

Flash II REPORT 2068 (2011-012)

GOVERNMENT OF NEPAL
MINISTRY OF EDUCATION
DEPARTMENT OF EDUCATION

Sanothimi, Bhaktapur
August, 2012

Foreword

The Educational Management Information System (EMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation and application. Especially, EMIS has been used to derive the Flash Reports I and II.

This Flash Report II, 2068 compares the educational status of main categories of students (e.g. Total, Dalit, Janajati and students with disabilities) in relation to their student, retention and performance at individual grade between the Flash I (i.e. in the beginning of the school year) and the Flash II (i.e. at the end of the school year). It also assesses the participation of local people from different strata of society in SMCs and PTAs in school management and compares progress between targets and program implementation at macro level on the basis of school level data. This report presents the program indicators, including construction and other physical facilities, scholarship distribution, school grants, release of funds, school improvement plans (SIPs) and other performance related indicators.

Such measures give an indication of the effectiveness of the education system. EMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of school level performance information has been instrumental in evidence based educational planning at district, regional and national levels.

In the process of preparation of this report many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative effort of EMIS core team of DOE, REDs, and DEOs officials. The constructive suggestions and feedback of the Development Partners have also significant role in this process. Therefore, I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for your contributions. Any suggestion and feedback for its improvement is highly appreciated.
