

Flash II REPORT 2071 (2014-015)

**GOVERNMENT OF NEPAL
MINISTRY OF EDUCATION
DEPARTMENT OF EDUCATION**

Sanothimi, Bhaktapur
2015

Foreword

The Educational Management Information System (EMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation and application. Especially, EMIS has been used to derive the Flash Reports I and II.

This report (Flash Report II, 2071) compares the educational status of main categories of students (e.g. Total, Dalit, Janajati and students with disabilities) in relation to their student, retention and performance at individual grade between the Flash I (i.e. in the beginning of the school year) and the Flash II (i.e. at the end of the school year). It also assesses the participation of local people from different strata of society in SMCs and PTAs in school management and compares progress between targets and program implementation at macro level on the basis of school level data. This report presents the program indicators, including construction and other physical facilities, scholarship distribution, school grants, release of funds, school improvement plans (SIPs) and other performance related indicators.

Such measures give an indication of the effectiveness of the education system. EMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of school level performance information has been instrumental in evidence based educational planning at district, regional and national levels.

In the process of preparation of this report many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative effort of EMIS core team of DOE, REDs, and DEOs officials. The constructive suggestions and feedback of the Development Partners have also significant role in this process. Therefore, I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for your contributions. Any suggestion and feedback for its improvement is highly appreciated.

Part: I

1 Introduction

This report presents statistical information on the implementation of the School Sector Reform Plan in the context of School Sector Reform Programme. The report is particularly useful to policymakers, planners, development partners, civil society organisations, private sector organisations and everyone interested in the development of the education sector.

The Department of Education (DOE) started the Flash reporting process from the school year 2004-05 (B.S. 2061) under its Education Management Information System (EMIS) where it collects school level educational data from all schools across the country twice a year i.e. in the beginning and end of the school year. Based upon the collected data, the DOE produces three reports annually. While Flash I report is an assessment of the educational inputs and processes based on the school census data at the beginning of the school year, the Flash II report is an assessment of the educational outputs and outcomes based on data at the end of the school year. Finally, the consolidated report analyzes trends on key indicators over a number of years based on data from both Flash I & II reports.

This Flash II Report 2014-015 is the 21st.report in the series of Flash Reports produced by the DOE.

2 The Flash II report

- Compares the educational status of main categories of students (e.g. Total, Dalit, Janajati and students with disabilities) in relation to the numbers of students, retention and performance at individual grade between the Flash I (i.e. in the beginning of the school year) and the Flash II (i.e. at the end of the school year).
- Illustrates disparities in the enrolment of students from the different social backgrounds as well as the ecological belts.
- Assesses the participation of local people from different strata of society in SMCs and PTAs in school management.
- Compares progress between targets and program implementation at the macro level on the basis of school level data. This report presents the program indicators, including construction and other physical facilities, scholarship distribution, school grants, release of funds, school improvement plans (SIPs) and other performance related indicators.

3 Methodologies

- The data was recorded at each school (on April 5, 2014), entered by each district into the Flash database and finally submitted to DoE by August 5, 2015.
- The data submitted by the districts were compiled and aggregated at the national database into the Flash database.
- An indicator-wise analysis was undertaken by extracting the appropriate information from the Flash database.

- The status of some output indicators (e.g. related to the non-formal education programme and the establishment of new ECDs) was analysed based on district-level progress reports from DEOs (i.e. not directly from schools).
- The reference date for Flash II data was 5th.April, 2015 (23 Chaitra, 2071). In Nepal, it is mandatory for all schools, including institutional (private) schools and community (public) schools to fill in both the Flash I and II questionnaires.
- In this report the districts are taken as the unit of analysis. However, comparisons on student and other specific performance of the programme related data at the school level have been analyzed between Flash I and II. The school-level data in the form of “School Profile” are available in the DoE website: www.doe.gov.np.

In additions to the above, since very beginning of the Flash Reporting system the DOE has been initiated different mechanisms for the improvement of the school level EMIS. Those initiations are the: standardized school census forms, standardized EMIS software to establish the electronic database, time-bound tasks, provisions to approve the data/information by different personnel from the schools to district education offices, building an individual school's time series database, systemic verification by the Resource Persons, School Supervisors, District education Officers and other stakeholders, linked in the schools education planning, resource management, supports, monitoring and evaluation system and others.

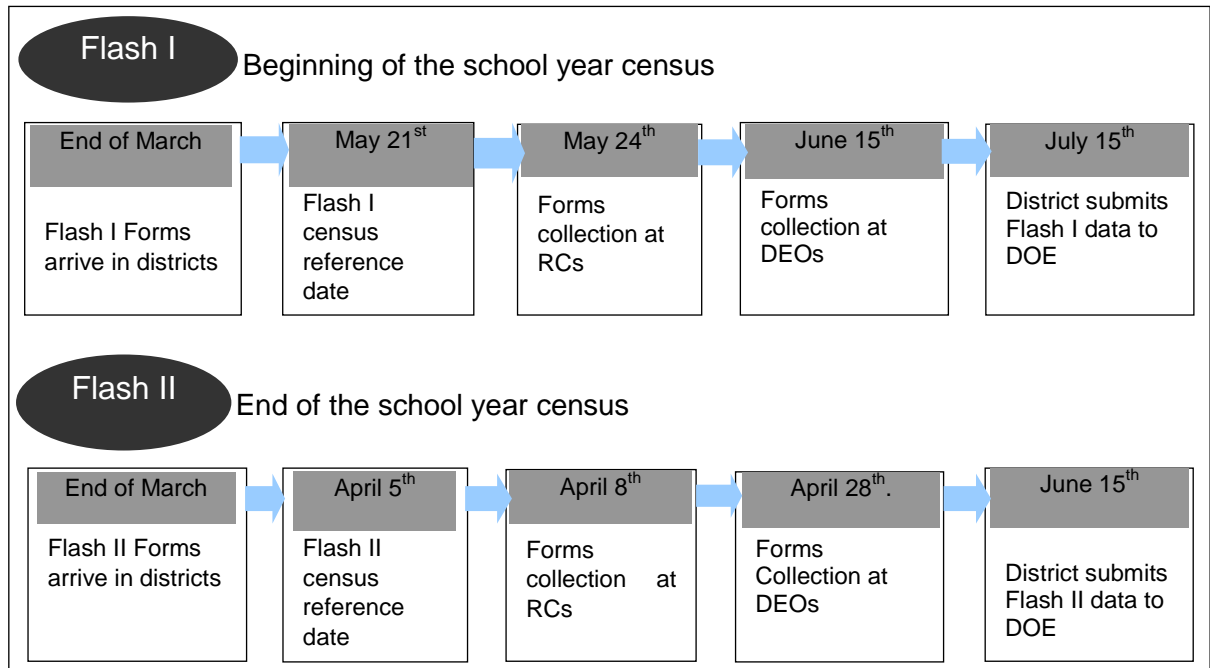

In spite of these initiations, based on the practices and the different studies the DOE has learned the lessons that until and unless every school have a standardized record keeping system at the school level the expectation of having a quality data will not be fulfilled. In this regards, the DOE has assessed the 40 schools' records from the two districts (i.e. Kapilbastu and Banke) and prepared the holistic and integrated 5 years School Record Keeping Registers in the form of hard copy and test in those 40 schools, which were appreciated by the schools, RPs and School supervisors. With the expansion of the ICT in the school activities the Integrated School Record Keeping system has been converted into the electronic based School Level IEMIS in the school year 2070 and tested in 2 districts (Bhaktapur and Dang), which was expanded in 15 districts in the school year 2071. With the success initiative on establishing the individual school's electronic based IEMIS by capturing the original records of the schools in the 15 districts the DOE has expand this mechanism in all 75 districts in the school year 2072 to strengthen the Flash Reporting System. By the last date for the submission of Flash II School census data out of 75 districts 63 districts submitted the electronic based IEMIS to the DOE and the rest submitted their Flash II school census data based on the previous mechanism (i.e. the schools entered the data in the Flash II school census forms manually and reported to the RCs and district education offices).

The current Flash Report II 2014-015 is prepared based on the both types of data: school level electronic based database and manual based of database reported by the schools to RCs, RCs to DEOs and DEOs to DOE.

4 Timeline of Flash data collection

The Flash data collection process is implemented as shown in the following figure.

Figure: 1.1
Timeline for Flash data collection

5 The Indicators covered in Flash Report II

The following indicators were covered in the Flash II school census:

1. Students currently in school by grade, gender, Dalit, Janajati and disabilities,
2. Number of participants enrolled in women literacy classes,
3. Enrollment in adult literacy classes by gender,
4. Percentage of schools receiving funds within two months of the first and second trimesters,
5. Percentage of schools with SIP,
6. Percentage of schools disclosing statements of accounts publicly,
7. School operational calendar (including school opening days),
8. Percentage of schools that completed social audit,
9. Number of community-managed schools,
10. Number of maintenance scholarships received by students,
11. Number of new classrooms constructed and rehabilitated,
12. Number of school environment improved,
13. Number of schools that received grants,

14. Number of schools completing SIP for the first time, and
15. Teacher training information.

VDC/District level information

1. Number of new ECD/PPCs open and running,
2. Number of Women's Literacy Classes delivered, and
3. Number of Adult literacy classes delivered and others.

6 Reliability of the data

The responsibility for preparing the electronic based school level IEMIS and filling in the Flash II questionnaire lies with each individual school in consultation with the School Supervisor and Resource Person. The Head Teacher (HT), School Management Committee (SMC) Chairperson and the School Supervisors/Resource Persons scrutinize the completed questionnaires before submitting it to the DEOs. Before approving the electronic based school level IEMIS and forms it is their responsibility to check the reliability of the data. However, the issue of assuring data-quality is strictly related with how schools have owned and used (e.g. for SIP and other resources) them. It is has observed that since the electronic based school level IEMIS system captured the original records of the schools by individual students, teachers and other details that made drastic change in improving the more consistent and reliable data than in the previous years.

In order to minimize the reporting errors, maintaining the data quality and preventing inconsistency in the data by revisiting the Flash forms, basic validation rules (such as to ensure that the student related to Dalit and Janajati and number of scholarship recipients, etc; does not exceed the total student) are used in the Flash data entry software.

7 Flash II Report 2071 Key findings

- Out of the total 35,603 (including the 482 ECDs programme that was distributed to the districts in the third trimester, recorded ECD/PPCs in the beginning of the school year, 31,902 (89.6%) ECD/PPCs are reported at the end of the school year 2014-015 by the reference date (5th.April 2015)
- Compared to the 1,014,339 total numbers of children in ECD/PPCs at the beginning of the school year 906,307 children were reported at end of the school year 2014-015. Of the total non-reported schools, the highest percentage of non-reported schools was found in the Mountain eco-belt.
- The average School Student Ratio at primary level is 1:128 (i.e. 1:124 in the beginning of the school year), at the lower secondary level it is 1:124, at the secondary level (grade 9-10) it is 1:104 and at the higher secondary level 1:130 respectively in the end of the school year.
- The total number of students reported in Flash II school census 2014-015 at primary, lower secondary and basic levels are: 4,217,697; 1,731,504 and 5,949,201 respectively. Compared to the beginning of the school year 2014-015 there are 30 districts, which have shown a decrease in primary level total students by more than 5.

- Compared to the beginning of the school year 2014-015 at secondary level there are slight changes in the grade wise composition of students in the end of the school year 2014-015.
- Of the total students, there are 91,351 at primary level, 2,065 at lower secondary level and 387 at the secondary level students are reported in the religious schools.
- Compared to the total students in the beginning of the school year 2071, in total 92.2% (compared to 89.3% in the last school year) of students at the primary level appeared in the 2071 final examination.
- At the lower secondary level, out of the total number of students in the beginning of the school year, in total 93.7% (compared to 92.4% in the last school year) appeared in the final examination in the end of the school year 2014-015.
- Overall, out of the total number of students appeared in the final exam at the secondary level is 95.1% (compared to 93.6% in the last school year) in the school year 2014-015.
- The average attendance rate for all three dates is 83.6% (compared to the last school year 79.6%), 87.9% (compared to the last school year 84.7%) and 90.5% (compared to the last school year 85.4%) at primary, lower secondary and secondary level respectively.
- Out of the total 29,133 community schools, 10.7% schools in the first trimester and 38.0% in the second trimester received the government funds within two months of each trimester.
- Out of the total community schools, 94.3% (compared to 93.9% in the last school year) of schools reported that they have a School Improvement Plan (SIP) for their schools.
- By the reference date (April 5, 2015) of Flash II data collection, out of the total community schools with the SIPs, 96.6% (compared to 95.9% in the last school year) schools responded to have received all types of government grants for the school year 2014-015.
- The percentage of schools that performed disclosed a statement of accounts (income and expenditure reports) is 85.4% (compared to 83.7% in the last school year).
- In total 91.9% (compared to 91.0% in the last school year) schools performed the social audit regarding all of their academic, administrative, financial and other school level activities during the school year 2014-015.
- In total 91.4% (compared to 89.9% in the last school year) schools prepared a school operational calendar.
- Compared to the 233 planned days of school opening days for overall school activities, the average number of actual school opening days was 226 in the school year 2014-015.
- Out of total 226 (compared to 223 days in the last school year) actual days for the activities performed at schools, it can be seen that on an average 186 (compared to 184 days in the last school year) days were spent for teaching and learning activities; 25 days were spent on examinations and 16 days for extra curricular and other activities.
- On an average the schools were monitored by Resource Persons 3.0 times, almost 1.7 times by the School Supervisor and 1.4 times by other persons.

- Out of the total schools, 98.6% (98.2% compared to last school year) of schools responded that they have formed their SMC. A similar percentage i.e. 97.7% (96.5% compared to last school year) of schools have formed their PTA.
- The participation on SMC by sex, Dalit and Janajati shows 22.1% (21.6% compared to last school year) female members, 11.6% (11.3% compared to last school year) Dalit members and 36.6% (36.0% compared to last school year) are Janajati members.
- The participation on PTA by sex, Dalit and Janajati is 28.3% (27.4% compared to last school year) female members, 14.1% (13.9% compared to last school year) Dalit members and 39.7% (39.0% compared to last school year) are Janajati members.
- Out of total SMCs and PTAs, 88.5% of SMCs (Compared to the last school year 87.1%) and almost 88.9% of PTAs (Compared to the last school year 86.6%) are formed by common consensus and the rest by an election process.
- Out of total 29,133 community schools 1-6 times meetings were held in 11,122 (38.2%) schools, 7-12 times meetings held in 11,204 (38.5%) schools, 13-18 times meetings held in 2,966 (10.2%) schools, and more than 18 times meetings held in 1017 (3.5%) schools.
- Altogether by the end of the fiscal year, a total of 12,471 (compared to 12,421 levels in the last school year) levels of schools management were transferred to their respective local community.
- Of the total 12,471 school levels, 8,248 (compared to 8,238 levels in the last school year) primary levels, 2,839 (compared to 2,826 levels in the last school year) lower secondary levels and 1,384 (compared to 1,357 levels in the last school year) secondary levels were transferred to the community.

Part: II

1. Data analysis

This section presents statistical information on the following Flash II indicators with tables, graphs/figures and maps on the following aspects of school education.

- Status of ECD/PPCs compared to the Flash I, 2070 records,
- School information by grade and level compared to the Flash I, 2070 records,
- Student by grade, gender compared to the Flash I, 2070 records,
- Student appearing in the final exam and retention during the school year,
- Scholarship,
- Involvement of local people in school management by social category,
- Functioning of schools,
- Physical and financial support to school,
- Teacher training information, and
- Others.

