment at primary, lower secondary and basic levels by social groups.

The Gender Parity Index (GPI) explains the ratio of female to male values (or male to female, in certain cases) of a given indicator. A GPI of 1 indicates parity between sexes; a GPI above or below 1 indicates a disparity in favor of one sex over the other. For gender parity to exist, the GPI value should be within the range of 0.97 and 1.03.

Following sections explain the ratio of female to male enrolment and measure progress towards gender equity in enrolment in the education system by grade and level. It also assesses the learning opportunities available to girls compared to those available to boys.

Table 3.13 and figure 3.9 below give the percentage of students by sex and the GPI in enrolments at primary, lower secondary and basic levels of total Dalit and Janajati students based on the 2011-2012 school census. The shares of enrolment of total, Dalit and Janajati girls are 50.4%, 50.8% and 50.6% at primary level, whereas they are 50.5%, 49.6% and 51.8% at lower secondary, and 50.4%, 50.5% and 50.9% at basic levels.

It clearly demonstrates that the gender parity has been achieved in basic education, including primary and lower secondary education (1.02 at primary level, 1.02 at lower secondary level and 1.02 at basic level). Except at lower secondary level it is the same results in Dalit enrolment; whereas, the GPI in Janajati enrolment has also been achieved at all levels. The GPI for Dalit students has increased from 1.02 in 2010 to 1.03 in 2011 at primary level and, again, from 0.95 to 0.98 at lower secondary. Similarly, it has increased from 1.01 in 2010 to 1.02 in 2011 at basic education level (Grades 1-8). The same positive trend is noted for Janajati students as well (1.02 in 2010 to 1.03 in 2011 at primary and 1.05 in 2010 to 1.08 in 2011 at lower secondary). Likewise, the GPI for basic level in Janajati enrolment has increased from 1.03 in 2010 to 1.04 in 2011.

The following Maps 4 and 5 present the status of girls' percentage at primary and basic levels in the total enrolment in the school year 2011-2012. At the primary level, there are 24 districts with girls' percentage below the national average (50.4%). Similarly, at the basic level, there are 22 districts with girls' percentage less than the national average (50.4%). Out of 75 districts, there are 10 districts: namely Rautahat, Bara, Kapilbastu, Mahottari, Lalitpur, Kathmandu, Kaski, Bajhang and Sarlahi with less than 50.4% of girls at the basic level.

#### **(4) Enrolment at primary, lower secondary and basic levels by disadvantaged Janajati and disabilities of students**

Tables 3.14 and 3.15 below show the status of Janajati students from endangered and extremely deprived groups at primary, lower secondary and basic levels. Based on the categorizations of 59 Janajati groups into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of 22 ethnic groups, who are under the endangered and extremely-deprived categories (See Annex: XI\_A-B & XXXV\_A-B).

In total, from these 22 ethnic groups, there are 81,814 children at primary level, 23,872 children at lower secondary level and 105,686 children at basic level registered at schools in the current school year 2011-2012. The 81,814 children constitute about 2% of the total primary level enrolment. Interestingly, the share of girls (52.0%) is higher than the share of boys in primary education. Even for lower secondary education the share of girls (51.9%) is higher compared to the share of boys.

The above table demonstrates that there are 13 ethnic groups with less than 300 children in lower secondary education (grades 6-8), ranging from minimum 1 (Bankaria) to maximum 263 (Meche). The total children for these 13 ethnic groups account for 1,167 (606 girls and 561 boys) that needs particular policy attention. While retention of all children enrolled in Grade One with a view to ensuring universal basic education (UBE) is vital, it is imperative to acknowledge the need to look at the profile of these children at risk of failing to complete basic education and identify strategies for preventing dropout.

Table 3.16 below shows the status of children with disabilities at primary, lower secondary and basic levels in the school year 2011-2012. The overall enrolment percentages of children with a disability in total enrolment at primary, lower secondary and basic levels are 1.1%, 0.8% and 1.0% respectively. Of them (51,766 in total) at primary level, 0.4%, 0.3%, 0.1%, 0.1%, 0.1%, and 0.1% have a physical, mental, deaf, blind, deaf and blind, and vocal and speech-related disability respectively. In the same way, out of the total 15,332 students with a disability at lower secondary level, 0.4%, 0.2%, 0.1% 0.1%, 0.1% and 0.1% has a physical, mental, deaf, blind, deaf and blind, and vocal and speech-related disability respectively. Similarly, out of the total 67,098 students at basic level with a disability, 0.4%, 0.3%, 0.1%, 0.1%, 0.1% and 0.1% have a physical, mental, deaf, blind, deaf and blind, and vocal and speech-related disability respectively (See Annex: XII\_A & XII\_B ).

### **(5) Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One**

The Gross Intake Rate (GIR) is an indicator relating to the enrolment in the first grade at primary level. It explains the total number of new entrants in Grade One, regardless of age, expressed as a percentage of the population of five year age children (the official primary school-entrance age). It indicates the capacity of the education system to accommodate the new enrolled children in Grade One.

Likewise, NIR is an indicator related to new entrants in Grade One who are five years of age, expressed as a percentage of the population of the same age. It shows the level of access to primary education of the eligible population of primary school-entrance age.

The tables 3.17, 3.18 and figure 3.10 below show the total number of new enrolment in Grade One, 5 year's age group projected population and GIR in Grade One in the school year 2011-2012 by eco-belts and gender. Based on the total number of new enrolment in Grade One and the total number of 5 years' age group population, the overall GIR for Grade One is 140.7% with 144.2% for girls and 137.3% for boys. Compared amongst the eco-belts, Mountain belt shows the highest GIR followed by Terai and Hill, whereas the Valley shows the lowest GIR (120.4%). The overall GIR 140.7% is lower than the last school year by 1.7 percent points. However, it is still high and this indicates a late entrance of children into Grade One. This is likely to be affecting the overall internal efficiency of primary education.

There are 42 districts with a GIR less than national average, while 33 districts mostly from the Hill and Mountain eco-belts, including 5 Karnali-zone districts, have the highest rates of GIR. Out of the total 1,034,342 new enrolments in Grade One, the age-wise enrolment shows that 8.0% students are less than 5 years old. This might also contribute to the relative high repetition rate in Grade One. It is worth noting that the districts which have high GIR also have relatively low percentages of new entrance in Grade One with ECD/PPCs experience (See Annex: XIII).

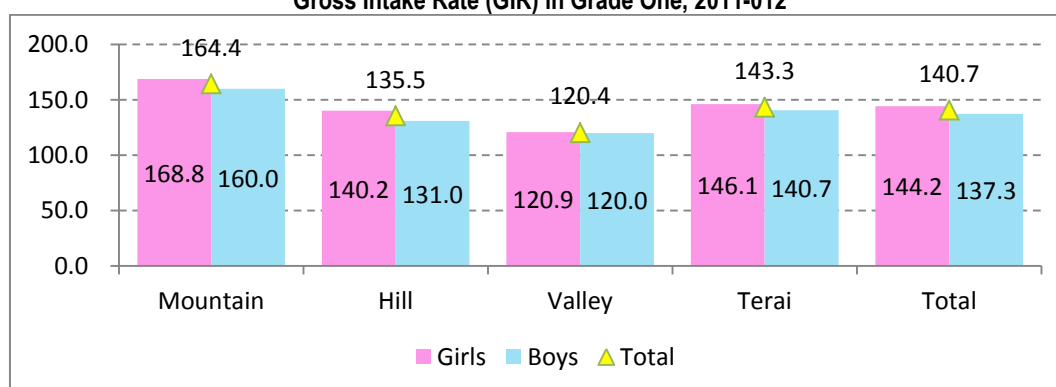

**Table 3.17**  
**Total number of new enrolment in Grade One and the 5 years age group projected population, 2011-012**

Similarly, the tables 3.19, 3.20 and figure 3.11 below show the total number of 5 years' age group new enrolment in Grade One, 5 year's age group projected population and NIR in Grade One in the school year 2011-012 by eco-belts and gender.

