

Flash I REPORT 2071 (2014-015)

GOVERNMENT OF NEPAL
MINISTRY OF EDUCATION
DEPARTMENT OF EDUCATION

Sanothimi, Bhaktapur
2014

Foreword

The Educational Management Information System (EMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation and application. Especially, EMIS has been used to derive the Flash Reports I and II.

This report (Flash I) provides a snapshot of schools, enrolments, internal efficiency including promotion, repetition, drop out and survival rates of students at all levels of the school education system in disaggregated forms by districts, eco-zones and development regions. Furthermore, this report analyses the training status of teachers and assesses how well schools are supplied with basic support from DEOs. Such measures give an indication of the effectiveness of the education system. EMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of information with regards to school performance has been instrumental for evidence-based educational planning and monitoring at district, regional and national levels.

In the process of preparation of this report many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative efforts of the EMIS core team of DOE, REDs and DEOs officials. The constructive suggestions and feedback of the Development Partners have also played a significant role in this process. I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for their contribution. Any suggestion and feedback for its improvement is highly appreciated.

Dr. Dilli Ram Rimal
Director General
Department of Education

Table of contents

Table of contents	i-iii
List of tables and figures	iv-vii
Acronyms	viii
SECTION I	1-9
1.1 Introduction	1
1.2 Process of preparing the report	1-2
1.3 Methodology	2-3
1.4 Data reliability	3-4
1.5 Lessons learnt	4
1.6 Key findings	5-7
1.7 Overall Progress Status on SSRP KPIs	7-9
SECTION II	10-16
2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)	10-13
2.2 Dalit and Janajati children enrolled in ECD/PPCs	13-14
2.3_A Percentage of new entrants in grade 1 with ECD/PPC experiences	15-16
2.3_B Number of ECD/PPCs facilitators/teachers by sex, Dalit, Janajati, qualification and percentage of training	16
SECTION III	17-64
3.1 School education	17
3.2 Basic Education	17-48
3.2.1 Number of schools	17-21
3.2.2 Enrolment	21-36
(1) Total number of enrolments at primary, lower secondary and basic levels	21-25
(2) Dalit and Janajati enrolments at primary, lower secondary and basic levels	25

(3) Percentage of girls and boys and gender parity indexes in enrolment at primary, lower secondary and basic levels by social groups	26-27
(4) Enrolment at primary, lower secondary and basic levels by disadvantaged Janajati and disabilities of students	27-28
(5) Enrolment by major types of disabilities at primary, lower secondary and basic levels	29-30
(6) Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One	30-32
(7) Gross and Net Enrolment Rate (GER and NER) at primary, lower secondary and basic levels	32-34
(8) Scenario of out-of-school children	34-36
(9) Internal efficiency at primary level	36-37
(10_A) Internal efficiency at lower secondary level	37-38
(10_B) The Quality of Basic Education based on the Findings and Recommendations of "National Assessment of Student Achievement (NASA) 2011 for grade 8 and for grades 3 and 5 in 2012"	38-40
3.2.3 Teachers information at primary, lower secondary and basic levels	40-48
(1) Total reported number of teachers by sex at primary, lower secondary and basic levels in all types of schools	41-42
(2) Percentage of teacher and the gender parity indexes in all types of schools	43-43
(3) Percentage of teachers by Dalit and Janajati	43-44
(4) Teacher training	44-45
(5) Student Teacher Ratios	46-46
(5)-1 Student Teacher Ratio in all types of schools	46
(5)-2 Student Teacher Ratios in community schools	47
(5)-3 Student Teacher Ratios in community schools on approved teacher positions	47-48
3.3 Secondary Education	49-64
3.3.1 Number of schools	49-51
3.3.2 Enrolment	52-56
(1) Total number of enrolment at secondary level	52
(2) Total number of Dalit and Janajati enrolment at secondary level	52-53
(3) Total number of enrolment at secondary level by school types	53-54
(4) Enrolment at secondary level by disadvantaged Janajati and disabilities of students	54-55
(5) Enrolment by major types of disabilities at secondary level	55-56
(6) Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level	56-57

3.3.3 Teachers information at secondary, higher secondary and secondary levels	58-64
(1) Distribution of teachers by sex at secondary, higher secondary and secondary levels	58-59
(2) Percentage of teacher and the gender parity indexes in all types of schools by level	59-60
(3) Percentage of Dalit and Janajati teacher	60
(4) Teacher training	61-62
(5) Teacher Ratios	62-
(5)-1 Student Teacher Ratio in all types of schools	62-63
(5)-2 Student Teacher Ratio in community schools	63
(5)-3 Student Teacher Ratio in community schools on approved teachers	63-64
(6) Internal efficiency at secondary level	64

SECTION IV **65-67**

4.1 Availability of textbooks at primary, lower secondary and secondary levels in community Schools	65-66
4.2 Number of classes with transitional language support at primary level	66-67

SECTION I

1.1 Introduction

The Department of Education (DOE) has published the Flash Report I, 2014-015 with a view to presenting different education statistics to facilitate the planning and monitoring activities of the School Sector Reform Plan (SSRP) 2009-015. The purpose is to furnish a national, ecological and district- level current educational status with their brief analyses in terms of access and equity, efficiency and quality related indicators of the SSRP.

This publication is eighteenth in the series of Flash Reports I and II produced by the DOE. The publication has focused, largely, on providing information to the following main areas of school education:

- Early childhood development (ECD) and pre-primary classes (PPCs),
- Alternative schooling programme: School outreach/Flexible schooling programme (SOP/FSP),
- Number of schools by types of schools (community, institutional and religious),
- Student participation by gender, Dalit, Janajati, disadvantaged Janajati and disabilities,
- Number of teachers and their training status by types of schools,
- GIR/NIR in Grade One and GER/NER by gender and level of education,
- Internal efficiency by grade, gender and level,
- Student-teacher ratios by level of school education,
- Student-school and teacher-school ratios by level of school,
- Delivery of free textbooks to schools within two weeks of the beginning of the school year, and
- Number of schools with transitional language support at primary level.

Since the school year 2009-10, the Flash Reports have included information in line with the SSRP core document that includes basic education comprising grades 1-8 and secondary education comprising grades 9-12 in order to address SSRP indicators. Accordingly, this report presents disaggregated information on these two levels: basic and secondary education.

The information presented in this report includes, unless stated otherwise, facts and figures from all schools running in the country: all types of community schools (community aided, community managed and community unaided), institutional schools (private) and religious schools by level : ECD/PPCs, primary, lower secondary, secondary and higher secondary.

1.2 Process of preparing the report

- Activities relating to this report were co-ordinated by the DOE's Education Management Information System (EMIS) Core Team headed by the Director of Planning and Monitoring Division.
- Flash I questionnaires were updated through wider consultations with central, regional, district and sub-district level personnel.
- Feedback and suggestions received from stakeholders, including development partners were incorporated to improve the Flash I questionnaires.

- The Camera-Ready Copy (CRC) of the revised Flash I questionnaires was sent to District Education Offices (DEOs) in the last week of February 2014 for its printing and distribution to schools.
- Guidelines about how to fill in the Flash I questionnaires were provided to schools along with the questionnaires and separate instructions were sent to the DEOs/REDS to ensure quality and accuracy of data by monitoring of data verification and validation at schools and RCs level by Resource Persons, School Supervisors and District Education Officers.
- The computer software developed on the PHP 5 (Pretext Hypertext Pre-processor) platform with the back-end support by the MySQL database was updated and used to process the Flash data. The software enabled data entry, processing and standard output generation. There is also a provision to generate additional output tables on the basis of specific user requirements. Small revisions were made in the last year's software to accommodate districts' requirements and also due changes, especially to address the priority-based minimum enabling conditions (PMECs) and student achievements related data were included in this year's Flash questionnaires.
- All districts were able to install the Flash Software by themselves in their own office. They entered the data into software locally and delivered the district Flash database to the DOE by email or FTP (File Transfer Protocol).
- Data entry into computer began with verifying and updating school codes given to all schools by DEOs.

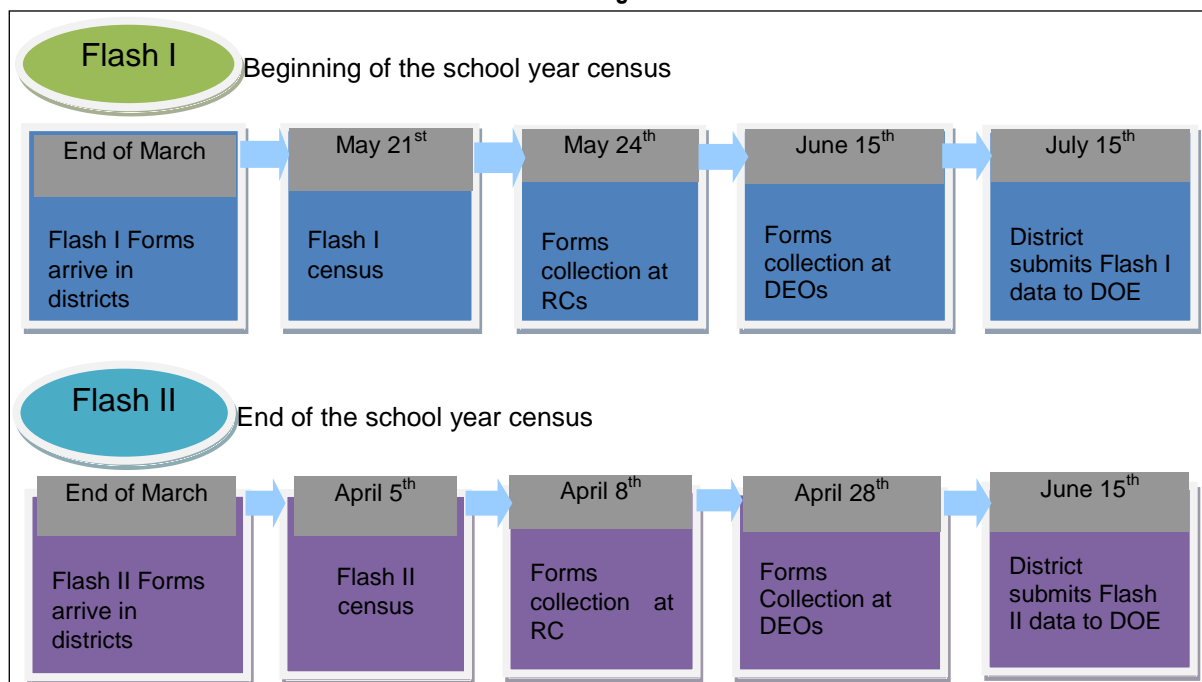

1.3 Methodology

- This report has been prepared based on the information gathered during the Flash I School Census covering all levels and types of schools – pre-primary to higher secondary (community aided, community unaided, community managed, private or institutional schools, religious schools and alternative schools) running in the country on the reference date of Jestha 7, 2071 (21 May, 2014). However, out of total 35,223 schools with all levels in the previous school year, 34,099 (97.0%) schools reported their information within the deadline of the Flash I school census 2014, and of the total 1,124 non-reported schools in total 417 schools were closed and merged in the school year 2014-015, for the rest 707 actual non-reported schools in the Flash I, 2014 school census their information was migrated from the previous Flash II school census 2013-014 database in order to generate a complete set of database.
- Information and analyses are presented, mainly, on the basis of ecological belts: Mountain, Hills, Tarai, and a separate fourth category Valley summarises information for three districts (Kathmandu, Lalitpur and Bhaktapur). The detailed information with respect to each district is provided in annexes for further references.
- The population used in the calculation of enrolment rates in all Flash Reports is based on the National Population Census Reports and the projected population by the Central Bureau of Statistics (CBS). In this regard, up to the Flash I Report 2012-013 the school age population was used based on the Population Projection for Nepal 2001-2021 publication, jointly published by the CBS and the Ministry of Population and Environment (MOPE) in the year 2003.
- Similarly, for the current Flash Report I, 2014-015, based on the population data received from CBS (National Population Census 2001 and 2011), the district wise

single age group population was calculated by using the Sprague multiplier coefficient from a given five-year age group population data. After obtaining district level single age group population, the compound growth rate formula was applied to estimate the district level population for single year (i.e. for the year 2014-2015).

- The specified age groups for students in ECD/PPC, primary, lower secondary, basic, secondary, higher secondary and secondary levels are 4, 5-9, 10-12, 5-12, 13-14, 15-16 and 13-16 years respectively.
- Schools are counted according to the level/levels of education they offer and as a unit by the total grades they offer. For example, level-wise, a higher secondary school offering grades 1-12 is counted as having four levels of education – as primary, lower secondary, secondary and higher secondary level respectively.
- The Flash I and II School Census were implemented as per the following prescribed timeline and schedules.

Figure1
Time line for Flash Data collection through the Flash I and II School Census

1.4 Data reliability

In the Flash reporting system, responsibilities for each agency/level are well defined in order to ensure the uniformity, consistency and quality of data. At the school level, Head Teachers (HTs) are responsible to fill up the Flash I questionnaire and obtain approval from School Management Committee (SMC) Chairpersons and School Supervisors/Resource Persons on time. Likewise, SMC Chairpersons and School Supervisors/Resource Persons are responsible for assessing and approving the completed Flash I questionnaires before these are submitted to the DEO. Also, several measures are taken to verify the data by cross checking the accuracy and consistency of the data.

In order to minimize the reporting errors and prevent inconsistency in data entry, necessary validation rules have been incorporated into the Flash data entry software. Furthermore, the DOE has been providing continuous technical support to the district personnel through visits

as well as through telephones and emails, which, to a large extent, has helped in improving the data quality. In addition, trainings and on-the-job orientations to the DEO personnel involved in data processing activities have been provided to enhance their capacity with a view to enabling them to ensure the quality, reliability and validity of data.

In addition to the above efforts to maintain reliability, validity and consistency in the data management at school level and improve the reporting process, the DOE has initiated the following mechanism:

- With a point of view to improve the school record keeping and reporting system, the DOE has established a mechanism, which is currently used in 53 districts (including Bhaktapur, Dang, Salyan, Parbat, Rupandehi and Mustang districts which had used this process in the last school year) to manage the individual student's, teacher's information as well as other related information to be managed at the school level in the electronic form (which is compatible with the current Flash Software System). The schools of these districts easily managed the detailed information of an individual student, teacher and other relevant information in the school level EMIS software and reported the quality data within the given time-frame of the school census. Moreover, this mechanism provides an opportunity to the schools, RCs and DEOs to track the progress of the students, teachers and other information. In this system, once the schools complete the school level electronic EMIS, it assists to easily update their information based on the profile of an individual student, teacher and other information at the end of the school year (i.e. except new students, the schools do not need to re-enter the data in the school level EMIS). As a whole, this new system has contributed to the improvement of the current Flash Reporting System.

1.5 Lessons learnt

- Based on the last 10 years' experiences in the Flash reporting system, it has been observed that a standardized school record keeping should be introduced and brought into regular practice (especially at the school level) to constantly improve the current EMIS system, which has already been used by 53 districts in the process of Flash I&II school census 2014/015 for the management and reporting system.
- The districts have demonstrated steady progress in timely reporting, verifying and validating the data by themselves. This capability enhancement has been possible with the installation of user-friendly and technically sound database management software developed by the DOE.
- Nevertheless, the capacity of schools, RCs and DEOs needs to be further strengthened in most aspects of EMIS activities, such as establishing the standardized school record keeping system at all schools, adequate logistical support for producing quality data and disseminating accurate and timely information to key stakeholders at the local (school, community and district) level, contributing to better accountability, adherence to results and informed decision-making at all levels.
- As a new initiative for the establishment of two-way data flow system, the DOE has developed the School, VDC and District Profiles, and distributed to each school through DEOs. The DOE has also developed a time-series Flash Database that has assisted the DEOs to check the consistency, reliability and validity of the data by assessing the data of each school.

1.6 Key findings

- The total number of community-based and school-based ECD/PPCs is 35,121 (34,622 in the last school year) of which 5,087 (4,901 in the last school year) pre-primary classes are running in institutional schools and the rest 30,034 (29,535 in the last school year) are running in community schools and as community-based ECDs.
- The average Enrolment Rate with regard to 4 years' population and enrolment in ECD/PPCs is 77.7% (76.7% in the last school year) with 77.3% for girls and 78.1% for boys.
- The proportion of students in Grade One with ECD/PPC experiences is 59.6% (56.9% in the last school year) with 60.0% for girls and 59.1% for boys.
- Of the total 35,223 schools (in unit) in the last school year, 417 schools closed/merged and the total number of schools come down to 34,806 in the current school year.
- Out of the total 34,806 (35,223 in the last school year) schools 34,335 (34,743 in the last school year) are primary, 14,924 (14,867 in the last school year) are lower secondary, 34,506 (34,923 in the last school year) are basic, 8,814 (8,726 in the last school year) are secondary, 3,596 (3,596 in the last school year) are higher secondary and 9,109 (9,021 in the last school year) are secondary (Grades 9-12) levels.
- Out of the total 34,806 schools, 895 (879 in the last school year) are religious schools, which include Madarasa, Gumba/Vihar and Ashram/Gurukul.
- On average, the school student ratios are 1:126 at primary, 1:123 at lower secondary, 1:179 at basic (Grades 1-8), 1:102 at secondary, 1:116 at higher secondary and 1:145 at secondary (Grades 9-12) levels (Compared to 1:127, 1:123, 1:178, 1:127, 1:103, 1:1116 and 1:145 respectively in the last school year).
- The total numbers of students at primary, lower secondary and basic levels are 4,335,355 (4,401,780 in the last school year) 1,835,313 (1,828,351 in the last school year) and 6,170,668 (6,230,131 in the last school year) respectively; these numbers have decreased by 1.5% points (66,425 students) at the primary level and increased by 0.4% points (6,962) at the lower secondary level as compared to the previous school year.
- Of the total enrolment at primary, lower secondary and basic levels, 84.6%, 84.1% and 84.4% (compared to 84.6%, 84.5% and 84.6% in the last school year) are in community schools respectively. Similarly, 15.4% (15.4% in the last school year), 15.9% (15.5% in the last school year) and 15.6% (15.4% in the last school year) are in institutional schools.
- The total number of students at secondary, higher secondary and secondary (grades: 9-12) levels are 900,585; 416,995 and 1,317,580 (896,919; 415,343 and 1,312,262 in the last school year) respectively.
- Of the total enrolment at secondary, higher secondary and secondary (grades: 9-12), 80.9% (81.1%, in the last school year), 71.1% (70.6% in the last school year) and 77.8% (77.7% in the last school year) are in community schools, whereas 19.1% (18.9% in the last school year), 28.9% (29.4% in the last school year) and 22.2% (22.3% in the last school year) are in institutional schools.
- The girls' enrolment constitutes 50.8% (50.7% in the last school year) at primary level, 50.7% (50.6% in the last school year) at lower secondary level, and 50.8% (50.6 in the last school year) at basic level. Likewise, girls comprise 51.0% (50.7% in the last school year) at secondary level, 50.7% (50.8% in the last school year) at higher secondary level and 50.9% (50.7% in the last school year) at comprehensive secondary (grades: 9-12) level.

- Of the total enrolment of 7,488,248 (7,542,393 in the last school year) students in school education, 57.9% are at primary level (59.7% in the last school year), 24.5% (24.2% in the last school year) are at lower secondary, 82.4% (82.6% in the last school year) are at basic, 12.0% (11.9% in the last school year) are at secondary, 5.6% (5.5% in the last school year) at higher secondary and 17.6% (17.4% in the last school year) are at secondary level.
- The share of Dalit enrolment is 19.9% at primary, 14.5% at lower secondary, 11.0% at secondary and 6.7% at higher secondary level, which are almost similar to the previous school year.
- The share of Janajati enrolment is 33.9% (33.9% in the last school year) at primary level, 38.5% (38.7% in the last school year) at lower secondary, 38.6% (38.6% in the last school year) at secondary and 29.8% (29.8% in the last school year) at higher secondary level.
- The total number of student enrolment by extremely disadvantaged Janajati (22 ethnic groups) is 96,333 (97,808 in the last school year) at primary level, 31,627 (31,513 in the last school year) at lower secondary level, 15,409 (15,345 in the last school year) at secondary level.
- Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One are 137.0% (141.8% in the last school year) and 93.0% (91.6% in the last school year) respectively.
- The Gross Enrolment Rate (GER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 134.4% (136.8% in the last school year) 89.7% (84.3% in the last school year), 117.1% (115.7% in the last school year), 70.1% (68.7% in the last school year), 32.9% (32.0% in the last school year) and 51.6% (50.4% in the last school year) respectively.
- The Net Enrolment Rate (NER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 96.2% (95.6% in the last school year), 74.6% (72.6% in the last school year), 87.6% (86.3% in the last school year), 56.1% (54.9% in the last school year), 13.1% (11.5% in the last school year) and 34.7% (33.2% in the last school year) respectively.
- The gender parity in school education has significantly improved. The Gender Parity Index (GPI) in NER at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 0.99; 1.02; 1.00; 0.99; 1.03 and 1.00 (0.99; 1.03; 1.00; 0.99; 1.02 and 1.00 in the last school year) respectively.
- The promotion and repetition rates in Grade One are 78.4% (75.4% in the last school year) and 15.2% (17.5% in the last school year).
- The promotion and repetition rates in grade 8 are 89.5% and 4.5% (89.6% and 5.0% in the last school year).
- The overall survival rate to grade five is 86.8%, with 86.5% for boys and 87.5% for girls (Compared to total 84.4%, boys 84.3% and girls 86.2% in the last school year).
- The overall survival rate to grade eight is 74.6%, with 73.3% for boys and 76.0% for girls (compared to total 72.1%, boys 70.1% and girls 73.3% in the last school year).
- The overall Co-efficient of Internal Efficiency at Primary and Basic levels is: 80.9% and 73.1% (79.0% and 70.7% in the last school year). The Cohort Graduation rates at Primary and Basic levels are: 79.7% and 66.7% (77.6% and 63.8% in the last school year).
- According to the National Assessment of Student Achievement (NASA) report, 2011 the average students' learning achievements in Grade 8 are 43% in Mathematics, 49% in Nepali and 47% in Social studies subjects.

- According to the NASA report, 2012 the average students' learning achievements in Grade 5 are 53.3% in Mathematics, 59.7% in Nepali and 53.6% in English subjects.
- According to the NASA report, 2012 the average students' learning achievements in Grade 3 are 59.4% in Mathematics and 62.6% in Nepali subjects.
- Based on the NASA reports, 2011 and 2012 the districts: Achham, Bardiya, Jumla, Khotang, Mahottari, Rolpa, Saptari, Udayapur and also the Eastern- and Mid-Western development regions have low level of achievements. It is worth mentioning here that similar situations have been observed in these districts and regions with regard to their internal efficiency as demonstrated in the Flash I Report, 2014-015.
- The proportions of female teachers by levels, in all types of schools, are: 41.9% (41.6% in the last school year) at primary level, 27.6% (27.5% in the last school year) at lower secondary level and 17.4% (17.4% in the last school year) at secondary level.
- The proportions of female teachers in all types of community schools are: 38.2% (37.9% in the last school year) at primary level, 20.8% (20.7% in the last school year) at lower secondary level and 13.9% (13.8% in the last school year) at secondary level.
- The proportions of Dalit teachers at primary, lower secondary and secondary levels are: 5.1%, 4.0%, and 4.4% (5.0%, 3.6%, and 4.1% in the last school year) respectively.
- The proportions of Janajati teachers at primary, lower secondary and secondary levels are: 30.4%, 19.9% and 18.3% (30.0%, 19.6% and 17.9% in the last school year) respectively.
- The percentage of fully-trained teachers in all community schools is 96.4% (95.1% in the last school year) at primary level, 83.8% (82.6% in the last school year) at lower secondary level and 93.0% (92.4% in the last school year) at secondary level.
- The student-teacher ratios (based on the approved positions of teachers) in community schools are 36:1 (37:1 in the last school year) at primary level, 60:1 (60:1 in the last school year) at lower secondary level and 30:1, (31:1 in the last school year) at secondary level.
- The average percentage of students who received the full sets of textbooks, within the second week of the academic year 2014-015, was 81.1% (73.1% in the last school year) at primary level, 80.6% (77.6% in the last school year) at lower secondary level and 79.4% (76.5% in the last school year) at secondary level.
- Altogether 69 local languages have been used in 6,524 grade 1 classes, 7,130 in grade 2 classes, 12,385 in grade 3 classes, 10,361 in grade 4 and 5,001 in grade 5 classes as the medium of instruction in the classroom teaching and learning activities at primary level.