The indicators are analyzed based on the data of the total number of schools that reported to the Flash II school census. The presentation compares progress between 5 development regions, 4 eco-belts and 75 districts within a school year.

2. Flash II indicators and analysis

2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)

The EFA goal regarding the Early Childhood Development (ECD) activities is in line with the Dakar Framework for Action for EFA (2001-15)¹. The ECD/PPC is instrumental for the social, emotional, intellectual and physical development of children. As such it helps to improve the internal efficiency of basic and primary education. Since 2004, with the implementation of the EFA 2004-09 and the implementation of the SSRP 2009-15 it has been one of the main strategies taken to achieve the EFA goal to increase the number of ECD centers to ensure access for the most vulnerable and marginalized children by the government of Nepal. The various forms of ECD/PPCs institutions include school-based ECD centers, community-based ECD centers and privately managed pre-primary classes. Schools give different names to these classes as Nursery, Kindergarten, Montessori, etc.).

2.1.a) Number of Early Childhood Development and Pre-primary Classes (ECD/PPCs)

Table 2.1 and figure 2.1 below show that out of the total 35,603 (including the 482 new ECDs distributed to the districts in the third trimester but not captured in the Flash II school census 2071) recorded ECD/PPCs in the beginning of the school year, 31,902 (89.6%) ECD/PPCs especially from the school based ECD/PPCs are reported at the end of the school year 2014-015 by the reference date (5th.April 2014) of Flash II school census (See Annex: I). The rest of the ECD/PPCs (in total 3,701ECD/PPCs) especially community-based ECDs and PPCs from the institutional schools (10.4%), which are not analyzed in this report, but their status will be

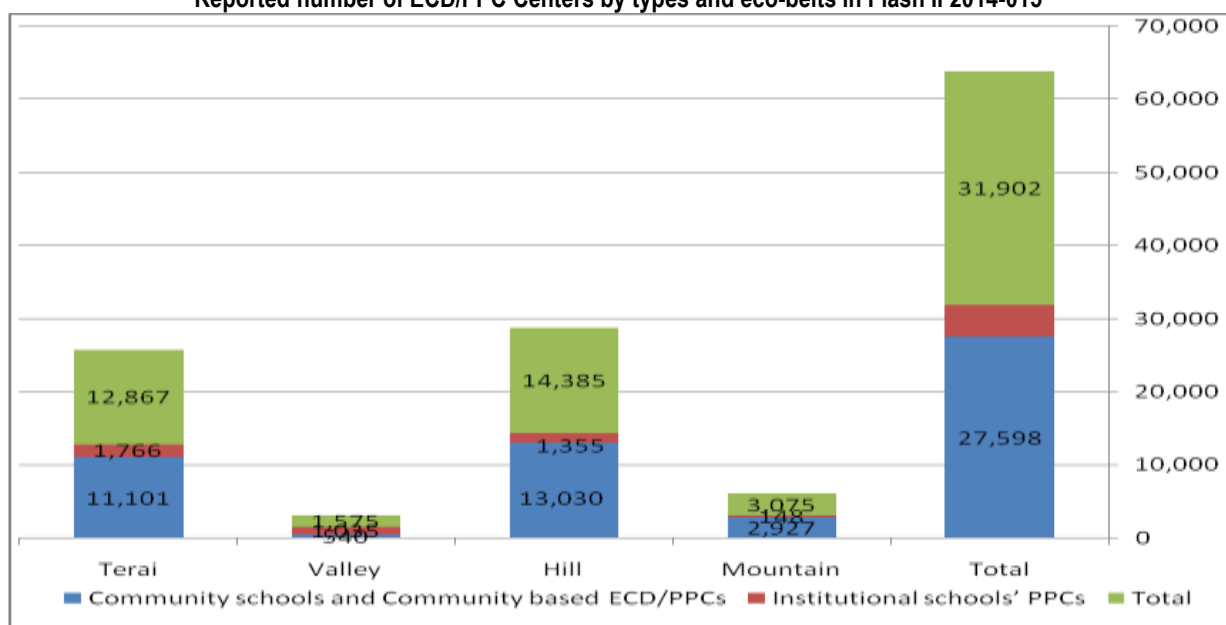

¹. *The Dakar Framework for Action is a collective commitment to action. Governments have an obligation to ensure that EFA goals and targets are reached and sustained.*

incorporated in the final report. Practically, some of the community-based ECDs are not linked with the mother schools and also have delayed to report their information, which caused under reporting of ECDs through the Flash II school census within the prescribed time and date. Although the data shows a low involvement of the private (institutional) sector in providing ECD/PPC services, the contribution of Pre-primary classes has been very important in the urban areas of the country, especially in the Kathmandu Valley almost 23% of ECD/PPCs have been run by the private sector). Among the 75 districts there are 10 districts: Saptari, Kathmandu, Lalitpur, Okhaldhunga, Rukum, Dhanusha, Mahottari, Jumla, Salyan and Humla with a rate of more than 20% of non-reported ECD/PPCs at the end of the school year 2014-015 by the reference date (5th.April 2014) of Flash II school census (See Annex: I). The reporting status of the ECD/PPCs suggests that although there are some problem of co-ordination between the mother schools and respective community based ECDs and also RCs with the Institutional schools at district and local level; the DEOs, RCs and schools should be more pro-active in the future.

Table 2.1
Total number of recorded and reported ECD/PPCs by types and eco-belts

Eco-belts	Number of recorded ECD/PPCs in the beginning of the school year, 2014-015				Number of reported ECD/PPCs in the end of the school year, 2014-015				Number of non-reported ECD/PPCs in Flash II
	Community schools and Community based ECD/PPCs	Institutional schools' PPCs	Total ECD/PPCs programme in the F/Y 2071-72	Total number of ECD/PPCs in 2071-72	Community based ECD/PPCs	Community schools based ECD/PPCs	Institutional schools' PPCs	Total	
Mountain	3,097	186	114	3,397	232	2,695	148	3,075	322
Hill	13,598	1,622	328	15,548	2,306	10,724	1,355	14,385	1,163
Kathmandu Valley	795	1,177	0	1,972	39	501	1,035	1,575	397
Terai	12,476	2,170	40	14,686	1,367	9,734	1,766	12,867	1,819

Figure 2.1
Reported number of ECD/PPC Centers by types and eco-belts in Flash II 2014-015

2.1. b) Number of children enrolled in ECD/PPCs

Table 2.2 and the figure 2.2 below compare the total numbers of children in ECD/PPCs between the beginning and end of the school year 2014-015 by eco-belt and gender. The comparison shows that in total 10,14,339 children from the 35,121 ECD/PPCs in the beginning of the school year come down into 9,06,307 from the 31,902 reported ECD/PPCs within the prescribed time and date of Flash II school census. It shows, due to the under reporting of ECD/PPCs within the prescribed time the number of student decreased by 10.7% at the end of the school year. The highest number of decrease in enrolment is observed in the Mountain compared to other eco-belts.

The ECD/PPCs and students ratio analysis shows that at the beginning of the school year, the ratio of ECD/PPCs and students was 1:29, whereas it is 1:28 at the end of the school year. This indicates that the on average almost 1 student from each ECD/PPCs dropped out within the school year 2014/015. The composition of children by gender shows that the share of girls in the total children has not changed at the end of the school year. The highest share of girls children is in the Mountain eco-belt in both Flash I&II school census (See Annex: I).

In addition, the PPCs run by private institutions include mostly the three-year's program (Nursery classes, Lower K.G. and Upper K.G.), whereas the ECDs run by the community and community schools include one-year program. This explains why the Kathmandu Valley has the highest ECD/PPCs and students ratio among the stated eco-belts. The figure 2.2 below depicts the status of total students by eco-belt and gender in the end of the school year 2014-015.

Table 2.2
Total children in ECD/PPCs by eco-belts in the beginning and end of the school year 2014-015

Eco-belts	Number of children in ECD/PPC in the beginning of the school year, 2014-015			Number of children in ECD/PPC in the end of the school year, 2014-015			% of change in the beginning and end of the school year 2014-015		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	33,492	34,077	67,569	28,425	29,100	57,525	15.1	14.6	14.9
Hill	158,058	167,845	325,903	149,873	159,415	309,288	5.2	5.0	5.1
Kathmandu Valley	52,133	58,348	110,481	45,829	51,393	97,222	12.1	11.9	12.0
Terai	244,945	265,441	510,386	212,131	230,141	442,272	13.4	13.3	13.3
Total	488,628	525,711	1,014,339	436,258	470,049	906,307	10.7	10.6	10.7

Figure 2.2
Comparison on total number of students in ECD/PPCs in the beginning and end of the school year 2014-015

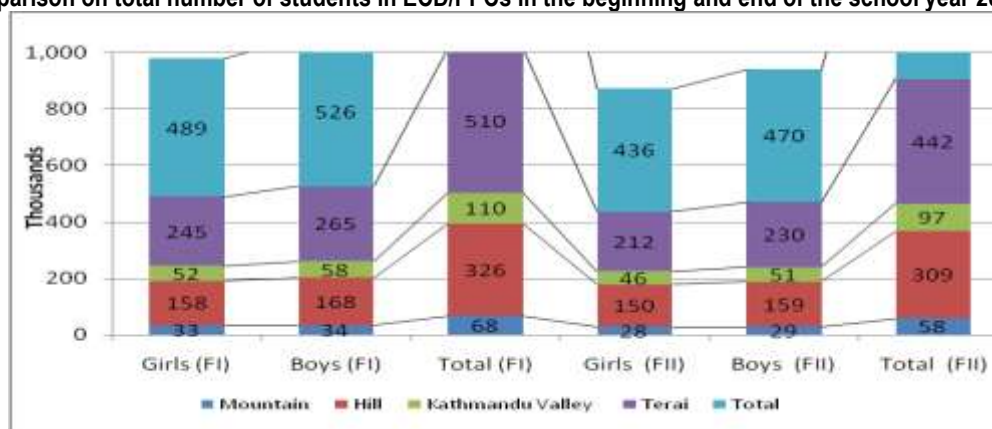

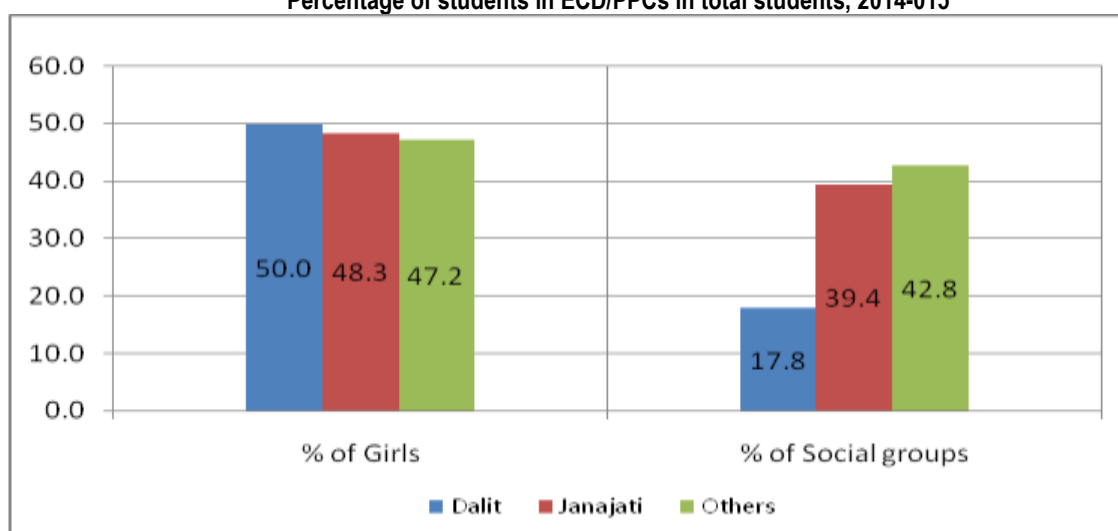

Table 2.3 below shows that out of the total children of 906 thousands in the end of the school year 2014-015 in ECDs/PPCs in total 17.8% with 18.5% girls and 17.2% boys are Dalit and in total 39.4% with 39.5% girls and 39.2% boys are Janajati in total children. This shows, compared to the beginning of the school year the share of Dalit has slightly decreased, whereas it has increased by 0.8% point for the Janajati in the end of the school year. The GPI with the share of girls and boys for ECD/PPCs in total, Dalit and Janajati students are 0.93, 1.00 and 0.94 respectively, which shows a higher level of participation of Dalit girls in comparison to the total and Janajati girls. Hence, the data suggests that the gender situation is approaching to parity among the Dalit children but there is still a gap among the overall and Janajati student (See Annex: I). Figure 2.3 below presents the share of girls and the share of students in ECD/PPCs by social groups, with the proportion of Dalit, Janajati and other students in total students.

Table 2.3
Number of Dalit and Janajati students in ECD/PPCs

Students	Number of students in ECD/PPC			Percentage share in total students	
	Total	Dalit	Janajati	Dalit	Janajati
Girls	436,258	80,791	172,380	18.5	39.5
Boys	470,049	80,738	184,259	17.2	39.2
Total	906,307	161,529	356,639	17.8	39.4

Figure 2.3
Percentage of students in ECD/PPCs in total students, 2014-015

2.2 School education

Broadly, since the implementation of SSRP (School Sector Reform Programme), the school education system in the country consists of basic (grade 1-8) and secondary (grade 9-12) education levels. The primary and lower secondary levels are included in the basic education and the secondary and higher secondary levels are included in the secondary education. Primary level provides grade one to five years of education, whereas lower secondary level provides further three years of education. Secondary level offers two more years of education, while higher secondary level also offers two more years of education after SLC. As described previously, early childhood development (ECD)/pre-primary classes (PPCs) are offered for the holistic development of children and as preparation for grade one. The prescribed age groups for different levels of school education are 4 years for ECD/PPC, 5-9 years for primary, 10-12 years for lower secondary, 13-14 years for secondary and 15-16 years for higher secondary education programme.

From 2009 the government of Nepal has begun to implement the School Sector Reform Programme (SSRP), which aims at restructuring school education with basic education (consisting of grades 1-8) and secondary education (consisting of grades 9-12). The majority of schools in the country include separate primary level (grade 1-5). In addition, most of the lower secondary, secondary and higher secondary schools operate primary level. Very few of them offer only grades 6-8 (lower secondary level) or only grades 9-10 (secondary level). At the higher secondary level it is more common that some schools offer only grades 11-12 (See Annex III).

Generally, schools are categorized into four types: community-aided (schools, which are fully supported by the government for teachers' salary and other expenses), community-managed (schools, which are fully supported by the government for teachers' salary and other funds but their management responsibility lies with the community), community-unaided (schools, which are either getting partial support or no support from the government) and the institutional schools (supported by parents and trustees). In addition to the above categories, there are some schools running as the religious schools such as Madarasa, Gumba/Vihar and Ashram/Gurukul that have received support from the government when they have been mainstreamed into the formal education system by registering with the DEO and following the Education Act and Regulation.