Based on the total number of 5 years' age group, new enrolment in Grade One and the 5 year's age group population in 2011, the overall Net Intake Rate (NIR) in Grade One is 90.7% with 90.2% for girls and 91.2% for boys. Compared among the eco-belts, Valley shows the highest NIR (94.0%) followed by Hill and Mountain with Terai having the lowest NIR (89.0%). Compared with the NIR in the last school year, it has increased by 1.7 percent points. As compared to the national average there are 46 districts, mostly from the Hill eco-belt, with a high NIR and 29 districts (including 11 Terai districts) with a low NIR (See Annex: XIV).

The following Map 6 presents the Net Intake Rate in Grade One by districts. Compared to the national average of NIR (90.7%) all together, there are 53 districts, which have more than

90% of NIR, whereas there are 22 districts, mostly in the Terai eco-belt, which have a low NIR in Grade One compared to the national average.

### **(6) Gross and Net Enrolment Rate (GER and NER) at primary, lower secondary and basic levels**

GER is an indicator related to total enrolment at a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year. This indicator is widely used to show the general level of participation in a given level of education.

Likewise, NER is an indicator related to total enrolment of the official age-group for a given level of education expressed as a percentage of the corresponding population. NER gives a more precise measurement of the extent of participation of children belonging to the official school age in a given level of education. Practically, a high NER denotes a high degree of participation by the official school-age population. The highest theoretical value is 100%. Increasing trends can be considered as reflecting improving participation at the specified level of education. When the NER is compared with the GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment.

The tables 3.21, 3.22 and 3.23 with the figures 3.12 and 3.13 below show the total number of students, age group wise students at primary, lower secondary and basic levels with the projected population of 5-9, 10-12 and 5-12 years' age groups for 2011 and the status of GER and NER at primary, lower secondary and basic levels by gender in the school year 2011-012. Based on the data presented in the tables 3.21, the overall GER at primary level is 135.9% with 141.2% for girls and 131.0% for boys. When these figures are compared with the figures of last year (139.5% total, 144.8% for girls and 134.5% for boys), the GERs, in total as well as for both girls and boys have been reduced at primary level (See Annex: XIII).

The overall NER at primary level is 95.1% with 94.5% and 95.6% for girls and boys respectively. When compared with the status of the last year (94.5% total, 93.6% for girls and 95.3% for boys), the NERs for both girls and boys as well as the total have increased. The present status of NER suggests that a total of approximately 173 hundred thousand children (4.9%) are out of formal primary schooling, of them the majority are girls (See Annex: XIV).

The table 3.23 further shows that the total GER at lower secondary level is 100.0% with GER of 104.1% for girls and GER of 96.0% for boys. When compared with the status of the previous year (94.5% total, 97.0% for girls and 92.1% for boys) the GER in total as well as for both genders has increased in this school year.

The total NER at lower secondary level is 70.0% with 69.5% for girls and 70.5% for boys in the school year 2011-012. When compared to the status of the previous year (69.3% with 68.5% for girls and 70.0% for boys), the scenario of this year shows some improvement. Based on the 10-12 years age group population in the school year 2011-012, there are 70.0% students enrolled at lower secondary level. This suggests that almost 30.0% of 10-12 years age group population is not attending at lower secondary level. In the same way, the GER and NER for the basic level are 123.7% and 86.6% respectively.

The district level analysis shows that compared to the national average, there are 42 districts with a low GER at primary level and the rest 33 districts (mostly Hill districts) have high GER rates at primary level. Similarly, 22 districts depict a low NER and the rest have high NER than the national average.

At the lower secondary level altogether 26 districts (including 3 districts from Karnali-zone) have lower GER and NER at lower secondary level. In addition, an almost similar situation is observed for the basic level. Overall, 26 districts mostly from the Hill and Mountain eco-belts (including Karnali zone) have more than 50% over-aged (including 8.0% less than 5 years children in Grade One) children at primary level. This might be one of the causes of the low internal efficiency at primary level.

### **(7) Internal efficiency at primary level**

The term “efficiency” refers to the relationship between outputs and inputs. A process is described as technically efficient if it produces the maximum outputs from a given combination of inputs. Internal efficiency deals with the use of resources and refers to the internal dynamics of the educational system in transforming inputs and processes into outputs. Moreover, it can be defined as the system’s ability to educate the maximum number of children who have entered the system in a specific year in the optimum time with the minimum possible use of human and financial resources.

Operationally, internal efficiency can be described as the number of students graduating from an educational institution (at a particular grade and level of education) expressed as a percentage of the number of students who entered the institution at the beginning of the particular programme.

Table 3.24 below shows the grade wise flow rate of students from school year 2010-011 to 2011-012 for primary grades. These flow rates show the evaluation of internal efficiencies of the students as well as the overall effectiveness of the inputs provided. The table illustrates, out of the total students enrolled in the school year 2010-011 in Grade One, 70.8% were promoted to Grade Two, 21.3% repeated the same Grade in the current school year, and 7.9% dropped out from the school education system (See Annexes XV\_A-C).

In other words, altogether 29.2% of the total enrolled students in Grade One of last school year could not continue in Grade Two in this school year. Although the promotion rate has improved as compared to the previous school year, it still demonstrates a high wastage of the inputs provided. However, the promotion rates for upper grades (Grades 2 to 5) are better than for Grade One. The table also suggests that the promotion rates for girls, as compared to that of boys, are slightly better in all Grades (See Annexes XV\_A-C). This trend has been continued since the school year 2007. The average survival rate to Grade 5 is 82.8 with 84.3 for girls and 81.7 for boys. This is higher than that of the previous school year (80.6), while the coefficient of internal efficiency is 75.2 of this 74.9 for girls and 74.8 for boys. Similarly, the cohort graduation rate at primary level is 73.6% with 75.8% for girls and 72.6% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2007 altogether almost 74 students successfully completed the primary level in the school year 2010-011.

**Table 3.24**

#### (8) Internal efficiency at lower secondary level

As shown in the table 3.25, the flow rates for students from school year 2010-011 to 2011-012 at lower secondary level are a bit more encouraging than the ones at primary level. Out of the total number of students enrolled in the school year 2010-11 in Grade Six, 88.3% are promoted to Grade Seven, 5.4% are repeating the same grade in the current school year, and 6.3% have dropped out from the school education system completely.

Likewise, the promotion rates in Grade Seven and Grade Eight are 88.9% and 86.9% respectively. When the data given below are analyzed from the gender perspective, no significant differences are noted (See Annexes XVI\_A-C). The average survival rate to Grade 8 is 67.5 with 69.5 for girls and 66.2 for boys. The coefficient of internal efficiency is 66.5 of this 67.1 for girls and 66.0 for boys. Similarly, the graduation rate of basic level (grades 1-8) is 58.8% with 60.2% for girls and 57.7% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2003, altogether almost 59 students successfully completed the basic level in the school year 2010-011.

The Figure 3.14 below shows the internal efficiencies at both primary and lower secondary levels and also presents the grade wise progress of students from Grade One to Grade Eight. The flow rates by districts show that the promotion, repetition and dropout rates vary from district to district.

### 3.2.3 Teachers information at primary, lower secondary and basic levels

This section contains information on teachers at primary, lower secondary and basic levels by school type, level, sex and other indicators related to the teachers. Teachers are defined as persons whose professional activity involves transmitting knowledge, attitudes and skills that are stipulated in the approved curriculum to students enrolled in a formal educational institution.