1.7 Overall Progress Status on SSRP KPIs

The following table presents the overall progress on the SSRP Key Performance Indicators (KPIs) with the base year status (2007/08 and 2008/09) and year wise achievements against the set targets for the SSRP period 2009/-10 to 2015/016. Overall, the analysis of the indicator wise achievement against the targets shows that most of the indicators are optimistically improved, but there are some indicators namely: New entrants with ECED experience in grade 1, Gross and Net Intake Rates in Grade 1, Gross and Net Enrolment Rates in ECED/Pre-primary, Primary Education, Basic Education, Secondary Education (grade 9-12), Pupil Teacher Ratio at Basic level, Repetition Rate in Grade 1 and literacy rates are still lagging behind the set targets. Moreover, the analysis suggests that, for the improvement of these indicators (in particular indicators related to grade 1) there should be ample attentions in the next years' school education planning and programme implementation.

Table1.1: Summary of the SSRP Key Performance Indicators (base year status, progress status and targets)

Indicators	Base years		Targets and achievements													
	07/08	08/09	09/10		10/11		11/12		12/13		13/14		14/15		15/16

SECTION II

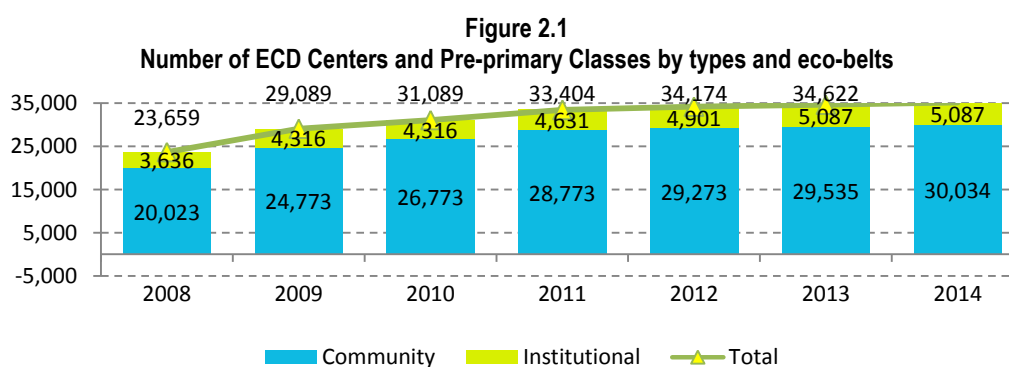

2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)

The early childhood education and development (ECED) goal stipulated in the EFA National Plan of Action (2001-15) provides a basis for the implementation of ECD/PPCs in the SSR Plan. In Nepal, the SSRP goal regarding the Early Childhood Development (ECD) activities is in line with the Dakar Framework of Action for EFA (2001-15). The Early Childhood Development / Pre-Primary Class (ECD/PPC) is regarded instrumental for the physical, intellectual, social and emotional development of children. Moreover, it helps to improve the internal efficiency of primary and basic education. One of the main strategies taken to achieve the EFA goals is to increase the number of ECD centers to ensure access for the most vulnerable and marginalized children. There are various forms of ECD/PPCs, which include school-based ECD centers, community-based ECD centers and privately managed pre-primary classes. Schools give different names to these classes such as Nursery, Kindergarten, Montessori etc.

Table 2.1 and figure 2.1 below show that out of the total 35,121 (Compared to 34,622 in the last school year ECD/PPCs in the country, 30,034 (85.5%) ECDs are running as community-based ECDs and community schools based ECD/PPCs. Accordingly, the rest 5,087 (14.5%) of the ECD/PPCs are operating under institutional schools (See Annex: I). The trend shows that there has been continuous increase in the ECD/PPCs facilities. Based on the set targets with regard to the ECD/PPCs GER and the Percentage of new children in Grade 1 with ECD/PPCs experience in the SSRP core document, the government has established new ECD/PPCs (Figure 2.1: 647 new ECD centers were established in the FY 2013/014 (2070/071) as per the DEOs' demand to provide ECD services to the un-served children. Although the data shows a low involvement of the private (institutional PPCs) sector in providing early childhood care and education services, the total number of ECD/PPCs has increased by 1.9% as compared to the number 34,474 in the last school year.

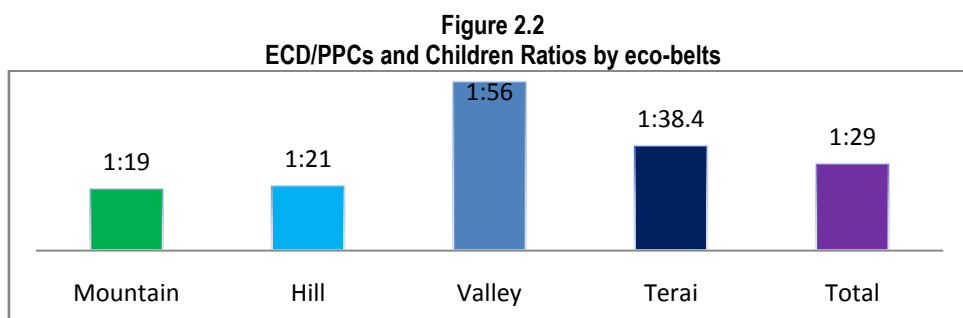

Table 2.1
Total number of ECD/PPCs by types and eco-belts

Eco-belts	Community	Institutional	Total
Mountain	3,117	186	3,303
Hill	13,620	1,610	15,230
Valley	795	1,169	1,964
Terai	12,502	2,122	14,624
Total	30,034	5,087	35,121

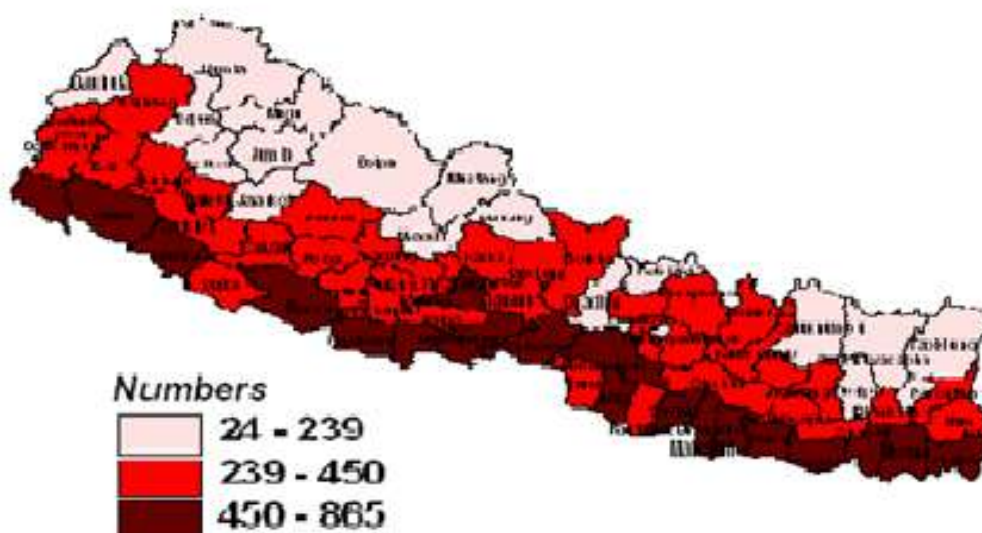

In total 1,014,339 children (Table 2.2_B) are catered by 35,121 ECD/PPCs (Table 2.1) in the current school year 2014-015. The present ratio of total children enrolled in the ECD/PPCs and the existing number of ECD/PPCs is 1:29 (compared to 1:30 in the last school year), indicating a need for a considerable expansion and strengthening of the ECD/PPCs to maintain the prescribed class size of ECD/PPCs and children ratio (i.e. 1:20). The district-level data shows the need of expansion of ECD/PPCs in 22 districts, which have high ECD/PPCs and children ratio (more than 1:29), than other districts (See Annex: I).

Figure 2.2 below shows the ¹ECD/PPCs and children ratios by eco-belts. This indicator presents the extent of each ECD/PPC’s capacity to accommodate the children. It shows, on average, one ECD/PPC is serving 29 children. The highest ECD/PPCs and children ratio is in the Terai (1:40) followed by the Valley (1:36) and the lowest is in the Hill (1:26) and the Mountain (1:27) eco-belts. This analysis suggests that, since Terai and Valley are more populated and there are more institutional schools with pre-primary classes, the ratio of ECD/PPCs and children is higher in these eco-belts. The district-wise analysis with regard to community schools based and community based ECD/PPCs and children enrolled in ECD/PPCs also shows that there are 28 districts with more than 1:25 ECD/PPCs and children ratio, highlighting the need of more efforts in the future to consolidate and build more effective and efficient ECD/PPCs (See Annex: V).

The following map depicts the distribution of school and community-based ECDs in the school year 2071 (2014-2015) by districts, which are running from the financial and other support of the government.

Map: 1 Number of school and community based ECD/PPCs

¹ This indicator is calculated by taking the total number of children enrolled in ECD/PPCs and the total number of ECD/PPCs recorded in the Flash Reporting System in a specific academic year.

Table 2.2_A and 2.2_B below show the total number of 4 years age group population, total number of enrolment with 4 years age children in ECD/PPCs and also the total number of 3-4 years age group population and the total number of children enrolled in the ECD/PPCs with the percentage of children enrolled in the ECD/PPCs compared with the 4 years and 3-4 years age group population by eco-belts and sex. In addition, the figures 2.3 and 2.4 below further elaborate them. Based on the targeted age focusing to the one year ECED programme for children of four years age group in the SSRP 2009-015, the DOE has collected the ECD/PPCs enrolment by age/s through the Flash I 2014 school census.

Based on the 4-year age enrolment data compared with the 4-year age population, the table (2.2_A) below presents that the overall percentage of 4-year children enrolled in ECD/PPCs is 77.7%, with 77.3% girls and 78.1% boys (Compared to total 76.7%, with 76.2% girls and 77.2% boys in the last school year) in the school year 2014-015. Compared with the set target (80.0%) for 2015 in the EFA National Plan of Action (NPA) 2001-2015 and the SSRP, this achievement is close to the target.

The analysis by eco-belts also suggests, although the efforts made by the government towards the expansion of ECD programme to cater the targeted children is more encouraging, it is important to pay more attention to strengthening the programme for their retention and transition to grade 1.

Table 2.2_A
Percentage of 4 year's population, total enrolment and enrolment rates in ECD/PPCs by eco-belts

Eco-belts	4-year age population			4-year age children enrolled in ECD/PPCs			% of 4 years' children enrolled in ECD/PPCs		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	21,220	21,549	42,769	16,064	16,324	32,388	75.7	75.8	75.7
Hill	89,779	92,877	182,656	70,468	73,137	143,605	78.5	78.7	78.6
Valley	17,734	20,410	38,144	15,121	17,847	32,968	85.3	87.4	86.4
Terai	143,707	151,195	294,902	108,939	116,172	225,111	75.8	76.8	76.3
Total	272,440	286,031	558,471	210,592	223,480	434,072	77.3	78.1	77.7

In addition to the above, in line with the previous years, information regarding the percentage of total children enrolled in the ECD/PPCs compared with the 3-4 years' age group population is presented in the Table 2.2_B. The table shows, on average, the country has achieved 94.3% of total children enrolled (Compared to 93.5% in the last school year) in ECD/PCCs. A slight gender difference in ECD/PPC enrolment rate (93.2% for girls and 95.4% for boys) against girls is observed. The Mountain eco-belt shows the lowest enrolment rate (81.5%) compared to the Terai (90.4%) and the Hill (92.9%) eco-belts (See Annex: I).

The highest enrolment rate is in the Valley (142.9%) as a result of more institutional (private) PPCs running in the Valley eco-belt. In addition, the PPCs run by private institutions mostly include three-years' programme (Nursery classes, Lower K.G. and Upper K.G.), whereas the ECDs run by the community and community schools based (which are funded by government programme) include one-year programme. This explains why the Valley continued to have the highest percentage of enrolment among the stated eco-belts. Overall, the ratio of girls to boys is 0.93, which is less (0.96) than the last school year 2013-014.

Table 2.2_B
3-4 years' population, total enrolments and enrolment rates in ECD/PPCs by eco-belts

Eco-belts	3-4 Years' Population			Total children in ECD/PPC			Enrollment Rate		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	41,136	41,767	82,903	33,492	34,077	67,569	81.4	81.6	81.5
Hill	172,597	178,236	350,833	158,058	167,845	325,903	91.6	94.2	92.9
Valley	35,689	41,615	77,304	52,133	58,348	110,481	146.1	140.2	142.9
Terai	274,894	289,555	564,449	244,945	265,441	510,386	89.1	91.7	90.4
Total	524,316	551,173	1,075,489	488,628	525,711	1,014,339	93.2	95.4	94.3

The Figure 2.3 below depicts the trends of total enrolment by gender during the years 2009 to 2014. The total enrolment in 2009 was 947,278 which reached 1,014,339 in 2014. Thus, in this period on average it has increased by 1.4% per-annum. The figure shows the enrolment trend has steadily increased up to 2011 and a slight decline is observed since 2012, which is in line with the trends (decreasing) of age group wise population growth based on the current National population census 2011.

Figure 2.3
Trend of total number of enrolments in ECD/PPCs

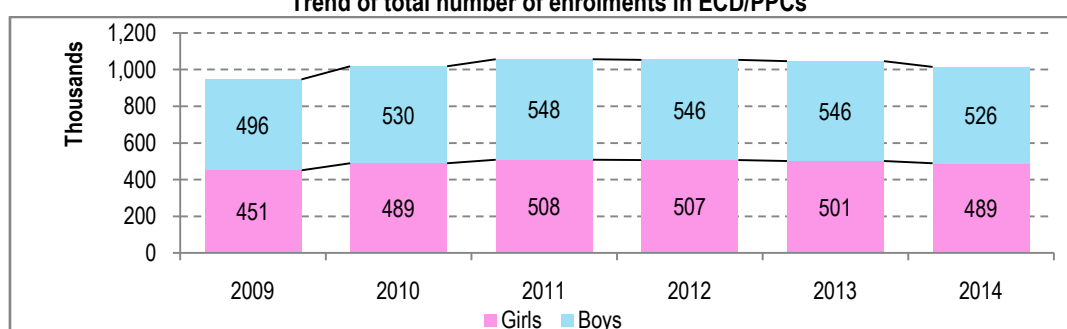

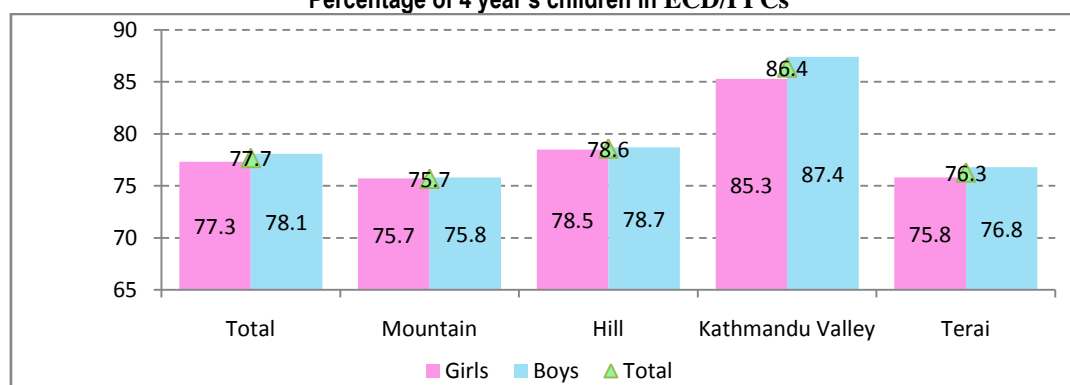

Figure 2.4 below shows the percentage of 4 year's children in ECD/PPCs by eco-belts against the population of 4 year age. It shows that the highest enrolment rate is in the Valley (86.4%) and the lowest is in the Mountain eco-belt (75.7%). The Hill and the Terai eco-belts have 78.6% and 76.3% respectively. An analysis by district shows that there are 36 districts with a low percentage of enrolment with regard to 4-year age children in ECD/PPCs (compared to the 77.7% national average) (See Annex: I).

Figure 2.4
Percentage of 4 year's children in ECD/PPCs

2.2 Dalit and Janajati children enrolled in ECD/PPCs

Table 2.3 below shows that out of the total enrolment of 1,014,339 in 2014-015 in ECDs/PPCs 18.0% are Dalit and 38.6% are Janajati. Among the Dalit children enrolled, 18.8% are girls and 17.4% are boys. Likewise, with regard to the Janajati 38.8% are girls and

38.5% are boys in the total enrolment. The GPI for ECD/PPC in total, Dalit and Janajati enrolment are 0.93, 1.0 and 0.94 which shows a higher level of participation of Dalit girls in comparison to the total and Janajati girls. Hence, the data suggests that the gender situation has approached to parity in Dalit enrolment. Figure 2.5 below presents the percentage of children in ECD/PPCs by social groups to the total children enrolled in ECD/PPCs (See Annex: I_A).

Table 2.3_A
Number of Dalit and Janajati children in ECD/PPCs

Students	Number of children in ECD/PPC			Percentage share in total children	
	Total	Dalit	Janajati	Dalit	Janajati
Girls	488,628	91,747	189,484	18.8	38.8
Boys	525,711	91,337	202,207	17.4	38.5
Total	1,014,339	183,084	391,691	18.0	38.6

Figure 2.5
Percentage of Dalit and Janajati in total children in ECD/PPCs

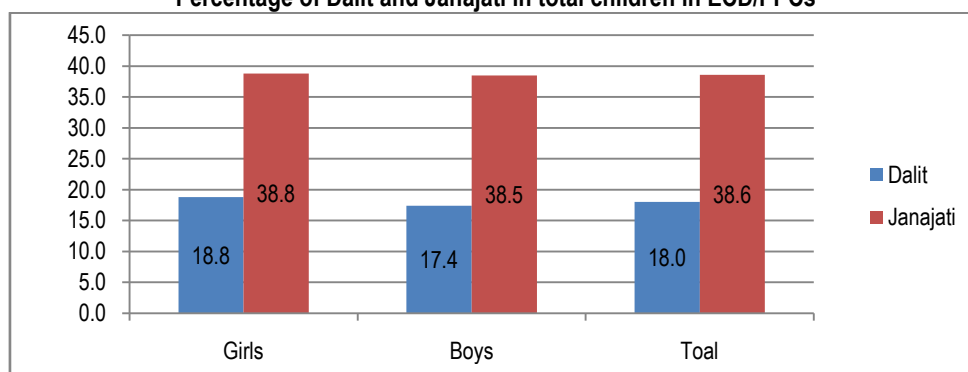

Table 2.3_B below shows the status of children with major types of disabilities in ECD/PPCs in the school year 2014-015. Of the total number of children enrolled in ECD/PPCs the total number of children by types of major disabilities is 2,064 (0.20%). Of them (2,064 in total) 0.06%, 0.07%, 0.02%, 0.01%, 0.2%, 0.00% and 0.03 have a physical (disabilities on mobility of physical parts), intellectually impaired (children with psychological difficulties, intellectual limitations and autism), hearing impaired (children who are profoundly deaf and children with limited hearing and also those who use sign language for conversation), blind (visually impaired or children who are not able to see and make differences of size and colour of any objects), low vision (with limited vision or children who are not able to see and read the E-chart/Vision chart from 10 yard), deaf and blind (both visually and hearing impaired children) and vocal and speech-related disability respectively in the school year 2014-015 (See Annex: I_B).

Table 2.3_B
Number of children by major types of disabilities in ECD/PPCs

Student	Major types of disabilities							Total Disabled
	Physical (affecting mobility)	Intellectually impaired	Hearing impaired	Visually impaired	Low Vision	Hearing and Visually impaired	Vocal and speech related disabilities	
Girls	276	330	118	21	69	12	154	980
Boys	300	338	123	31	87	25	180	1,084
Total	576	668	241	52	156	37	334	2,064
% in total enrollment	0.06	0.07	0.02	0.01	0.02	0.00	0.03	0.20

2.3_A Percentage of new entrants in Grade One with ECD/PPC experiences

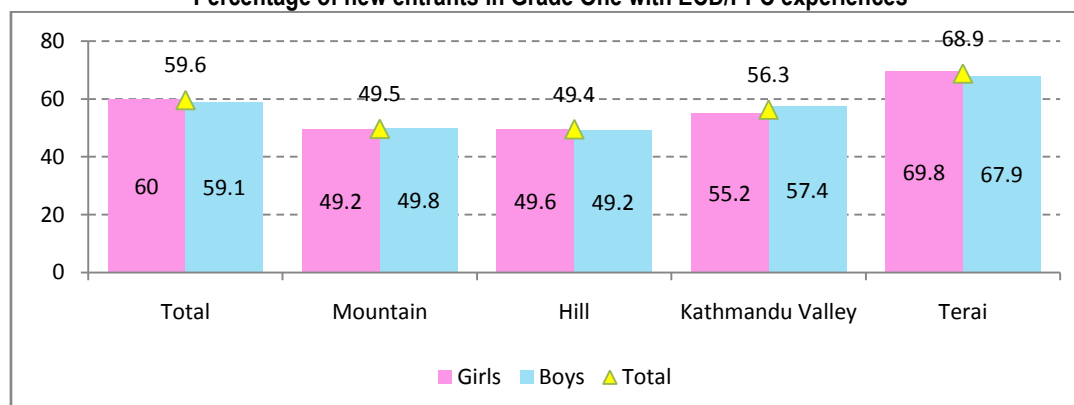

The indicator “Percentage of new entrants in Grade One with ECD/PPCs experiences” is instrumental for improving teaching learning and also it helps to improve the internal efficiency in early grades of primary education. The following Table 2.4 and figure 2.6 present the percentage of new children, with ECD/PPC experiences in Grade One, which is 59.6% (Compared to 56.9% in the last school year), higher by 2.7 percent points than the previous school year (56.9%). Among the eco-belts, the Terai eco-belt shows the highest intake (68.9%) of new children in Grade One with ECD/PPC experiences. Also, the variation in terms of the GER in ECD/PPCs and the percentage of new children in Grade One with ECD/PPC experiences, especially in the Valley eco-belt shows that the proportion of children with ECD/PPC experiences in Grade One is low compared to the GER (See Annex: II_A).

Table 2.4_A
Number and Percentage of new entrants in Grade One with ECD/PPC experiences by eco-belts

Eco-belts	New enrolment in Grade One			New enrolment in Grade One with ECD/PPC experiences			% of new students in Grade One with ECD/PPC experiences		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	42,803	40,237	83,036	21,056	20,036	41,092	49.2	49.8	49.5
Hill	163,893	161,246	325,138	81,216	79,321	160,537	49.6	49.2	49.4
Valley	24,412	26,762	51,174	13,472	15,358	28,830	55.2	57.4	56.3
Terai	234,500	228,301	462,799	163,696	155,098	318,794	69.8	67.9	68.9
Total	465,608	456,546	922,147	279,440	269,813	549,253	60.0	59.1	59.6

The availability of more Pre-primary classes in private institutions (e.g., Nursery, L.K.G, and U.K.G.) helps increase the GER in the Valley. It has been observed that, the increasing trend of ECD/PPC experiences in Grade One has contributed to reduce the repetition rates (i.e. from 29.4% in 2007 to 28.3% in 2008, 26.5% in 2009 and 22.6% in 2010, 21.3% in 2011, 19.9% in 2012, 17.5% in 2013 and 15.2% in the school year 2014), dropout rates (i.e. from 16.1% in 2007 to 12.1% in 2008, 9.9% in 2009, 8.3% in 2010, 7.9% in 2011, 7.7% in 2012, 7.1% in 2013 and 6.5% in the school year 2014) and increase the retention rates for Grade One (See Table 3.24).