2.1.1 The reporting status and comparison of schools in FI 2014-015 and FII 2014-015

Table 2.4 and figures 2.4 below present the total number of schools by unit and levels registered at DEOs database throughout the country in the beginning of the school year 2014-015. Of the total 34,806 schools, 34,335 are primary levels, 14,952 are lower secondary and 34,506 are basic levels of schools. It shows that, in total 417 schools (especially in the Terai eco-belt) were closed and merged in the last school year, so that the number of schools has decreased in the current school year 2014-015. Of the total recorded schools in the beginning of the school year 2014-015 in total 33,070 (95.0%) schools with 32,874 primary levels, 14,003 lower secondary levels and 33,028 basic levels, 8,271 secondary levels, 3,123 higher secondary levels and 8,310 secondary levels are reported at the end of the school year 2014-015 by the reference date (5th April 2014) of Flash II school census (See Annex: II). In total 1,736² (5.0%) non-reported schools (especially institutional schools) within the prescribed time are also reported beyond the prescribed data of Flash II school census, which are not analyzed

² The status of reported beyond the time-line will be incorporated in the final version of this report.

in this report. The status of reporting shows that the lowest reporting (81.6%) has been observed in the Kathmandu valley compared to other eco-belts. This indicates that each individual school, RC and DEO should be more active to report the data within the given time table in the future (See Annex: II).

The figure 2.4 below presents the percentage distribution of schools by level. Among the eco-belts, the highest percentage of primary level is in Hill and the lowest is in the Kathmandu valley, which shows that compared to the number of students at primary level the distribution of primary level school is less in the Terai eco-belt.

Table 2.4
Number of schools by eco-belts (in unit and levels in Flash I & II, 2014-015)

School by level and Unit	School census	Number of schools by unit and levels				
		Mountain	Hill	Kathmandu Valley	Terai	Total
Total School (Units)	Flash I	4,225	17,566	2,206	10,809	34,806
	Flash II	4,139	17,120	1,801	10,010	33,070
Primary level (Grades 1-5)	Flash I	4,187	17,429	2,070	10,649	34,335
	Flash II	4,109	17,026	1,791	9,948	32,874
Lower secondary level (Grades 6-8)	Flash I	1,607	6,830	1,686	4,829	14,952
	Flash II	1,532	6,515	1,462	4,494	14,003
Basic level (Grades 1-8)	Flash I	4,218	17,514	2,084	10,690	34,506
	Flash II	4,139	17,105	1,799	9,985	33,028
Secondary level (Grades 9-10)	Flash I	794	3,846	1,360	2,825	8,825
	Flash II	769	3,680	1,210	2,612	8,271
Higher secondary level (Grades 11-12)	Flash I	318	1,575	438	1,265	3,596
	Flash II	304	1,513	269	1,037	3,123
Secondary level (Grades 9-12)	Flash I	801	3,897	1,479	2,943	9,120
	Flash II	769	3,696	1,210	2,635	8,310

Figure 2.4
Percentage distribution of schools by eco-belts and levels (in total unit and level)

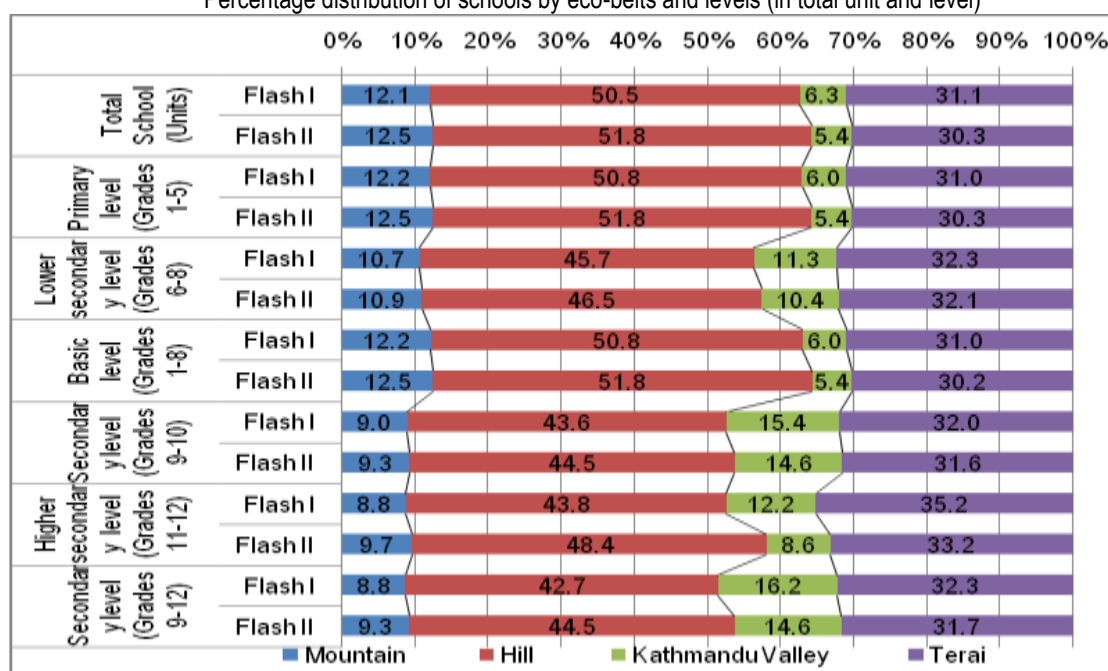

Table 2.5 below presents the matching of the each individual school in the beginning of the school year 2014-015 with the school reported in the end of the school year 2014-015. Of the total 34,806 schools in the beginning of the school year, 33,072 (95.0%) schools were reported both in the Flash I and II school census. Matching with the schools recorded in the Flash I school census 2014-015; almost 4.6% of the same schools were not reported by the reference date of Flash II school census. Among the 4 eco-belts the highest percentage of non-reported schools were found in the Kathmandu Valley. Mostly, the institutional schools did not report their information in time, which caused the under reporting of students and other respective information.

Table 2.5
Comparison on reported schools in Flash II school census with the recorded schools in Flash I school census 2014-015

Eco-belts	Total number of recorded schools in the school year 2014-015	Number of schools reported both in Flash I & II 2014-015	Number of schools which were reported in Flash I but not in Flash II 2014-015	% of non- reported school in Flash II 2014-015
Mountain	4,225	4,139	86	2.0
Hill	17,566	17,122	444	2.5
Kathmandu Valley	2,206	1,801	405	18.4
Terai	10,809	10,010	799	7.4
Nepal	34,806	33,072	1,734	5.0

Table 2.6 below shows the number of religious schools by types and level. Since the beginning of the school year 2006-07 the DOE initiated to mainstream the educational activities in religious schools in the country. To this effect, all religious schools need to report to DEOs in the same way as any other recognized schools have been reported both in the Flash I and II school census. In consequence, DEOs provide support to these religious schools in the same way as other schools in the country.

A total of 800 religious schools (compared to 895 recorded religious schools in the beginning of the school year 2014) reported to Flash II school census at the end of the school year, which is lower than the total number of religious schools in the beginning of the school year. Out of them 793 school levels are primary level, 41 lower secondary levels, 18 secondary levels and 5 are the higher secondary levels. The Madarasa schools are mainly found in the Terai belt, Gumbas mainly in Hill and Mountain belts and Ashram mainly in Hill and Terai belts (See Annex: IV).

Table 2.6
Number of reported religious schools by type and level, Flash II 2014-015

Religious Schools	Total (in unit)	Primary level	Lower Secondary level	Basic level	Secondary level	Higher Secondary level	Secondary level
Madarasa	683	683	22	683	10	3	10
Gumba/Vihar	64	64	5	64	1	0	1
Ashram/Gurukul	53	46	14	46	7	2	7
Total	800	793	41	793	18	5	18

Table 2.7 and figure 2.5 below show the School Student Ratio (SSR)³ by levels and eco-belts at end of the school year 2014-015. This indicator presents the extent of schools' capacity to accommodate the students for the regular teaching learning activities. The national average of

³ This indicator is calculated by taking the total number of schools by level and total number of students in the respective school level.

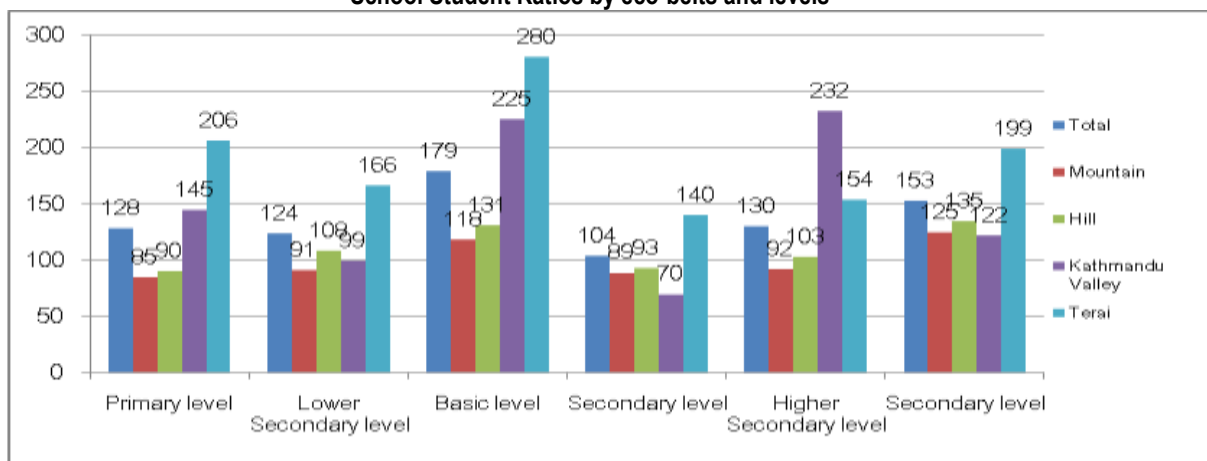

School Student Ratio at primary level is 1:128, which is almost 2 percent points higher than the School Student Ratio in the beginning of the school year (i.e. 1:126). That is, on average, a primary level school is serving 128 students. Similarly, the School Student Ratio at lower secondary level is 1:124 and at basic education level it is 1:179. Likewise, the School Student Ratio at secondary level (grade 9-10) is 1:104, at the higher secondary level 1:130 and at the secondary level (grade 9-12) it is 1:153. Compared to the beginning of the school year 2014-015, the School Student Ratios are higher in all levels in the end of the school year 2014-015.

Table 2.7
School Student Ratios by eco-belts and levels

Eco-belts	Primary level	Lower Secondary level	Basic level	Secondary level	Higher Secondary level	Secondary level
Mountain	85	91	118	89	92	125
Hill	90	108	131	93	103	135
Kathmandu Valley	145	99	225	70	232	122
Terai	206	166	280	140	154	199
Total	128	124	179	104	130	153

Figure 2.5 below depicts the status of School Student Ratios by level and eco-belts in the end of the school year 2014-015. The highest School Student Ratios are found in the Terai at all levels. It is the only eco-belt which has higher rates than the national average at all levels. The lowest School Student Ratios are varies by level within the eco-belts.

Figure 2.5
School Student Ratios by eco-belts and levels

2.3. Student

Indicator 1: Students currently in schools by grade and gender

a) Student at basic level by grade and gender

Both the table 2.8 and figure 2.6 below show the grade-wise composition of enrolment at primary, lower secondary and basic levels in the beginning of the school year 2014-015. The grade-wise enrolment at the primary level shows that the trend of highest share of Grade One in total enrolment is continuing. However, the pattern of enrolment shows a beginning of positive signs, indicating that the difference of shares within the primary level's grades is narrowing down (i.e. from 33.8% in Grade One and 14.4% in Grade Five in 2004-05 to 26.2% in Grade One and 17.1% in Grade Five in the school year 2014-015). The continuous progress on grade-wise retention, higher promotion and lower repetition and drop-out rates seems to contribute to narrow the gaps in the share of enrolment among all grades of primary level.

Out of total enrolment at basic level (Grades 1-8) almost one fifth (18.4%) of students is in Grade One and 14.0% in Grade Two. Likewise, 12.0% and 9.7% of students are in Grades Five and Eight respectively. The grade-wise composition at the basic level shows that more than one third of the total numbers of students are in Grades One and Two. From a gender perspective, the composition of grade-wise enrolments is fairly balanced and the data shows that gender parity has been achieved in all grades at the basic level (See Flash I 2014-015, Annex: VI & XXX). However, it is a challenge to improve the progression rate so that all children admitted in Grade One are retained and complete basic education with good quality to achieve universal basic education (UBE) within specified/stipulated time period.

Table: 2.8
Grade-wise composition of enrolment at basic level, Flash I, 2014-015

Grade	Girls	Boys	Total	Share of girls by grades and levels	Grade-wise share in total enrolment by levels	Grade-wise share in total enrolment of basic education
Grade 1	571,856	564,577	1,136,433	50.3	26.2	18.4
Grade 2	438,195	426,592	864,787	50.7	19.9	14.0
Grade 3	419,972	401,322	821,294	51.1	18.9	13.3
Grade 4	392,727	380,215	772,942	50.8	17.8	12.5
Grade 5	378,563	361,336	739,899	51.2	17.1	12.0
Grades 1-5	2,201,313	2,134,042	4,335,355	50.8	100.0	70.3
Grade 6	321,426	318,224	639,650	50.3	34.9	10.4
Grade 7	301,582	292,950	594,532	50.7	32.4	9.6
Grade 8	307,941	293,190	601,131	51.2	32.8	9.7
Grades 6-8	930,949	904,364	1,835,313	50.7	100.0	29.7
Total (Grades 1-8)	3,132,262	3,038,406	6,170,668	50.8		100.0

Figure 2.6
Grade-wise composition of enrolments at basic level

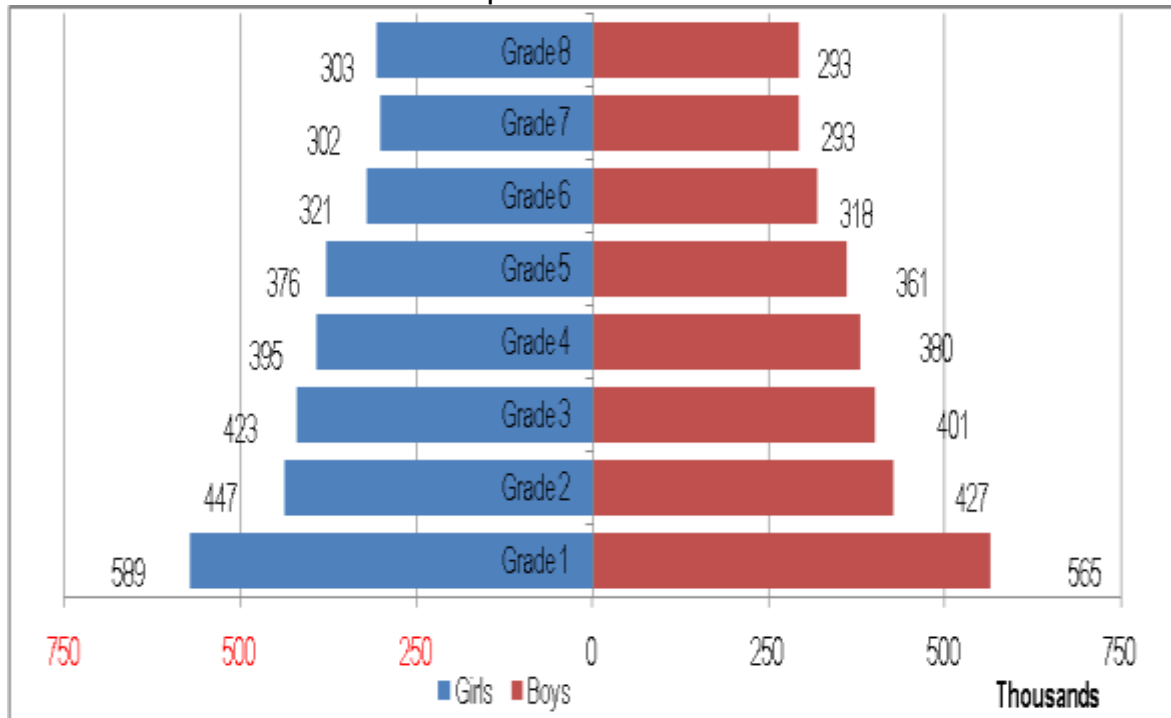

Table 2.9 and figure 2.7 below show the grade-wise composition of student at primary, lower secondary and basic levels in the end of the school year 2014-015. The total number of students reported in Flash II school census 2014-015 at primary, lower secondary and basic levels are: 4,217,697; 1,731,504 and 5,949,201 respectively. Compared to the beginning of the school year 2014-015 there are 25 districts, which have shown a decrease in enrolment at primary level by more than 3 percentage points, of these the districts namely; Manang, Siraha, Saptari, Surkhet, Jumla, Taplejung and Parsa have shown a decrease in primary level students by more than 9 percentage points in the end of the school year 2014-015.