#### (1) Total reported number of teachers by sex at primary, lower secondary and basic levels in all types of schools

**Table 3.26**  
Total number of teachers by levels (based on reporting) in all types of schools

Level	Female	Male	Total
Primary(1-5)	73,383	100,331	173,714
Lower secondary(6-8)	13,236	35,612	48,848
Basic(1-8)	86,619	135,943	222,562

**Figure 3.15**  
Total number of teachers by levels (based on reporting) in all types of schools

The table 3.26 and figure 3.15 above present the total number of teachers reported at primary, lower secondary and basic levels in the beginning of the school year 2011-012 in all types of schools. As a whole, there are 173,714 teachers at primary level; 48,848 teachers at lower secondary level and 222,562 teachers are at basic level. Of them, the numbers of female teachers are 73,383; 13,236 and 86,619 respectively at primary, lower secondary and basic levels. Likewise, the shares of female teachers are 42.2%, 27.1% and 38.9% at primary, lower secondary and basic levels respectively (See Annex: XVII & XXI).

**Table 3.27**  
Total number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Primary(1-5)	23,986	18,057	42,043
Lower secondary(6-8)	6,327	8,121	14,448
Basic(1-8)	30,313	26,178	56,491

Out of total number of teachers (Table 3.26) reported in the beginning of the school year, the number of teachers in the institutional schools are presented in the above table 3.27, where a

total of 42,043; 14,448 and 56,491 teachers were reported at primary, lower secondary and basic levels. The shares of female teachers in total number of teachers at primary, lower secondary and basic levels are 57.1%, 43.8% and 53.7% respectively. This is higher than the share of female teachers for all schools and for community schools (See Annex: XVIII & XXII).

Likewise, out of total number of teachers (table 3.26), the table 3.28 below shows the reported number of teachers in all types of community schools in the beginning of the school year. The numbers of teachers given include all types of teachers (i.e. teachers working in approved positions, Rahat teachers and teachers appointed by the community from their own sources). A total of 166,071 teachers with 56,306 female and 109,765 male teachers were reported for the basic level schools (See Annex: XVIII & XXII).

Out of the total numbers of teachers in community schools, the shares of female teachers are 37.5%, 20.1% and 33.9% at primary, lower secondary and basic levels respectively. The shares of female teachers at all levels have not significantly changed as compared to the shares of female teachers in the last school year.

**Table 3.28**  
Total number of teachers in all types of community schools by levels (based on reporting)

Level	Female	Male	Total
Primary(1-5)	49,397	82,274	131,671
Lower secondary(6-8)	6,909	27,491	34,400

<sup>2</sup> The numbers of female teachers are presented based on the reporting in the community schools working in the approved positions and Rahat Quotas.

by levels. Overall, 101,950 teachers with 38,649 female teachers at primary level, 25,772 teachers with 5,172 female teachers at lower secondary level and 127,722 teachers with 43,821 female teachers at basic level are working in the current school year. Out of the total numbers of teachers by levels 37.9% at primary, 20.1% at lower secondary and 34.3% at the basic level are female teachers (See Annex: XXVIII\_B).

## (2) Percentage of teacher and the gender parity indexes in all types of schools

As discussed previously, the ratio of female to male of a given indicator is termed as GPI. Hence, to assess the level of participation of female teachers against male teachers in the education system, the GPI indicator is one of the most important indicators.

The table 3.30 below shows the shares of teachers by gender and GPI at primary, lower secondary and basic levels by types of schools. The overall GPI in total number of teachers is 0.73 at primary level, 0.37 at lower secondary and 0.64 at basic level respectively. Likewise, the GPI for institutional schools is 1.33 at primary level, 0.78 at lower secondary level and 1.16 at basic level. Hence, the GPI for institutional schools is higher than the GPI in total number of teacher at all levels.

Compared to the GPIs in total and institutional schools, the GPIs in the reported number of teachers in community schools and the total number of teachers working in approved positions and Rahat quotas are comparatively low.

**Table 3.30**  
**Shares of teachers by sex in types of schools and levels**

## (3) Percentage of teachers by Dalit and Janajati

Table 3.31 and figure 3.17 below show the percentage shares of teachers from Dalit and Janajati by levels and sex in total number of teachers. The proportion of Dalit and Janajati teachers remain low in teaching profession as compared to their overall proportion of the total population. The percentage shares of Dalit teachers at primary, lower secondary and basic levels are 4.5%, 2.9% and 4.2% respectively.

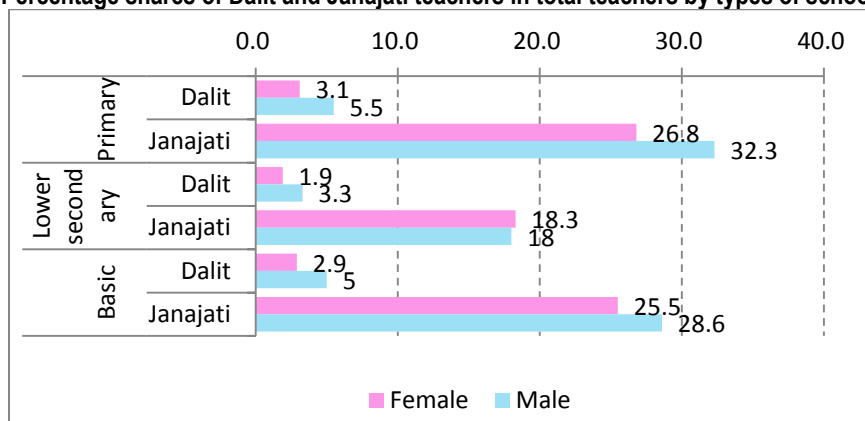

Likewise, the percentage share of Janajati teachers at primary level is 29.9%, at lower secondary level 18.1% and at the basic level it is 27.4% respectively. However, compared to

last school year, there is a slight increment in the percentage shares of Dalit and Janajati teachers (See Annex: XVII & XXI).

**Table 3.31**  
**Percentage shares of Dalit and Janajati teachers in total teachers by types of schools**

Social group	Primary			Lower secondary			Basic

Table 3.32 above shows the total number of teachers<sup>3</sup> by training status and sex in the school year 2011-012 in all types of schools at primary, lower secondary and basic levels. Out of the total 173,714 teachers at primary level 160,788 are trained, 7,303 are partially trained, and 5,623 are untrained. Again, the figures by training status show that out of the total number of teachers at lower secondary level 37,745 are trained, 2,535 are partially trained and 8,568 teachers are untrained. At the basic level there are 198,533 trained, 9,838 are partially trained and 14,191 are untrained teachers (See Annex: XIX & XXIII).

The percentages of teachers by training status and sex are illustrated in Table 3.33 below. At the primary level, 92.6%, 4.2% and 3.2% of teachers are trained, partially trained and untrained respectively. Similarly, at lower secondary level, 77.3% are trained, 5.2% are partially trained, and 17.5% are untrained. Again, at basic level, out of total number of teachers, there are 89.2% trained, 4.4% partially trained and 6.4% teachers are untrained. The figures in the table suggest that more teachers, except at lower secondary level are trained and

<sup>3</sup> The numbers of teachers at all levels are based on the reporting in the Flash I School Census 2011-012.

almost 18% of the teachers at lower secondary level are still untrained (See Annex: XX & XXIV).

**Table 3.33**  
**Percentage of teachers by training status (all types of school)**

The table 3.34 below shows the status of training in community schools at all levels and sex. Out of the total 131,671 teachers at primary level 123,885 are trained, 5,626 are partially trained, and 2,160 are untrained. Again, the figures show that out of the total number of teachers at lower secondary level 27,482 are trained, 1,833 are partially trained and 5,085 teachers are untrained. Similarly, at the basic level there are 151,367 trained, 7,459 are partially trained and 7,245 are untrained teachers (See Annex: XIX & XXIII).

**Table 3.34**  
**Number of community schools' teachers by training status**

The status of teachers in terms of training in community schools by level and sex are shown in the table 3.35 below. At primary level 94.1%, 4.3%, and 1.6% of the teachers are trained, partially trained and untrained respectively. At lower secondary level 79.9% of the teachers are trained, 5.3% are partially trained and 14.8% are untrained. Similarly, at the basic level among the total number of teachers 91.1% are trained, 4.5% are partially trained and 4.4% are untrained. Hence, almost 91% of the teachers in community schools, except at lower secondary level are trained in the beginning of this school year (See Annex: XX & XXIV).