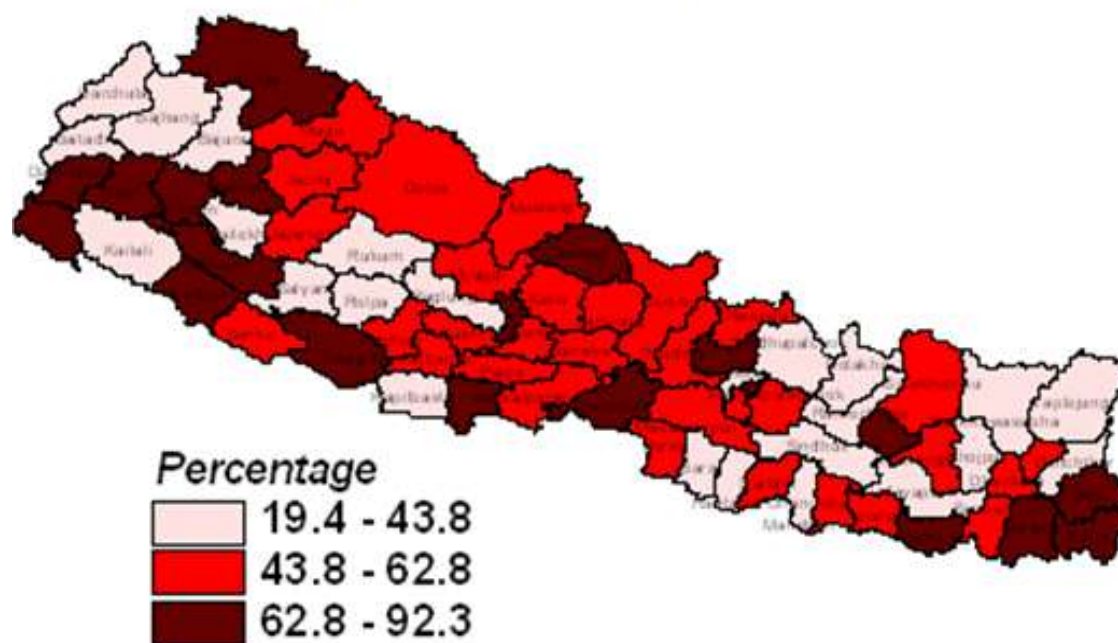

Figure 2.6
Percentage of new entrants in Grade One with ECD/PPC experiences

The Map 2, below, presents the overall percentage of new children in Grade One with ECD/PPC experiences by districts. Out of 75 districts, there are 45 districts (of these 5 districts: Khotang, Pyuthan, Jajarkot, Bajura and Achham show less than 30% of children are in grade 1 as the new entrants with the ECD/PPCs experiences) with low percentage (lower

than the national target 62.0% in SSRP) of new children with ECD/PPC experiences in Grade One in the school year 2014-2015.

Map:2 Percentage of new children enrolled in grade 1 with the ECD/PPCs Experiences

2.3_B Number of ECD/PPCs facilitators/teachers by sex, Dalit, Janajati, Others, qualification and percentage of training

Table 2.3_B below shows the total number of ECD/PPCs facilitators/teachers by sex, Dalit, Janajati, Others, qualifications and their percentage of training. Overall, the total number of ECD/PPCs facilitators/teachers is 46,005 with 41,447 (90.1%) females in all types of ECD/PPCs (35,121 ECD/PPCs including 5,087 PPCs of institutional schools). Of the total numbers of ECD/PPCs facilitators/teachers, the percentage shares of Dalit, Janajati and Others are 6.3%, 30.5% and 63.2% respectively. Compared to their share in the total population of the country, the percentage of Dalit facilitators is quite lower compared to the facilitators from the Janajati and others. Likewise, the status of the ECD/PPCs facilitators/teachers by their qualifications shows that almost 6.4% of facilitators/teachers are with under SLC, 56.0% are with SLC and 37.5% of the ECD/PPCs facilitators/teachers are with more than the SCL qualification. Furthermore, the table 2.4_B below shows the percentage of ECD/PPCs facilitators/teachers with their training status, where altogether 87.5% ECD/PPCs facilitators/teachers are trained and the rest are untrained in all types of ECD/PPCs (See Annex: II_B).

Table 2.4_B
Number of ECD/PPCs facilitators by sex, Dalit, Janajati qualification and percentage of training

Eco-belts	ECD/PPC Facilitators by sex			ECD/PPC Facilitators by Dalit and Janajati			ECD/PPC Facilitators by qualification			Facilitators by training	
	Females	Males	Total	Dalit	Janajati	Others	< SLC	SLC	> SLC	Trained	Untrained
Mountain	3,250	428	3,678	273	1,171	2,234	305	2055	1318	83.1	16.9
Hill	16,909	1,704	18,613	1,220	6,186	11,207	1783	10198	6632	83.5	16.5
Valley	3,713	824	4,537	150	1,238	3,149	112	2074	2351	94.8	5.2
Terai	17,575	1,602	19,177	1,278	5,423	12,476	753	11452	6972	90.5	9.5
Total	41,447	4,558	46,005	2,921	14,018	29,066	2953	25779	17273	87.5	12.5

SECTION III

3.1 School education

Since the school year 2009/010, the government of Nepal has been implementing the School Sector Reform Programme (SSRP), aiming to restructure the school education system with basic education (consisting of grades 1-8, with 5-12 years) and secondary education (consisting of grades 9-12, with 13-16 years). Subsequently, in the school education system while primary and lower secondary levels are included in the basic education and secondary and higher secondary levels are included in the comprehensive secondary education of the country. Schools with primary level provide grade one to five years of education, whereas lower secondary schools provide further three years of education. Secondary schools offer two more years of education, while higher secondary schools also offer two more years of education after school leaving certificate (SLC) examinations. As described previously, early childhood development (ECD)/pre-primary classes (PPCs) are offered as building a foundation for children and preparing them for grade one. The prescribed population age groups for different levels of school education are 5-9 years for primary, 10-12 years for lower secondary, 13-14 years for secondary and 15-16 years for higher secondary education programme.

The majority of schools in the country include primary level (grades 1-5), i.e. most of the lower secondary, secondary and higher secondary schools include primary level. Very few of them offer only grades 6-8 (lower secondary level) or only grades 9-10 (secondary level). At the higher secondary level it is more common that some schools offer only grades 11-12.

Broadly, schools are categorized into two types: Community schools and institutional schools. Further, community schools are of three types: (i) community-aided (schools, which are fully supported by the government for teachers' salary and other expenses), (ii) community-managed (schools, which are fully supported by the government for teachers salary and other funds but their management responsibility lies with the community) and (iii) community-unaided (schools, which are either getting partial support or no support from the government). Besides, there are institutional schools, which are supported by founders, parents and trustees.

In addition to these broad categories, there are some schools running as religious schools such as Madarasa, Gumba/Vihar and Ashram/Gurukul that have received support from the government when they have been mainstreamed into the formal education system by registering with the DEO, following the Education Act and Regulation.

3.2 Basic Education

As the School Sector Reform Programme (2009-015) has institutionalized the education sector structure with basic (grades 1-8) level and secondary (grades 9-12) level, the information in the following sections reflects this new education structure. More particularly, this section presents the status of basic education in terms of schools, students, teachers and other indicators.

3.2.1 Number of Schools

The Table 3.1 and the figures 3.1 and 3.2 below present the total number of primary and lower secondary schools by units, levels and their percentage in total registered at DEOs

database throughout the country in the school year 2014-2015. Of the total 34,806 schools, 34,335 are primary levels, 14,952 are lower secondary and 34,506 are basic levels of schools. It shows that, in total 417 schools (especially in the Terai eco-belt) were closed and merged in the last school year, so that the number of schools has decreased in the current school year 2014-015. Compared to the last school year the lower secondary level has increased by 0.4% (57 levels) in the current school year. It indicates that of the total primary schools in the last school year, 57 schools were upgraded into lower secondary level. The distribution of primary schools by eco-belts shows that there are 4,225 schools in the Mountain, 17,566 are in the Hill, 2,206 are in the Valley and 10,809 are in the Terai belt (See Annex: III_A).

Among the eco-belts, the highest number of schools is in the Hill and the lowest number is in the Valley eco-belts. Likewise, there are 34,506 basic level schools with Grades 1-8 in the country, with 4,218 in the Mountain, 17,514 in the Hill, 2,084 in the Valley and 10,690 in the Terai belt.

Table 3.1
Number of schools by eco-belts (in units and levels)

Eco-belts	Total School (Units)	Primary level (Grades 1-5)	Lower secondary level (Grades 6-8)	Basic level (Grades 1-8)
Mountain	4,225	4,187	1,607	4,218
Hill	17,566	17,429	6,830	17,514
Valley	2,206	2,070	1,686	2,084
Terai	10,809	10,649	4,829	10,690
Total	34,806	34,335	14,952	34,506

Figure 3.1
Number of schools by eco-belts (in levels)

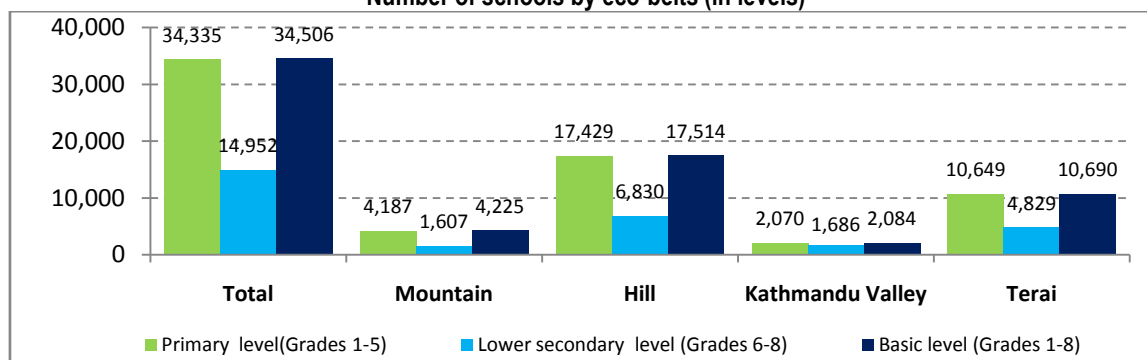

Figure 3.2
Percentage distribution of schools by eco-belts and levels in total levels

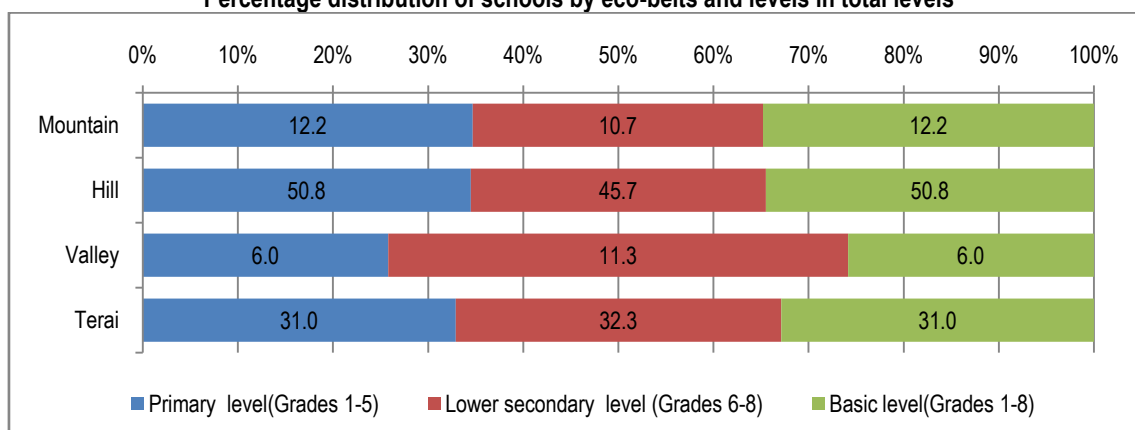

Table 3.2 below shows the distribution of schools running by grades in the school year 2014-015. Out of the total 25,686 schools in unit at the basic level (grades 1-8), the majority of schools (12,549 schools) are running with grades 1-5 (primary level). At the primary level, there are small schools with only grade(s) 1, 1-2 and 1-4, which will eventually upgrade in the successive year/s with the consent and approval of DEOs. At the lower secondary level, the majority of schools are running with grades 1-8; however, there is a significant number of schools with grades 1- 7 and less number of schools with grades 6-7 and 6-8 (Annex: III_A).

Table 3.2
Number of schools by units (running by grades)

Grade	Number of schools (in Unit)
1	286
1-2	591
1-3	4,645
1-4	1,483
1-5	12,549
1-6	498
1-7	859
1-8	4,761
6-7	6
6-8	8
Total	25,686

Table 3.3 and figure 3.3 below explain the number of school levels, excluding the religious schools by types and levels in the school year 2014-015. At primary level, out of the total 33,453 school levels, 28,098 are community schools and 5,355 are institutional schools. Similarly, at lower secondary level, out of the total 14,902 school levels, 11,056 are community schools and 3,846 are institutional schools. Likewise, among 33,611 basic school levels 28,236 are community and 5,375 are institutional schools (See Annex: III_A-C).

Table 3.3
Number of schools by levels and types (Excluding religious schools)

Levels and Types of Schools	Community (in levels)	Institutional (in levels)	Total (in levels)
Primary (1-5) level	28,098	5,355	33,453
Lower Secondary (6-8) level	11,056	3,846	14,902
Basic (1-8) level	28,236	5,375	33,611

Figure 3.3
Distribution of schools by level

Table 3.4 below shows the number of religious primary, lower secondary and basic schools by types, units and levels. Out of the total 895 (Compared to 879 in the last school year) reported religious schools in the Flash I, 2014 school census, 882 primary levels, 50 lower secondary levels, and 895 basic education levels were reported. The Madarasas are mainly located in Terai, the Gumbas in Hill and Mountain, and the Ashram/Gurukul in the Hill and Terai eco-belts (See Annex: IV_A-C).

Table 3.4
Distribution of religious schools by unit and levels

Religious Schools	Total number of schools (in Unit)	Number of school by level		
		Primary	Lower Secondary	Basic
Madarasa	745	744	27	745
Gumba/Vihar	78	76	7	78
Ashram/Gurukul	72	62	16	72
Total	895	882	50	895

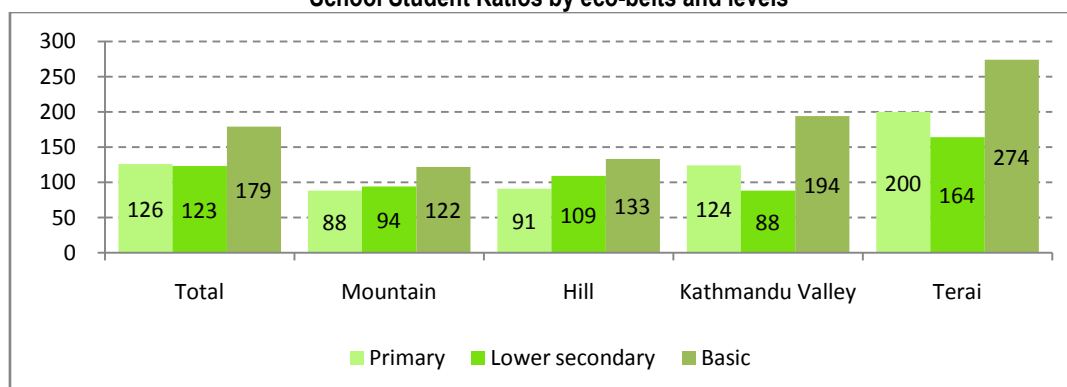

Table 3.5 and figure 3.4 below show the School Student Ratio (SSR)² by levels and eco-belts at primary, lower secondary and basic levels. This indicator presents the extent of schools' capacity to accommodate the students. The national average of School Student Ratio at primary level is 1:126 (Compared to 1:127 in the last school year). That is, on average, a primary level school is serving 126 children. Similarly, the School Student Ratio at lower secondary level is 1:123 (Similar to 1:123 in the last school year) and at basic education level it is 1:179 (Compared to 1:178 in the last school year) (See Annex: V).

Table 3.5
School Student Ratios by eco-belts and levels

Eco-belts	Primary	Lower secondary	Basic
Mountain	88	94	122
Hill	91	109	133
Valley	124	88	194
Terai	200	164	274
Total	126	123	179

The highest School Student Ratios are found in the Terai at all levels. It is the only eco-belt which has higher rates than the national average at all levels. The lowest School Student Ratio is found in Mountain and Hill at the primary level and in Valley at the lower secondary level (See Annex: V).

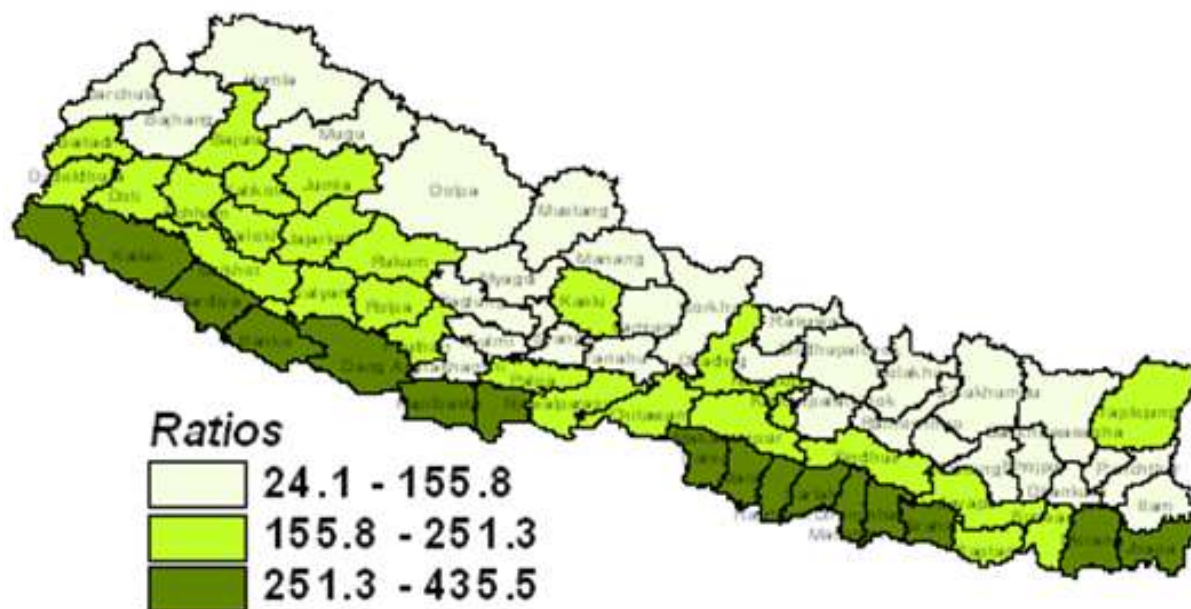

Figure 3.4
School Student Ratios by eco-belts and levels

² This indicator is calculated by taking the total number of schools by level and the total number of students in the respective school level in a specific school year.

The Map: 3 below presents the School Student Ratio at basic level in the school year 2071 (2014/015) by districts. All together, there are 51 districts at primary level and 50 districts at basic level with a high School Student Ratio (more than the national average). These districts are mostly in the Terai and some of them are in the Hill eco-belt.

Map:3 Basic level School Student Ratio

3.2.2 Enrolment

This section deals with enrolments at basic level with the disaggregated information of primary, lower secondary and basic levels and also by types of schools and other related indicators in the school year 2014-015.

(1) Total number of enrolments at primary, lower secondary and basic levels

Table 3.6 and figure 3.5 below show the trends of total enrolment at the primary, lower secondary and basic levels since the school year 2009. The overall enrolment at primary level in the school year 2014 is 4.43 million, which is similar to 4.90 million in the school year 2009. The average annual growth rate in enrolment at primary level is -0.1% point in this period. However, the enrolment at the lower secondary level reached 1.83 million in the school year 2014 from 1.60 million in the school year 2009. Compared to the last school year this has increased by 0.4% in the school year 2014-015. At the lower secondary level the average annual growth rate in enrolment is 2.7% point in this period. Likewise, the average annual growth rate for basic level in this period is -1.0%. It is worth noting that the average annual growth rates of girls are higher than the average annual growth rates of boys at both primary and lower secondary levels.

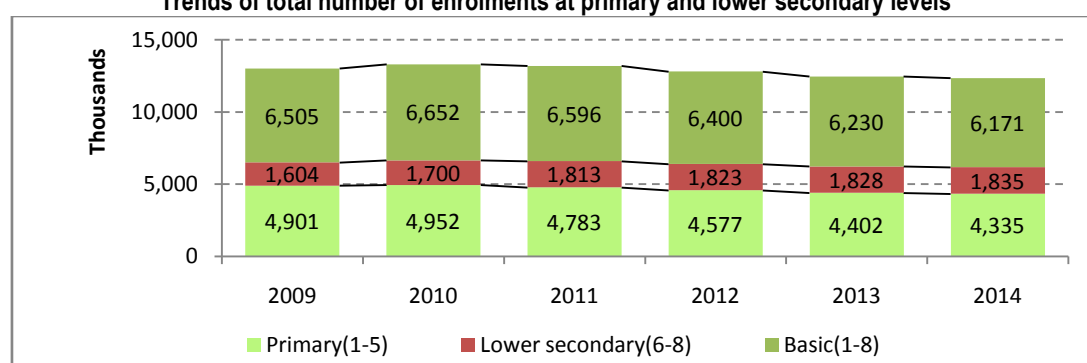

At the primary level, on average 1.5% (66,425 students) student has decreased in the current school year compared to the previous school year. The district level analysis shows that there are 62 districts, which reported a decreased enrolment at the primary level. Out of the remaining 13 districts, 8 districts (Bara, Bhaktapur, Mustang, Gorkha, Parbat, Rupandehi, Kalikot and Mugu) reported an increased enrolment by more than 1.0% at the same level.

Similarly, there are 31 districts with an increment of enrolment at the lower secondary level, of this there are 6 districts with more than 7% increment of enrolment at this level. The increase in enrolment at the lower secondary level indicates a high transition from primary to lower secondary level. At the basic level, the trend of enrolment has observed similar pattern as in the primary and lower secondary level.

Table 3.6
Trends of total number of enrolments at primary, lower secondary and basic levels

Level	2009	2010	2011	2012	2013	2014	Average annual growth rate
Primary(1-5)	4,900,663	4,951,956	4,782,885	4,576,693	4,401,780	4,335,355	-2.4
Lower secondary(6-8)	1,604,422	1,699,927	1,812,680	1,823,192	1,828,351	1,835,313	2.7
Basic(1-8)	6,505,085	6,651,883	6,595,565	6,399,885	6,230,131	6,170,668	-1.0

Figure 3.5
Trends of total number of enrolments at primary and lower secondary levels

As stated earlier with proper follow up and monitoring of the Flash Reporting System at school, RC and district level by the respective person and institution (i.e. Resource Person, School Supervisor, District Education Officer, REDs and DOE) and also well managed Flash data entry Software with necessary validation rules, the quality of data (with more consistency and accuracy) has improved. In addition, regarding the quality of data, as the DOE has initiated to establish the “School Level EMIS” with a viewpoint of improving the “School Record Keeping System” at the school level, among the 53 districts currently using this mechanism there are 5 districts (Dang, Sankhuwashava, Bhojpur, Siraha and Mustang) that have submitted their Flash I & II data by using the new mechanism and this Flash I Report 2014-015 is prepared based on the data of new mechanism for these 5 districts.