In-addition to this analysis, the school wise comparative analysis on enrolment in the beginning of the school year (Flash I school census 2014-015) and the end of the school year (Flash II school census 2014-015) depicts that there are 6,306 schools which have slight increase in enrolment, whereas there are 11,409 schools with no change in the enrolment and 15,159 schools which have decreased in enrolment in the end of the school year.

The grade-wise student at primary level depicts that the trend of highest share in grade 1 in total student is continuing. But as it is stated in Table 2.8 and figure 2.6, the difference of shares within the primary level's grades is narrowing down. The continuous progress on grade-wise higher retention rates at the end of the school year seems to contribute to narrow the gaps in the share of students in all grades for primary level (See Annex: V). At the lower secondary level also, same pattern is observed in the grade-wise share of student in total students (See Annex: XII).

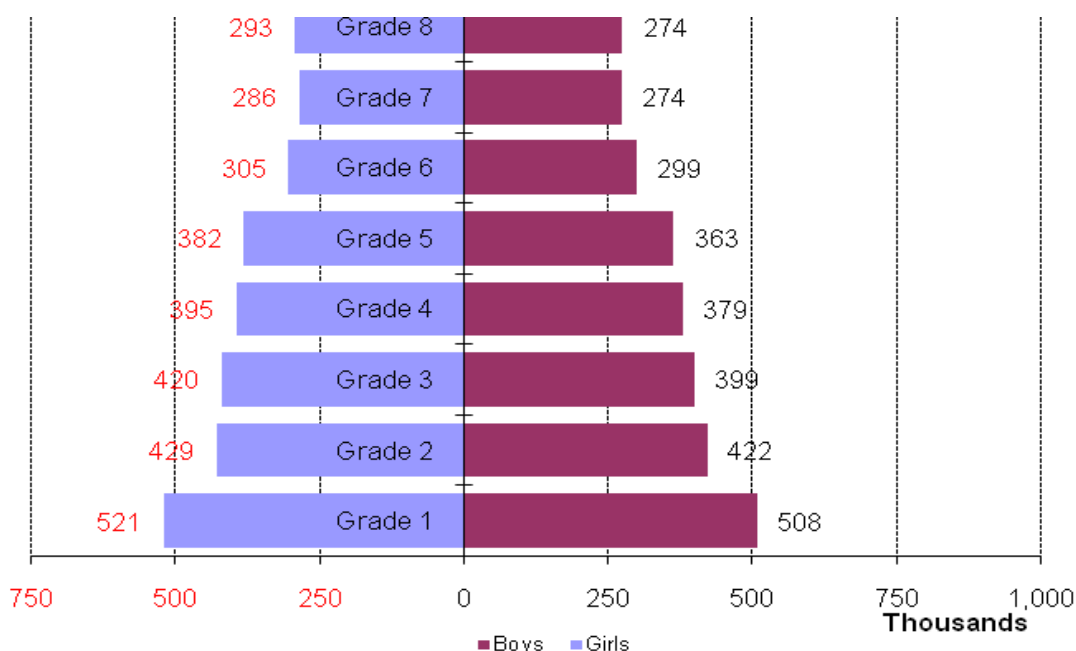

Out of total students in basic level (Grades 1-8) almost one fifth (17.3%) of students is in grade one and 14.3% in grade two. Likewise, 12.5% and 9.5% of students are in grades five and eight respectively, i.e. almost one third of the total numbers of students are in grades one and

two. From a gender perspective the composition of grade-wise students is fairly balanced at all levels (Table 2.9).

Table 2.9
Grade-wise composition of student at basic level in end of the school year, Flash II 2014-015

Grades	Girls	Boys	Total	Share of girls by grade and level	Grade wise share in total student at primary and lower secondary levels	Grade wise share in total student at Basic level
Grade 1	520,699	507,943	1,028,642	50.6	24.4	17.3
Grade 2	429,355	421,591	850,946	50.5	20.2	14.3
Grade 3	420,459	398,622	819,081	51.3	19.4	13.8
Grade 4	395,123	378,621	773,744	51.1	18.3	13.0
Grade 5	382,023	363,261	745,284	51.3	17.7	12.5
Grade 1-5	2,147,659	2,070,038	4,217,697	50.9	100.0	70.9
Grade 6	304,982	299,445	604,427	50.5	34.9	10.2
Grade 7	285,936	273,542	559,478	51.1	32.3	9.4
Grade 8	293,147	274,452	567,599	51.6	32.8	9.5
Grade 6-8	884,065	847,439	1,731,504	51.1	100.0	29.1
Total (Grade 1-8)	3,031,724	2,917,477	5,949,201	51.0	0.00	100.0

Figure 2.7
Grade wise composition of students at basic level at the end of the school year 2014-015

Tables 2.10, 2.11 and figure 2.8 below show the number of Dalit and Janajati students reported in the Flash II school census 2014-015 and the comparison on the grade-wise share of students between beginning and end of the school year 2014-015 in total student at basic level. Overall, the shares of Dalit students in total students at primary level has slightly changed at the end of the school year as compared to the beginning of the school year 2014-015 (i.e. from 19.9% in Flash I to 19.1% in the Flash II 2014-015), whereas there is also slight decrease in the share of Janajati students both in primary and lower secondary levels by 0.3% and 0.7% in the end of

the school year. As earlier stated (Table 3.9), the most probably of decrease in student is for other students than the Dalit and Janajati students.

Table 2.10
Dalit students at basic level by grade and gender in Flash II 2071 and percentage of grade-wise Dalit students in total students in Flash I and Flash II school census 2014-015

Grade	Student in Flash II 2014-015			Share of Dalit in total Student	
	Girls	Boys	Total	In Flash I	In Flash II
Grade 1	112,255	105,790	218,045	21.8	21.2
Grade 2	86,256	83,862	170,118	20.6	20.0
Grade 3	80,382	75,707	156,089	19.7	19.1
Grade 4	71,841	67,907	139,748	18.6	18.1
Grade 5	63,454	60,149	123,603	17.3	16.6
Grade 1-5	414,188	393,415	807,603	19.9	19.1
Grade 6	47,414	44,985	92,399	15.9	15.3
Grade 7	39,624	37,132	76,756	14.4	13.7
Grade 8	36,753	34,777	71,530	13.1	12.6
Grade 6-8	123,791	116,894	240,685	14.5	13.9
Total (Grade 1-8)	537,979	510,309	1,048,288	18.3	17.6

Table 2.11
Janajati students at basic level by grade and gender in Flash II 2071 and percentage of grade-wise Janajati students in total students in Flash I and Flash II school census 2014-015

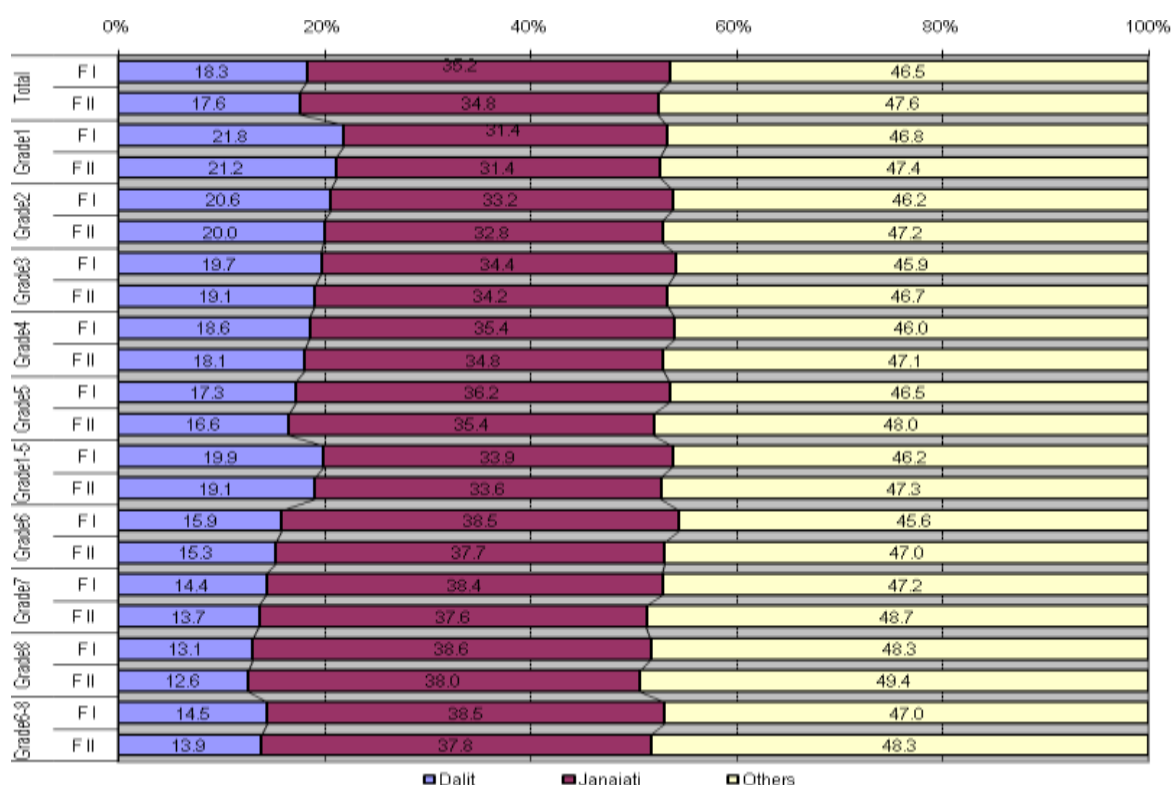

Grade	Student in Flash II 2014-015			Share of Janajati in total student	
	Girls	Boys	Total	In Flash I	In Flash II
Grade 1	162,405	160,107	322,512	31.4	31.4
Grade 2	139,956	139,419	279,375	33.2	32.8
Grade 3	143,012	136,752	279,764	34.4	34.2

Grade 5	135,671	128,512	264,183	36.2	35.4
Grade 1-5	718,115	697,091	1,415,206	33.9	33.6
Grade 6	118,256	109,838	228,094	38.5	37.7
Grade 7	111,228	99,228	210,456	38.4	37.6
Grade 8	115,505	100,130	215,635	38.6	38.0
Grade 6-8	344,989	309,196	654,185	38.5	37.8
Total (Grade 1-8)	1,063,104	1,006,287	2,069,391	35.2	34.8

The district level analysis shows that it varies by district to district. Compared to the beginning of the school year, there are 10 districts –Humla, Bajhang, Achham, Banke, Rasuwa, Bardiya, Doti, Parsa, Taplejung, and Jumla show a decrease in the share of Dalit students by more than 12% points at the primary level and 9 districts-Sindhupalchok, Mugu, Dailekh, Morang, Rolpa,

Taplejung, Banke, Dolpa and Bardiya show a decrease in Dalit enrolment at lower secondary level by 13% points at the end of the school year.

Similarly, altogether 10 districts: Manang, Jajarkot, Bajhang, Bajura, Bardiya, Parsa, Gulmi, Rupandehi, Jumla and Taplejung show a decrease in the share of Janajati students by more than 8% points at the end of the school year in total students at the primary level. likewise, 7 districts- Kanchanpur, Banke, Sarlahi, Rukum, Palpa, Syangja and Kavrepalanchok show a decrease in lower secondary level students by more than 15% points at the end of the school year 2014-015 (See Annex: V, VI, VII, XII, XIII & XIV).

Figure 2.8
Grade-wise Share of students by Dalit and Janajati students in total students at basic level, Flash I and Flash II school census 2014-015

Similarly, the figure 2.8 above shows the percentage of Dalit and Janajati students in total students by grade in the end of the school year 2014-015. Compared to the percentage of Dalit and Janajati students in total students in beginning of the school year, the percentage of Dalit and Janajati students in total students has changed in the end of the school year at all levels (See Annex: XI_A&B).

Table 2.12 and the figure 2.9 below present the number and percentage of students enrolled by type of schools at the end of the school year at primary, lower secondary and basic level. The share of student in community schools and institutional schools at primary level is 86.8% and 13.2%. Similarly, at the lower secondary level the share of student in community schools is 83.7% and the 16.3% is in institutional schools in the total number of student. Over all, at the basic level the share of student in community schools is 85.9% and the 14.1% student is in institutional schools in the total number of student. Compared to the beginning of the school year, the shares of students in the institutional schools have slightly decreased at primary and basic level, whereas it has slightly increased at the lower secondary level in the end of the school year. Compared to the boys' students, the share of girl students is higher in community

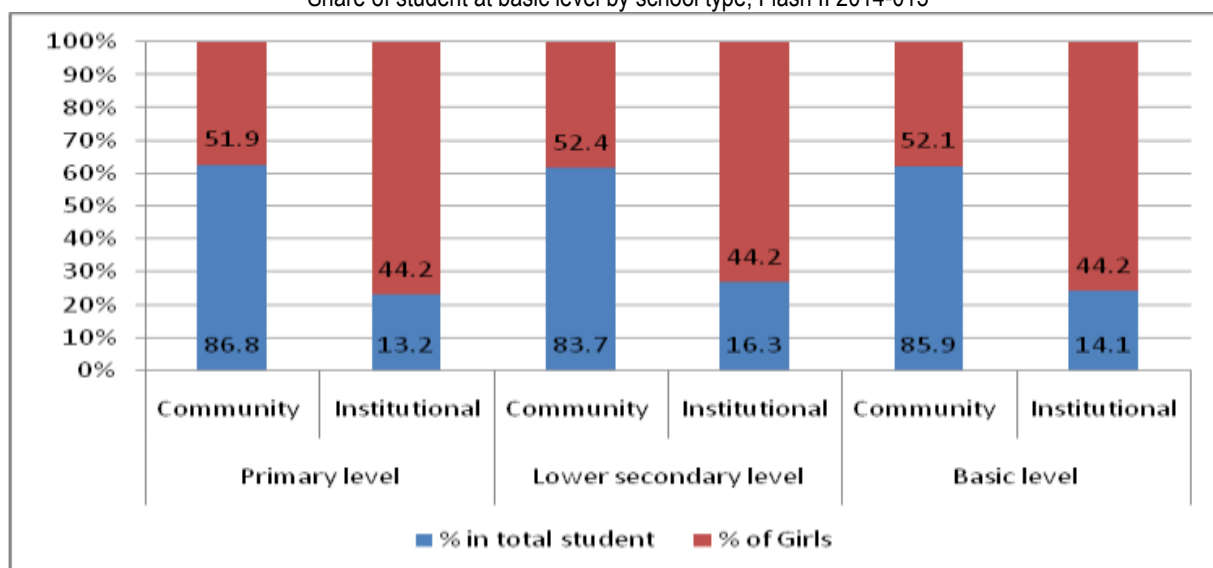

schools, whereas the share of girls is low in institutional schools. This low share of girls in institutional schools is same as at the beginning of the school year.

