

Flash I REPORT 2072 (2015-016)

GOVERNMENT OF NEPAL
MINISTRY OF EDUCATION
DEPARTMENT OF EDUCATION

Sanothimi, Bhaktapur
2015

Foreword

The Educational Management Information System (EMIS) in Nepal has been gradually evolving and demonstrably improving from the perspective of information collection, interpretation, presentation and application. Especially, EMIS has been used to derive the Flash Reports I and II.

This report (Flash I 2015-016) provides a snapshot of schools, enrolments, internal efficiency including promotion, repetition, drop out and survival rates of students at all levels of the school education system in disaggregated forms by districts, eco-zones and development regions. Furthermore, this report analyses the training status of teachers and assesses how well schools are supplied with basic support from DEOs. Such measures give an indication of the effectiveness of the education system. EMIS helps to identify whether the education system is functioning well and indicates special areas where greater attention is needed. This kind of information with regards to school performance has been instrumental for evidence-based educational planning and monitoring at district, regional and national levels.

In the process of preparation of this report many people and organizations have contributed in various ways. In general, this report is the result of collective and collaborative effort of EMIS core team of DEO, UNESCO Nepal Office team and REDs and DEOs officials. The constructive suggestions and feedback of the Development Partners have also played a significant role in this process. I am grateful to all organizations and individuals who have contributed significantly to the overall process of this report and, thus, would like to extend gratitude for their contribution. Any suggestion and feedback for its improvement is highly appreciated.

Khagaraj Baral
Director General
Department of Education

Table of contents

Table of contents	i-iii
List of tables and figures	iv-vii
Acronyms	viii
SECTION I	1-11
1.1 Introduction	1-2
1.2 Process of preparing the report	2-3
1.3 Methodology	3-4
1.4 Data reliability	4-5
1.5 Lessons learnt	5-6
1.6 Key findings	6-9
1.7 Overall Progress Status on SSRP KPIs	9-11
SECTION II	11-19
2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)	11-16
2.2 Dalit and Janajati children enrolled in ECD/PPCs	16-17
2.3_A Percentage of new entrants in grade 1 with ECD/PPC experiences	17-18
2.3_B Number of ECD/PPCs facilitators/teachers by sex, Dalit, Janajati, qualification and percentage of training	19
SECTION III	20-75
3.1 School education	20-75
3.2 Basic Education	20-57
3.2.1 Number of schools	20-24
3.2.2 Enrolment	24-40
(1) Total number of enrolments at primary, lower secondary and basic levels	24-28
(2) Dalit and Janajati enrolments at primary, lower secondary and basic levels	28-29

(3) Percentage of girls and boys and gender parity indexes in enrolment at primary, lower secondary and basic levels by social groups	29-31
(4) Enrolment at primary, lower secondary and basic levels by disadvantaged Janajati and disabilities of students	31-32
(5) Enrolment by major types of disabilities at primary, lower secondary and basic levels	32-33
(6) Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One	34-36
(7) Gross and Net Enrolment Rate (GER and NER) at primary, lower secondary and basic levels	36-38
(8) Scenario of out-of-school children	38-40
(9) Internal efficiency at primary level	40-42
(10_A) Internal efficiency at lower secondary level	42-43
(10_B) The Quality of Basic Education based on the Findings and Recommendations of "National Assessment of Student Achievement (NASA) 2011 for grade 8 and for grades 3 and 5 in 2012"	43-48
3.2.3 Teachers information at primary, lower secondary and basic levels	48-57
(1) Total reported number of teachers by sex at primary, lower secondary and basic levels in all types of schools	49-51
(2) Percentage of teacher and the gender parity indexes in all types of schools	51
(3) Percentage of teachers by Dalit and Janajati	52
(4) Teacher training	52-54
(5) Student Teacher Ratios	54-57
(5)-1 Student Teacher Ratio in all types of schools	54-55
(5)-2 Student Teacher Ratios in community schools	55-56
(5)-3 Student Teacher Ratios in community schools on approved teacher positions	56-57
3.3 Secondary Education	58-75
3.3.1 Number of schools	58-60
3.3.2 Enrolment	61-67
(1) Total number of enrolment at secondary level	61-62
(2) Total number of Dalit and Janajati enrolment at secondary level	62
(3) Total number of enrolment at secondary level by school types	63-64
(4) Enrolment at secondary level by disadvantaged Janajati and disabilities of students	64-65
(5) Enrolment by major types of disabilities at secondary level	65-66
(6) Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level	66-67

3.3.3 Teachers information at secondary, higher secondary and secondary levels	68-74
(1) Distribution of teachers by sex at secondary, higher secondary and secondary levels	68-69
(2) Percentage of teacher and the gender parity indexes in all types of schools by level	69-70
(3) Percentage of Dalit and Janajati teacher	70-71
(4) Teacher training	71-72
(5) Teacher Ratios	72
(5)-1 Student Teacher Ratio in all types of schools	72-73
(5)-2 Student Teacher Ratio in community schools	73
(5)-3 Student Teacher Ratio in community schools on approved teachers	74
(6) Internal efficiency at secondary level	74-75

SECTION IV **76-78**

4.1 Availability of textbooks at primary, lower secondary and secondary levels in community Schools	76-77
4.2 Number of classes with transitional language support at primary level	77-78