Table 3.7 below shows the number and share of girls in total enrolment by levels in the school year 2014/15. Overall, the shares of girls at all levels have slightly increased in the current school year, which are 50.8% (compared to 50.7% in the last school year) at the primary level, 50.7% (compared to 50.9% in the last school year) at the lower secondary level and 50.8% (compared to 50.6% in the last school year) at the basic level. The data shows that there is a minor change in the share of girls’ enrolment at all levels of basic education.

Table 3.7
Total number of enrolments at primary, lower secondary and basic levels by sex in 2014-015

Level	Girls	Boys	Total	% of girls' enrolment
Primary(1-5)	2,201,313	2,134,042	4,335,355	50.8
Lower secondary(6-8)	930,949	904,364	1,835,313	50.7
Basic(1-8)	3,132,262	3,038,406	6,170,668	50.8

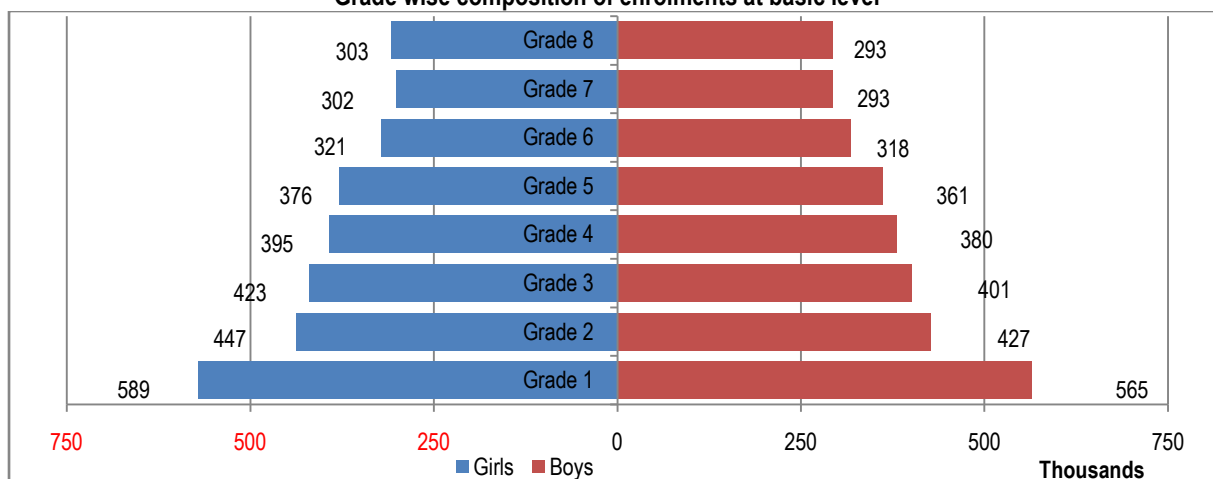

Table 3.8 and figure 3.6 below show the grade-wise composition of enrolment at primary, lower secondary and basic levels. The grade-wise enrolment at the primary level shows that the trend of the highest share of Grade One in total enrolment is continuing. However, this year enrolment shows a beginning of positive signs, indicating that the difference of shares within the primary level's grades is narrowing down (i.e. 26.2% in Grade One and 17.1% in Grade Five in the current school year compared to 33.8% in Grade One and 14.4% in Grade Five in 2004-05). The continuous progress on grade-wise higher promotion, and lower repetition and drop-out rates seems to contribute to narrow the gaps in the share of enrolment among all grades of primary level.

Table: 3.8
Grade-wise composition of enrolment at the basic level

Grade	Girls	Boys	Total	Share of girls by grades and levels	Grade-wise share in total enrolment by levels	Grade-wise share in total enrolment of basic education
Grade 1	571,856	564,577	1,136,433	50.3	26.2	18.4
Grade 2	438,195	426,592	864,787	50.7	19.9	14.0
Grade 3	419,972	401,322	821,294	51.1	18.9	13.3
Grade 4	392,727	380,215	772,942	50.8	17.8	12.5
Grade 5	378,563	361,336	739,899	51.2	17.1	12.0
Grades 1-5	2,201,313	2,134,042	4,335,355	50.8	100.0	70.3
Grade 6	321,426	318,224	639,650	50.3	34.9	10.4
Grade 7	301,582	292,950	594,532	50.7	32.4	9.6
Grade 8	307,941	293,190	601,131	51.2	32.8	9.7
Grades 6-8	930,949	904,364	1,835,313	50.7	100.0	29.7
Total (G. 1-8)	3,132,262	3,038,406	6,170,668	50.8		100.0

Out of total enrolment at basic level (Grades 1-8) a little over one fifth (18.4%) of students is in Grade One and 14.0% in Grade Two. Likewise, 12.0% and 9.7% of students are in Grades Five and Eight respectively. The grade-wise composition at the basic level shows that almost 32% of the total numbers of students are in Grades One and Two. From a gender perspective, the composition of grade-wise enrolments is fairly balanced and the data shows that gender parity has been achieved in all grades at the basic level (See Annex: VI & XXX). However, it is a challenge to improve the progression rate so that all children admitted in Grade One are retained, progress through the grades efficiently and complete basic education of good quality to achieve universal basic education (UBE) within specified/stipulated time period.

Figure 3.6
Grade wise composition of enrolments at basic level

The table 3.9, 3.10, 3.11 and the figure 3.7 below show the number of students, their shares by types of schools and the percentage of girls, boys and GPI by types of schools. It reveals that 84.6% (Compared to 84.6% in the last school year) of total primary level children are in community schools and the remaining 15.4% are in institutional schools. Unlike the overall situation of gender, the proportion of girls' enrolment at primary level in institutional schools is lower (13.2%) as compared to the proportion of boys (17.7%), demonstrating unequal treatment between boys and girls. For all types of community schools the situation is contrary; at all levels girls have a higher enrolment rate than boys. Compared to the previous school year the enrolment share of institutional schools in total enrolment has not changed in the current school year.

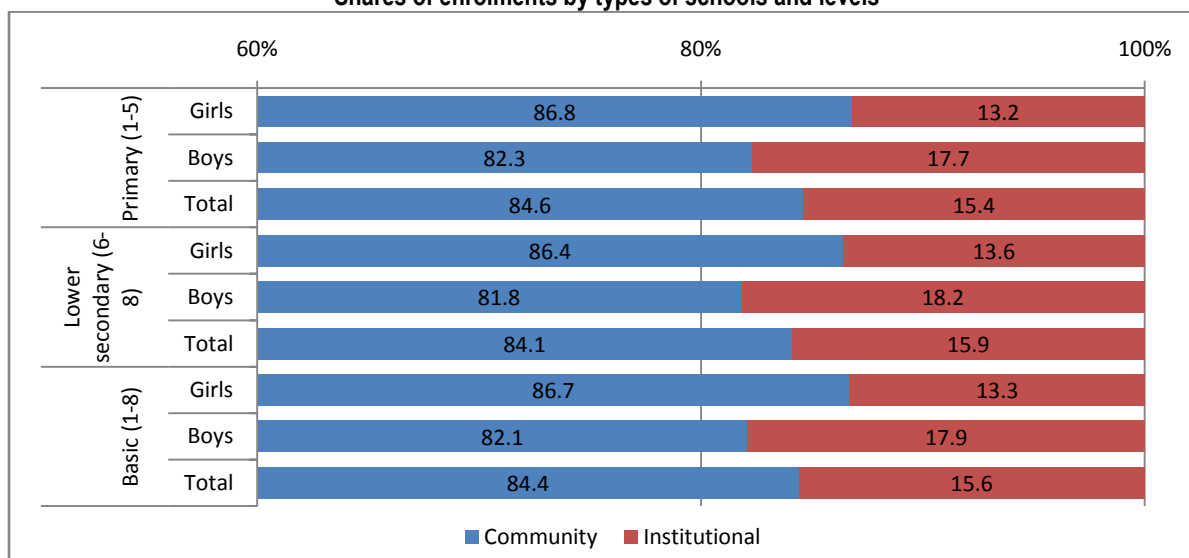

Table 3.9
Number of students' enrolment by types of schools and levels

Types of schools	Primary (1-5)			Lower secondary (6-8)			Basic (1-8)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
All types of Community	1,910,266	1,755,393	3,665,659	804,757	739,482	1,544,239	2,715,023	2,494,875	5,209,898
Institutional	291,047	378,649	669,696	126,192	164,882	291,074	417,239	543,531	960,770
Total	2,201,313	2,134,042	4,335,355	930,949	904,364	1,835,313	3,132,262	3,038,406	6,170,668

Table 3.10
Shares of enrolments by types of schools and levels

Types of schools	Primary (1-5)			Lower secondary (6-8)			Basic (1-8)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
All types of Community	86.8	82.3	84.6	86.4	81.8	84.1	86.7	82.1	84.4
Institutional	13.2	17.7	15.4	13.6	18.2	15.9	13.3	17.9	15.6

Figure 3.7
Shares of enrolments by types of schools and levels

Interestingly, at all levels, shares of girls are considerably low in institutional schools compared to the shares of enrolment in community schools in the current school year. The percentage of girls in institutional schools is 43.5% at the primary level, 43.4% at the lower secondary level and 43.4% at the basic level. On contrary to this, both the percentage of girls and the GPI are higher in all types of community schools, which reveal the different attitude of parents on choice of school education for girls and boys (See Annex: VII, VIII & XXXIII

& XXXIV). It points out that if parents have to make a choice for the education of their children in a private school, they prefer their son to daughter.

Table 3.11
Percentage of Girls and Boys in total enrolments by types of schools and levels

Types of schools	Primary (1-5)			Lower secondary (6-8)			Basic (1-8)		
	Girls	Boys	GPI	Girls	Boys	GPI	Girls	Boys	GPI
All types of Community	52.1	47.9	1.09	52.1	47.9	1.09	52.1	47.9	1.09
Institutional	43.5	56.5	0.77	43.4	56.6	0.77	43.4	56.6	0.77
Total	50.8	49.2	1.03	50.7	49.3	1.03	50.8	49.2	1.03

(2) Dalit and Janajati enrolments at primary, lower secondary and basic levels

Tables 3.12 and 3.13 together with figure 3.8 below show the enrolment of Dalit and Janajati students at primary, lower secondary and basic levels. At the primary level the enrolment share of Dalit is 19.9%, whereas the shares at lower secondary and basic levels are 14.5% and 18.3% respectively. When compared to the last year's status of shares, there are not considerable changes at levels of basic education (See Annex: IX & XXXI). Similarly, table 3.13 depicts the shares of Janajati students by levels. Compared to the share of Janajati enrolment in the previous school year, the share of enrolment in the total enrolment at primary level has remained almost same in the current school year; similarly, there has been a slight decrease at lower secondary level (from 38.7% to 38.5%). The share at basic level is 35.2% (Compared to 35.3% in the last school year) (See Annex: X & XXXII). The shares of enrolment by social groups in total enrolment illustrate a gradual improvement in the accuracy of reporting for the last two years.

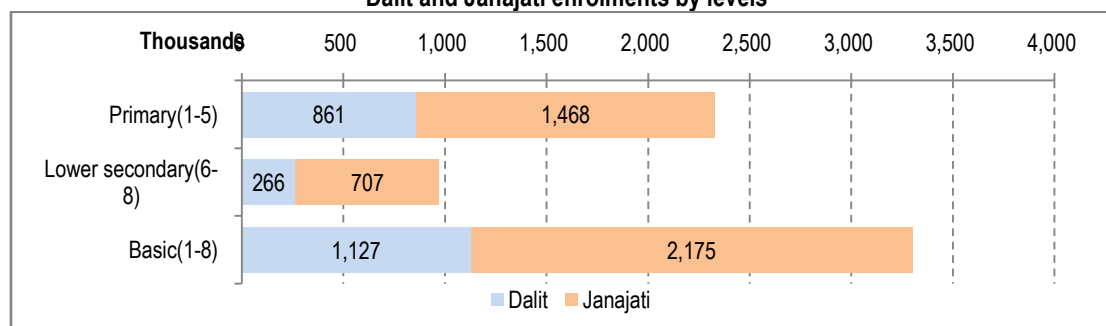

Table 3.12
Dalit enrolments at primary, lower secondary and basic levels

Level	Girls	Boys	Total	% of enrolment in total
Primary(1-5)	440,036	420,687	860,723	19.9
Lower secondary(6-8)	136,450	129,467	265,917	14.5
Basic(1-8)	576,486	550,154	1,126,640	18.3

Table 3.13
Janajati enrolments at primary, lower secondary and basic levels

Level	Girls	Boys	Total	% of enrolment in total
Primary(1-5)	741,317	726,589	1,467,906	33.9
Lower secondary(6-8)	369,244	337,429	706,673	38.5
Basic(1-8)	1,110,561	1,064,018	2,174,579	35.2

Figure 3.8
Dalit and Janajati enrolments by levels

(3) Percentage of girls and boys and gender parity indexes in enrolment at primary, lower secondary and basic levels by social groups.

The Gender Parity Index (GPI) explains the ratio of female to male values (or male to female in certain cases) of a given indicator. A GPI of 1 indicates parity between sexes; a GPI above or below 1 indicates a disparity in favor of one sex over the other. For gender parity to exist, the GPI value should be within the range of 0.97 and 1.03.

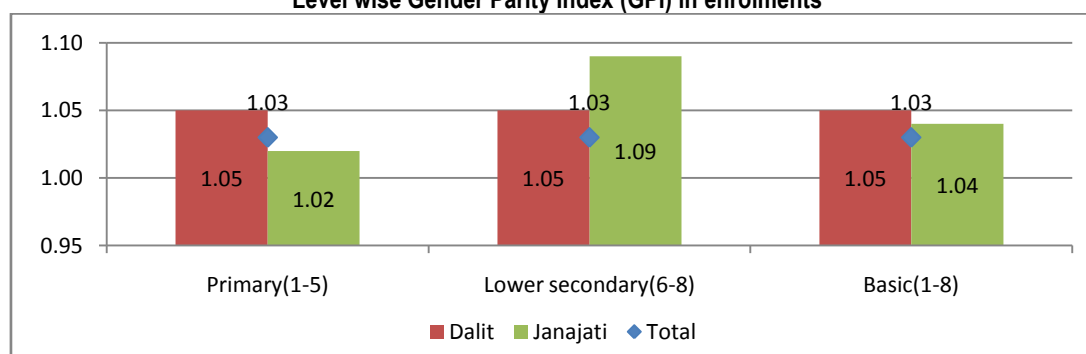

The following table 3.14 and figure 3.9 explain the percentage of girls and boys in total enrolment and measure progress towards gender equity in enrolment in the education system by total, Dalit and Janajati categories and level. Table 3.14 and figure 3.9 below depict the percentage of students by sex and the GPI in enrolments at primary, lower secondary and basic levels of total, Dalit and Janajati students based on the school census 2014-015. The shares of enrolment in total, Dalit and Janajati girls are 50.8%, 51.1% and 50.5% at primary level, whereas the shares of girls at lower secondary level are 50.7%, 51.3 % and 52.3% , and 50.8%, 51.2 % and 51.1% at the basic level.

It clearly demonstrates that the gender parity has been achieved in basic education, including primary and lower secondary education (1.03 at primary level, 1.05 at lower secondary level and 1.04 at basic level). It explains the GPI in enrolment at all levels and social categories has been achieved. The GPI for Dalit students has increased to 1.05 in the school year 2014 at the primary level and at the lower secondary level it has also increased to 1.05. Similarly, it has increased to 1.05 in the school year 2014 at the basic education level (Grades 1-8). An identical positive trend is noted for Janajati students as well (1.02 in 2011 to 1.02 in 2014 at primary and 1.08 in 2011 to 1.09 in 2014 at lower secondary). Likewise, the GPI for basic level in Janajati enrolment has reached to 1.04 in the school year 2014.

Table 3.14
Percentages of students by sex and Gender Parity Index (GPI)

Level	Total			Dalit			Janajati		
	Girls	Boys	GPI	Girls	Boys	GPI	Girls	Boys	GPI
Primary(1-5)	50.8	49.2	1.03	51.1	48.9	1.05	50.5	49.5	1.02
Lower secondary(6-8)	50.7	49.3	1.03	51.3	48.7	1.05	52.3	47.7	1.09
Basic(1-8)	50.8	49.2	1.03	51.2	48.8	1.05	51.1	48.9	1.04

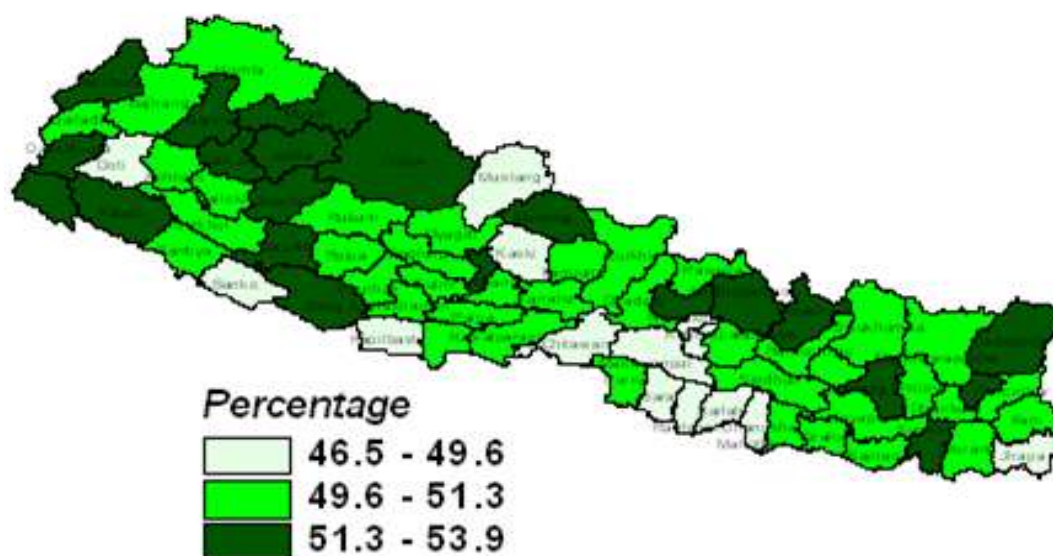

Figure 3.9
Level wise Gender Parity Index (GPI) in enrolments

The following Maps 4 and 5 present the status of girls' percentage at primary and basic levels in total enrolments in the school year 2014-2015. At the primary level, there are 19 districts with girls' percentage below the national average (50.8%). Similarly, at the basic level, there

are 17 districts with girls' percentage less than the national average (50.8%). Out of 75 districts, there are 9 districts: namely Rautahat, Bara, Kapilbastu, Mahottari, Lalitpur, Kathmandu, Kaski, Bajhang and Sarlahi with less than 50.8% of girls at the basic level.

Map: 4 Percentage of girls at primary level in total enrolment

Map: 5 Percentage of girls at basic level in total enrolment

(4) Enrolment at primary, lower secondary and basic levels by disadvantaged Janajati

Tables 3.15 and 3.16 below present the status of Janajati students from extremely deprived groups at primary and lower secondary levels in the school year 2014-015. Based on the category of 59 Janajati groups into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of 22 ethnic groups, who are classified as extremely-deprived groups (See Annex: XI_A-B & XXXV_A-B).

In total, from these 22 ethnic groups, there are 96,333 (Compared to the last school year 90,405 children) children at the primary level, 31,627 (Compared to the last school year

31,513 children) children at the lower secondary level and 127,960 children at the basic level registered at schools in the current school year 2014-2015. The 96,333 children constitute about 2.2% of the total primary level enrolment. Interestingly, the share of girls (51.4%) is higher than the share of boys in their total primary education enrolment. Even in the lower secondary education the share of girls (53.2%) is higher compared to the share of boys. The tables 3.15 and 3.16 below demonstrate that there are 6 ethnic groups at primary level and 8 ethnic groups at lower secondary level with more than 200 children, ranging between minimum 37 (Surel) and maximum 195 (Siyar) at primary level and minimum 5 (Bankaria) and maximum 189 (Raji) at lower secondary level. The total children of these 6 and 8 ethnic groups account for 724 at primary and 474 at lower secondary levels, necessitating a particular policy attention. While retention of all children enrolled in Grade One with a view to ensuring universal basic education (UBE) is vital, it is imperative to acknowledge the need to look at the profile of these children who are at risk of failing to complete basic education and identify strategies for preventing their dropout.

Table 3.15
Number of enrolment by extremely disadvantaged Janajati at primary level

Janajati Casts	Girls	Boys	Total	% in total enrolment	Janajati Casts	Girls	Boys	Total	% in total enrolment
Bankaria	55	37	92	0.00	Majhi	9,621	9,049	18,670	0.43

Total of 22 Janajati						16,817	14,810	31,627	1.72

(5) Enrolment by major types of disabilities at primary, lower secondary and basic levels

Table 3.17 below shows the status of children with major types of disabilities at primary, lower secondary and basic levels in the school year 2014-015. The overall enrolment percentages of children by types of major disabilities in total enrolment at primary, lower secondary and basic levels are 1.1%, 0.9% and 1.04% respectively. Of them (47,882 in total) at primary level, 0.35%, 0.3%, 0.17%, 0.02%, 0.1%, 0.02% and 0.15 have a physical (disabilities on mobility of physical parts), intellectually impaired (includes children with psychological difficulties, intellectual limitations and autism), hearing impaired (children are profoundly deaf and children with limited hearing and also use sign language for conversation), blind (visually impaired or children who are not able to see and make differences between size and color of any objects), low vision (with limited vision or children who are not able to see and read the E-chart/Vision chart from 10 yard), deaf and blind (both the visually and hearing impaired children) and vocal and speech-related disability respectively.

In the same way, out of the total 16,465 students with a disability at lower secondary level, 0.36%, 0.15%, 0.13, 0.02% 0.14%, 0.02% and 0.09% has a physical, mental, deaf, blind, low vision, deaf and blind, and vocal and speech-related disability respectively. Similarly, out of the total 64,347 students at basic level with a disability, 0.35%, 0.25%, 0.16%, 0.02%, 0.11%, 0.02 and 0.13% have a physical, mental, deaf, blind, low vision, deaf and blind, and vocal and speech-related disability respectively (See Annex: XII_A & XII_B).

Table 3.17_A
Total number of students by major types of disabilities at primary, lower secondary and basic level

Level		Major types of disabilities							
		Physical (affecting mobility)	Intellectually impaired	Hearing impaired	Visually impaired	Low Vision	Hearing and Visually impaired	Vocal and speech related disabilities	Total Disabled
Primary	Girls	7,060	6,134	3,512	455	2,141	471	3,006	22,779
	Boys	7,989	6,684	3,739	453	2,170	502	3,566	25,103
	Total	15,049	12,818	7,251	908	4,311	973	6,572	47,882
	% in total enrollment	0.35	0.30	0.17	0.02	0.10	0.02	0.15	1.10
Lower secondary	Girls	3,224	1,357	1,096	194	1,304	156	691	8,022
	Boys	3,388	1,414	1,255	177	1,190	143	876	8,443
	Total	6,612	2,771	2,351	371	2,494	299	1,567	16,465

The table 3.17_B below shows the total number of students enrolled in the Flexible schooling programme in the school year 2014/015). Focusing on the school age children those who are out-of- schools, the DOE has designed and implemented the FSP to provide them educational opportunities in accordance with their flexible time. The DOE has also

established a support scheme to provide learning facilities and facilitators as well. Of the total enrolment (Table 3.8) at primary level altogether 12,428 students with 3,040 Dalit and 4,482 Janajati students enrolled in 235 Flexible Schooling programme in the school year 2014/015 (See Annex: XII_C).