The share of students in institutional schools at the end of the school year has slightly changed as compared to the beginning of the school year. It shows the under reporting of institutional schools in many districts at the end of the school year (Flash II 2014-015), resulting in the decrease of student in this type of schools (See Annex V, VIII, IX, XII, XV and XVI).

Table 2.12
Number and percentage of student at basic level by school type and gender, Flash II 2014-015

Students	Primary level			Lower secondary level			Basic level		
	Community	Institutional	Total	Community	Institutional	Total	Community	Institutional	Total
Girls	1,901,576	246,083	2,147,659	759,156	124,909	884,065	2,660,732	370,992	3,031,724
Boys	1,759,098	310,940	2,070,038	689,703	157,736	847,439	2,448,801	468,676	2,917,477

Figure 2.9
Share of student at basic level by school type, Flash II 2014-015

The table 2.13 below shows the number of students by types of religious schools (Madarasa, Gumba and Ashram) at primary, lower secondary and basic level based on the reporting in the Flash II school census 2014-015. In total 91,351 at primary level, 2,065 at lower secondary level and 93,416 students at basic level are reported in all types of religious schools in the end of the school year 2014-015; of this, at the basic level 88,262 students are in Madarasa schools, 2,399 students are in Gumba schools and the 2,755 students are in Ashram schools at the end of the school year (See Annex: X_A-B and XVII_A-D).

A notable statistic is the uneven share of girls in these types of schools with 54.8% girls in Madarasa schools, 39.6% in Gumba schools and 29.9% in Asharam schools at the basic level. The share of student in total student in these types of schools is the highest at primary level and the lowest is at lower secondary level. Furthermore, the share of religious schools' student in total student is 2.2% at primary level, 0.1% at lower secondary level and 1.6% at basic level respectively.

Table 2.13
Student in Madarsa, Gumba and Aashram schools at basic level, Flash II 2014-015

Types of religious schools	Primary level			Lower secondary level			Basic level		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Madarasa	47505	39334	86839	888	535	1423	48393	39869	88262
Gumba	936	1403	2339	13	47	60	949	1450	2399

% in total student	2.3	2.0	2.2	0.1	0.1	0.1	1.7	1.5	1.6

b) Student at secondary and higher secondary levels by grade and gender

The student figures related to the secondary level (grade 9-12) with the disaggregating of secondary level (grade 9-10) and higher secondary level (grade 11-12) presented in this report are based on the reported schools in the end of the school year to Flash II school census 2014-015. In total, at the end of the school there are 861,870 students at the secondary level (Grade 9-10), 406,155 students at the higher secondary level (grade 11-12) and altogether 1,268,025 students at the secondary level (grade 9-12) are presented in the following table 2.14 and Figure 2.10. Compared to the beginning of the school year 2014-015 there are slight changes in the grade wise composition of students in the end of the school year 2014-015. The student pattern in Flash I and II is almost same at the both levels (See Annex: XII).

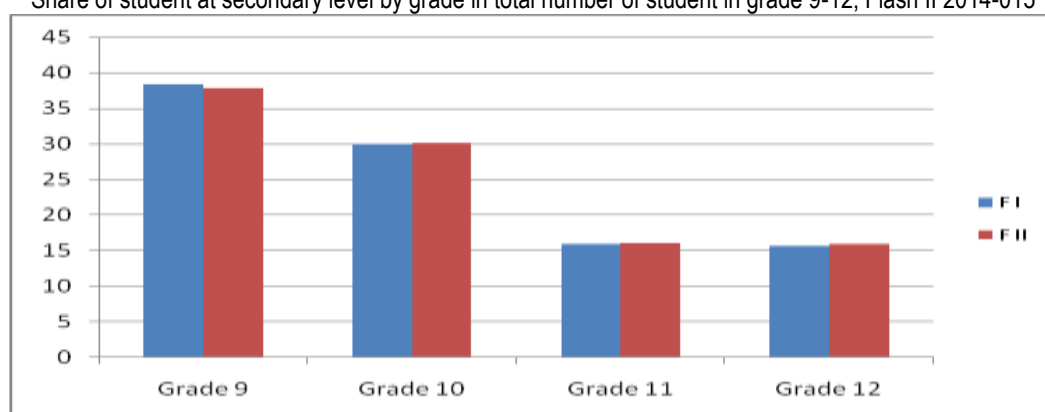

In-addition to the overall analysis of the students at secondary level in the beginning and end of the school year 2014-015, the school wise comparative analysis on student number in the beginning of the school year (Flash I school census 2014-015) and the end of the school year (Flash II school census 2014-015) depicts that there are 38,715 students are less than the Flash I 2014-015 at secondary levels which show a 4.3% points decrease in student number, similarly there are 10,840 less students are in the Flash II 2014-015 than in the Flash I 2014-015 at higher secondary level indicates 2.6% points student decreased in this level. At the secondary level (Grade 9-12) in total 49,555 (3.8%) students decreased at the end of the school year 2014-015.

Table 2.14
Total student at secondary and higher secondary levels by grade and gender in Flash II and the percentage of grade wise student in total student, Flash I 2014-015 and Flash II 2014-015

Grade	Student in Flash II 2014-015			Share of student in total student, Flash I 2014-015		Share of student in total student, Flash II 2014-015	
	Girls	Boys	Total	Flash I by level	Flash I in secondary level (grade 9-12)	Flash II by level	Flash II in secondary level (grade 9-12)
Grade 9	245,962	233,329	479,291	56.1	38.4	55.6	37.8
Grade 10	193,964	188,615	382,579	43.9	30.0	44.4	30.2
Grade 9-10	439,926	421,944	861,870	100.0	68.4	100.0	68.0
Grade 11	102,256	101,564	203,820	50.3	15.9	50.2	16.1
Grade 12	103,692	98,643	202,335	49.7	15.7	49.8	16.0
Grade 11-12	205,948	200,207	406,155	100.0	31.6	100.0	32.0
Grade 9-12	645,874	622,151	1,268,025	-	100.0	-	100.0

Figure 2.10

Share of student at secondary level by grade in total number of student in grade 9-12, Flash II 2014-015

Furthermore, The analysis shows that in the beginning of the school year at secondary and higher secondary levels, the school student ratio was 1:102 and 1:116 respectively, where as these ratios are 1:104 and 1:130 in the end of the school year (table: 2.7). It indicates the school student ratio in both levels has increased in the end of the school year. Overall, due to the delay on reporting of 810 secondary and higher secondary schools (especially institutional schools) almost 6.3% student in secondary level and 13.2% student in higher secondary level have decreased in the end of the school year.

The table 2.15 below shows the share of Dalit students at secondary and higher secondary levels in the beginning and end of the school year 2014-015 in total students. Compared to the beginning of the school year the share of Dalit students at secondary level has decreased by 0.4%, whereas at the higher secondary level it has remain almost same in the end of the school year. Overall, compared to the beginning of the school year the grade wise share of Dalit student in total student at the both secondary and higher levels remain almost same at the end of the school year 2014-015 (See Annex XII, XIII & XVIII).

Table 2.15

Dalit student at secondary and higher secondary levels by grade in Flash II 2014-015 and the percentage of grade wise Dalit student in total student in Flash I 2014-015 and Flash II 2014-015

Grade	Student in Flash II 2014-015			Share of Dalit in total student	
	Girls	Boys	Total	In Flash I	In Flash II
Grade 9	26,464	26,907	53,371	11.6	11.1
Grade 10	18,314	19,660	37,974	10.2	9.9
Grade 9-10	44,778	46,567	91,345	11.0	10.6
Grade 11	6,421	7,361	13,782	6.9	6.8
Grade 12	6,102	6,978	13,080	6.6	6.5
Grade 11-12	12,523	14,339	26,862	6.7	6.6
Grade 9-12	57,301	60,906	118,207	9.7	9.3

Similarly, the table 2.16 below shows the status of Janajati students at secondary and higher secondary levels in the beginning and end of the school year 2014-015. Compared to the beginning of the school year, the number of students at the end of the school year has decreased by almost 4 percent point at the end of the school year 2014-015 (See Annex XII,

XIV & XVIII). The share of Janajati students in total students at both secondary and higher secondary levels have slightly decreased in the all grades (grade 9 to 12) in the end of the school year.

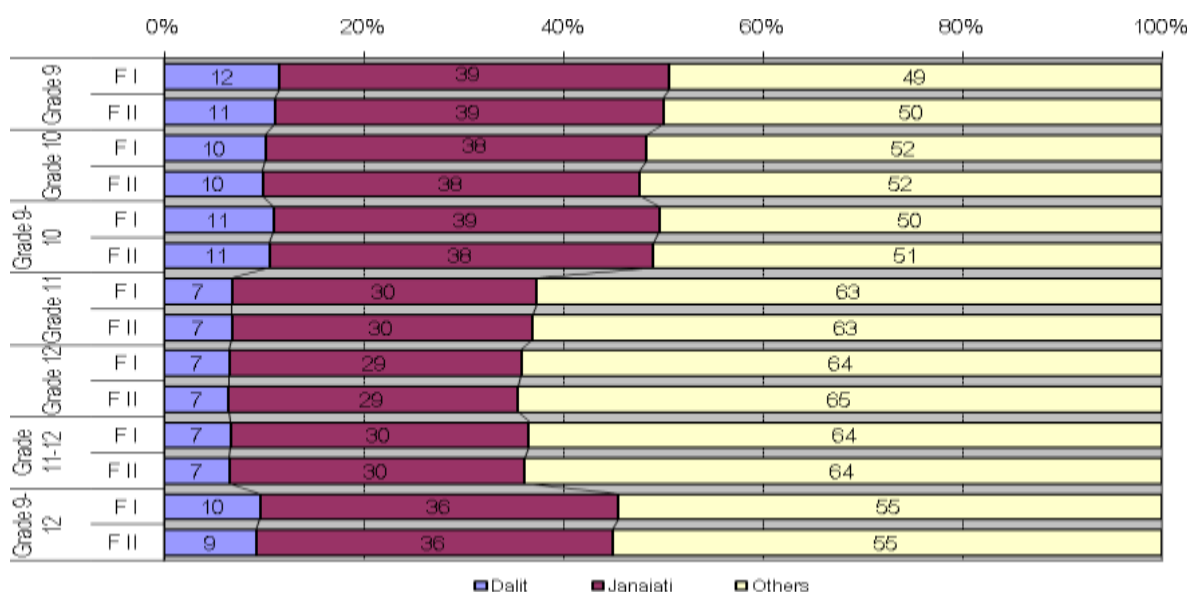

Table 2.16
Janajati student at secondary and higher secondary levels by grade in Flash II 2014-015 and the percentage of grade wise Janajati student in total student in Flash I 2014-015 and Flash II 2014-015

Grade	Student in Flash II 2014-015			Share of Janajati in total student	
	Girls	Boys	Total	In Flash I	In Flash II
Grade 9	99,471	87,101	186,572	39.0	38.9
Grade 10	76,947	67,851	144,798	38.1	37.8
Grade 9-10	176,418	154,952	331,370	38.6	38.4
Grade 11	31,998	29,387	61,385	30.4	30.1
Grade 12	31,316	27,135	58,451	29.2	28.9
Grade 11-12	63,314	56,522	119,836	29.8	29.5
Grade 9-12	239,732	211,474	451,206	35.8	35.6

Overall, due to the delay on reporting of 810 secondary and higher secondary schools (especially institutional schools) 4.5% student in secondary level and 2.7% student in higher secondary level have decreased in the end of the school year (Table 2.14), whereas the shares of Dalit and Janajati students in total students are remained almost same as in the beginning of the school year. The analysis of the students by social categories illustrate that, compared to the community schools the share of Dalit and Janajati students in institutional schools are low, so that the most possibly of decreasing in total students are Other than the Dalit and Janajati category.

Likewise, the figure 2.11 below shows the comparison on share of student by Dalit and Janajati at secondary and higher secondary levels in Flash I and Flash II 2014-015 in total student (See Annex: XVIII).

Figure 2.11
Share of student at secondary and higher secondary levels by Dalit and Janajati in total student, Flash I 2014-015 and Flash II 2014-015

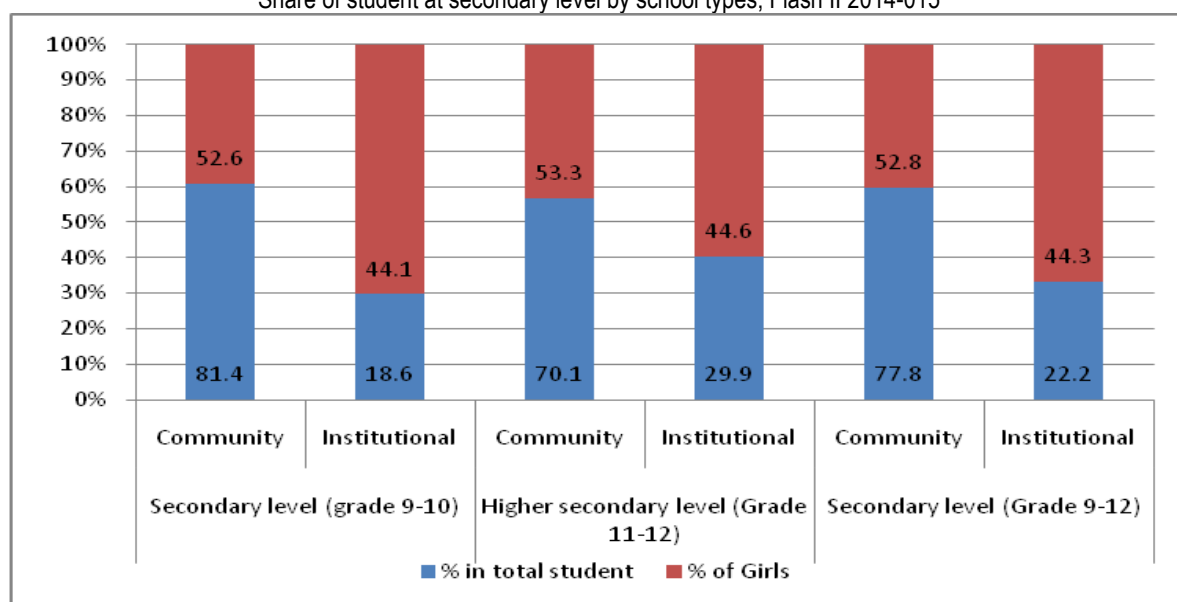

The table 2.17 and the figure 2.12 below present the number and percentage of students in total student by types of schools at secondary and higher secondary levels at the end of the school year 2014-015. The share of students in community schools and institutional schools at secondary level is 81.4% and 18.6% respectively. Similarly, at the higher secondary level the share of student is 70.1% and 29.9% in community schools and institutional schools (See Annex XII, XV, XVI & XVIII).