## (5) Teacher Ratio

This section deals with the Student Teacher Ratios (STR) at basic level by types and levels of schools.

### (5)-1 Student Teacher Ratio in all types of schools

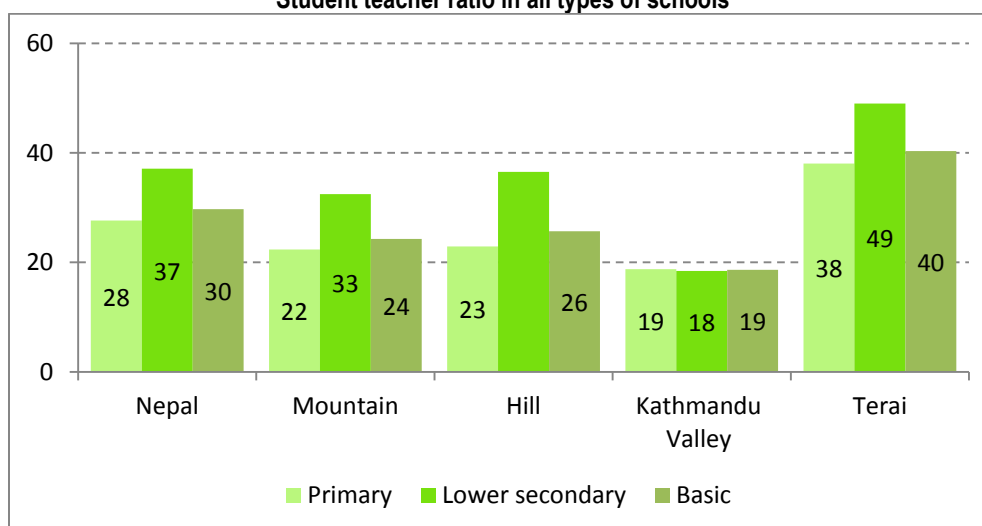

The table 3.36 and figure 3.18 below present the STR<sup>4</sup> for all types of schools by eco-belts and levels in the school year 2011-012 at basic level. On average the STR at primary level is 28:1, at lower secondary level 37:1 and at the basic level 30:1. The highest STR at primary level is found in Terai eco-belt with 38:1, while the lowest is in Valley by 19:1. Similarly, at the lower secondary level the highest STR is in Terai belt at 49:1 and the lowest is in Valley at 18:1.

Likewise, at basic level, the highest STR is in Terai (40:1) and the lowest is in Valley (19:1). As in previous years, the analysis shows that more crowded classes are observed in the Terai belt at all levels than in other eco-belts. It is worth mentioning that the STRs, in all eco-belts and at all levels, have decreased this year (See Annex XXVII).

**Table 3.36**  
**Student teacher ratio in all types of schools by level**

Eco-belts	Primary	Lower secondary	Basic
Mountain	22	33	24
Hill	23	36	26
Valley	19	18	19
Terai	38	49	40
Total	28	37	30

**Figure 3.18**  
**Student teacher ratio in all types of schools**

### (5)-2 Student Teacher Ratios in community schools

The table 3.37 and figure 3.19 below show the STRs by eco-belts for all types of community schools based on the reported number of teachers. On average, the STR in community

<sup>4</sup> The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2011-012.

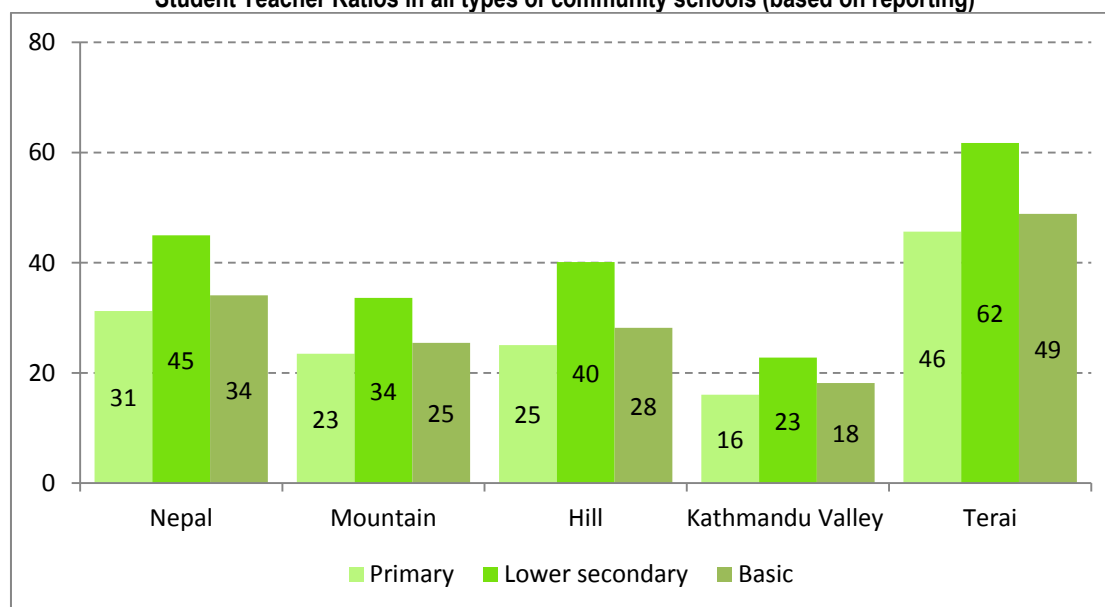

schools is 31:1 at primary, 45:1 at lower secondary, and 34:1 at basic level. At the primary level the highest STR (46:1) is in the Terai eco-belt and the lowest (16:1) is in Valley.

Similarly, at both lower secondary and basic levels, the highest STR is observed in the Terai belt and the lowest one in Valley. The data reveals that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.36) and that the highest STR is in the Terai belt and the lowest STR is in Valley (Table 3.36) at all levels of schools in both scenarios (See Annex XXVIII\_A).

### **(5)-3 Student Teacher Ratios in community schools based on the approved teacher positions**

Table 3.38 and figure 3.20 below show the STR for all types of community schools based on the approved positions of teachers by levels in the school year 2011-012. On average, the STRs at primary, lower secondary and basic levels are 40:1, 60:1 and 44:1 respectively.

The Terai belt shows the highest STR (56:1; 77:1; and 60:1) at all levels, whereas the lowest STR (17:1, 28:1 and 20:1) is found in Valley at all levels. It illustrates that students in the Terai belt do not get the same opportunity of interaction with the teachers as compared to the students in Valley. This fact is further illustrated that there are 34 districts with a higher STR

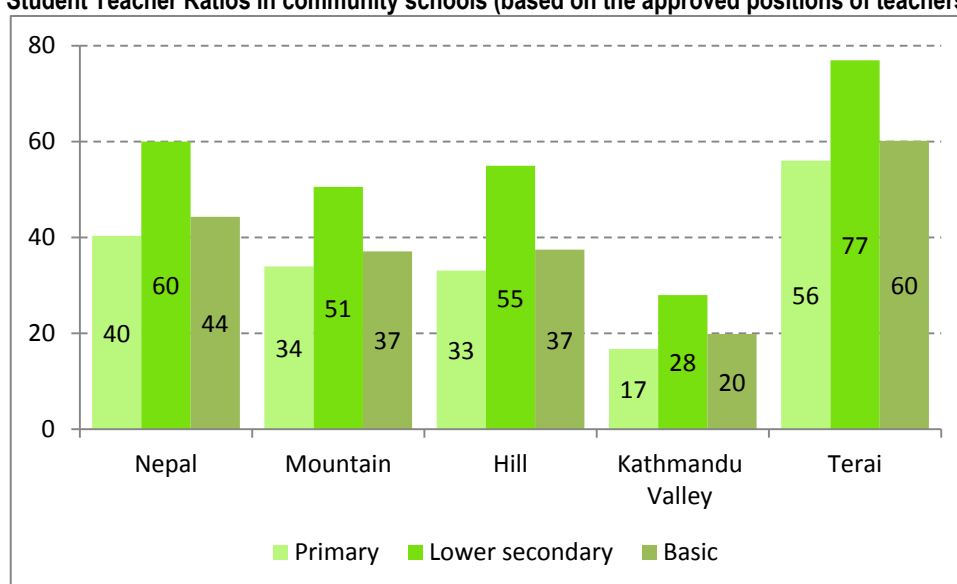

than the national average and most of these districts are in the Terai belt (See Annex XXVIII\_A).