Table 3.17_B
Total, Dalit and Janajati number of students in Flexible Schooling Programme (FSP)

Eco-belts	Total			Dalit			Janajati		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	725	718	1,443	129	128	257	229	239	468
Hill	4,005	3,739	7,744	1,054	945	1,999	1,514	1,356	2,870
Valley	419	327	746	47	36	83	275	233	508
Terai	1,257	1,238	2,495	329	372	701	325	311	636
Total	6,406	6,022	12,428	1,559	1,481	3,040	2,343	2,139	4,482

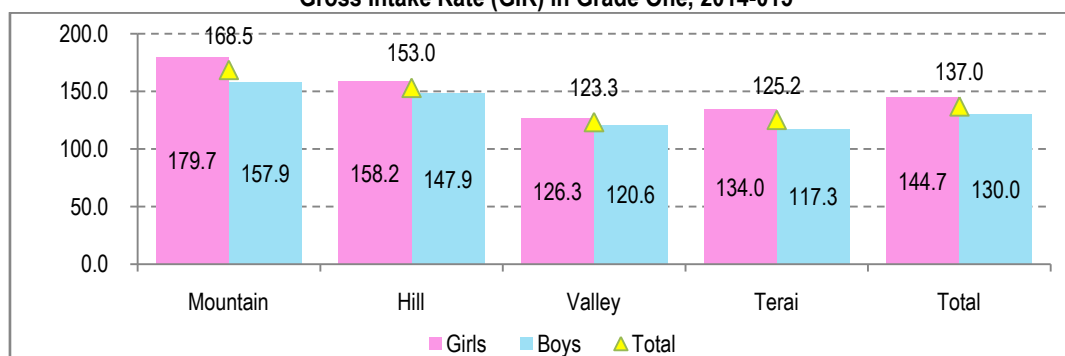

(6) Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One

The Gross Intake Rate (GIR) is an indicator relating to the new enrolment in the first grade at primary level. It explains the total number of new entrants in Grade One, regardless of age, expressed as a percentage of the population of five year age children (the official primary school-entrance age). It indicates the capacity of the education system to accommodate the new enrolled children in Grade One. Likewise, NIR is an indicator related to new entrants in Grade One who are five years of age, expressed as a percentage of the population of the same age. It shows the level of access to and admission in primary education of the eligible population of primary school-entrance age.

Table 3.18
Gross Intake Rate (GIR) in Grade One, 2014-015

Eco-belts	Girls	Boys	Total
Mountain	179.7	157.9	168.5
Hill	158.2	147.9	153.0
Valley	126.3	120.6	123.3
Terai	134.0	117.3	125.2
Total	144.7	130.0	137.0

Figure 3.10
Gross Intake Rate (GIR) in Grade One, 2014-015

The tables 3.18 and figure 3.10 above show the GIR in Grade One in the school year 2014-2015 by eco-belts and gender. Based on the total number of new enrolment in Grade One and the total number of 5 years' age group population³, the overall GIR for Grade One is 137.0⁴

³ The district wise single age group population was calculated for both the GIR and NIR in 2014-015 based on the data received from the CBS of current National Population Census 2011.

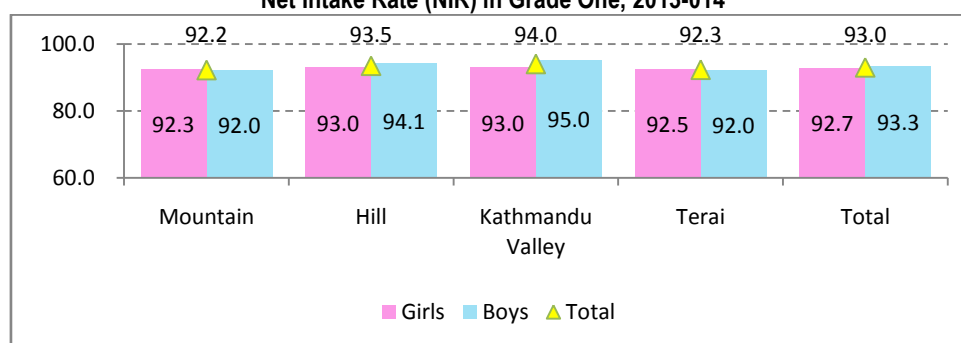

(Compared to 141.8% in the last school year) with 144.7% for girls and 130.0% for boys (See Annex: XIII). Compared amongst the eco-belts, Mountain belt shows the highest GIR followed by Hill, whereas the Valley shows the lowest GIR (123.3%). The overall GIR 137.0% is lower than the last school year by 4.8 percent points. Though the GIR has decreased, still it is higher than the set target (135%) for 2014 in the SSRP. The higher GIR indicates a late admission of children into Grade One. This is likely to be affecting the overall internal efficiency of primary education.

Similarly, the tables 3.19 and figure 3.11 below show the NIR in Grade One in the school year 2014-015 by eco-belts and gender. The overall Net Intake Rate (NIR) in Grade One is 93.0% (Compared to 91.6% in the last school year), with 92.7% for girls and 93.3% for boys. Among the eco-belts, There is not much difference with regard to NIR in Grade One; however the Valley eco-belt shows the highest NIR (94.0%) followed by Hill, Terai and Mountain eco-belt having the lowest NIR (92.2%). Compared with the NIR in the last school year, it has increased by 1.4 percent points. As compared to the national average there are 39 districts, mostly from the Mountain and Hill eco-belts, with a high NIR and 35 districts (including 11 Terai districts) with a low NIR (i.e. less than 93.0% of NIR) (See Annex: XIV).

Table 3.19
Net Intake Rate (NIR) in Grade One, 2013-014

Eco-belts	Girls	Boys	Total
Mountain	92.3	92.0	92.2
Hill	93.0	94.1	93.5
Valley	93.0	95.0	94.0
Terai	92.5	92.0	92.3
Total	92.7	93.3	93.0

Figure 3.11
Net Intake Rate (NIR) in Grade One, 2013-014

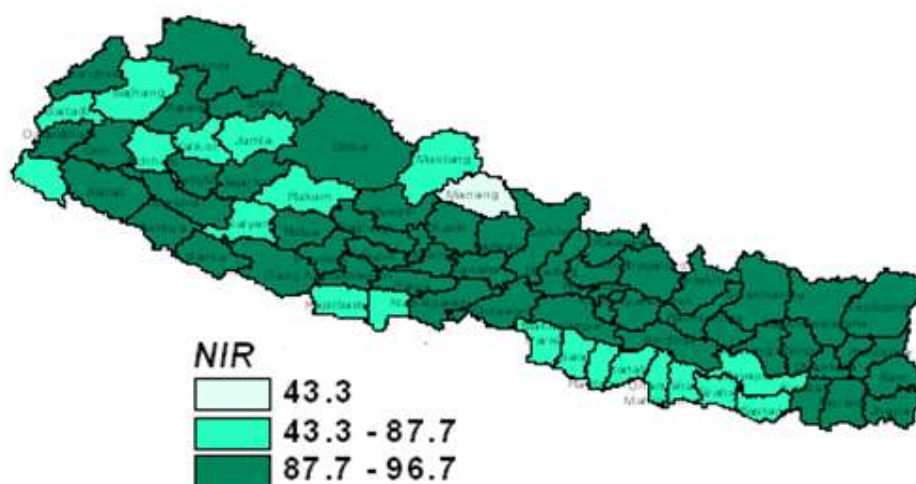

The following Map 6 presents the Net Intake Rate in Grade One by districts. Compared to the national average of NIR (93.0%), altogether there are 35 districts, which have more than 93.0% of NIR, whereas there are 16 districts, including seven districts (Saptari, Siraha, Ramechhap, Dhanusha, Mahottari, Bara and Parsa), with six in the Terai and one

4 The population used in the calculation of enrolment rates in all Flash Reports is based on the National Population Census Reports and the projected population by the CBS. In this regard, up to the Flash I Report 2012/013 the school age population was used based on the Population Projection for Nepal 2001-2021 publication, jointly published by the Central Bureau of Statistics (CBS) and the Ministry of Population and Environment (MOPE) in the year 2003, which was used to calculate both the GIR and NIR for 2012-013. Compared to the projected population used up to 2012/013, the projected population based on the National Population Census 2011, shows the population of the age group 4-9 is in decreasing trend and the population of the age group 10-16 is in increasing trend. So, the fluctuations in the enrolment rates depend on the increasing and the decreasing trends of the respective age group population.

(Ramechhap) in the Hill eco-belt, which have a low (less than 90% of NIR) NIR in Grade One in the current school year 2014/015. Overall, it suggests for more concerted and sustained efforts for the admission of all children of age five in Grade One in time, and ensure their universal retention, completion and learning of an acceptable quality.

Map 6 Net Intake Rate (NIR) in Grade One

(7) Gross and Net Enrolment Rates, and Gender Parity Index (GER, NER and GPI) at primary, lower secondary and basic levels

GER is an indicator related to total enrolment at a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population⁵ corresponding to the same level of education in a given school year. This indicator is widely used to show the general level of participation in a given level of education. Likewise, NER is an indicator related to total enrolment of the official age-group for a given level of education expressed as a percentage of the corresponding population. NER gives a more precise measurement of the extent of participation of children belonging to the official school age in a given level of education. In practice, a high NER denotes a high degree of participation by the official school-age population. The highest theoretical value is 100%. Increasing trends can be considered as reflecting improving participation at the specified level of education. When the NER is compared with the GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment.

The table 3.20 with figures 3.12 and 3.13 below show the level wise status of Gross Enrolment Rate (GER) and Net enrolment Rate (NER) of students at primary, lower secondary and basic levels by gender in the school year 2014-015. Based on the data presented in the table 3.20, the overall GER at primary level is 134.4% (Compared to 136.8% in the previous year) with 140.3% for girls and 128.9% for boys. When these figures are compared with the figures of the last year (136.8% total, 142.4% for girls and 131.6% for boys), the GERs in total as well as for both girls and boys have decreased (by almost 4.8% in total) at primary level (See Annex: XIII).

The overall NER at primary level is 96.2% with 95.7% and 96.6% for girls and boys respectively. When compared with the status of the last year (95.6% total, 95.0% for girls and 96.2% for boys), the NERs for both girls and boys as well as the total have increased. The

⁵ Regarding the population used in the calculation of enrolment rates (GER/NER), the same methods were applied as stated in earlier footnotes in the analysis of GIR and NIR.

present status of NER suggests that approximately 3.8% of 5-9 years' age group children (123,586 children) are out of formal primary schooling, of them the majority are girls (55.0%) (See Annex: XIV). Compared to the both indicators (GER and NER) related to the status of participation in primary education, it shows the GER has decreased by almost 4.8% points, whereas the NER has increased by 0.6% points, indicating more correct age groups children were enrolled in all primary grades. However, the number of students by age composition has not changed significantly. The table 3.20 further shows that the total GER at lower secondary level is 89.7% with GER of 92.0% for girls and GER of 87.4% for boys. Compared with the status of the previous year (84.3% total, 86.2% for girls and 82.4% for boys) the GER in total as well as for both genders has increased in the current school year.

The total NER at the lower secondary level is 74.6% with 75.5% for girls and 73.8% for boys in the school year 2014-015. When compared to the status of the previous year (72.6% with 73.5% for girls and 71.7% for boys), the scenario of this year shows some improvement. Based on the 10-12 years' age group population in the school year 2014-015, there are 74.6% students enrolled at lower secondary level. This suggests that almost 25.4% (Compared to 27.4% in the last school year) children of 10-12 years' age group population are not attending at lower secondary level. However, considering the high level of GER in primary education it suggests that some of them are in lower grades (i.e. grades 1-5), which needs further analysis for improvement in the overall/universal enrolment and participation of children of 10-12 years in lower secondary education in correct time. Similarly, the total GER and NER for the basic level are 117.1% and 87.6% (Compared to 115.7% and 86.3% in the last school year) respectively. This shows a slight increase both in the GER and NER at the basic level than in the last school year. Moreover, the GPIs in GER by level are 1.09 at primary level, 1.05 at lower secondary level and 1.08 at basic level. Likewise, the GPIs in NER by level are 0.99 at primary level, 1.02 at lower secondary level and 1.00 at basic level, which show the participations of girls and boys at all levels are equal in both the Gross and Net enrolment; and thus the Gender Parity Index at all levels is achieved.

Table 3.20
Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) by levels

Level	GER				NER			
	Girls	Boys	Total	GPI	Girls	Boys	Total	GPI
Primary(1-5)	140.3	128.9	134.4	1.09	95.7	96.6	96.2	0.99
Lower secondary(6-8)	92.0	87.4	89.7	1.05	75.5	73.8	74.6	1.02
Basic(1-8)	121.4	112.9	117.1	1.08	87.6	87.7	87.6	1.00

Figure 3.12
Gross Enrolment Rate (GER) by levels

Figure 3.13
Net Enrolment Rate (NER) by levels

The district level analysis shows that compared to the national average, there are 25 districts with a low GER at primary level and the rest 50 districts (mostly Mountain and Hill districts) have higher GER rates at primary level. Similarly, compared to the national average 39 districts show a low NER and the rest have high NER than the national average. Likewise, compared to the national average altogether 18 districts have lower GER and NER at lower secondary level. In addition, an almost similar situation is observed at the basic level. Overall, 34 districts mostly from the Hill and Mountain eco-belts (including 3 districts from Karnali zone) have more than 50% over-and under-age (including 6.6% of less than 5 years children in Grade One) children at primary level. This might be one of the causes of the low internal efficiency at primary level.

Finally, the analyses of the GER at both primary and lower secondary levels show that more over age children are enrolled at primary level, but by the age definition they should be at the lower secondary level's grades. This contributes to higher GER at the primary level and lower GER at the lower secondary level. In addition, compared to the set targets of GER and NER for 2014 in SSRP at primary (133% GER and 98% NER) and basic levels (121% GER and 88% NER), achievements at both levels have improved.

8) Scenario of out-of-school children

In the school education system, practically and characteristically; the out-of-school children are categorized into two types: the first one is never schooling children and the second one is ever schooling children (Dropped out children). The table 3.21_A below presents the percentage of out-of-school children by single age group (5-16 years' age group) in 2011. Based on the records of National Population and Housing Census 2011 received from the Central Bureau of Statistics, in total there were 7,978,913 children of the age group 5-16 in the country. The analysis by single age group shows that, the highest percentage of out-of-school children are in age groups 5, 6 and 16. The district level analysis shows, there are 18 districts with more than 10% out of school children of the age groups 5-12 years. Moreover, out of 18 districts there are 9 districts: Kapilbastu, Saptari, Parsa, Bara, Siraha, Dhanusa, Sarlahi, Mahottari and Rautahat, which have more than 20% of out of school children in the same age groups.

Table 3.21_A
Based on National Population and Housing Census 2011, the percentage of out-of-school children by single age

Eco-belts	Gender	Percentage of children who are currently not in school by age groups											
		5	6	7	8	9	10	11	12	13	14	15	16
Mountain	Girls	20.1	13.8	8.2	5.8	3.7	8.5	8.0	8.7	10.6	14.6	16.5	25.3

	Total	15.6	10.7	6.7	6.2	3.6	14.9	9.2	14.0	12.1	18.0	18.3	25.1

Source: National Population and Housing Census 2011 (CBS)

It is worth mentioning here, regarding the out-of-school children the Nepal Living Standards Survey (NLSS III), 2010/11 Published by Central Bureau of Statistics Nepal (Tables 5.8 and 5.18) revealed the primary reasons for not attending school for population aged 6-24 years (those who never attended any school) and the Reason for Dropouts (those who ever attended any school at least once). The report presented that of the total population of the age group 6-24 years 8.7 percent of the population never attended school. Among these never attendees, 30.0 percent reported parents did not want to send school, followed by other reasons had to work at home 25.5 percent, not willing to attend 17.2 percent and the other reasons included too young 7.2 percent, too expensive 7.3 percent, disability 3.4 percent and school far way 3.1percent respectively. Similarly, regarding the reasons for dropouts from the schools and campus, the report cited that the 6-24 years population left the schools because of: poor academic progress (24.6%), help needed at home (22%), because of married (17 percent), parent did not want (7 percent), too expensive education (7percent) etc..

In addition to the above (3.21_A), based on the individual age wise (school age) population by castes and ethnicities of National Population and Housing Census 2011 received from the Central Bureau of Statistics (CBS) the table 3.21_B and the figure 3.13_B below present the percentage of out-of-school children by castes and ethnicities⁶ in 2011. Based on the records of National Population and Housing Census 2011 and the categorization of the castes/ethnicities in the “Resource book for District level orientation on Gender Equity and Social Inclusion” jointly prepared by the Government of Nepal, Ministry of Federal Affairs and Local Development and the Local Development Training Academy Jawalakhel, the analysis shows that the highest percentage of out of school children are in age groups 5, 6, 15 and 16 (See Annex: XIV_B-D). Among the castes and ethnicities the highest percentage of out of school children is observed in disadvantaged communities than the children from Dalit and Janajati community in the country. This shows, though the overall achievements in access related indicators are encouraging in districts, geographical eco-belts, development regions and national levels, it is also equally important to see the status of the different communities at VDCs/Municipalities and compartment areas as well in the following years school education planning and programme implementation.

Table 3.21_B
Percentage of out-of-school children from Dalit, Janajatis and Disadvantaged communities by single age

Single Age	Percentage of Out of school children by Dalit, Janajati and Pichhada communities								
	Total Janajati			Total Dalit			Total disadvantaged Community		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
5	16	28.5	20.3	25	38.5	30.2	20.1	39.6	26.3
6	12.8	15.2	13.8	23	24.1	23.5	24.6	27.9	26
7	11.1	8	9.8	18.9	13.8	16.5	22.2	14.6	18.9
8	5.4	7	6	13.1	15.9	14.2	13.3	19.9	15.6
9	7.5	4.8	6.2	13.4	10.4	11.9	21	15	18.1
10	9.9	5.1	7.5	19.9	14	16.9	26.9	18.1	22.4
11	8.8	4	6.5	14.7	8.3	11.6	26.7	13.6	20.8
12	8.4	5.6	7	18.9	14.1	16.5	28.4	20	24.3
13	12.6	6.1	9.5	21.2	12	16.8	36.5	16.3	27.4
14	10.8	9.1	10	21.7	17.2	19.6	28.7	21.1	25.1
15	15.5	14.8	15.2	30.1	26.3	28.3	37.7	29.5	33.6
16	25.5	21.9	23.9	41.5	33.3	37.6	48.3	35	41.5

Source: National Population and Housing Census 2011 (CBS)

⁶ Based on the categorization of the castes/ethnicities in “Resource book for District level orientation on Gender Equity and Social Inclusion” jointly prepared by the Government of Nepal, Ministry of Federal Affairs and Local Development and the Local Development Training Academy Jawalakhel, there are 59 Janajati castes and ethnicities, 23 Dalit castes and 24 disadvantaged communities)

Figure 3.13_B

(9) Internal efficiency at primary level

The term “efficiency” refers to the relationship between outputs and inputs. A process is described as technically efficient if it produces maximum outputs from a given combination of inputs. Internal efficiency deals with the use of resources and refers to the internal dynamics of the education system in transforming inputs and processes into outputs. Moreover, it can be defined as the system’s ability to educate the maximum number of children who have entered the system in a specific year in the optimum time with the minimum possible use of human and financial resources. Operationally, internal efficiency can be described as the number of students graduating from an educational institution (at a particular grade and level of education) expressed as a percentage of the number of students who entered the institution at the beginning of the particular programme.

Table 3.22
Internal efficiency at primary level

Students	PRD	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Total of Grades 1-5
Total	Promotion rate	78.4	88.7	89.8	89.6	91.6	86.7
	Repetition rate	15.2	8.1	6.9	6.5	5.3	9.1
	Dropout rate	6.4	3.2	3.3	3.9	3.1	4.2
	Survival Rate to grades	-	-	-	-	86.8	-
	Coefficient of internal efficiency	-	-	-	-	-	80.9
	Cohort Graduation Rates						79.7
Boys	Promotion rate	78.4	88.4	89.4	89.3	91.5	86.5
	Repetition rate	15.4	8.0	6.9	6.7	5.4	9.2
	Dropout rate	6.2	3.6	3.7	4.0	3.1	4.3
	Survival Rate to grades	-	-	-	-	86.5	-
	Coefficient of internal efficiency	-	-	-	-	-	80.6
	Cohort Graduation Rates						79.6
Girls	Promotion rate	78.3	89.0	90.2	90.0	91.7	86.9
	Repetition rate	15.0	8.3	6.8	6.4	5.3	9.0
	Dropout rate	6.7	2.7	3.0	3.6	3.0	4.1
	Survival Rate to grades	-	-	-	-	87.5	-
	Coefficient of internal efficiency	-	-	-	-	-	81.5
	Cohort Graduation Rates						80.4

Table 3.22 above shows the grade wise flow rate of students from school year 2013-014 to 2014-015 for primary grades. These flow rates show the evaluation of internal efficiencies of the students as well as the overall effectiveness of the inputs provided. The table illustrates, out of the total students enrolled in the school year 2013-014 in Grade One, 78.4% (75.4% in the previous school year) promoted to Grade Two, 15.2% repeated the same Grade in the current school year, and 6.4% dropped out from the school education system (See Annexes XV_A-C).

In other words, altogether 21.6% of the total enrolled students in Grade One of the last school year could not continue in Grade Two in this school year. Although the promotion rate has improved as compared to the previous school year, it still demonstrates a high wastage of the inputs provided. However, the promotion rates for upper grades (Grades 2 to 5) are better than for Grade One. The table also suggests that the promotion rates for girls, as compared to that of boys, are slightly better in all Grades (See Annexes XV_A-C). This trend has continued since the school year 2007. The average survival rate to Grade 5 is 86.8% (85.4 in the last school year) with 87.5% for girls and 86.5% for boys. This shows a small improvement over the previous school year (85.4), while the coefficient of internal efficiency is 80.9% (Compared to 79.0% of the previous school year) of this 81.5 for girls and 80.6 for boys. Similarly, the cohort graduation rate at primary level is 79.7% (compared to 77.6% in the previous school year), with 80.4% for girls and 79.6% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2009-010, altogether 79.7% of the students successfully completed the primary level in the school year 2013-014.

(10_A) Internal efficiency at lower secondary level

Table 3.23
Internal efficiency at lower secondary level

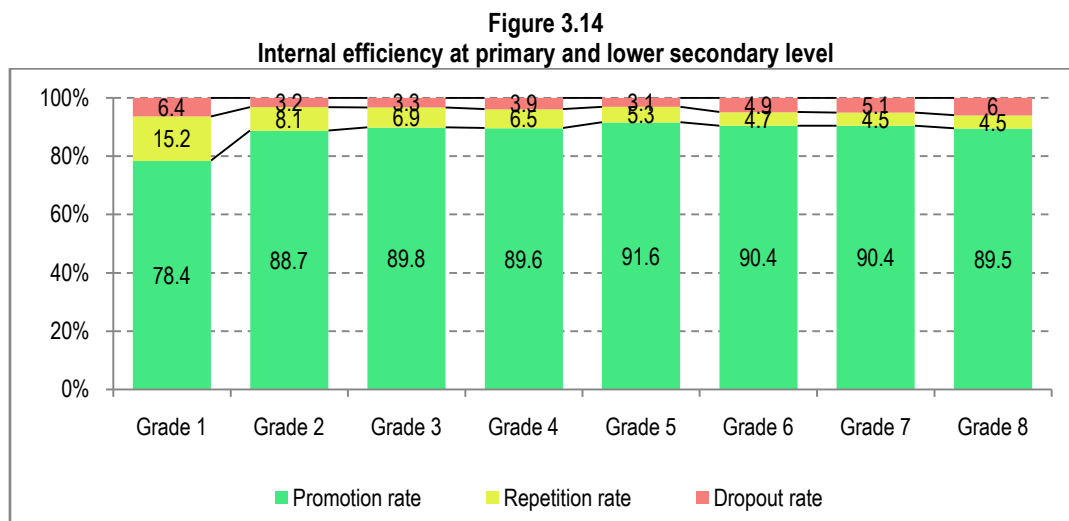

Students	PRD	Grade 6	Grade 7	Grade 8	Grade 6-8	
Total	Promotion rate	90.4	90.4	89.5	90.1	
	Repetition rate	4.7	4.5	4.5	4.6	
	Dropout rate	4.9	5.1	6.0	5.3	
	Survival rate to grade 8					74.6
	Coefficient of internal efficiency					73.1
	Cohort Graduation Rates					66.7
Boys	Promotion rate	89.3	90.3	89.6	89.7	
	Repetition rate	5.1	4.4	4.5	4.7	
	Dropout rate	5.6	5.3	5.9	5.6	
	Survival rate to grade 8					73.3
	Coefficient of internal efficiency					71.9
	Cohort Graduation Rates					65.6
Girls	Promotion rate	91.5	90.5	89.3	90.4	
	Repetition rate	4.3	4.6	4.6	4.5	
	Dropout rate	4.2	4.9	6.1	5.0	
	Survival rate to grade 8					76.0
	Coefficient of internal efficiency					74.0
	Cohort Graduation Rates					67.9

The table above 3.23 presents the grade wise flow rates at lower secondary level from school year 2013-014 to 2014-015. The pattern of the grade wise student flow rates at lower secondary level is also similar to the primary level. Out of the total number of students

enrolled in the school year 2013-14 in Grade Six, 90.4% (Compared to 89.6% in the last school year) promoted to Grade Seven, 4.7% repeated the same grade in the current school year, and 4.9% dropped out from the school education system completely.