As compared to the share of student in institutional schools at the both levels in the beginning of the schools year 2014-015, the shares of students in the institutional schools have been increased. Compared to the institutional schools, the share of girl students is higher in community schools. This low share of girls in institutional schools is same as at the beginning of the school year.

Table 2.17
Number and percentage of student at secondary level by school type and gender, Flash II 2014-015

Students	Secondary level (grade 9-10)			Higher secondary level (Grade 11-12)			Secondary level (Grade 9-12)		
	Community	Institutional	Total	Community	Institutional	Total	Community	Institutional	Total

Figure 2.12
Share of student at secondary level by school types, Flash II 2014-015

The table 2.18 below shows the number of students by types of religious schools (Madarasa, Gumba and Ashram) at secondary and higher secondary levels. Overall 407 students are reported in the secondary level (grade 9-12), of these 387 students in secondary level reported in the all types of religious schools, whereas it is only 20 students were reported at the higher secondary level in end of the school year 2014-015. Out of the total students at secondary level (grade 9-10) there are 161 students in Madarsa and 246 students are in Ashram schools,

whereas there is not any students reported in Gumba schools in both secondary and higher secondary levels (See Annex X_A-B).

Table 2.18
Student in Madarasa, Gumba and Aashram schools at secondary and higher secondary levels, Flash II 2014-015

Types of religious schools	Secondary level (grade 9-10)			Higher secondary level (grade 11-12)			Secondary level (grade 9-12)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Madarasa	83	78	161	0	0	0	83	78	161
Gumba	0	0	0	0	0	0	0	0	0
Ashram	39	187	226	0	20	20	39	207	246
Total	122	265	387	0	20	20	122	285	407
% in total student	0.03	0.06	0.04	0.00	0.01	0.00	0.02	0.05	0.03

Indicator 2: Students appearing in the final exams

The main purpose of this indicator is to assess the effectiveness and performance of the school education system by analysing its performance in terms of students' retention through a full school year and appeared in the final examination.

Table 2.19 below shows the percentage of students that appeared in the final examination at the end of the school year compared to the total number of students who still attended school at the end of the school year 2014-015 at the primary and the lower secondary level. The table shows that in total 92.2% (compared to 89.3% in the last school year) of students at the primary level appeared in the final examination (See Annex XIX).

Table 2.19
Percentage of students appeared in the final exam at primary and lower secondary levels, Flash II, 2014-015

Grade	% of students appearing in the exam		
	Girls	Boys	Total
1	85.3	84.2	84.8
2	92.3	93.1	92.7
3	94.4	93.6	94.0
4	94.9	93.9	94.4
5	95.2	94.8	95.0
Total in 1-5	92.4	91.9	92.2
6	94.3	93.4	93.8
7	94.0	92.6	93.3
8	94.5	93.5	94.0
Total in 6-8	94.3	93.1	93.7

The exam appearance rate for grade one is 84.8% (compared to 82.7% in the last school year) (Table 2.19) which is more than 2.0% percent point higher than in the last school year but it is

markedly lower than the exam appearance rate for the other grades. Hence, almost than 15.0% of the students – or almost one of every seven students - enrolled in grade one did not appear in the final exam at the end of school year. This has obvious implication on the internal efficiency of school education. In order to achieve the universal primary/basic education, this underlines the need of all students enrolled in grade one to continue for eight years and complete basic education with reasonable learning outcomes. In particular, it is essential to focus on improving the performance and internal efficiency of each school by enabling schools to track each child in grade one to ensure that every child graduates from primary/basic school well prepared for secondary school, with a vision for EFA 2015 and beyond.

Similarly, at the lower secondary level (Table 2.19), out of the total number of students in the beginning of the school year, in total 93.7% (compared to 92.4% in the last school year) with 94.3% girls and 93.1% boys appeared in the final examination in the end of the school year 2014-015 (See Annex XXII). Overall, at the lower secondary level the percentage of students appeared in the final examination is slightly increased than in the last school year 2013-014.

Hence, almost one student out of every 13 students did not appear in the final examination. In the both primary and lower secondary levels, it is worth mentioning that the percentage of students appeared in the final examination is higher for the girls than the boys. The analysis shows that in terms of retention, with 93.7 percent in grades VI-VIII and 92.2 percent in grades I-V appearing in the final examination, the effectiveness of the students' performance is more pronounced for students in lower secondary level as compared to students in primary level. The analysis on the percentage of students appeared in the final exam at primary level shows that compared to the national average (92.2%) the highest percentage (95.8%) of students appeared in the final examination in the Kathmandu Valley, whereas the lowest percentage (91.3%) of students appeared in the final examination in the Mountain eco-belt.

Table 2.20 below shows the percentage of Dalit students who appeared in the final examination at the end of the school year compared to the total number of students who still attended school at the end of the school year at primary and lower secondary level. The table shows that in total 88.9% (compared to 86.5% in the last school year) of all students appeared in the final examination at primary level (See Annex XX). The exam appearance rate for grade one is 82.1% (Table 2.20), which is 1.3% points higher than in the last school year but it is markedly lower than the exam appearance rate for the other grades and total students. Hence, as in the total students almost 18% of the students – or almost one of every five Dalit students - enrolled in grade one did not appear in the final exam at the end of school year.

Similarly, at the lower secondary level, out of the total number of students in the beginning of the school year in total 89.9% (compared to 88.2% in the last school year) with 90.1% girls and 89.7% boys appeared in the final examination in the end of the school year 2014-015 (See Annex XXIII). Overall, at the lower secondary level the percentage of students appeared in the final examination has increased than in the last school year 2013-014 (88.2%).

Hence, more than one student out of every 10 students did not appear in the final examination. In both primary and lower secondary levels, the percentage of Dalit students appeared in the final examination is lower than the percentage of students appeared in the final examination for total students. It is imperative to enable each school to perform far better with a goal to achieve equality in education by ensuring that no child drops out or repeats, rather all children learn well and complete basic education.

Table 2.20
Percentage of Dalit students appeared in the final exam at primary and lower secondary levels, Flash II 2014-015

Grade	% of students appearing in the exam		
	Girls	Boys	Total
1	82.8	81.3	82.1
2	89.4	90.2	89.8
3	90.7	90.4	90.5
4	92.1	90.5	91.3
5	90.8	90.7	90.8
Total in 1-5	89.2	88.6	88.9
6	90.1	89.5	89.8
7	89.3	88.5	88.9
8	90.9	91.0	91.0
Total in 6-8	90.1	89.7	89.9

Table 2.21 below shows the percentage of Janajati students who appeared in the final examination at the end of the school year compared to the total number of students who retained up to the end of the school year at primary and lower secondary level. The table shows that in total 91.0% (compared to 89.6% in the last school year) of all students appeared in the final examination at primary level (See Annex XXI). The exam appearance rate for grade one is 84.7% (Table 2.21), which is almost 0.2% point higher than in the last school year and also it is markedly lower than the exam appearance rate for the other grades. Hence, as in the total students almost 15% of the students enrolled in grade one did not appear in the final exam at the end of school year. It is a huge challenge to ensure that every classroom, especially grade one has the best teacher to foster a child friendly and inclusive environment to achieve universal primary/basic education.

Table 2.21
Percentage of Janajati students appeared in the final exam at primary and lower secondary levels, Flash II, 2014-015

Grade	% of students appearing in the exam		
	Girls	Boys	Total
1	85.5	83.9	84.7
2	91.4	91.9	91.7
3	93.5	92.8	93.1
4	93.3	91.9	92.6
5	93.4	92.3	92.9
Total in 1-5	91.4	90.6	91.0
6	92.4	91.0	91.7
7	92.1	90.2	91.2
8	93.2	92.1	92.6
Total in 6-8	92.6	91.1	91.8

Similarly, at the lower secondary level (Table: 2.21), out of the total number of students in the beginning of the school year in total 91.8% (compared to 90.3% in the last school year) with

92.6% girls and 91.1% boys appeared in the final examination in the end of the school year 2014-015 (See Annex XXIV). Overall, at the lower secondary level the percentage of students appeared in the final examination is slightly increased than in the last school year 2013-014 (90.3%). At the primary level the percentage of Janajati students appeared in the final examination is higher than the percentage of students appeared in the final examination for Dalit (2.20) students.

Table 2.22 below shows the percentage of students appearing in final examination at the secondary level (Grade 9-10) at the end of the school year 2014-015. Overall, out of the total number of students still in school at the end of the school year is 95.1% (compared to 93.6% in the last school year) - with 95.2% girls and 95.1% boys - at the secondary level appeared in the final examination. At the secondary level out of total students in the beginning of the school year, the percentage of girls appeared in the final examination is higher than the percentage of boys appeared in the final examination at the end of the school year in all grades (See Annex XXII). The analysis shows that the school education system is more successful for the retention of students at the secondary level as compared with students in primary and lower secondary levels.

Table 2.22
Percentage of students appeared in the final exam at secondary level, Flash II, 2014-015

Grade	% of students appearing in the exam		
	Girls	Boys	Total
9	94.5	93.9	94.2
10	95.8	96.3	96.1
Total in 9-10	95.2	95.1	95.1

Compared with the average exam appearance rate of all students at secondary level (95.1%), the exam appearance rate of Dalit students is 91.0% with 91.0% girls and 90.9% boys (Table 2.23). Likewise, the average exam appearance rate of Janajati students is 95.4% with 95.5% girls and 95.2% boys (Table 2.24) at the secondary level. The Flash II 2014-015 school census has revealed that the exam appearance rate of girls is higher than the boys for all categories of the students at the secondary level (See Annex: XXII, XXIII & XXIV), indicating the need to adopt remedial measures. Compared to the previous school year the exam appearance rates in current school year 2014-015 is higher for total, Dalit and Janajati students at the secondary level.

Table 2.23
Percentage of Dalit students appeared in the final exam at secondary level, Flash II, 2014-015

Grade	% of students appearing in the exam		
	Girls	Boys	Total
9	90.1	88.9	89.5
10	91.9	92.9	92.4
Total in 9-10	91.0	90.9	91.0

Table 2.24
Percentage of Janajati students appeared in the final exam at secondary level, Flash II, 2014-015

Grade	% of students appearing in the exam		
	Girls	Boys	Total
9	95.0	94.6	94.8
10	96.0	95.9	96.0
Total in 9-10	95.5	95.2	95.4

Indicator 3: Student Attendance

This indicator assesses the regularity of students, including how often students attend in the daily teaching learning activities, and the effectiveness of the operation of schools. Data relating to student attendance was collected on three different dates (i.e. on B.S. 2071-02-29 (12 June 2014), 2071-06-12 (28 September 2014) and 2071-11-14 (26 February, 2015) within the school year 2014-015. Based on the Flash II 2014-015 school census, the table 2.25 below shows the student attendance rates on three different dates during the school year 2014-015. The grade-wise and level-wise average attendance rate is calculated by taking the total number of grade-wise students who attended on the respective date and compared with the total number of grade-wise students at the beginning of the school year. The aggregate average attendance rate for all three dates is 83.6% (compared to the last school year 79.6%), 87.9% (compared to the last school year 84.7%) and 90.5% (compared to the last school year 85.4%) at primary, lower secondary and secondary level respectively.

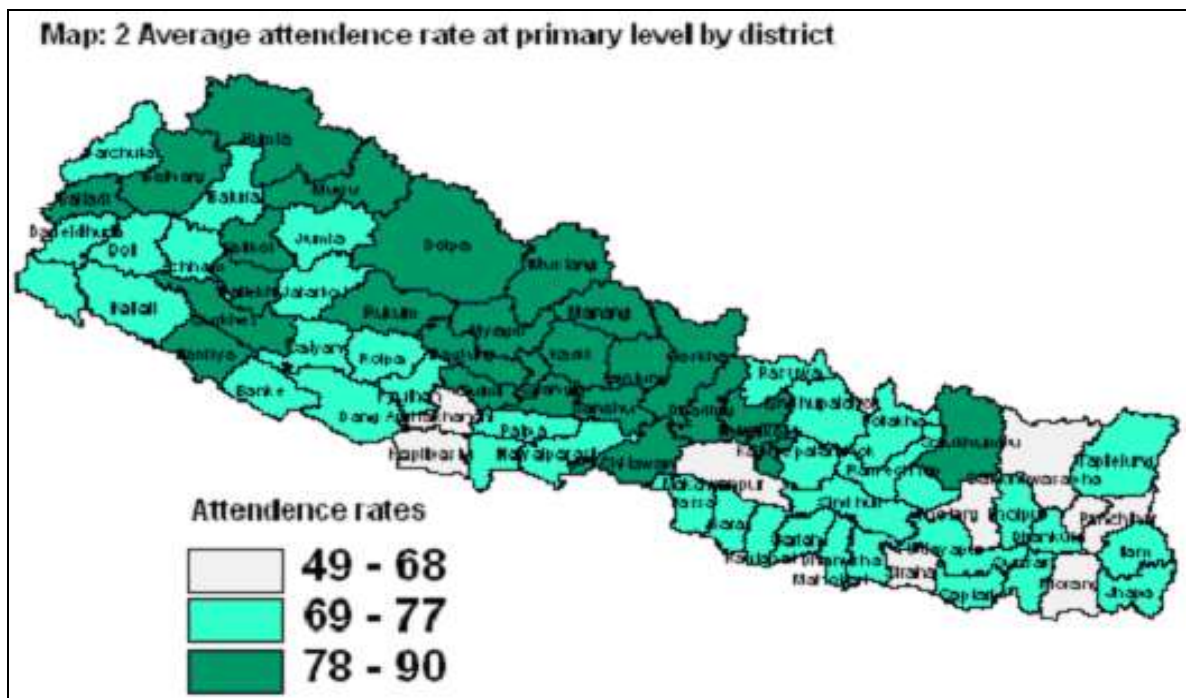

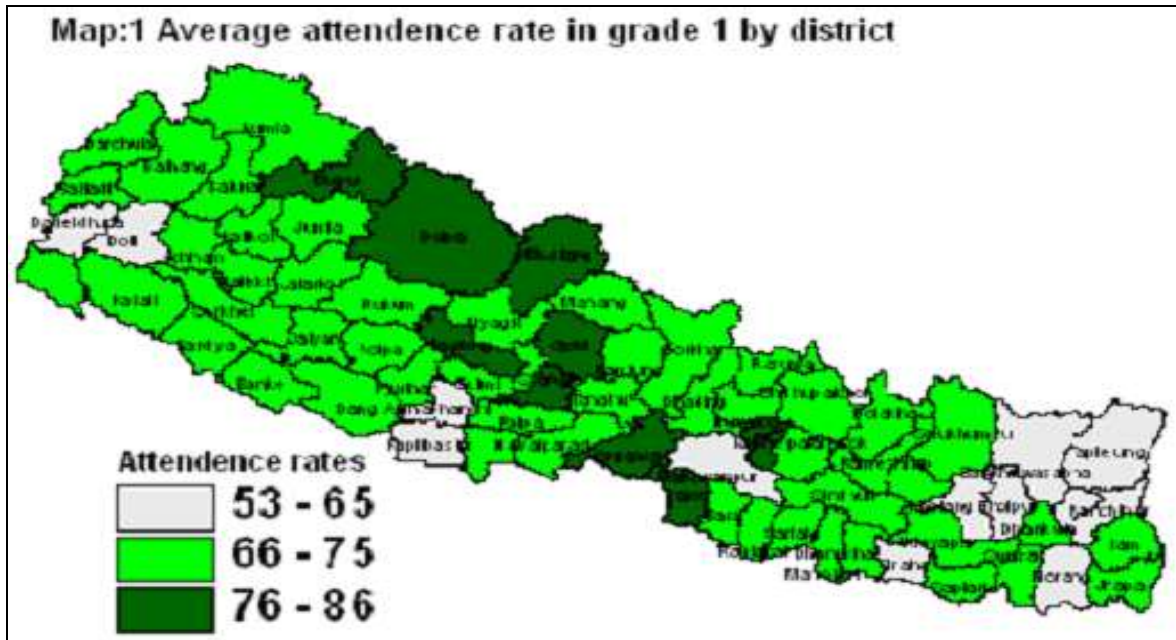

Table 2.25
Average attendance rates of students by grade and level on specific dates, Flash II, 2014-015