## 3.2 Secondary Education

This section deals with the information regarding secondary and higher secondary schools in the country as a part of school census 2011-012. While secondary refers to Grades 9-10, higher secondary refers to Grades 11-12. In view of the school restructuring as envisaged in the SSRP 2009-2015, a comprehensive secondary education level refers to Grades 9 to 12.

### 3.2.1 Number of schools

The Table 3.39 and the figures 3.21 and 3.22 below present the distribution of secondary level (Grades 9-12) schools by eco-belts functioning throughout the country in the school year 2011-012. The total number of schools is 34,361. Of the total schools, 726 secondary with 292 higher secondary levels are in the Mountain belt, 3,524 secondary level with 1,482 higher secondary levels are in the Hilly belt, 1,217 secondary with 418 higher secondary in the Valley and 2,471 secondary with 1,190 higher secondary levels are in the Terai belt. Among the total schools, the highest numbers of secondary schools are concentrated in Hill, whereas the thinly populated Mountain belt has the lowest number of secondary school's levels (See Annex: III\_A). The figures 3.21 and 3.22 further elaborate the distribution of schools by eco-belts in number and their percentage in the total number of schools.

**Table 3.39**  
Distribution of schools by eco-belts by units at secondary level

Eco-belts	Total School (Units)	Secondary level (Grades 9-10)	Higher secondary level (Grades 11-12)	Secondary level (Grades 9-12)

**Figure 3.22**

The Table 3.40 below explains the distribution of schools running by grades in the school year 2011-012. Currently, none of the schools are running with Grades 9-11, 9-11 and 9-12 at the secondary level. In total, 8,233 secondary schools are running throughout the country (including 3,382 higher secondary grades) (See Annex: III\_A).

**Table 3.40**

The Table 3.41 below explains the distribution of schools, excluding religious schools, by types and levels of schools in the school census 2011-012. At secondary level, out of the total 7,924 secondary levels, 5,525 are community and 2,399 are institutional school levels. Similarly, at higher secondary level, out of the total 3,379 school levels, 2,495 are community school levels and 884 are institutional schools.

Likewise, among 8,219 secondary (Grades 9-12) levels 5,525 are under community and 2,694 are under the institutional management (See Annex: III\_B & C).

**Table 3.41**  
**Distribution of schools by levels (Excluding religious schools) at secondary level**

Level	Community	Institutional	Total
Secondary (9-10) level	5,525	2,399	7,924

Secondary (9-12) level	5,525	2,694	8,219

The Table 3.42 below shows the number of religious schools by types and levels. A total of 14 secondary and 3 higher secondary levels of religious schools are reported in the School Census 2011-012. Of them, at secondary level 7 are Madarasas and 7 are Ashram/Gurukul, whereas none of the Gumba/Vihar was reported at secondary level. Of the total, at higher secondary level there are 3 Madarasa Schools only. Mostly, the Madarasa schools are found

in the Terai eco-belt, the Gumba/Vihar are in Hill and Mountain eco-belts and the Ashram are found in Hill and Terai eco-belts (See Annex: IV\_A-C).

**Table 3.42**

The Table 3.43 and figure 3.23 below show the Student School Ratios by levels and eco-belts at secondary level in the school year 2011-012. The national average of secondary level (9-10) School Student Ratio is 1:107. That is, on average, a secondary level is serving 107 students. Similarly, the ratio at higher secondary level is 1:104 and at secondary (Grades 9-12) as a whole it is 1:146 (See Annex: V). When analyzed by eco –belts, the highest School Student Ratio is found in the Terai eco-belt at secondary level, which is higher than the national average. The lowest School Student Ratio is found in the Valley at both levels. This shows that schools in the Terai are crowded and, therefore, need ample attention for adequate facilities, including classroom and space (See Annex: V).

### 3.2.2 Enrolment

This section contains the information on enrolment of students and the enrolment related indicators at secondary level.

#### (1) Total number of enrolment at secondary level

The Table 3.44 below shows the total enrolment at the secondary and higher secondary levels in the beginning of the school year 2011-012. The enrolment at secondary level is 848,569 which is higher than the total enrolment (811,910) in the previous school year 2010-11, whereas the enrolment at the higher secondary level in this school year is 353,338<sup>5</sup>. When the data are analyzed from gender perspective, the share of enrolment for girls at secondary level (grades 9-10) is 49.7%, whereas it is 51.2% at the higher secondary and 50.2% at secondary level (grades 9-12) (See Annex: XXX).

**Table 3.44**  
**Total number of enrolment at secondary level**

#### (2) Total number of Dalit and Janajati enrolment at secondary level

The Tables 3.45 and 3.46 below show the numbers and shares of Dalit and Janajati enrolment in total enrolment at secondary level in the school year 2011-012. On average, the share of Dalit enrolment in total enrolment at the secondary level is 10.5%. When compared to the previous school year (10.0%), the share of Dalit enrolment has increased by 0.5% points. The Dalit enrolment at the higher secondary level is 6.8%, which is also higher than in the previous year (6.3%) (See Annex: XXX & XXXI).

Similarly, the Table 3.46 presents the total 342,512 enrolment of Janajati students at the secondary level, which is 40.4% of the total enrolment and has decreased from the previous school year (40.8%) 2011-012 by 0.4% points (See Annexes: XXX & XXXII). Likewise, the enrolment of Janajati students at the higher secondary level is 111,393 in the school year 2011-012, which is 31.5% of the total enrolment at this level. Moreover, the overall share of Dalit and Janajati enrolment at secondary education (Grades 9-12) is 9.4% and 37.8% respectively.

**Table 3.45**

**(3) Total number of enrolment at secondary level by school types**

The tables 3.47, 3.48 and the figure 3.24 below show the total number of enrolments and the percentage of enrolment by types of schools in total enrolment at secondary and higher secondary levels in the school year 2011-012. At the secondary level, of the total 848,569 students reported in Flash I, 2011-012, 83.5% students are in all types of community schools and 16.5% are in institutional schools. Compared to the last school year 2010-11, the share of enrolments in institutional schools has slightly increased in the current school year at the secondary level. Similarly, at higher secondary level, of the total 353,338 students, 88.0% are in all types of community schools and the rest (i.e.12.0%) are in institutional schools. The data also reveal that the shares of girls in all types of community schools are higher than the shares of boys at both levels (See Annexes: XXX, XXXIII & XXXIV). The figure 3.24 provides information with respect to the share of enrolment by types of schools.

**Table 3.47**

#### (4) Enrolment at secondary level by disadvantaged Janajati and disabilities of students

The Table 3.49 (A&B) below shows the status of Janajati students by castes at secondary level (grades 9-12). Based on the categorization of 59 Janajati castes into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of following 22 castes, which are classified as the endangered and extremely deprived categories (See Annex: XXXVI\_A-B and See Annex: XXXVII\_A-B).

In total, there are 8,319 students (i.e., 1.% in total enrolment) at secondary level from the following castes studying in the current school year 2011-012. The participation of girls from these groups in secondary education is 50.9%. It indicates the share of enrolment by sex is very much encouraging in the total enrolment. Similarly, there are 2,737 students (i.e., 0.8% in total enrolment) from these categories at the higher secondary level wherein the majority is of boys (i.e.51.3% boys and 48.7% girls).