Likewise, the promotion rates in Grade Seven and Grade Eight are 90.4% and 89.5% (90.1% and 88.5% in the last school year) respectively. When the data given below are analyzed from the gender perspective, no significant differences are noted (See Annexes XVI_A-C). The average survival rate to Grade 8 is 74.6% (Compared to 72.1% of the last school year) with 76.0% for girls and 73.3% for boys. The coefficient of internal efficiency is 73.1% (Compared to 70.7% of the last school year), of this 74.0% for girls and 71.9% for boys. Similarly, the cohort graduation rate of basic level (grades 1-8) is 66.7% (Compared to 63.8% of the last school year) with 67.9% for girls and 65.6% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2006, almost 67.0% students successfully completed the basic level in the school year 2013-014.

As mentioned in the above tables the Figure 3.14 below shows the grade wise internal efficiencies at both primary and lower secondary levels and also presents the grade wise progress of students from Grade One to Grade Eight. The flow rates by districts show that the promotion, repetition and dropout rates vary from district to district (See Annexes: XV A-C and XVI A-C).

(10_B) The Quality of Basic Education based on the Findings and Recommendations of “National Assessment of Student Achievement (NASA) 2011 for grade 8, and for grades 3 and 5 in 2012”

The above analysis is based on the EMIS data, which does not tell more about the learning ability and performance of the students. In this regard, it is relevant to discuss about the findings of “National Assessment of Student Achievement (NASA) 2011 for grade 8, and for grades 3 and 5 in 2012”.

The NASA for grade 8 students was conducted in 2011, based on the reports it presents that there is a great difference between the achievement levels of the students. The differences in achievement level are more pronounced in community schools than the institutional schools. The report has clearly indicated that such a huge difference in students’ achievement level is due to the weak capacity of the current education system. It also indicates that schools’ and students’ individual effort is responsible for their achievement rather than the capacity and

performance of the system. The differences were found in terms of districts, eco-belts, respective subject matters prescribed in curriculum and textbooks, school environment, house-hold activities, languages, socio-economic status of house-holds, teachers' characteristics, timely availability of textbooks and other materials, castes and ethnicities, and other factors.

According to the study, in Social Studies, a similar but not entirely identical pattern emerged with the respective results as follow: knowledge level 52%, comprehension level 66%, and application level 40% and higher ability level 34%. But the reasons behind this situation were not clearly mentioned in the report and left it to the further discussions within and outside the system. Regarding the achievements, in Reading and Writing the study report reveals that the achievement level in writing skill is lower than that in reading skill, while the curriculum has emphasized to the writing skill by allocating more periods to teach this skill. Specially, the achievement level of students with non- Nepali mother language is comparatively lower in reading and writing skills. Another appropriate finding regarding the achievement of rural- and urban- based schools shows the achievement level of schools from urban areas is 52% and that of rural areas 45%, which indicates the poorer performance of rural schools.

Similar types of variation have been observed between the types of schools' (institutional and community schools) achievement level. It shows the average achievement of institutional schools is 63% whereas that of the community schools it is only 44%. Here, one of the contexts in the better performance of institutional schools is the better socio-economic status of the students.

Table 3.24 below shows the summary of grade 8 students' achievement level based on the NASA 2011 report by gender. The average means show the boys are better performing than girls in Mathematics and Social studies, whereas, in Nepali girls are better than boys. Differences are not wide but they are significant and there should be an initiation to reduce the gap.

Table 3.24:
students' subject wise learning achievements in Grade 8, NASA, 2011

Statistical functions	Subject wise students achievement								
	Mathematics			Nepali			Social studies		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Number	7,963	8,043	16,006	7,898	8,421	16,319	7,882	8,354	16,236
Mean	45	41	43	48	49	49	50	49	47
SD	21.4	21	21.3	19	19	19	15.3	15.3	15.9

Similarly, based on SSRP target for NASA study, the NASA unit has completed the second round of study on "National Assessment of Student Achievement (NASA) 2012 for grades 3 and 5 in 2012." The methodologies and procedures of the study on "National Assessment of Student Achievement (NASA) 2012" for grades 3 and 5 were also applied same as in the "National Assessment of Student Achievement (NASA) 2011" for grade 8. The key findings of the study reports of the "National Assessment of Student Achievement (NASA) 2012 for grades 3 and 5 are almost similar in nature. In general, the findings are based on differences between the districts, developmental regions, types of schools (institutional- and community), Ecological belts and Rural/Urban backgrounds, where the differences in the students achievements are found remarkable as in the previous study report for grade 8. Similarly, there is an educational inequality between the language groups; students with very low socioeconomic status imply remarkably lower-than-average learning achievement and also

the status of timely availability of textbooks and other materials demonstrated the significant differences in the both reports' findings. Among the wide ranges of the findings of various dimensions the following tables 3.25 and 3.26 present the status of average achievement scores in Mathematics, Nepali and English subjects for grade 5 students and the average achievement scores in Mathematics and Nepali subjects for grade 3 students. In grade 5 the differences between boys and girls are not remarkable, where the proficiencies in Mathematics and Social Studies are in favour of boys by 1.7% and 1.8% points higher than the girls, whereas, the average achievement scores in Nepali it shows girls are better than the boys (Table: 3.25).

Similarly, the table 3.26 below depicts the status of average achievement scores in Mathematics and Nepali subjects for grade 3 by gender. The differences between boys and girls in Mathematics proficiency are not seen. In Mountain zone, in the Institutional schools, the boys seem to perform better than girls with 13 percent points. Also, in the "Other" caste, the girls seem to outperform the boys by 7 percent points. The differences between boys and girls in Nepali proficiency are in favor of girls. In the both grades the tendency seems to be that the girls' proficiency is slightly better than the boys in Nepali subject.

Table 3.25:
Students' subject wise learning achievements in Grade 5, NASA, 2012

Statistical functions	Subject wise students achievement								
	Mathematics			Nepali			English		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Number	6,570	6,302	12,872	6,449	6,977	13,426	6,604	6,519	13,123
Mean	54.4	52.7	53.3	59	60.7	59.7	54.8	53	53.6
SD	22.5	23.1	22.9	23	23.1	23.1	24.2	24.4	24.2

Table 3.26:
students' subject wise learning achievements in Grade 3, NASA, 2012

Statistical functions	Subject wise students achievement					
	Mathematics			Nepali		
	Boys	Girls	Total	Boys	Girls	Total
Number	8,304	8,670	16,974	8,586	8,861	17,447
Mean	59.5	59.5	59.4	62.7	64.2	62.6
SD	25.4	25.1	25.6	24.0	23.5	24.0

As a whole, the study suggests that the socioeconomic status plays a strong role in the educational processes. More efforts and resources should be put to the lowest-performing students in the very early grades of schooling. The efforts put forward on and by students at the early grades would most probably raise later their standard in the higher grades too. For this the MOE should prepare a strategic plan how this would happen and it needs to put a strong positive emphasis, specially focusing on to the remarkable supports to the districts of absolutely low achievement level such as Achham, Bardiya, Jumla, Khotang, Mahottari, Rolpa, Saptari, and Udayanpur and also to the schools in Eastern- and Mid-Western development regions.

3.2.3 Teachers information at primary, lower secondary and basic levels

This section presents the information on teachers at primary, lower secondary and basic levels by school type, level, sex and the specific indicators related to the teachers. Teachers are defined as persons whose professional activity involves transmitting knowledge, skills

and attitudes, which are required as per the approved curriculum for students enrolled in a formal educational institution.

(1) Total reported number of teachers by sex at primary, lower secondary and basic levels in all types of schools

The table 3.27 and figure 3.15 below present the total number of teachers reported in the Flash I school census 2014 at primary, lower secondary and basic levels in the beginning of the school year 2014-015 in all types of schools (both in all types of community and institutional schools). As a whole, there are 187,684 teachers at primary level; 52,348 teachers at lower secondary level and 240,032 teachers are at basic level. Of them, the numbers of female teachers are 78,630; 14,434 and 93,064 respectively at primary, lower secondary and basic levels, which shows both the number of female and male teachers has increased compared to the previous school year. The shares of female teachers are 41.9%, 27.6% and 38.8% (similar to 41.6%, 27.5% and 38.5% in the last school year) at primary, lower secondary and basic levels respectively (See Annex: XVII & XXI).

Table 3.27
Total number of teachers by levels (based on reporting) in all types of schools

Level	Female	Male	Total
Primary(1-5)	78,630	109,054	187,684
Lower secondary(6-8)	14,434	37,914	52,348
Basic(1-8)	93,064	146,968	240,032

Figure 3.15
Total number of teachers by levels (based on reporting) in all types of schools

The table 3.28 below presents the total reported number of teachers in all types of institutional schools at primary, lower secondary and basic levels in the school year 2014-015. Out of total number of teachers (Table 3.27) reported in the beginning of the school year in the Flash I school census 2014, the total numbers of teachers in the institutional schools are 47,762; 15,577 and 63,339 at primary, lower secondary and basic levels. The shares of female teachers in total number of teachers at primary, lower secondary and basic levels are 52.9%, 43.6% and 50.6% (similar to 52.5%, 43.5% and 50.3% in the last school year) respectively. However, this is higher than the share of female teachers in community schools (Table 3.29) (See Annex: XVIII & XXII).

Table 3.28
Total number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Primary(1-5)	25,249	22,513	47,762
Lower secondary(6-8)	6,798	8,779	15,577
Basic(1-8)	32,047	31,292	63,339

Likewise, out of total number of teachers (table 3.27), the table 3.29 below shows the reported number of teachers in all types of community schools in the beginning of the school year at primary, lower secondary and basic level. The number of teachers given in the table includes all types of teachers (i.e. teachers working in approved positions, Rahat teachers and teachers hired by the community from their own sources). A total of 176,693 teachers with 61,017 female and 115,676 male teachers were reported for the basic level, of this 139,922 with 53,381 female at primary level and 36,771 with 7,636 female at lower secondary level (See Annex: XVIII & XXII). Out of the total numbers of teachers in community schools, the shares of female teachers are 38.2%, 20.8% and 34.5% (Compared to 37.9%, 20.7% and 34.3% in the last school year) at primary, lower secondary and basic levels respectively. The shares of female teachers at all levels have slightly improved as compared to the shares of female teachers in the last school year 2013-014.

Table 3.29
Total number of teachers in all types of community schools by levels (based on reporting)

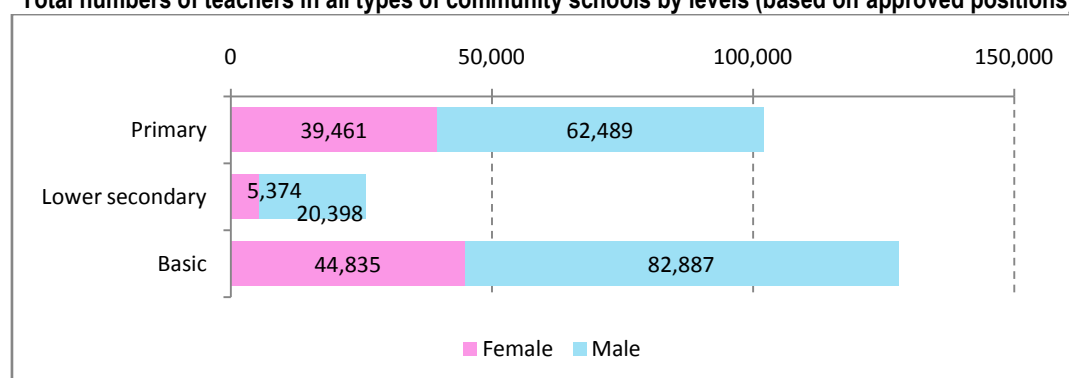

Level	Female	Male	Total
Primary(1-5)	53,381	86,541	139,922
Lower secondary(6-8)	7,636	29,135	36,771
Basic(1-8)	61,017	115,676	176,693

Table 3.30 and figure 3.16 below show the numbers of teachers in all types of community schools based on the numbers of teachers working in approved positions and Rahat positions by levels. Overall, 101,950 teachers with 39,461 female teachers at primary level, 25,772 teachers with 5,374 female teachers at lower secondary level and 127,722 teachers with 44,835 female teachers at basic level are working in the current school year. Out of the total numbers of teachers by levels 38.7% at primary, 20.9% at lower secondary and 35.1% at the basic level are female teachers, this shows the share of female teacher has slightly increased in the current school year (See Annex: XXIX).

Table 3.30
Total number of teachers in all types of community schools by levels (based on approved positions)

Level	Female ⁷	Male	Total
Primary(1-5)	39,461	62,489	101,950
Lower secondary(6-8)	5,374	20,398	25,772
Basic(1-8)	44,835	82,887	127,722

Figure 3.16
Total numbers of teachers in all types of community schools by levels (based on approved positions)

⁷ The numbers of female teachers are presented based on the reporting in the community schools working in the approved positions and Rahat Quotas.

(2) Percentage of teachers and the gender parity indexes in all types of schools

As discussed in the previous tables: 3.27, 3.28, 3.29 and 3.30, the table 3.31 below presents the percentage of teachers in total numbers of teachers and the Gender Parity Indexes (ratio of female to male) by level. Hence, to assess the level of participation of female teachers against male teachers in the education system, the GPI indicator is one of the most important indicators.

The table 3.31 below shows the GPI in total number of teachers is 0.72 at primary level, 0.38 at lower secondary and 0.63 at basic level respectively, which shows there is a slight change in the previous school year. Likewise, the GPI for institutional schools is 1.12 at primary level, 0.77 at lower secondary level and 1.03 at basic level. Hence, the GPI for institutional schools is higher than the GPI in total number of teacher at all levels.

Though the share of Female teachers in community schools has slightly improved, compared to the GPIs in total and institutional schools, the GPIs in the reported number of teachers in community schools and the total number of teachers working in approved positions and Rahat quotas are comparatively low.

Table 3.31
Shares of teachers by sex and GPI in types of schools and levels

Types of Schools	Primary(1-5)			Lower secondary(6-8)			Basic(1-8)		
	Female	Male	GPI	Female	Male	GPI	Female	Male	GPI
Share and GPI in total number of teachers (all types of schools)	41.9	58.1	0.72	27.6	72.4	0.38	38.8	61.2	0.63
Share and GPI in total number of teachers in Institutional Schools	52.9	47.1	1.12	43.6	56.4	0.77	50.6	49.4	1.02
Share and GPI in total number of teachers (all types of community schools based on reporting)	38.2	61.8	0.62	20.8	79.2	0.26	34.5	65.5	0.53
Share and GPI in total number of teachers (all types of community schools based on approved positions)	38.7	61.3	0.63	20.9	79.1	0.26	35.1	64.9	0.54

(3) Percentage of teachers by Dalit and Janajati

Table 3.32 and figure 3.17 below show the percentage shares of Dalit and Janajati teachers in total number of teachers by levels and sex. The proportion of Dalit and Janajati teachers remain low in teaching profession as compared to their overall proportion in the total population. The overall percentage shares of Dalit teachers at primary, lower secondary and basic levels are 5.1%, 4.0% and 4.9% (Compared to the share of Dalit teachers 5.0%, 3.6% and 4.7% in the previous school year) respectively.

Table 3.32
Percentage shares of Dalit and Janajati teachers in total teachers by levels

Social group	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Dalit	3.6	6.2	5.1	2.9	4.4	4.0	3.5	5.8	4.9
Janajati	27.7	32.3	30.4	19.4	20.1	19.9	26.4	29.1	28.1

Likewise, the overall percentage share of Janajati teachers at primary level is 30.4% (30.0% in the previous school year), at lower secondary level 19.9% (19.6% in the previous school

year) and at the basic level it is 28.1% (27.7% in the previous school year) respectively. The status of Dalit and Janajati teachers in total number of teachers shows that while there is a huge need of increase/improvement in the numbers of dalit teachers at both primary and lower secondary levels; there is a also a need of increase of janajati teachers, especially at lower secondary level.(See Annex: XVII & XXI).

Figure 3.17
Percentage shares of Dalit and Janajati teachers in total teachers by types of schools

(4) Teacher training

The analysis of this section presents the status of the teachers by their training status by types of schools and levels. The information related to the teacher training is the quality aspect of school education, which contributes to improve the classroom teaching learning activities and the learning efficiency of the students as well. Based on the definitions of teacher training, the following analysis on the status of teachers by training is categorized into fully trained, partially trained and untrained respectively.

Table 3.33 below shows the total number of teachers⁸ by training status and sex in the school year 2014-015 in all types of schools at primary, lower secondary and basic levels respectively. At the basic level, of the total 240,032 teachers, all together 219,399 teachers are trained, 7,780 are partially trained and 12,853 are untrained teachers. Under the basic education, out of the total 187,684 teachers at primary level, in total 177,217 are trained, 5,500 are partially trained, and 4,967 are untrained. Again, the figures by training status show that out of the total number of teachers at lower secondary level 42,182 are trained, 2,280 are partially trained and 7,886 teachers are untrained (See Annex: XIX & XXIII).

Table 3.33
Total number of teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	74,007	103,210	177,217	11487	30695	42,182	85,494	133,905	219,399
Partially trained	1,999	3,501	5,500	480	1800	2,280	2,479	5,301	7,780
Untrained	2,624	2,343	4,967	2467	5419	7,886	5,091	7,762	12,853
Total	78,630	109,054	187,684	14,434	37,914	52,348	93,064	146,968	240,032

The percentages of teachers at basic level by training status and sex are illustrated in Table 3.34 below. Based on the data of teacher training status presented in the above table 3.33, altogether 94.4%, 2.9% and 2.6% (93.6%, 3.1% and 3.4% compared to the last school year)

⁸ The numbers of teachers at all levels are based on the reporting in the Flash I School Census 2013-014.

of teachers are trained, partially trained and untrained at the primary level. Similarly, at the lower secondary level, 80.6% are trained, 4.4% are partially trained and 15.1% are untrained (whereas there were 79.9%, 4.6% and 15.5% in the last school year). Again, at the basic level, out of total number of teachers, 91.4% are trained, 3.2% are partially trained and 5.4% are untrained. The figures in the table suggest that while only 3% primary teachers are untrained, the situation needs enormous improvement at lower secondary level where almost 15% of the teachers are still untrained (See Annex: XX & XXIV).

Table 3.34
Percentage of teachers by training status (all types of schools)

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	94.1	94.6	94.4	79.6	81.0	80.6	91.9	91.1	91.4
Partially trained	2.5	3.2	2.9	3.3	4.7	4.4	2.7	3.6	3.2
Untrained	3.3	2.1	2.6	17.1	14.3	15.1	5.5	5.3	5.4

The tables 3.35 and 3.36 below show the number and percentage of teachers by training status in community schools at basic level. Out of the total 139,922 teachers at primary level 134,828 are trained, 3,464 are partially trained, and 1,630 are untrained. Similarly, the figures show that out of the total number of teachers at lower secondary level 30,817 are trained, 944 are partially trained and 5,010 teachers are untrained. Overall, at the basic level 165,645 teachers are trained, 4,408 are partially trained and 6,640 are untrained teachers (See Annex: XIX & XXIII).

The table 3.36 below presents the percentage of teachers in terms of training in community schools by level and sex. At the primary level in total 96.4% with 96.1% female and 96.5% male (compared to the 95.1% with 95.1% female and 95.0% male in the last school year) teachers are fully trained. Of the total teachers 2.5% teachers partially trained and 1.2% of the teachers are untrained. At lower secondary level 83.8% (82.6% in the last school year) of the teachers are trained, 2.8% are partially trained and 13.6% teachers are untrained. Similarly, at the basic level among the total number of teachers 93.7% (92.5% in the last school year) are trained, 2.5% are partially trained and 3.8% teachers are untrained. Hence, nearly 93.7% of the teachers in community schools at basic level, with 96.4% at primary and 83.8% at lower secondary level are trained in the current school year (See Annex: XX & XXIV). This also shows the immense need of training of lower secondary teachers among community schools.

Table 3.35
Number of community schools' teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	51,325	83,503	134,828	6348	24469	30,817	57,673	107,972	165,645
Partially trained	1,316	2,148	3,464	252	692	944	1,568	2,840	4,408
Untrained	740	890	1,630	1036	3974	5,010	1,776	4,864	6,640
Total	53,381	86,541	139,922	7,636	29,135	36,771	61,017	115,676	176,693

Table 3.36
Percentage of community schools' teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	96.1	96.5	96.4	83.1	84.0	83.8	94.5	93.3	93.7
Partially trained	2.5	2.5	2.5	3.3	2.4	2.6	2.6	2.5	2.5
Untrained	1.4	1.0	1.2	13.6	13.6	13.6	2.9	4.2	3.8

(5) Student Teacher Ratios

This section deals with the Student Teacher Ratios (STRs) at basic level by types and levels of schools. This indicator is used to measure the level of human resources input in terms of number of teachers in relation to the size of the student/pupil population. It is normally used to compare with established national norms on the number of pupils per teacher for each level or type of school education. It is one of the most common indicators used in the educational planning for the projection of teachers required.

(5)-1 Student Teacher Ratio in all types of schools

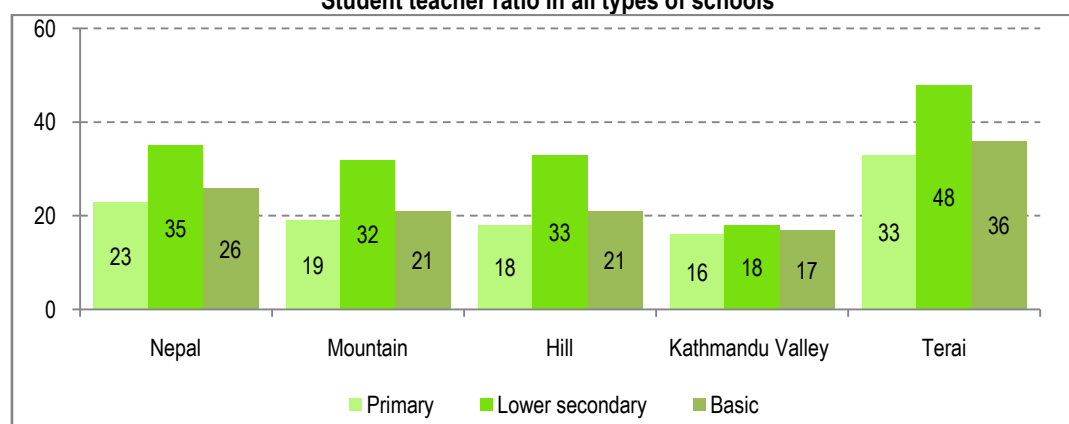

Table 3.37 and figure 3.18 below present the STR⁹ for all types of schools by eco-belts and levels in the school year 2014-015 at basic level. On average the STR at primary level is 23:1, at lower secondary level 35:1 and at the basic level 26:1 (Compared to 24:1 at primary level, 35:1, at lower secondary level 26:1 and at the basic level in the previous school year). The highest STR at primary level is found in the Terai eco-belt with 33:1 while the lowest is in the Valley by 16:1. Similarly, at the lower secondary level the highest STR is in the Terai belt at 48:1 and the lowest is in the Valley at 18:1.