Grade	Percentage of attendance on			
	2071-02-29 (12 June 2014)	2071-06-12 (28 Sep. 2014)	2071-11-14 (26 Feb. 2015)	Average Attendance
1	78.4	76.9	82.7	79.3
2	82.9	82.1	84.2	83.1
3	85.1	84.5	86.3	85.3
4	84.4	84.1	85.6	84.7
5	84.9	85.2	86.6	85.6
1-5 (sub-total)	83.1	82.6	85.1	83.6
6	86.6	84.5	87.0	86.0
7	89.9	87.3	88.9	88.7
8	89.2	87.4	89.9	88.8
6-8 (sub-total)	88.6	86.4	88.6	87.9
9	90.6	89.5	90.3	90.1
10	91.5	90.2	90.9	90.9
9-10 (sub-total)	91.0	89.8	90.6	90.5
Total of 1-10	86.3	85.2	87.2	86.2

Compared to the last school year, the average attendance rates have significantly increased at all primary, lower secondary and secondary levels in the school year 2014-015, which indicates that the regularity of students in all grades has improved and if this trend is maintained, it will bring a significant change in the internal efficiency of the school education system, contributing to the improved performance of each student in achieving enhanced learning outcomes. The proportion of students' attendance increases steadily through the grades at all levels. Compared to other grades at primary level, the attendance rate in grade one is comparatively low in all three dates. The student attendance rates indicate that, at the primary level almost 17% to 21% of the students are not regularly attending in the daily classroom teaching and learning activities (See Annex XXV "A" to "D"). The low attendance rates might be a significant contributing factor to the low rates of retention and the low percentage of students being appeared in the final examination (Table 2.19). In addition, the low attendance rates might affect the overall internal efficiency (i.e 15.2% of repetition rate

and almost 6.5% of dropout rate in grade 1 in the school year 2014-015) of the whole education system.

The following maps: 1 and 2 display the district-wise average attendance rates of grade 1 and overall primary level students on the three different dates during the school year 2014-015. Moreover, the analysis of the aggregated average attendance rates by school shows that there are 15,241 schools with 100% of student attendance rates and in total 391 schools with almost 50% of student attendance rates. This suggests that the DEOs, RCs, Schools, SMCs and PTAs should have more active co-ordination to improve in the student regularity by improving the internal and external environment of schools and other relevant activities too.

2.4. School Management

This section provides information on school management indicators, which are mainly related to school management tasks and service delivery tasks from the District Education Office to schools.

Indicator 4: Number of schools which received the government fund within two months of each trimester

In the school education sector the government has given more emphasize to disburse the government funds to schools in time. Table 2.26 below shows the number of community schools that received government funds from the DEOs within two months and after two months of the first and second trimesters. Out of the total 29,133 community schools, which responded to the questions related to receiving government funds at the end of the school year, 10.7% (Compared to 9.9% in the previous school year) schools in the first trimester and 38.0% (Compared to 23.6% in the previous school year) in the second trimester received the government funds within two months of each trimester. The majority of schools received the government funds in the third month of these two trimesters. It was 76.7% schools in the first trimester and 48.4% schools in the second trimester (See Annex XXVI). Compared to the previous fiscal year, the percentages of schools that received government funds within two months have slightly increased in the both first and second trimesters. Based on the practice on budget disbursement, it is important to note that the government has not been able to manage the fund from the starting of the fiscal year, because of this constraint the percentage of school receiving the fund with the 2nd.month of each trimester is low (especially in the first trimester).

Table 2.26
Schools that received government funds within two months of each trimester, Flash II, 2014-015

Trimester		Trimester period			
		1st and 2nd months	3rd. month	4rth.month	Total
First trimester	Number of schools	3,106	22,339	3688	29,133
	Percentage	10.7	76.7	12.7	
Second trimester	Number of schools	11,083	14,107	3,943	29,133
	Percentage	38.0	48.4	13.5	

Indicator 5: Status of School Improvement Plan (SIP) and government grants

Table 2.27 below shows the number and percentage of all community schools with SIPs and those receiving government grants. Out of the total community schools, 94.3% (compared to 93.9% in the last school year) of schools reported that they have a School Improvement Plan (SIP) for their schools. By the reference date (April 5, 2014) of Flash II data collection, out of the total 29,133 community schools, 96.6% (compared to 95.9% in the last school year) schools responded to have received all types of government grants for the school year 2014-015 (See Annex: XXVII). Though there is a mandatory provision to all community schools to submit the SIP for the schools grants, the table 2.27 presents a slight gap between the percentages of schools with SIP and received the all types of government grants. Based on the consultation with the DEOs regarding to the Gaps between these two indicators it was found that some of the schools are updating their SIPs which were not submitted to the DEOs in time, because of this, although some of the schools could not submitted their SIPs in time they also got the government grants.

Similarly, although the indicators relating to the schools with SIP and receiving the all types of government grants improved the reasons behind the low reporting for SIP and government funds could be low awareness of the different types of funding to the schools at the school level. For example, the teacher salary is also a government fund and all teachers receive their salary in each trimester. It should be a policy priority of each District Education Office to orient the relevant stakeholders of school with regard to funding modalities at Resource Center level.

Table 2.27
Status of School Improvement Plan and school grants (all community schools), Flash II, 2014-015

Status of School Improvement Plan and block grants	Number of schools	Percentage of schools
Out of total 29,133 community schools responded for SIP, the % of schools with SIP	27,465	94.3
Out of total 29,133 community schools responded for all types of government funds	28,134	96.6

Indicator 6: Percentage of schools disclosing statement of accounts publicly

Indicator 9: Percentage of schools with completed social audit

These two indicators assess the effectiveness of the school level activities and the changes in terms of transparency and public accountability at the school level.

Table 2.28 below shows the number and percentage of schools that disclosed publicly their statement of accounts and performed a social audit. Compared to the 29,133 community schools, there are 24,872 schools reported to have disclosed a statement of accounts (income and expenditure reports) to the public by the end of the first week of April 2014⁴. The percentage of schools that performed this activity is 85.4% (compared to 83.7% in the last school year). This percentage is higher by 1.7 percent points than the previous school year. (See Annex XXVII).

Likewise, out of total 29,133 community schools for this questionnaire, in total 26,765 (91.9%) schools performed the social audit regarding all of their academic, administrative, financial and other school level activities during the school year 2014-015, which is increased by 0.9 percent point as compared to the last school year (91.0%) (See Annex XXVII). Hence, it shows there has been a positive development in the context of transparency and public accountability at school level. However, it also shows that more awareness is still needed to make all schools comply with the regulation to disclose publicly their statement of accounts and perform a social audit at the local level on a regular basis.

Table 2.28
Schools having publicly disclosed accounts and having performed a social audit (all community schools), Flash II, 2014-015

Schools	Number of schools	% in total responded community schools
Out of total reported community schools for this questionnaire that disclosed the statement of account publicly	24,872	85.4
Out of total reported community schools for the questionnaire that performed social audit	26,765	91.9

⁴ All schools are required to disclose their statement of accounts to the public by April 2015.

Indicator 7: School operational calendar and average number of school opening days

This indicator assesses the availability of school operational plan to run the daily teaching learning activities as well as other functions that need to be accomplished efficiently at the school level.

The table 2.29 below shows the number of schools, which prepared a school operational calendar in the school year 2014-015. Compared to the total responding schools for the question on a school calendar, 91.4% (compared to 89.9% in the last school year) schools prepared a school operational calendar. Similarly, by school type it can be seen that out of the total number of community schools, 90.8% (compared to 89.7% in the last school year) responded to have prepared a school operational calendar, whereas out of the total number of institutional schools that responded, 94.6% (compared to 93.4% in the last school year) have prepared a school operational calendar (See Annex XXVII).

Table 2.29
Schools having prepared an operational calendar by school type, Flash II 2014-015

Types of schools	Schools with calendar	% schools
Out of total schools 34,806 that prepared an operational calendar	31,813	91.4
Out of total community schools that prepared an operational calendar	26,446	90.8
Out of total institutional schools that prepared an operational calendar	5,367	94.6

Table 2.30_A below shows the average number of school opening days for main activities as compared to planned activities, the actual number school opening days for teaching learning activities, examinations, extracurricular activities and other activities in the school year 2014-015 by the reference date of Flash II school census 2014-015. Based on responses of schools, compared to the 233 planned days of school opening days for overall school activities, the average number of actual school opening days was 226 days (223 days compared to the last school year) in the school year 2014-015. Out of total 226 (compared to 223 days in the last school year) actual days for the activities performed by schools, it can be seen that on an average 186 (compared to 184 days in the last school year) days were spent for teaching and learning activities; 25 days were spent on examinations and 16 days for extra curricular and other activities (See Annex: XXVIII_A).

In addition to this, the table 2.30_B below shows the average times of school supervised and monitored by Resource Persons (RPs), School Supervisors (SSs) and others in the school year 2014-015. The analysis shows that, based on the reporting from 33,070 schools, on an average the schools were monitored by the Resource Persons is 3.0 times, almost 1.7 times by the School Supervisor and 1.4 times by other persons. It indicates frequency of school visit for the supervision and monitoring proposes seems low in all eco-belts, especially by Resource Persons and School Supervisors, which need to be improved in the coming days (See Annex: XXVIII_B).

Table 2.30_A

Average number of school opening days, teaching learning activities and extra-curricular activities, Flash II, 2014-015

Number of schools responded for school opening days	Average planned days for school operation				Average actual days for school operation			
	Total Opening days	Teaching learning	Examinations	Extra-curricular activities	Total Opening days	Teaching learning	Examinations	Extra-curricular activities
33,070	233	190	25	21	226	186	25	16

Table 2.30_B
Average times of School Monitored by Resource Persons (RPs), School Supervisors (SSs) and Others, 2014-015

Eco-belts	Total responded number of schools	Average times of School Monitoring by		
		Resource Persons (RPs)	School Supervisor (SS)	Others
Mountain	4,139	3.2	1.4	1.2
Hill	17,120	3.2	1.3	1.4
Kathmandu Valley	1,801	2.6	1.3	0.7
Terai	10,010	3.4	1.4	1.6
Total	33,070	3.0	1.7	1.4

Indicator 8: Participation of local people in school management

This indicator presents the status of participation in school management from the local community. It presents the extent and level of people participation in School Management Committee (SMC) and Parents Teacher Association (PTA) composition by gender, Dalit and Janajati at school level.

Table 2.31_A and figures 2.13 and 2.14 below show the composition of SMC and PTA by gender, Dalit and Janajati. Out of the total 29,133 community schools, 98.6% (98.2% compared to last school year) of schools responded that they have formed their SMC. Similarly, the percentages of schools that formed their PTA is 97.7% (96.5% compared to last school year). The participation of parents on SMC by gender, Dalit and Janajati shows 22.1% (21.6% compared to last school year) female members, 11.6% (11.3% compared to last school year) Dalit members and 36.6% (36.0% compared to last school year) are Janajati members.

Similarly, the participation of parents on PTA by gender, Dalit and Janajati is 28.3% (27.4% compared to last school year) female members, 14.1% (13.9% compared to last school year) Dalit members and 39.7% (39.0% compared to last school year) are Janajati members. Compared to the last school year, the level of participation of Dalit and Janajati is slightly changed in the school year 2014-015, which corresponds to the proportion of the Dalit and Janajati population composition. Out of total SMCs and PTAs, 88.5% of SMCs (Compared to the last school year 87.1%) and almost 88.9% of PTAs (Compared to the last school year 86.6%) are formed by common consensus and the rest by an election process (See Annex XXIX_A). The graphs 2.13 and 2.14 below also present the average status of community people's participation in the School Management Committee and Parent Teacher Association in the school year 2014-015. The district level status shows the shares of female, Dalit and Janajati in SMCs and PTAs, which vary from district to district.

Moreover, the table 2.31_B below shows the number of schools by the times of School Management Committees' (SMCs) meetings in all types of community schools in the school year 2014-015. It shows that, out of total 29,133 community schools that responded to this questionnaire, 1-6 times meetings were held in 11,122 (38.2%) schools, 7-12 times meetings held in 11,204 (38.5%) schools, 13-18 times meetings held in 2,966 (10.2%) schools, and more than 18 times meetings held in 1,017 (3.5%) schools. Similarly, 2,824 (9.7%) schools also reported that they do not have any SMC meeting during the school year 2014-015. The analysis shows that there are significant numbers of schools with the remarkable number of SMC meetings (See Annex: XXIX_B), but, due to the difficulties to collect the purpose of meetings and their effects in the internal teaching learning activities and external activities of the schools, this report do not have any information to track in this regard.

Table 2.31_A
Composition of SMC/PTA, Flash II, 2014-015

Composition of SMCs/PTAs	School with SMC	School with PTA
Number of community schools for the SMC and PTA formation questionnaire	29,133	29,133
% of Female members in	22.1	28.3
% of Dalit members in	11.6	14.1
% of Janajati members in	36.6	39.7
% of SMC and PTA formed by consensus	88.5	88.9
% of SMC and PTA formed by election	11.5	11.1

Figure 2.13
Composition of SMCs/PTAs by gender, Flash II 2014-015

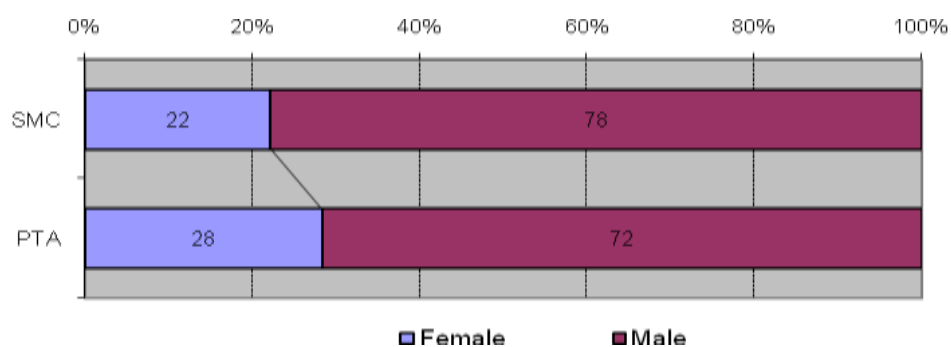

Figure 2.14
Composition of SMCs/PTAs by Dalit and Janajati, Flash II 2014-015

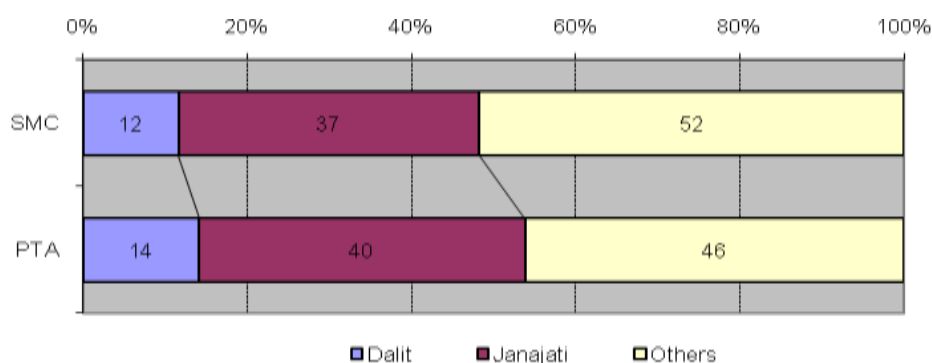

Table 2.31_B
Number of schools by the times of School Management Committee's (SMCs) meetings in all types of community Schools, Flash II, 2014-015

Eco-belts	Total responded number of schools	Number of Schools by the Times of SMC Meetings Held				
		Between 1 to 6 times	Between 7 to 12 times	Between 13-18 times	Over 18 times	Not held at all
Mountain	4,025	1,756	1,566	336	93	274
Hill	15,966	6,137	6,723	1,619	466	1,021
Kathmandu Valley	625	318	157	41	14	95
Terai	8,517	2,911	2,758	970	444	1,434
Total	29,133	11,122	11,204	2,966	1017	2,824

Indicator 10: Number of school management transfer to community

This indicator assesses the progress with respect to the process of handing over the management of schools from the government to the local community. The DOE record based on the program for FY 2071/072 and reporting from the all 75 District Education Offices, the table 2.32 below shows the number in view of the levels of schools where the management of schools transfer programme was implemented by the end of the fiscal year 2014-015 (i.e.16th.July 2014 or 32 Asadh 2071). Altogether by the end of the fiscal year, a total of 12,471 (compared to 12,421 levels in the last fiscal year) levels of schools management were transferred to their respective local community.