The Table 3.50 below shows the status of students with disabilities at both secondary and higher secondary levels in the school year 2011-012. Overall, students with disabilities at secondary and higher secondary levels are 0.7% and 0.4% respectively in the total enrolment. When taken as a whole, the percentage of students at secondary level (Grades 9-12) with disabilities is 0.7%. Out of the total 6,063 students with disabilities at secondary level, 0.36% students have physical disability, 0.09% is mentally retarded, 0.07% is deaf, 0.07% is blind, 0.06% is deaf and blind and 0.05% has vocal and speech-related disability. Similarly, of the total 1,280 students with disabilities at higher secondary level, 0.22% students have physical disability, 0.04% is mentally retarded, 0.03% is deaf, 0.03% is blind and 0.02% is deaf and blind and 0.02 has vocal and speech-related disability. Of the total students at secondary level (Grades: 9-12), 0.61% (i.e., 7,343) of the students are with all types of disability (See Annex: XXXVIII & XXXIX).

### 5) Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level

The table 3.51 and the figures 3.25 and 3.26 below show the GER and NER at secondary and higher secondary levels in the school year 2011-012. At secondary level, on average, the GER is 70.1%, of this 71.9% GER is for girls and 68.4% GER is for boys. Likewise, the average NER at secondary level is 52.1%, of this 51.4% is for girls and 52.7% is for boys. The NER suggests that, based on the 13-14 age group students enrolled at secondary level in the school year 2011-012, a big number of secondary age group population is out of school or enrolled as overage students at the lower secondary level in the country.

Similarly, the average GER at the higher secondary level is 28.9%, of this 30.2% is for girls and 27.6% is for boys. Also, the NER at the higher secondary level is 9.4%; of this 9.7% NER is for girls and 9.1% NER is for boys. Thus, the data illustrate that more attention needs to be paid to expand the opportunities of education for secondary and higher secondary level

school going age group population. However, a very narrow gender gap is noticed between girls and boys at secondary and higher secondary levels with respect to NER.

Compared to the status of the previous school year at the secondary level, both the GER and the NER have increased (the GER from 66.3% to 70.1%, whereas the NER from 46.5% to 52.1% (See Annex: XIII & XIV). Similarly, the figures 3.25 and 3.26 present the status of GER and NER by levels in the school year 2011-012.

### 3.2.3 Teachers information at secondary, higher secondary and secondary levels

This section contains information on teachers at secondary, higher secondary and secondary (grade 9-12) levels by school types, levels, sex and other indicators related to teachers.

#### (1) Distribution of teachers by sex at secondary, higher secondary and secondary levels

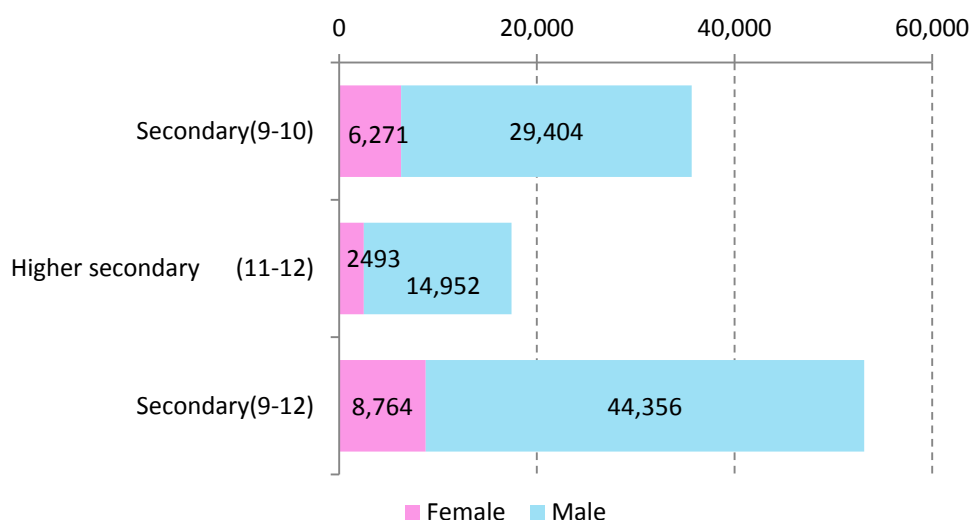

The table 3.52 and figure 3.27, below, show the total numbers of teachers reported at secondary, higher secondary and secondary levels in the beginning of the school year 2011-012. In total, there are 35,675 teachers at secondary level, 17,445 teachers are at higher secondary level and altogether 53,120 teachers are in the secondary level (Grades 9-12). Of them, the numbers of female teachers are 6,271; 2,493 and 8,764 respectively at secondary, higher secondary and secondary (Grades 9-12) levels.

The shares of female participation in total number of teachers are 17.6%; 14.3% and 16.5% at secondary, higher secondary and secondary level respectively. It shows there is a slight increment in the share of female teachers at all levels than in the previous school year (See Annex: XXI).

**Table 3.52**  
**Distribution of total teachers at secondary level (based on reporting)**

Level	Female	Male	Total
Secondary(9-10)	6,271	29,404	35,675
Higher secondary (11-12)	2,493	14,952	17,445
Secondary(9-12)	8,764	44,356	53,120

**Figure 3.27**  
**Distribution of total teachers at secondary level (based on reporting)**

Out of the total number of teachers (Table 3.52), the table 3.53 below depicts the number of teachers in institutional schools, wherein the total 12,850; 3,747 and 16,597 teachers were reported at secondary, higher secondary and secondary levels in Flash I, 2011-012. The percentages of female teachers in total number of teachers at secondary, higher secondary and

secondary levels are 24.1%, 11.5% and 21.3% respectively, which are higher than the percentage of female teachers in the total and community schools (See Annex: XXII).

**Table 3.53**  
**Number of teachers in institutional schools by levels (based on reporting)**

Level	Female	Male	Total
Secondary(9-10)	3,099	9,751	12,850
Higher secondary(11-12)	430	3,317	3,747
Secondary(9-12)	3,529	13,068	16,597

Likewise, the Table 3.54 given below shows the number of teachers reported in Flash I, 2011-012 in all types of community schools. The numbers of teachers given in the table are based on the reporting in the Flash I, 2011-012 censuses, which includes all types of teachers (i.e. teachers working in the approved positions, Rahat teachers and teachers appointed by the community from their own sources).

In total 22,825 with 3,172 female, 13,698 with 2,063 female and 36,523 with 5,235 female teachers were reported at secondary, higher secondary and secondary (Grades 9-12) level in the Flash I, 2011-012 school census. Out of total, the percentages of female teachers are 13.9%, 15.1% and 14.3% at secondary, higher secondary and secondary levels respectively. The shares of female teachers have increased at all levels than in the previous school year (See Annex: XXII).

**Table 3.54**

Higher secondary(11-12)	2,063	11,635	13,698
Secondary(9-12)	5,235	31,288	36,523

Table 3.55 given below provides the number of teachers in all types of community schools based on the number of teachers working in the approved number of positions and Rahat quotas by levels. Overall, there are 19,584 with 2,859 female teachers at secondary level, 1,954 teachers at higher secondary level and altogether 21,538 teachers at secondary (Grades 9-12) level working in the current school year (See Annex: XXVIII\_B).

**Table 3.55**  
**Number of teachers in all types of community schools by levels (based on approved positions)**

Higher secondary(11-12)	-	-	1,954
Secondary(9-12)	2,859	16,725	21,538

<sup>6</sup> The numbers of female teachers are presented based on the reporting in the community schools working in the approved positions and Rahat Quotas.