Likewise, at the basic level, the highest STR is in Terai (36:1) and the lowest is in the Valley (17:1). Hence, although the Student Teacher Ratio at all levels has decreased by almost 1%, as in previous years, the analysis shows that more crowded classes are observed in the Terai belt at all levels than in other eco-belts. It is worth mentioning that the STRs, in all eco-belts and at all levels, have decreased in the current school year (See Annex XXVII), necessitating the need to consider data based reform in policy/legal provision with regard to STR at all levels of school education post-2015.

Table 3.37
Student teacher ratio in all types of schools by level

Eco-belts	Primary	Lower secondary	Basic
Mountain	19	32	21
Hill	18	33	21
Valley	16	18	17
Terai	33	48	36
Total	23	35	26

Figure 3.18
Student teacher ratio in all types of schools

⁹ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2014-015.

(5)-2 Student Teacher Ratios in community schools

The table 3.38 and figure 3.19 below show the STRs by eco-belts for all types of community schools based on the reported number of all types of teachers (i.e. teachers working in the approved positions, Rahat Teachers and teachers hired by the community). On average, the STR in community schools is 26:1 at primary, 42:1 at lower secondary, and 30:1 at basic level (Compared to 27:1 at primary, 43:1 at lower secondary, and 30:1 at basic level in the previous school year). Even in the context of community schools the STR needs to be considered seriously taking into account to provide quality basic education to all, especially disadvantaged.

At the primary level the highest STR (41:1) is in the Terai eco-belt and the lowest (15:1) is in the Valley. Similarly, at both lower secondary and basic levels, the highest STR is observed in the Terai belt and the lowest one in the Valley. The data reveals that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.37) and that the highest STR is in the Terai belt and the lowest STR is in the Valley (Table 3.38) at all levels of schools in both scenarios (See Annex XXVIII).

Table 3.38
Student Teacher Ratios in all types of community schools (based on reporting)

Eco-belts	Primary	Lower secondary	Basic
Mountain	19	33	22
Hill	20	36	23
Valley	15	20	17
Terai	41	60	45
Total	26	42	29

Figure 3.19
Student Teacher Ratios in all types of community schools (based on reporting)

(5)-3 Student Teacher Ratios in community schools based on the approved teacher positions

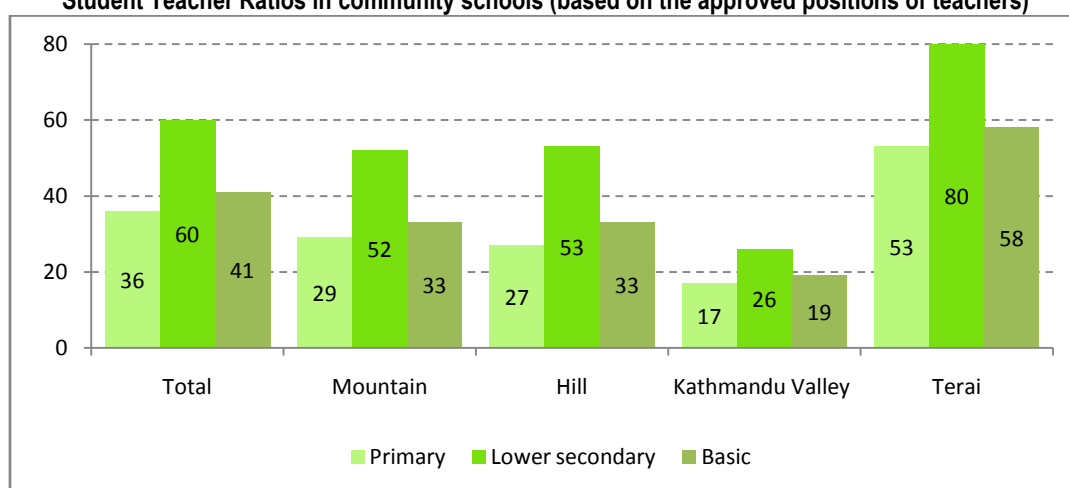

Table 3.39 and figure 3.20 below show the STR for all types of community schools based on the approved positions and Rahat teachers by levels in the school year 2014-015. On average, the STRs at primary, lower secondary and basic levels are 36:1, 60:1 and 41:1 (Compared to 37:1, 60:1 and 41:1 in the previous school year) respectively. It shows there is a slight change in primary level and for the lower secondary and secondary levels it has remained same as in the previous school year. The Terai belt shows the highest STR 53:1; 80:1; and 58:1 (Compared to 54:1, 79:1 and 59:1 in the last school year) at primary, lower secondary and basic levels, whereas the lowest STR 17:1, 26:1 and 19:1 is found in the Valley at all levels.

At the basic level it further illustrates that there are 33 districts (most of these districts are in the Terai belt) with a higher STR than the national average (See Annex XXVIII).

Table 3.39
Student Teacher Ratios in community schools (based on the approved positions of teachers)

Eco-belts	Primary	Lower secondary	Basic
Mountain	29	52	33
Hill	27	53	33
Valley	17	26	19
Terai	53	80	58
Total	36	60	41

Figure 3.20
Student Teacher Ratios in community schools (based on the approved positions of teachers)

3.3 Secondary Education

This section deals with information regarding secondary education (grade 9-12), with disaggregated information with regard to secondary and higher secondary levels in the school year 2014-015. In this report the secondary level refers to Grades 9-10 and the higher secondary level refers to Grades 11-12. In view of the school restructuring as envisaged in the SSRP 2009-2015, a comprehensive secondary education level refers to Grades 9 to 12.

3.3.1 Number of schools

The Table 3.40 and the figures 3.21 and 3.22 below present the distribution of secondary level (Grades 9-12) schools by eco-belt functioning throughout the country in the school year 2014-015. As stated in the basic level section, the total number of schools is 34,806. Of the total schools, 794 secondary with 318 higher secondary levels are in the Mountain belt, 3,846 secondary level with 1,575 higher secondary levels are in the Hilly belt, 1,360 secondary with 438 higher secondary levels are in the Valley and 2,825 secondary with 1,265 higher secondary levels are in the Terai belt.

Among total schools, the highest numbers of secondary schools are concentrated in Hill, whereas the thinly populated Mountain belt has the lowest number of secondary school levels (See Annex: III_A). The figures 3.21 and 3.22 further elaborate the distribution of schools by eco-belt in number and their percentage in the total number of schools.

Table 3.40
Distribution of schools by eco-belts by units at secondary level

Eco-belts	Total School (Units)	Secondary level (Grades 9-10)	Higher secondary level (Grades 11-12)	Secondary level (Grades 9-12)
Mountain	4,225	794	318	801
Hill	17,566	3,846	1,575	3,897
Valley	2,206	1,360	438	1,479
Terai	10,809	2,825	1,265	2,943
Total	34,806	8,825	3,596	9,120

Figure 3.21
Distribution of schools by eco-belts at secondary level

Figure 3.22
Percentage distribution of schools by eco-belts at secondary level

Table 3.41
Distribution of schools by unit (running by grades) at secondary level

Grade	Number of schools
1-9	351
1-10	5,124
1-11	0
1-12	3,188
6-9	1
6-10	45
6-11	0
6-12	111
9-10	3
9-11	0
9-12	2
11-12	295
Total	9,120

Table 3.41 above explains the distribution of schools running by grades in the school year 2014-015. Currently, none of the schools are running with Grades 1-11, 6-11 and 9-11 at the secondary level. In total, 9,120 secondary schools are running throughout the country, with including 3,596 higher secondary grades (See Annex: III_A).

Table 3.42 below explains the distribution of schools, excluding religious schools, by types and levels of schools in the school year 2014-015. At secondary level, out of the total 8,804 secondary levels, 5,990 are community and 2,814 are institutional school levels. Similarly, at higher secondary level, out of the total 3,590 school levels, 2,644 are community school levels and 946 are institutional schools. Likewise, among 9,099 secondary (Grades 9-12) levels 5,990 are under community and 3,109 are under the institutional management (See Annex: III_A, B & C).

Table 3.42
Distribution of schools by levels (Excluding religious schools) at secondary level

Level	Community	Institutional	Total
Secondary (9-10) level	5,990	2,814	8,804
Higher secondary (11-12) level	2,644	946	3,590
Secondary (9-12) level	5,990	3,109	9,099

Table 3.43 below shows the number of religious schools by types and levels. A total of 21 secondary levels (grade 9-10) of religious schools are reported in the School Census 2014-015. Of them, at secondary level 13 are Madarasas and 7 are Ashram/Gurukul, whereas 1 of

the Gumbas/Vihars was reported at secondary level. Of the total, at higher secondary level 6 religious types of schools (4 Madarasas and 2 Ashram/Gurukul) were reported. Mostly, while the Madarasa schools are in the Terai eco-belt, the Gumbas/Vihars are in Hill and Mountain eco-belts (See Annex: IV_A-C).

Table 3.43
Distribution of religious schools by units and levels at secondary level

Religious Schools	Total number of schools (in Unit)	Number of school by level		
		Secondary	Higher secondary	Secondary
Madarasa	745	13	4	13
Gumba/Vihar	78	1	0	1
Ashram/Gurukul	72	7	2	7
Total	895	21	6	21

Table 3.44 and figure 3.23 below show the Student School Ratios by levels and eco-belts at the secondary level in the school year 2014-015. The national average of secondary level (Grade 9-10) School Student Ratio is 1:102 (Compared to 1:103 in the last school year). That is, on average, a secondary level is serving 102 students, which is not much different than the last school year. Similarly, the ratio at higher secondary level is 1:116 (similar to 1:116 of the last school year) and at secondary (Grades 9-12) as a whole it is 1:145 (similar to 1:145 in the last school year), shows there is no change of school student ratio in the higher secondary and secondary (grades 9-12) levels in the current school year (See Annex: V).

When analyzed by the eco-belt, the highest School Student Ratio is found in the Terai eco-belt at the secondary level (1:137), which is higher than the national average (1:102). The lowest School Student Ratio is found in the Valley at secondary (1:63) but highest at higher secondary (1:146) levels. This shows that schools in Terai and Valley are crowded in secondary and higher secondary levels, therefore, need ample attention for adequate facilities, including teachers, space, classrooms, furniture, laboratories, libraries, playgrounds, equipment etc. (See Annex: V).

Table 3.44
School Student Ratios by eco-belts at secondary level

Eco-belts	Secondary (9-10)	Higher secondary (11-12)	Secondary (9-12)
Mountain	90	90	126
Hill	93	102	133
Valley	63	146	101
Terai	137	130	187
Total	102	116	144

Figure 3.23
School Student Ratios by eco-belts at secondary level

3.3.2 Enrolment

This section contains information on enrolment and enrolment-related indicators at secondary, higher secondary and secondary (Grades 9-12) levels.

(1) Total number of enrolment at secondary level

Table 3.45 below shows the total enrolment at secondary and higher secondary levels in the beginning of the school year 2014-015. The enrolment at secondary level is 900,585, which is higher than the total enrolment (896,919) in the previous school year 2013-014, whereas the enrolment at the higher secondary level in the current school year is 416,995¹⁰ (415,343 in the previous school year). When the data are analyzed from the gender perspective, the share of girls in total enrolment at the secondary level (grades 9-10) is 51.0% (50.7% in the previous school year), whereas it is 50.7% (50.8% in the previous school year) at the higher secondary and 50.9% (50.7% in the previous school year) at secondary level (grades 9-12) (See Annex: XXX).

Table 3.45
Total number of enrolment at secondary level

Grade/level	Girls	Boys	Total	% of Girls	Grade wise share by level	Grade wise at secondary level (grade 9-12)
Grade 9	258,366	247,081	505,447	51.1	56.1	38.4
Grade 10	200,583	194,555	395,138	50.8	43.9	30.0
Secondary level (grade 9-10)	458,949	441,636	900,585	51.0	100.0	68.4
Grade 11	105,201	104,487	209,688	50.2	50.3	15.9
Grade 12	106,241	101,066	207,307	51.2	49.7	15.7
Higher Secondary level (grade 11-12)	211,442	205,553	416,995	50.7	100.0	31.6
Total of Secondary level (grade 9-12)	670,391	647,189	1,317,580	50.9	-	100.0

(2) Total number of Dalit and Janajati enrolment at secondary level

Table 3.46
Dalit enrolment at secondary level

Grade/level	Girls	Boys	Total	% of Girls	Grade and level wise share in total enrolment
Grade 9	29,113	29,628	58,749	49.6	11.6
Grade 10	19,543	20,861	40,414	48.4	10.2
Secondary level (grade 9-10)	48,664	50,494	99,176	49.1	11.0
Grade 11	6,738	7,771	14,507	46.4	6.9
Grade 12	6,355	7,272	13,624	46.6	6.6
Higher Secondary level (grade 11-12)	13,098	15,046	28,139	46.5	6.7
Total of Secondary level (grade 9-12)	61,762	65,540	127,315	48.5	9.7

Tables 3.46 and 3.47 below show the numbers and shares of Dalit and Janajati enrolment in the total enrolment at the secondary level in the school year 2014-015. On average, the share of Dalit enrolment in the total enrolment at the secondary level (grade 9-10) is 11.0%; and

¹⁰ The number of enrolment is presented based on the reported number of higher secondary levels.

6.7% at the higher secondary level, which are almost similar to the previous school year (See Annex: XXX & XXXI). Although it has remained invariable, comparing to their share in population it is a satisfactory achievement, which needs to be sustained and continuously improved, contributing towards their increased participation in tertiary education.

Table 3.47 presents the total enrolment (347,782) of Janajati students at the secondary level (grade 9-10) in the school year 2014-015, which is 38.6% of the total enrolment (See Annexes: XXX & XXXII). Likewise, the enrolment of Janajati students at the higher secondary level (grade 11-12) is 124,231 in the school year 2014-015, which is 29.8% of the total enrolment at this level. The overall share of Janajati in the total enrolment at the secondary level (Grades 9-12) is 35.8%.

Regarding the participation and share of girls in secondary education, dalit girls with 48.5% at comprehensive secondary level (grade 9-12) are a little behind their boys counterparts. However, Janajati girls with their 53% share in secondary education are much ahead of janajati boys.

Table 3.47
Janajati enrolment at secondary level

Grade/level	Girls	Boys	Total	% of Girls	Grade and level wise share in total enrolment
Grade 9	104,689	92,703	197,358	53.0	39.0
Grade 10	80,044	70,408	150,415	53.2	38.1
Secondary level (grade 9-10)	184,736	163,116	347,782	53.1	38.6
Grade 11	33,200	30,541	63,746	52.1	30.4
Grade 12	32,417	28,032	60,456	53.6	29.2
Higher Secondary level (grade 11-12)	65,630	58,591	124,231	52.8	29.8
Total of Secondary level (grade 9-12)	250,366	221,707	472,013	53.0	35.8

(3) Total number of enrolment at secondary level by school types

Tables 3.48, 3.49, 3.50 and the figure 3.24 below show total enrolments, the percentage of enrolment by types of schools in total enrolment and the grade wise share of girls and boys in the total enrolment at secondary and higher secondary levels in the school year 2014-015. At the secondary level (grade 9-10), of the total 900,585 students reported in the Flash I, 2014-015, in total 80.9% (compared to 81.1% in the previous school year) students are in all types of community schools and the remaining 19.1% (Compared to 18.9% in the last school year) are in institutional schools. Compared to the last school year 2013-14, the share of enrolments in institutional schools has slightly increased in the current school year at the secondary level.

At the higher secondary level, of the total 416,995 students, 71.1% (Compared to 70.6% in the previous school year) are in all types of community schools and the rest (28.9%) are in institutional schools, which shows that the number of students enrolled in institutional schools has slightly decreased in the current school year. The data also reveal that the shares of girls in all types of community schools are higher than the shares of boys at both levels (See Annexes: XXX, XXXIII & XXXIV). The figure 3.24 provides information with respect to the share of enrolment by types of schools. As elucidated earlier, the shares of girls are considerably lower in institutional schools compared to the shares of enrolment in community schools in the current school year. The percentage of girls in institutional schools is 43.9% at

the secondary level, 44.2% at the higher secondary level and 44.0% at the comprehensive secondary level. On the contrary, both the percentage of girls and GPI are higher in community schools, which indicate the different attitude of parents on the choice of school education for their girls and boys children (See Annex: XXX, XXXIII & XXXIV).

Table 3.48
Total number of enrolment at secondary and higher secondary levels by types of schools

Types of schools	Secondary (9-10)			Higher secondary (11-12)			Secondary (9-12)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
All types of Community	383,458	344,998	728,456	158,208	138,351	296,559	541,666	483,349	1,025,015
Institutional	75,491	96,638	172,129	53,234	67,202	120,436	128,725	163,840	292,565
Total	458,949	441,636	900,585	211,442	205,553	416,995	670,391	647,189	1,317,580

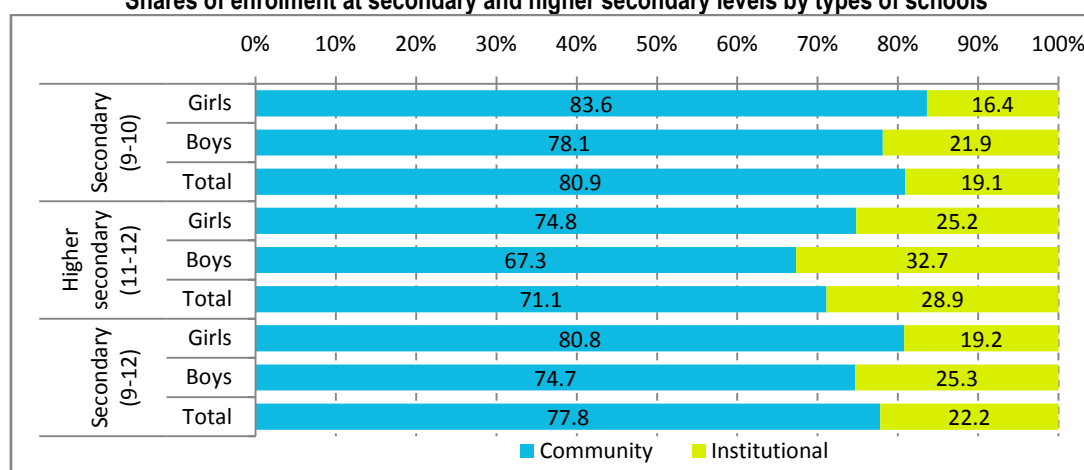

Table 3.49
Share of enrolment at secondary and higher secondary levels by types of schools

Types of schools	Secondary (9-10)			Higher secondary (11-12)			Secondary (9-12)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total

Institutional	16.4	21.9	19.1	25.2	32.7	28.9	19.2	25.3	22.2

Table 3.50
Percentage of Girls and Boys in total enrolments by types of schools and levels

Types of schools	Secondary (9-10)			Higher secondary (11-12)			Secondary (9-12)		
	Girls	Boys	GPI	Girls	Boys	GPI	Girls	Boys	GPI
All types of Community	52.6	47.4	1.11	53.3	46.7	1.14	52.8	47.2	1.12
Institutional	43.9	56.1	0.78	44.2	55.8	0.79	44.0	56.0	0.79
Total	51.0	49.0	1.04	50.7	49.3	1.03	50.9	49.1	1.04

Figure 3.24
Shares of enrolment at secondary and higher secondary levels by types of schools

(4) Enrolment at secondary level by disadvantaged Janajati

Table 3.51 below shows the status of disadvantaged Janajati students at the secondary level (grades 9-12). Based on the classification of 59 Janajati into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the

enrolment data of following 22 ethnic groups, who are classified as extremely deprived categories (See Annex: XXXVI).

In total, there are 15,409 students (i.e., 1.71% in the total enrolment) at the secondary level from the following groups/castes studying in the current school year 2014-015. The number of student from the following castes/ethnicities has slightly increased than in the previous school year. From the gender point of view, it shows that the participation of girls from these groups (i.e. girls 7,904 compared to boys 7,505) in secondary education is 51.3% points.

Table 3.51
Total number of enrolment by extremely disadvantaged Janajati in Grades 9-10 (Secondary level)

Janajati/Castes	Girls	Boys	Total	% in total enrolment	Janajati/Castes	Girls	Boys	Total	% in total enrolment
Bankaria	1	1	2	0.00	Majhi	1,639	1,478	3,117	0.35
Baramu	275	244	519	0.06	Meche	93	50	143	0.02
Bote	150	159	309	0.03	Mushibadiya	4	14	18	0.00
Chepang	340	325	665	0.07	Raji	27	29	56	0.01
Danuwar	1,718	1,522	3,240	0.36	Raute	1	0	1	0.00
Dhanuk	1,666	1,853	3,519	0.39	Satar	513	596	1,109	0.12

Kisan	27	29	56	0.01	Surel	1	0	1	0.00
Kusunda	1	25	26	0.00	Thami	525	452	977	0.11
Lopcha	59	48	107	0.01	Thunam	19	15	34	0.00
Total						7,904	7,505	15,409	1.71

(5) Enrolment by major types of disabilities at secondary level

Table 3.52 below shows the status of students with disabilities¹¹ at both secondary and higher secondary levels in the school year 2014-015. Overall, students with disabilities at secondary and higher secondary levels are 0.77% and 0.55% respectively in the total enrolment. When taken as a whole, the percentage of students at the secondary level (Grades 9-12) with disabilities is 0.70%. Out of the total 6,937 students with disabilities at secondary level, 0.36% students have physical (affecting mobility) disability, 0.10% is intellectually impaired, 0.10% is hearing impaired, 0.02% is visually impaired, 0.13% has low vision, 0.01% is hearing and visually impaired and 0.06% has vocal and speech-related disability. Similarly, of the total 2,285 students with disabilities at the higher secondary level, 0.15% students have physical (affecting mobility) disability, 0.02% is intellectually impaired, 0.04% is hearing impaired,

¹¹ The Nepal Living Standards Survey III, 2010-2011 includes these types of disabilities – physical, visual, hearing, hearing and seeing, speaking, mental and multiple disabilities. Overall, 3.6 percent of people have some kind of disability. The disability rates for males and females are 4.2 percent and 3.0 percent respectively. Of all persons with some kind of disability, 29.2 percent are physically disabled, 22.3 percent have visual related disability, 23.4 percent hearing related disability, 2.4 percent vision/hearing related disability, 8.6 percent speech related disability, 6.8 percent mentally retarded and 7.3 percent have multiple disability.

0.01% is visually impaired, 0.04% has low vision and 0.28% has vocal and speech-related disability. Of the total students at the secondary level (Grades: 9-12), 0.70% (i.e., 9,222) of the students are with all types of disability (See Annex: XXXVIII & XXXIX).