Of the total 8,248 (compared to 8,238 levels in the last school year) primary levels, 2,839 (compared to 2,826 levels in the last school year) lower secondary levels and 1,384 (compared to 1,357 levels in the last school year) secondary levels were transferred to the community. Altogether, compared to the last school year, it shows that the numbers of community managed schools have increased by almost 0.4% in the school year 2014-015.

Table 2.32 Number of community schools' level that transfer their management to community

Number of districts	Number of community schools' level transfer to the community
By the reference date of 5th. April 2014) in 75 districts)	12,471
Primary level	8,248
Lower secondary level	2,839
Secondary level	1,384

Source: DOE

Indicator 11: Number of maintenance scholarship received by students

The government has introduced scholarship and incentive schemes to encourage the regular attendance of students as well as to improve their retention, especially for girls, Dalits, disadvantaged groups and students with disabilities. It is worth mentioning that the scholarship schemes focus on different groups such as scholarships for all Dalit students, girls' scholarship for 100% of enrolled girls, scholarships for all students with disabilities and scholarships for students from specific targeted population groups.

a) Basic and Secondary level scholarships

Table 2.33 below shows the targets and number of scholarships distributed to students in community schools in the school year 2014-015 at basic and secondary levels by types of scholarships. The number of scholarships presented in the table 2.33 is based on reporting in Flash II school census 2014-015 by the reference date of 5th.April 2015. This means the number of students received the scholarships after the Flash II 2014-015 school census is not captured in this report.

Compared to the total targets of the scholarships at both levels in total 85.4% of student received the respective type of scholarship. Here, the reporting shows that compared to the targets by types of scholarships, 86.5%, 83.9%, 74.6%, 85.2%, 96.5%, 91.7%, 71.3% and 77.4% of students received the 100% girls (1-8) scholarship, Dalit (1-8) scholarship, Deprived

groups (1-8) scholarship, Scholarship for students with disabilities (1-8) scholarship, Secondary Scholarship (9-10) scholarship, Dalit (9-10) scholarship, Disable (9-10) scholarship and Deprived groups (9-10) scholarship respectively.

In addition to the government scholarship programmes, INGOs, NGOs and communities are also providing a significant number of scholarships throughout the country. Based on the reported number of scholarships, a total of 62,854 students at the basic level and 16,659 students at secondary level received the scholarship in the school year 2014-015 from the INGO, NGO, CBO or other local community organisations. It shows that the contribution of these organisations is very much encouraging. However, Flash II does not collect data on the specific type and amount of scholarship from those organisations.

Table 2.33
Basic and Secondary Community schools' students who received scholarships, Flash II 2014-015

Types of Scholarships	Targets	Number of students who received scholarship			% of students received scholarship
		Girls	Boys	Total	
100% girls (1-8)	2,072,231	1,792,722	0	1,792,722	86.5
Dalit (1-8)	1,111,727	415,944	516,483	932,427	83.9
Deprived groups (1-8)	127,960	49,964	45,537	95,501	74.6
Scholarship for students with disabilities (1-8)	46,476	19,574	20,021	39,595	85.2
Secondary Scholarship (9-10)	60,000	57,914	0	57,914	96.5
Dalit (9-10)	80,000	33,745	39,641	73,386	91.7
Disable (9-10)	7,184	2,329	2,793	5,122	71.3
Deprived groups (9-10)	15,409	5,753	6,175	11,928	77.4
Others (1-8)		33,719	29,135	62,854	
Others (9-10)		9,022	7,637	16,659	
Total Targets and Achievement only for targeted	3,520,987	2,377,945	630,650	3,008,595	85.4

Part III

1. Teachers' information

1.1 Distribution of teachers by types of schools and level

This section contains information related to the status of teachers by gender, Dalit and Janajati, training and types of schools.

The table 3.1 below present the total number of teachers reported in the Flash II school census 2014-015 at primary, lower secondary and basic levels in the end of the school year 2014-015 in all types of schools (both in all types of community and institutional schools). As a whole, there are 187,684 teachers at primary level; 52,348 teachers at lower secondary level and 38,858 teachers are at secondary levels. Of them, the numbers of female teachers are 78,630; 14,434 and 6,775 respectively at primary, lower secondary and secondary levels, which shows both the number of female and male teachers has increased compared to the previous school year. Likewise, the shares of female teachers are 41.9%, 27.6% and 17.4% at primary, lower secondary and secondary levels respectively (See Annex: XXX).

In-addition, the table 3.1 presents the total reported number of teachers in all types of institutional schools at primary, lower secondary and secondary levels in the school year 2014-015. Out of total number of teachers (Table 3.1) reported in Flash II school census 2014-015, the total number of teachers in the institutional schools are 47,762; 15,577 and 14,733 at primary, lower secondary and secondary levels (See Annex: XXX).

Table 3.1
Distribution of teachers by types of schools by level, 2014-015

School types	Levels								
	Primary			Lower secondary			Secondary		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Community schools	53,381	86,541	139,922	7,636	29,135	36,771	3,356	20,769	24,125
Institutional schools	25,249	22,513	47,762	6,798	8,779	15,577	3,419	11,314	14,733
Total	78,630	109,054	187,684	14,434	37,914	52,348	6,775	32,083	38,858

1.2 Number of teachers by Dalit and Janajati

Both the tables 3.2 and 3.3 below show the number and percentage shares of Dalit and Janajati teachers in total number of teachers by levels and gender. The proportion of Dalit and Janajati teachers remain low in teaching profession as compared to their overall proportion in the total population. The overall percentage shares of Dalit teachers at primary, lower secondary and secondary levels are 5.1%, 4.0% and 4.4% (Compared to the share of Dalit teachers 5.0%, 3.6% and 4.1% in the previous school year) respectively.

Table 3.2
Number of teachers by Dalit and Janajati by level, 2014-015

Levels	Teachers' categories								
	Total			Dalit			Janajati		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Primary	78,630	109,054	187,684	2,825	6,803	9,628	21,765	35,213	56,978
Lower secondary	14,434	37,914	52,348	415	1655	2070	2,796	7,622	10,418
Secondary (9-10)	6,775	32,083	38,858	352	1377	1729	1,132	5,984	7,116

Likewise, the overall percentage share of Janajati teachers (Table 3.3) at primary level is 30.4% (30.0% in the previous school year), at lower secondary level 19.9% (19.6% in the previous school year) and at the secondary level it is 18.3% (17.9% in the last school year) (See Annex: XXXI).

Table 3.3
Percentage of teachers by Dalit and Janajati by level, 2014-015

Levels	Teachers' categories					
	Dalit			Janajati		
	Female	Male	Total	Female	Male	Total
Primary	3.6	6.2	5.1	27.7	32.3	30.4
Lower secondary	2.9	4.4	4.0	19.4	20.1	19.9
Secondary (9-10)	5.2	4.3	4.4	16.7	18.7	18.3

1.3 Teacher Training

The analysis of this section presents the status of the teachers by their training status by level in community school. The information related to the teacher training is the quality aspect of the school education, which contributes to improve the classroom teaching learning activities and the learning efficiency of the students as well. Based on the definitions of teacher training, the following analysis on the status of teachers by training is categorized into fully trained, partially trained and untrained respectively.

The tables 3.4 and 3.5 below present the number and percentage of teachers in terms of training in community schools by level and gender. At the primary level in total 96.4% with 96.1% female and 96.5% male teachers are fully trained. Of the total teachers 2.5% teachers partially trained and 1.2% teachers are untrained. At lower secondary level 83.8% of the teachers are trained, 2.6% are partially trained and 13.6% teachers are untrained. Similarly, at the secondary level (9-10), 93.0%, 4.4%, and 2.6% of the teachers are trained, partially trained and untrained respectively. Hence, on average more than 91% of the teachers in community schools, except at lower secondary level are trained in the school year 2014-015 (See Annex: XXXII).

Table 3.4
Number of community schools' teachers by training status

Training status	Primary			Lower secondary			Secondary		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	51,325	83,503	134,828	6,348	24,469	30,817	3,085	19,530	22,615
Partially trained	1,316	2,148	3,464	252	692	944	212	533	745
Untrained	740	890	1,630	1,036	3,974	5,010	59	707	766
Total	51,325	83,503	134,828	6,348	24,469	30,817	3,085	19,530	22,615

Table 3.5
Percentage of community schools' teachers by training status, 2014-015

Training status	Primary			Lower secondary			Secondary		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	96.1	96.5	96.4	83.1	84.0	83.8	91.9	94.0	93.0
Partially trained	2.5	2.5	2.5	3.3	2.4	2.6	6.3	2.6	4.4
Untrained	1.4	1.0	1.2	13.6	13.6	13.6	1.7	3.4	2.6

7 Flash II Report 2071 Key findings

- Out of the total 35,603 (including the 482 ECDs programme that was distributed to the districts in the third trimester, recorded ECD/PPCs in the beginning of the school year, 31,902 (89.6%) ECD/PPCs are reported at the end of the school year 2014-015 by the reference date (5th April 2015)
- Compared to the 1,014,339 total numbers of children in ECD/PPCs at the beginning of the school year 906,307 children were reported at end of the school year 2014-015. Of the total non-reported schools, the highest percentage of non-reported schools was found in the Mountain eco-belt.
- The average School Student Ratio at primary level is 1:128 (i.e. 1:124 in the beginning of the school year), at the lower secondary level it is 1:124, at the secondary level (grade 9-10) it is 1:104 and at the higher secondary level 1:130 respectively in the end of the school year.
- The total number of students reported in Flash II school census 2014-015 at primary, lower secondary and basic levels are: 4,217,697; 1,731,504 and 5,949,201 respectively. Compared to the beginning of the school year 2014-015 there are 30 districts, which have shown a decrease in primary level total students by more than 5.
- Compared to the beginning of the school year 2014-015 at secondary level there are slight changes in the grade wise composition of students in the end of the school year 2014-015.
- Of the total students, there are 91,351 at primary level, 2,065 at lower secondary level and 387 at the secondary level students are reported in the religious schools.
- Compared to the total students in the beginning of the school year 2071, in total 92.2% (compared to 89.3% in the last school year) of students at the primary level appeared in the 2071 final examination.
- At the lower secondary level, out of the total number of students in the beginning of the school year, in total 93.7% (compared to 92.4% in the last school year) appeared in the final examination in the end of the school year 2014-015.
- Overall, out of the total number of students appeared in the final exam at the secondary level is 95.1% (compared to 93.6% in the last school year) in the school year 2014-015.
- The average attendance rate for all three dates is 83.6% (compared to the last school year 79.6%), 87.9% (compared to the last school year 84.7%) and 90.5% (compared to the last school year 85.4%) at primary, lower secondary and secondary level respectively.
- Out of the total 29,133 community schools, 10.7% schools in the first trimester and 38.0% in the second trimester received the government funds within two months of each trimester.
- Out of the total community schools, 94.3% (compared to 93.9% in the last school year) of schools reported that they have a School Improvement Plan (SIP) for their schools.
- By the reference date (April 5, 2015) of Flash II data collection, out of the total community schools with the SIPs, 96.6% (compared to 95.9% in the last school year) schools responded to have received all types of government grants for the school year 2014-015.

- The percentage of schools that performed disclosed a statement of accounts (income and expenditure reports) is 85.4% (compared to 83.7% in the last school year).
- In total 91.9% (compared to 91.0% in the last school year) schools performed the social audit regarding all of their academic, administrative, financial and other school level activities during the school year 2014-015.
- In total 91.4% (compared to 89.9% in the last school year) schools prepared a school operational calendar.
- Compared to the 233 planned days of school opening days for overall school activities, the average number of actual school opening days was 226 in the school year 2014-015.
- Out of total 226 (compared to 223 days in the last school year) actual days for the activities performed at schools, it can be seen that on an average 186 (compared to 184 days in the last school year) days were spent for teaching and learning activities; 25 days were spent on examinations and 16 days for extra curricular and other activities.
- On an average the schools were monitored by Resource Persons 3.0 times, almost 1.7 times by the School Supervisor and 1.4 times by other persons.
- Out of the total schools, 98.6% (98.2% compared to last school year) of schools responded that they have formed their SMC. A similar percentage i.e. 97.7% (96.5% compared to last school year) of schools have formed their PTA.
- The participation on SMC by sex, Dalit and Janajati shows 22.1% (21.6% compared to last school year) female members, 11.6% (11.3% compared to last school year) Dalit members and 36.6% (36.0% compared to last school year) are Janajati members.
- The participation on PTA by sex, Dalit and Janajati is 28.3% (27.4% compared to last school year) female members, 14.1% (13.9% compared to last school year) Dalit members and 39.7% (39.0% compared to last school year) are Janajati members.
- Out of total SMCs and PTAs, 88.5% of SMCs (Compared to the last school year 87.1%) and almost 88.9% of PTAs (Compared to the last school year 86.6%) are formed by common consensus and the rest by an election process.
- Out of total 29,133 community schools 1-6 times meetings were held in 11,122 (38.2%) schools, 7-12 times meetings held in 11,204 (38.5%) schools, 13-18 times meetings held in 2,966 (10.2%) schools, and more than 18 times meetings held in 1017 (3.5%) schools.
- Altogether by the end of the fiscal year, a total of 12,471 (compared to 12,421 levels in the last school year) levels of schools management were transferred to their respective local community.
- Of the total 12,471 school levels, 8,248 (compared to 8,238 levels in the last school year) primary levels, 2,839 (compared to 2,826 levels in the last school year) lower secondary levels and 1,384 (compared to 1,357 levels in the last school year) secondary levels were transferred to the community.