## (2) Percentages of teachers and the gender parity indexes in all types of schools by levels

The Tables 3.56, 3.57 below demonstrate the percentage of teachers by sex and GPI at secondary, higher secondary and secondary levels by types and levels of schools based on the reporting in Flash I, 2011-012. The overall GPI in total number of teachers is 0.21 at secondary level, 0.17 at higher secondary and 0.20 at secondary level respectively. Moreover, almost similar situation of GPI is found in the shares of female teachers in total number of teachers in the community schools (table: 3.57). Compared to the GPIs at primary, lower secondary and basic levels, the GPI at secondary and higher secondary levels are very low. This shows that the participation of female in teaching profession at secondary education is very poor.

**Table 3.56**  
Percentage shares of teachers in all types of schools at secondary level

Level	Female	Male	GPI
Secondary(9-10)	17.6	82.4	0.21
Higher secondary(11-12)	14.3	85.7	0.17
Secondary(9-12)	16.5	83.5	0.20

**Table 3.57**  
Percentage shares of teachers in all types of community schools at secondary level

Secondary(9-10)	13.9	86.1	0.16
Higher secondary(11-12)	15.1	84.9	0.18

## (3) Percentage of Dalit and Janajati teachers

**Table 3.58**  
Shares of Dalit and Janajati teachers in total teachers in all types of schools

Social group	Secondary			Higher secondary			Secondary		
	Female	Male	Total	Female	Male	Total	Female	Male	Total

**Figure 3.28**  
Percentage of Dalit, Janajati teachers in total teachers at secondary level

Table 3.58 and figure 3.28 above present the shares of teachers by social groups (Dalit and Janajati) and levels. The shares of Dalit and Janajati teachers are very low in teaching profession. The shares of Dalit teachers at secondary, higher secondary and secondary (Grades 9-12) levels are 3.6%; 2.7% and 3.3% respectively. Likewise, the shares of Janajati teachers at secondary level are 17.6%, with 13.1% at higher secondary level and 16.1% at the secondary (Grades 9-12) level. Compared to the figures of the last school year, both the shares of Dalit and Janajati teachers have increased at secondary and higher secondary levels in the current school year 2011-012 (See Annex: XXI).

#### (4) Teacher training

Table 3.59, below, shows the total number of teachers<sup>7</sup> by training status and sex in the school year 2011-012 in all types of schools at secondary, higher secondary and secondary levels. Out of the total 35,675 teachers at secondary level (9-10) 30,937 are trained, 2,073 are partially trained, and 2,665 are untrained. Again, the figures by training status show that out of the total number of teachers 17,445 at higher secondary level 10,821 are trained, 1,653 are partially trained and 4,971 teachers are untrained. At the secondary level (9-12) out of the total teachers 53,120 there are 41,758 teachers trained, 3,726 partially trained and 7,636 teachers are untrained (See Annex: XXV\_A & XXV\_B).

**Table 3.59**  
**Number of teachers by training status (all types of school) at secondary level**

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	5,365	25,572	30,937	1,826	8,995	10,821	7,191	34,567	41,758

Untrained	494	2,171	2,665	420	4,551	4,971	914	6,722	7,636

The percentages of teachers by training status and sex are illustrated in Table 3.60 below. At the secondary level (9-10) 86.7%, 5.8% and 7.5% of teachers are trained, partially trained and untrained respectively. Similarly, at higher secondary level, 62.0% are trained, 9.5% are partially trained, and 28.5% are untrained. Again, at secondary level (9-12), out of total number of teachers, there are 78.6% trained, 7.0% partially trained and 14.4% teachers are untrained. The figures in the table suggest that more teachers, except at higher secondary level are trained and more than 28% of the teachers at higher secondary level are still untrained (See Annex: XXVI\_A & XXVI\_B).

**Table 3.60**  
**Percentage of teachers by training status (all types of schools) at secondary level**

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)

Untrained	7.9	7.4	7.5	16.8	30.4	28.5	10.4	15.2	14.4

The table 3.61 below shows the number of teachers by training status in community schools at secondary, higher secondary and secondary (9-12) levels. Out of the total 22,825 teachers

<sup>7</sup> The numbers of teachers at all levels are based on the reporting in the Flash I school census 2011-12.

at secondary level (9-10) 20,559 are trained, 1,256 are partially trained, and 1,010 are untrained. Again, the figures show that out of the total number (13,698) of teachers at higher secondary level 8,779 are trained, 1,149 are partially trained and 3,770 teachers are untrained. Lastly, at the secondary level (9-12) there are 29,338 trained, 2,405 partially trained and 4,780 are untrained teachers (See Annex: XXV\_A and XXV\_B).

**Table 3.61**  
Number of community schools' teachers by training status at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total

Total	3,172	19,653	22,825	2,063	11,635	13,698	5,235	31,288	36,523

The status of teachers in terms of training in community schools at secondary level (9-12) by sex are shown in the table 3.62 below. At secondary level (9-10) 90.1%, 5.5%, and 4.4% of the teachers are trained, partially trained and untrained respectively. At higher secondary level 64.1% of the teachers are trained, 8.4% are partially trained and 27.5% are untrained. Similarly, at the secondary level (9-12) among the total number of teachers 80.3% are trained, 6.6% are partially trained and 13.1% are untrained. Hence, more than 90% of the teachers in community schools at secondary level (9-10) are trained in the beginning of this school year (See Annex: XXVI\_A & XXVI\_B).

**Table 3.62**

## (5) Teacher Ratio

### (5)-1 Student Teacher Ratios in all types of schools

This section deals with the Student Teacher Ratios (STR) at all levels: secondary, higher secondary and secondary level by types of schools. The STR assesses the level of human resources input in terms of number of teachers in relation to the number of students.

The following Table 3.63 and figure 3.29 present the STR<sup>8</sup> in all types of schools by eco-belts and levels in the school year 2011-012. On average, the STR at secondary level is 24:1, at higher secondary level 20:1 and at the secondary (Grades 9-12) level 23:1 respectively.

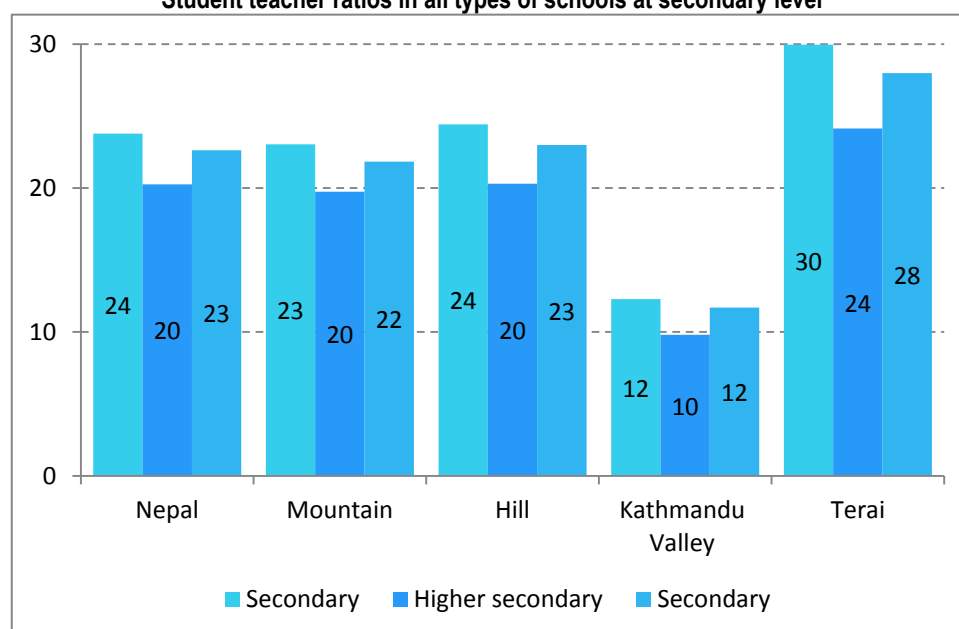

<sup>8</sup> The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2011-12.

Likewise, the highest STR at secondary level is found in the Terai belt at all levels, whereas the lowest STR is in the Valley eco-belt (See Annex XXVII).