Table 3.52
Total number of students by major types of disabilities at secondary level

Level		Types of disabilities							Total Disabled
		Physical (affecting mobility)	Intellectually impaired	Hearing impaired	Visually impaired	Low Vision	Hearing and Visually impaired	Vocal and speech related disabilities	
Secondary (9-10)	Girls	1,530	399	420	76	612	54	239	3,330
	Boys	1,688	475	459	96	533	59	297	3,607
	Total	3,218	874	879	172	1,145	113	536	6,937
	% in total enrollment	0.36	0.10	0.10	0.02	0.13	0.01	0.06	0.77
Higher secondary (11-12)	Girls	321	39	72	20	82	14	586	1,134
	Boys	318	49	79	20	74	10	601	1,151
	Total	639	88	151	40	156	24	1,187	2,285
	% in total enrollment	0.15	0.02	0.04	0.01	0.04	0.01	0.28	0.55
Secondary (9-12)	Girls	1,851	438	492	96	694	68	825	4,464
	Boys	2,006	524	538	116	607	69	898	4,758
	Total	3,857	962	1,030	212	1,301	137	1,723	9,222
	% in total enrollment	0.29	0.07	0.08	0.02	0.10	0.01	0.13	0.70

6) Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level

The table 3.53 and the figures 3.25 and 3.26 below show the GER and NER at secondary and higher secondary levels in the school year 2014-015. At secondary level, on average, the GER is 70.1% ¹²(Compared to 68.7% in the previous school year), of this 70.1% GER is for girls and 70.2% GER is for boys. Likewise, the average NER at secondary level is 56.1% (Compared to 55.0% in the previous school year), of this 55.9% is for girls and 56.3% is for boys. The NER suggests that, based on the 13-14 age group students enrolled at secondary level in the school year 2014-015, a big number of secondary age group population is out of school or enrolled as overage students at the lower secondary level.

Similarly, the average GER at the higher secondary level is 32.9% (Compared to 32.0% of the previous school year), of this 33.2% is for girls and 32.6% is for boys. Also, the NER at

¹² 12) The district-wise single age group population calculated for both GER and NER in 2014-015 is based on the data received from the CBS on the new National Population Census 2011.

12) Populations, used in the calculation of enrolment rates in all Flash Reports, are based on the National Population Census Reports and the projected population by the CBS. In this regard, for the calculation of both GER and NER up to the Flash I Report 2012/013 the school age population was used based on the Population Projection for Nepal 2001-2021 publication, jointly published by the Central Bureau of Statistics (CBS) and the Ministry of Population and Environment (MOPE) in the year 2003. Compared to the projected population used up to 2012/013, the projected population based on the National Population Census 2011, shows increasing trends with regard to the population of the age group 13-14 and 15-16. Hence, the fluctuations in the enrolment rates depend on the increasing and decreasing trends of the respective age group population.

the higher secondary level is 13.1% (Compared to 11.5% of the previous school year); of this 13.3% NER is for girls and 12.9% NER is for boys. Thus, the data illustrate that more attention needs to be paid to enhance the efficiency of basic education and expand the opportunities of education for secondary and higher secondary level school going age group population. It is worth-mentioning here that a very narrow gender gap is noticed between girls and boys at secondary and higher secondary levels with respect to NER. Compared to the status of the previous school year at the secondary and higher secondary levels, both the enrolment rates - GER and NER have slightly increased in the current school year (See Annex: XIII & XIV). In this respect, figures 3.25 and 3.26 present the status of GER and NER by levels in the school year 2014-015.

Moreover, the GPIs in GER by level are 1.00 at secondary level, 1.02 at higher secondary level and 1.01 at secondary level. Likewise, the GPIs in NER by level are 0.99 at secondary level, 1.03 at higher secondary level and 1.00 at secondary level, which show the participations of girls and boys at all levels are equal in both the Gross and Net enrolment and the Gender Parity Index at all levels is achieved.

Table 3.53
Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level

Level	GER				NER			
	Girls	Boys	Total	GPI	Girls	Boys	Total	GPI
Secondary (9-10)	70.1	70.2	70.1	1.00	55.9	56.3	56.1	0.99
Higher secondary (11-12)	33.2	32.6	32.9	1.02	13.3	12.9	13.1	1.03
Secondary (9-12)	51.9	51.4	51.6	1.01	34.7	34.6	34.7	1.00

Gross Enrolment Rate (GER) at secondary level

Figure 3.26
Net Enrolment Rate (NER) at secondary level

3.3.3 Teachers' information at secondary, higher secondary and secondary levels

This section contains information on teachers at secondary, higher secondary and secondary (grade 9-12) levels by school types, levels, sex and other indicators related to teachers.

(1) Distribution of teachers by sex at secondary, higher secondary and secondary levels

The table 3.54 and figure 3.27, below, show the total numbers of teachers (Teachers working in the approved positions, Rahat teachers, teachers hired by the community in community schools and teachers working in institutional schools) reported at secondary, higher secondary and secondary levels in the Flash I school census 2014-015. In total, there are 38,858 teachers at secondary level, 19,179 teachers are at higher secondary level and altogether 58,037 teachers are in the secondary level (Grades 9-12). Of them, the numbers of female teachers are 6,775; 3,019 and 9,794 respectively at secondary, higher secondary and secondary (Grades 9-12) levels.

The shares of female participation in total number of teachers are 17.4%; 15.7% and 16.9% at secondary, higher secondary and secondary level respectively. It shows a slight increment in the share of female teachers at secondary level compared to the previous school year (See Annex: XXI).

Table 3.54
Distribution of total teachers at secondary level (based on reporting)

Level	Female	Male	Total
Secondary (9-10)	6,775	32,083	38,858
Higher secondary (11-12)	3,019	16,160	19,179
Secondary (9-12)	9,794	48,243	58,037

Figure 3.27
Distribution of total teachers at secondary level (based on reporting)

Out of the total number of teachers (Table 3.54), the table 3.55 below depicts the number of teachers in institutional schools, wherein the total 14,733; 4,059 and 18,792 teachers were reported at secondary, higher secondary and secondary levels in the Flash I, 2014-015. The percentages of female teachers in total number of teachers at secondary, higher secondary and secondary levels are 23.2%, 13.3% and 21.1% respectively, which are higher than the percentage of female teachers in the total and community schools (See Annex: XXII).

Table 3.55
Number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	3,419	11,314	14,733
Higher secondary(11-12)	538	3,521	4,059
Secondary(9-12)	3,957	14,835	18,792

Likewise, the table 3.56 below shows the number of teachers reported in the Flash I, 2014-015 school census in all types of community schools. The numbers of teachers given in the table are based on reporting in the Flash I, 2014-015 school census, which include all types of teachers (i.e. teachers working in the approved positions, Rahat teachers and teachers appointed by the community from their own sources).

In total 24,125 with 3,356 female, 15,120 with 2,481 female and 39,245 with 5,837 female teachers were reported at secondary, higher secondary and secondary (Grades 9-12) levels in the Flash I, 2014-015 school census. Out of total, the percentages of female teachers are 13.9%, 16.4% and 14.9% at secondary, higher secondary and secondary levels respectively. The share of female teachers has slightly increased at all levels of the secondary education as compared to the previous school year (See Annex: XXII).

Table 3.56
Distribution of teachers in all types of community schools at secondary level (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	3,356	20,769	24,125
Higher secondary(11-12)	2,481	12,639	15,120
Secondary(9-12)	5,837	33,408	39,245

Table 3.57 below provides the number of teachers in all types of community schools based on the number of teachers working in the approved number of positions and Rahat quotas by levels. Overall, there are 19,584 with 2,859 (14.6%) female teachers at the secondary level, 3,869 teachers at the higher secondary level and altogether 23,453 teachers at the total secondary (Grades 9-12) level working in the current school year (See Annex: XXIX).

Table 3.57
Number of teachers in all types of community schools by levels (based on approved positions)

Level	Female ¹³	Male	Total
Secondary(9-10)	2,859	16,725	19,584
Higher secondary(11-12)	-	-	3,869
Secondary(9-12)	2,859	16,725	23,453

(2) Percentages of teachers and the gender parity indexes in all types of schools by levels

Tables 3.58 and 3.59 below demonstrate the percentage of teachers by sex and GPI at secondary, higher secondary and secondary levels by types and levels of schools based on the reporting in the Flash I, 2014-015 school census. The overall GPI in total number of teachers is 0.21 at secondary level, 0.19 at higher secondary and 0.20 at secondary level respectively. Moreover, a slightly different situation of GPI is found in the shares of female teachers in total number of teachers in community schools (table: 3.59). Compared to the GPIs at primary, lower secondary and basic levels, the GPI at secondary and higher secondary levels

¹³ The numbers of female teachers are presented based on the reporting of community schools working in the approved positions and Rahat Quotas.

are considerably low. This shows the need of greater equity with regard to the participation of females in teaching profession at secondary level.

Table 3.58
Percentage shares of teachers in all types of schools at secondary level

Level	Female	Male	GPI
Secondary(9-10)	17.4	82.6	0.21
Higher secondary(11-12)	15.7	84.3	0.19
Secondary(9-12)	16.9	83.1	0.20

Table 3.59
Percentage shares of teachers in all types of community schools at secondary level

Level	Female	Male	GPI
Secondary(9-10)	13.9	86.1	0.16
Higher secondary(11-12)	16.4	83.6	0.20
Secondary(9-12)	14.9	85.1	0.17

(3) Percentage of Dalit and Janajati teachers

Table 3.60 and figure 3.28 below present the shares of teachers by social groups (Dalit and Janajati) and gender in total number of teachers at secondary level. The shares of Dalit teachers at secondary, higher secondary and secondary (Grades 9-12) levels are 4.4% (4.1 in the last school year); 3.4% (3.2% in the last school year) and 4.1% (3.8% in the last school year) respectively. Likewise, the shares of Janajati teachers at secondary level are 18.3% (17.9% in the last school year), with 13.8% (13.5% in the last school year) at higher secondary level and 16.8% (16.5% in the last school year) at the secondary (Grades 9-12) level. Compared to the figures of the last school year, shares of both Dalit and Janajati teachers have slightly increased at all levels of the secondary education in the current school year 2014-015 (See Annex: XXI). Moreover, female participation in both dalit and janajati teachers is slightly higher than that of male.

Table 3.60
Shares of Dalit and Janajati teachers in total teachers in all types of schools

Social group	Secondary			Higher secondary			Secondary		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Dalit	5.2	4.3	4.4	3.2	3.5	3.4	4.6	4.0	4.1
Janajati	16.7	18.7	18.3	17.3	13.2	13.8	16.9	16.8	16.8

Figure 3.28
Percentage of Dalit, Janajati teachers in total teachers at secondary level

(4) Teacher training

Table 3.61 below, shows the total number of teachers¹⁴ by training status and sex in the school year 2014-015 in all types of schools at secondary, higher secondary and secondary levels. Out of the total 38,858 teachers at secondary level (9-10) 35,128 are trained, 1,723 are partially trained, and 2,007 are untrained. Again, the figures by training status show that out of the total number of teachers 19,179 at the higher secondary level, 13,061 are trained, 1,051 are partially trained and 5,067 teachers are untrained. At the secondary level (9-12) out of the total teachers 58,037, all together 48,189 teachers are trained, 2,774 are partially trained and 7,074 teachers are untrained (See Annex: XXV).

Table 3.61
Number of teachers by training status (all types of school) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	5,953	29,175	35,128	2,016	11,045	13,061	7,969	40,220	48,189
Partially trained	330	1393	1,723	215	836	1,051	545	2,229	2,774
Untrained	492	1515	2,007	788	4,279	5,067	1,280	5,794	7,074
Total	6,775	32,083	38,858	3,019	16,160	19,179	9,794	48,243	58,037

The percentages of teachers by training status and sex are illustrated in Table 3.62 below. At the secondary level (9-10) 89.4%, 4.4% and 6.0% of teachers are trained, partially trained and untrained respectively. Similarly, at the higher secondary level, 67.6% are trained, 6.2% are partially trained, and 26.3% are untrained. Again, at the secondary level (9-12), out of total number of teachers, in total 83.0% are trained, 4.8% are partially trained and 12.2% teachers are untrained. The figures in the table suggest that more teachers at the higher secondary level (26.5%) are untrained than at the secondary level (6.0%) (See Annex: XXVI_A & XXVI_B).

Table 3.62
Percentage of teachers by training status (all types of schools) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	87.9	90.9	89.4	66.8	68.3	67.6	81.4	83.4	83.0
Partially trained	4.9	4.3	4.4	7.1	5.2	6.2	5.6	4.6	4.8
Untrained	7.3	4.7	6.0	26.1	26.5	26.3	13.1	12.0	12.2

Table 3.63 below, shows the total number of teachers by training status and sex in the school year 2014-015 in all types of community schools at secondary, higher secondary and secondary levels. Out of the total 24,126 teachers at the secondary level (9-10), 22,615 are trained, 745 are partially trained, and 766 are untrained. Again, the figures by training status show that out of the total number of teachers 15,120 at the higher secondary level, 10,417 are trained, 452 are partially trained and 4,251 teachers are untrained. At the secondary level (9-12) out of the total teachers 39,246; 33,032 teachers are trained, 1,197 are partially trained and 5,017 teachers are untrained (See Annex: XXV).

¹⁴ The numbers of teachers at all levels are based on the reporting in the Flash I school census 2014-15.

Table 3.63
Number of teachers by training status (all types of community schools) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	3,085	19,530	22,615	1,692	8,725	10,417	4,777	28,255	33,032
Partially trained	212	533	745	135	317	452	347	850	1,197
Untrained	59	707	766	654	3,597	4,251	713	4,304	5,017
Total	3,356	20,770	24,126	2,481	12,639	15,120	5,837	33,409	39,246

Table 3.64
Percentage of community schools' teachers by training status at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	91.9	94.0	93.0	68.2	69.0	68.6	81.8	84.6	84.2
Partially trained	6.3	2.6	4.4	5.4	2.5	4.0	5.9	2.5	3.0
Untrained	1.7	3.4	2.6	26.4	28.5	27.4	12.2	12.9	12.8

The percentage of teachers in terms of training in community schools at secondary level (9-12) by sex are shown in the table 3.64 above. At the secondary level (9-10), in total 93.0%, 4.4%, and 2.6% of the teachers are trained, partially trained and untrained respectively. At the higher secondary level, 68.6% of the teachers are trained, 4.0% are partially trained and 27.4% are untrained. Similarly, at the secondary level (9-12) among the total number of teachers 84.2% are trained, 3.0% are partially trained and 12.8% are untrained (See Annex: XXVI_A & XXVI_B).

(5) Teacher Ratios

(5)-1 Student Teacher Ratios in all types of schools

This section deals with the Student Teacher Ratios (STRs) at all levels: secondary, higher secondary and secondary level by types of schools. The STR assesses the level of human resources input in terms of the number of teachers in relation to the number of students.

The following Table 3.65 and figure 3.29 present the STR¹⁵ in all types of schools by eco-belts and levels in the school year 2014-015. On average, the STR at the secondary level is 23:1, at the higher secondary level 22:1 and at the secondary (Grades 9-12) level 23:1 respectively. It reveals that the highest STR at the secondary level is found in the Terai eco-belt than in other eco-belts (See Annex XXVII).

Table 3.65
Student teacher ratios in all types of schools at secondary level

Eco-belts	Secondary	Higher secondary	Secondary
Mountain	24	17	22
Hill	23	19	22
Valley	11	25	14
Terai	31	25	29
Total	23	22	23

¹⁵ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2014-015.

Figure 3.29
Student teacher ratios in all types of schools at secondary level

(5)-2 Student Teacher Ratios in community schools

Table 3.66 and figure 3.30 below present the STR¹⁶ in all types of community schools by eco-belts and levels in the school year 2014-015 based on the reported number of teachers in the Flash I, 2014-015 school census. On average, the STR at the secondary level is 30:1, at the higher secondary level 20:1 and at the secondary (Grades 9-12) level 26:1 respectively. As in the previous situation, the highest STR at the secondary level is found in the Terai eco-belt (See Annex XXVIII).

Table 3.66
Student Teacher Ratios in all types of community schools (based on the reported number of teachers)

Eco-belts	Secondary	Higher secondary	Secondary
Mountain	25	17	22
Hill	27	20	24
Valley	14	19	16
Terai	41	20	32
Total	30	20	26

Figure 3.30
Student teacher ratios in all types of community schools (based on the reported number of teachers)

(5)-3 Student Teacher Ratios in community schools based on approved teachers' positions

Table 3.67 below shows the STR by eco-belts for all types of community schools at the secondary (Grades 9-10) level based on the number of approved teacher positions (including

¹⁶ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and teachers in all types of schools by level in the school year 2014-15.

the teachers working in Rahat Quota). On average, the STR in secondary community schools is 37:1 (Compared to the 31:1 in the last school year). As the table depicts, at the secondary level, the highest STR (48:1) is in the Terai eco-belt and the lowest one (19:1) is in the Valley. The data also reveal that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.65 & 3.66) (See Annex XXVIII).

Table 3.67
Student Teacher Ratios in community schools (based on the approved positions of teachers)

Eco-belts	Secondary level (Grade 9-10)
Mountain	33
Hill	33
Valley	19
Terai	48
Total	37

(6) Internal efficiency at secondary level

Table 3.68 below shows the flow rates of students from the school year 2013-014 to the school year 2014-015 in grade 9 and the percentage of students appeared in the final exam from grade 10 at the secondary level. The table illustrates, out of the total students enrolled in the school year 2013-014 in Grade Nine, 91.5% (Compared to 90.7% in the last school year) promoted to Grade Ten, 4.1% repeated the same grade in the current school year, and 4.5% dropped out from the school education system. The table also indicates that the girls' repetition and dropout rates in Grade 9 are slightly higher than that of boys (See Annexes XVI_A-C). Similarly, in total 91.4% of grade 10 students appeared in the final exam in the school year 2013-014.

Table 3.67
Internal efficiency at secondary level

Students	PRD	Grade 9	Grade 10	Grade 9-10
Total	Promotion rate	91.5	91.4	91.4
	Repetition rate	4.1	2.2	3.2
	Dropout rate	4.5	6.4	5.3
Boys	Promotion rate	91.9	91.6	91.7
	Repetition rate	3.9	2.2	3.2
	Dropout rate	4.2	6.2	5.1
Girls	Promotion rate	91.1	91.2	91.1
	Repetition rate	4.2	2.1	3.3
	Dropout rate	4.7	6.6	5.5

SECTION IV

4.1 Availability of textbooks at primary, lower secondary and secondary levels in community schools

Textbooks are the main instructional materials for classroom teaching/learning activities in schools. The Ministry of Education is committed, especially for primary school children, to deliver all textbooks by the second week of the 1st. month of each new school year.

Table 4.1 presents the status of availability of a full set of new textbooks within the second week of the 1st month (by 2071/01/15) of this school year in the community primary, lower secondary and secondary school levels. It shows that out of the total number of enrolled children at the primary level in the country, 81.1% children received a full set of textbooks within the second week of the school year 2014-015 (i.e. 2071/01/15), 4.3% children received a partial set of textbooks, 3.8% students reused the old text books and the rest 10.7% (compared to 19.6% children in the last school year) children did not receive even a single textbook by the above reference date (See Annex: XXXX_A & XXXX_B).

When compared with the status of the previous school year, the percentage of children at the primary level receiving a full set of textbooks increased from 73.1% to 81.1% in the current school year. The highest percentage of children receiving a full set of textbooks by the reference date was Grade 5 children with 84.5% and Grade Three children with 84.0%. The highest percentage of the children not receiving even a single textbook was the Grade One children with 14.6%. However, this is less than by 10.0% of the Grade One children not receiving any textbooks in the last school year.

Table 4.1
Availability of textbooks at primary, lower secondary and secondary levels by grades

Grade	Total Enrolment	Number of Students by the status of Text books availability							
		Student number				Percentage			
		Full sets	Partial	Re-used	None	Full	Partial	Reused	None
1	985,348	750,093	43,313	48,432	143,509	76.1	4.4	4.9	14.6
2	725,026	586,804	33,521	30,300	74,401	80.9	4.6	4.2	10.3
3	687,614	577,426	28,083	23,752	58,353	84.0	4.1	3.5	8.5
4	646,687	534,996	29,046	20,650	61,995	82.7	4.5	3.2	9.6
5	620,984	524,809	24,382	17,886	53,907	84.5	3.9	2.9	8.7
1-5	3,665,659	2,974,128	158,345	141,020	392,165	81.1	4.3	3.8	10.7
6	535,782	423,463	19,559	11,184	81,576	79.0	3.7	2.1	15.2
7	499,961	413,162	19,290	14,317	53,192	82.6	3.9	2.9	10.6
8	508,496	408,452	17,997	14,936	67,111	80.3	3.5	2.9	13.2
6-8	1,544,239	1,245,077	56,846	40,437	201,879	80.6	3.7	2.6	13.1
1-8	5,209,898	4,219,205	215,191	181,457	594,044	81.0	4.1	3.5	11.4
9	414,486	327,414	28,760	15,215	43,097	79.0	6.9	3.7	10.4
10	313,970	250,756	19,385	7,358	36,472	79.9	6.2	2.3	11.6
9-10	728,456	578,170	48,145	22,573	79,569	79.4	6.6	3.1	10.9
1-10	5,938,354	4,797,375	263,336	204,030	673,613	80.8	4.4	3.4	11.3

With 80.6% (excluding additional 3.7% partial and 2.6% reused) children receiving full sets of textbooks in time, the analysis suggests an encouraging scenario at the lower secondary

level with respect to the availability of textbooks by the particular date of 2071/01/15. Again, the scenario with respect to secondary level (79.4% students receiving full textbooks) is less than the primary (81.1% children receiving full sets of textbooks) and in the lower secondary level. To sum up, with 80.8% children receiving full sets of textbooks (grade 1-10) by the reference date there has been significant improvement in the availability of textbooks in the current school year, still a lot has to be done to sustain the progress and make further improvement to ensure full sets of textbooks to all children in time as per the reference date.

4.2 Number of classes with transitional language support at primary level

Nepal is a multilingual country, where groups of people speak many different languages as their mother tongue in daily practices. Table 4.2 below shows the number of schools which used a local language in the teaching and learning process at the primary level as a transitional language to make better interpretation of the subject matters for those students who did not have Nepali language as their mother tongue.

In total there are 69 local languages, which have been used as the medium of instruction in the classroom teaching and learning activities at primary level. Out of total 29,133 community schools in the school year 2014-015 the following local languages were used as the medium of instruction by grade at primary level in teaching and learning activities. The data shows that the local languages were mainly used in the early grades at primary level. Among the following reported local languages, Maithili, Tamang, Doteli, Awadhi, Bhojpuri, Tharu, Magar, Limbu, Bajjika etc. were usually used in the Terai and Hill districts.

Table 4.2
Number of classes with transitional language support at primary level

The provision of teaching through local language/s is in line with the government initiative to promote the local languages/mother tongues for teaching and learning activities at primary level. Altogether 21 textbooks were developed by the Curriculum Development Center (CDC) in different languages, based on the curriculum. Accordingly, to promote the use of local language/s in teaching and learning the National Center for Educational Development (NCED) developed training packages and provided training to teachers through the 10-day Teacher Professional Development (TPD) modules. In-addition to this there are text-books developed in some local languages for early grades. The DOE will initiate to collect information regarding the implementation of local curriculums, text-books and the use of training skills in the classrooms from the next Flash School Census, 2015-016 and present in the coming Flash and consolidated reports.

Table 4.3 below presents the total number of schools, number of languages and students by grade where the local languages have been used as the medium of instruction in the classroom teaching and learning activities at primary level. Of the total 69 local languages used as the medium of instruction in the classroom teaching and learning activities at primary level, nearly 266,808 students in grade 1 of 7,190 schools, 192,827 students in grade 2 of 6,730 schools, 169,121 students in grade 3 of 6,269 schools, 138,418 students in grade 4 of 4,972 schools and 119,199 students in grade 5 of 4,542 primary schools benefitted from the facilitation by trained teachers, contributing to their enhanced understanding of the prescribed subject matters in their local language/s.

In addition to the above table (Table 4.2) the table 4.4 below presents the number of languages used in the same schools in grade 1-5. In total, almost 6,081 schools used one local language, 422 schools used two local languages. 62 schools used three local languages, 23 schools used four local languages and 10 schools used five local languages as the medium of instruction in the classroom teaching and learning activities at primary level in the school year 2014-015.

Table 4.3
Summary of transitional local languages by number of schools, languages, and students