**Table 3.63**  
**Student teacher ratios in all types of schools at secondary level**

Eco-belts	Secondary	Higher secondary	Secondary
Mountain	23	20	22
Hill	24	20	23
Valley	12	10	12
Terai	30	24	28
Total	24	20	23

**Figure 3.29**

### (5)-2 Student Teacher Ratios in community schools

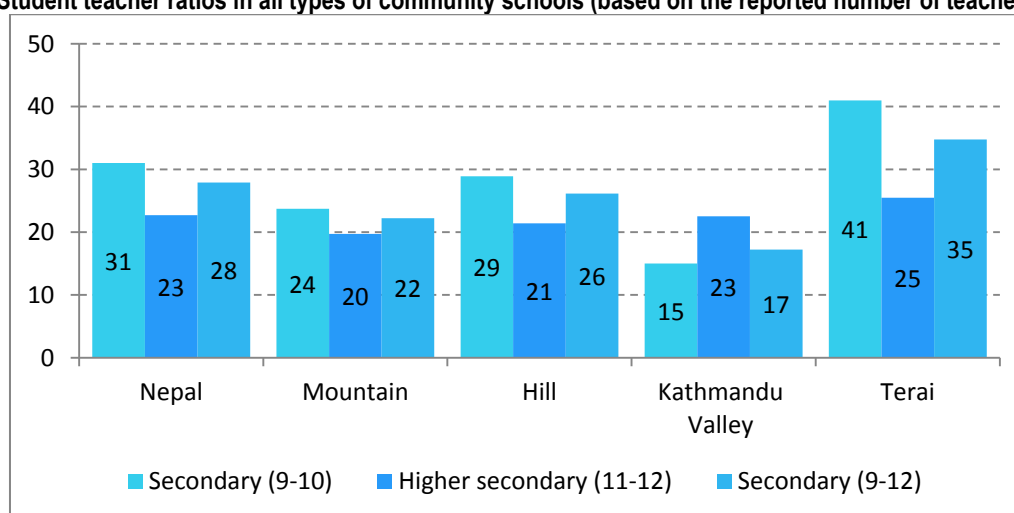

Table 3.64 and figure 3.30 below present the STR<sup>9</sup> in all types of community schools by eco-belts and levels in the school year 2011-012 based on the reported number of teachers in Flash I, 2011-012 school census. On average the STR at secondary level is 31:1, at higher secondary level 23:1 and at the secondary (Grades 9-12) level 28:1 respectively. As in the previous situation, the highest STR at secondary level is found in the Terai belt (See Annex XXVIII\_A).

**Table 3.64**  
**Student Teacher Ratios in all types of community schools (based on the reported number of teachers)**

Eco-belts	Secondary	Higher secondary	Secondary
Mountain	24	20	22
Hill	29	21	26
Valley	15	23	17
Terai	41	25	35
Total	31	23	28

<sup>9</sup> The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2011-12.

**Figure 3.30**  
**Student teacher ratios in all types of community schools (based on the reported number of teachers)**

### (5)-3 Student Teacher Ratios in community schools based on approved teachers positions

The Table 3.65 below shows the STR by eco-belts for all types of community schools at secondary (Grades 9-10) level based on the number of approved teacher positions. On average, the STR in secondary community schools is 36:1. As the table depicts, at the secondary level, the highest STR (46:1) is in the Terai and the lowest one (18:1) is in the Valley eco-belt. The data also reveal that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.63 & 64) (See Annex XXVIII\_A).

**Table 3.65**  
**Student Teacher Ratios in community schools (based on the approved positions of teachers)**

Eco-belts	Secondary level (Grade 9-10)
Mountain	30
Hill	34
Valley	18
Terai	46

### (6) Internal efficiency at secondary level

The Table 3.66 given below shows the flow rates of students from the school year 2010-011 to 2011-012 in grade 9 at secondary level and the passed percentage in test examination in grade 10 also the examination passed percentage at higher secondary level. The table illustrates, out of the total students enrolled in the school year 2010-011 in Grade Nine, 89.4% are promoted to Grade Ten, 4.7% are repeating the same grade in the current school year, and 5.9% dropped out from the school education system. The table also indicates that the girls' repetition rate in Grade 9 is slightly higher, whereas the dropout rate is slightly

lower as compared to that of boys (See Annexes XVI\_A-C). Similarly, in total 89.4% of grade 10 students passed in the test examination. Based on the reported number of grade 11 and 12 students in Flash I 2011-012 there are 40% student in grade 11 and 41% students in grade 12 passed in the final examination.

**Table 3.66**  
**Internal efficiency at secondary level**

	PRD	Grade 9	Grade 10	Grade 9-10	Grade 11 <sup>10</sup>	Grade 12
Total	Promotion rate	89.4	89.4	89.4	40	41
	Repetition rate	4.7	2.5	3.7	-	-
	Dropout rate	5.9	8.1	6.9	-	-

	Repetition rate	5	2.9	4.1	-	-
	Dropout rate	5.9	8.1	6.9	-	-

---

<sup>10</sup> The passed percentage in grade 10 is based on the test exam, and the passed percentage in grade 11 and 12 is based on the reported number of higher secondary schools' total number of students appeared and passed in the exam in Flash I census 2011-12.

## SECTION IV

### 4.1 Availability of textbooks at primary, lower secondary and secondary levels in community schools

Textbooks are the main instructional materials for classroom teaching/learning activities in the schools. The Ministry of Education has made commitment, especially for primary school children, to deliver the textbooks within the second week of the 1<sup>st</sup>. month of each new school year.

Table 4.1 presents the status of availability of textbooks within the second week of the 1<sup>st</sup> month (by 2068/01/15) of this school year in the community primary, lower secondary and secondary levels. It shows that out of the total number of enrolled children at the primary level in the country, 69.4% children received a full set of textbooks within the second week of the school year 2011-012 (i.e. 2068/01/15), 2.2% children received a partial set of textbooks and 28.4% (compared to 31.0% children in the last school year) children did not receive even a single textbook by the above reference date (See Annex: XXXX\_A & XXXIX\_B).

When compared with the status of the previous school year, the percentage of children at primary level receiving a full set of textbooks has increased from 66.3% to 69.4% in the current school year. The highest percentage of children receiving a full set of textbooks by the reference date was Grade 5 children with 75.3%. The highest percentage of the children not receiving even a single textbook was the Grade One children with 35.2%. However, this is less than 2.5% of the Grade One children not receiving any textbooks in the last school year.

**Table 4.1**  
**Availability of textbooks at primary, lower secondary and secondary levels by grades**

Grades	Total students enrolled in 2011-012	Number and percentage of students receiving textbooks within the second week (2068/01/15) of academic session, 2011-012

Total	6,366,480	4,338,347	68.1	173,081	2.7	1,855,052	29.1

The analysis also suggests a low scenario at lower secondary level with respect to the availability of textbooks by the particular date of 2068/01/15. Again, the scenario with respect to secondary level is a bit worsening than the primary and lower secondary levels. To sum up, though there has been some progress made in the availability of textbooks in the current school year, still a lot has to be done to make the availability of full sets of textbooks in time as per the reference date for all students.

#### 4.2 Number of classes with transitional language support at primary level

Nepal is a multilingual country, where groups of people speak many different languages as their mother tongue in daily practices. Table 4.2 and figure 4.1 below show the number of classes which used a local language in the teaching and learning process at the primary level as a transitional language to make better interpretation of the subject matters for those students who did not have Nepali language as their mother tongue.

In total there are 33 local languages, which have been widely used as the medium of instruction in the classroom teaching and learning activities at primary level. Out of total 33,881 primary levels in the school year 2011-012 the following local languages were used as the medium of instruction in 19,999 classes at primary level in teaching and learning activities.

The data shows that the local languages were mainly used in the early grades at primary level. Among the following reported local languages, Maithili, Tamang, Doteli, Awadhi, Bhojpuri, Tharu, Magar, Limbu, Bajika, etc. were used widely in the Terai and Hill districts.

**Table 4.2**