SECTION I

1.1 Introduction

The Department of Education (DOE) has prepared the Flash Report I, 2015-016 with a view to presenting different education statistics to facilitate the planning, programming, resource management, plan implementation and monitoring activities of the School Sector Reform Plan (SSRP) 2009-015, which is going to be completed in the current Fiscal year 2015/016. After the SSRP, for the continuation of the education sector plan, the MOE is preparing the School Sector Development Plan (SSDP) for the coming 7 years period. Based on the SSRP achievements, the SSDP will focus on underperformed (based on the set targets for 2015) areas, emerging challenges and issues. Basically, two major devastating earthquakes of 25th April with 7.8 magnitudes and 12th of May 2015 with a 7.3 magnitudes and series of their aftershocks have impacted in serious challenges of destruction of school physical facilities including school buildings, classrooms, toilets, drinking water facilities and so on. In additions to this, the prolonged political unrest in some part of the country has also created obstacles in the school education, which has a greater impact on children to have a proper learning access. Consequently, the DEOs had to face serious problems to collect the Flash I 2015 school census data in time and submit to the DOE that made delay to prepare the report to fulfill the purpose of analysis of the current educational status based on the set indicators in the SSRP.

This publication is the twenty second in the series of Flash Reports I and II produced by the DOE. The publication has focused, largely, on providing information to the following main areas of school education:

- Early childhood development (ECD) and pre-primary classes (PPCs),
- Alternative schooling programme: School outreach/Flexible schooling programme (SOP/FSP),
- Number of schools by types of schools (community, institutional and religious),
- Student participation by gender, Dalit, Janajati, disadvantaged Janajati and disabilities,
- Number of teachers and their training status by types of schools,
- GIR/NIR in Grade One and GER/NER by gender and level of education,
- Internal efficiency by grade, gender and level,
- Student-teacher ratios by level of school education,
- Student-school and teacher-school ratios by level of school,
- Delivery of free textbooks to schools within two weeks of the beginning of the school year, and
- Number of schools with transitional language support at primary level.

Since the school year 2009-10, the Flash Reports have included information in line with the SSRP core document comprised of basic education (grades 1-8) and secondary education (grades 9-12) in order to address SSRP indicators. Accordingly, this report presents disaggregated information on these two levels: basic and secondary education.

The information presented in this report includes, unless stated otherwise, facts and figures from all schools running in the country: all types of community schools (community aided,

community managed and community unaided), institutional schools (private) and religious schools by level : ECD/PPCs, primary, lower secondary, secondary and higher secondary.

1.2 Process of preparing the report

- Education Management Information System (EMIS) Core Team headed by the Director, Planning and Monitoring Division of DoE coordinated all activities of this report.
- Flash I questionnaires and the School Level Electronic based IEMIS were updated through wider consultations with central, regional, district and sub-district level personnel.
- Feedback and suggestions received from stakeholders, including development partners were incorporated to improve the Flash I questionnaires and the School Level Electronic based IEMIS.
- The Camera-Ready Copy (CRC) of the revised Flash I questionnaires and the updated Flash Software was sent to District Education Offices (DEOs) in the last week of February 2015 for printing the Flash I questionnaires and generate the School Level Electronic based IEMIS form the Flash Software to distribute for all schools.
- Guidelines to fill in the Flash I questionnaires and complete the School Level Electronic based IEMIS were provided to schools along with the questionnaires and separate instructions were sent to the DEOs/REDs to ensure quality and accuracy of data by monitoring of data verification and validation at schools and RCs level by Resource Persons, School Supervisors and District Education Officers.
- The computer software based on the PHP 5 (Pretext Hypertext Pre-processor) platform with the back-end support by the MySQL database was developed, updated and used to process the Flash data. The software enabled data entry, processing and standard output generation. A provision has been made in the software to generate additional output tables on the basis of specific user requirements. Small revisions were made in the last year's software as well as in the Flash questionnaires to accommodate districts' requirements and also due changes, especially to address the Minimum Enabling Conditions (MECs) and student achievements related data.
- All DEOs were able to install the Flash Software by themselves. Data were entered into software locally and delivered the district Flash database to the DOE by email or FTP (File Transfer Protocol).
- Data entry into computer began with verifying and updating school codes given to all schools by DEOs.

Since very beginning of the Flash Reporting system, the DOE has been initiating different mechanisms for the improvement of the school level EMIS. Those initiations are the: standardized school census forms, standardized EMIS software to establish the electronic database, time-bound tasks, provisions to approve the data/information by different personnel from the schools to district education offices, building an individual school's time series database, systemic verification by the Resource Persons, School Supervisors, District education Officers and other stakeholders, linked in the schools education planning, resource management, supports, monitoring and evaluation system and others.

The DOE has learned the lessons from several practices, initiatives and the different studies that until and unless every school have a standardized record keeping system at the school level, the expectation of having a quality data will not be fulfilled. In this regards, the DOE has assessed the 40 schools' records from the two districts (i.e. Kapilbastu and Banke) and prepared the holistic and integrated 5 years School Record Keeping Registers in a form of hard copy and tested in those 40 schools, which were appreciated by the schools, RPs and School supervisors. With the expansion of the ICT infrastructure in the schools, the Integrated School Record Keeping system has been converted into the electronic based School Level IEMIS in the school year 2070 and tested in 2 districts (Bhaktapur and Dang), which was expanded in 15 districts in the school year 2071. With the success initiatives on establishing the individual school's electronic based IEMIS by capturing the original records of the schools in the 15 districts the DOE has expand this mechanism in all 75 districts in the school year 2072 to strengthen the Flash Reporting System. By the end of November 2015, of the 75 districts 63 districts have submitted the electronic based IEMIS to the DOE and the rests have submitted their Flash I school census data based on the previous mechanism (i.e. the schools entered the data in the Flash I school census forms manually and reported to the RCs and district education offices).

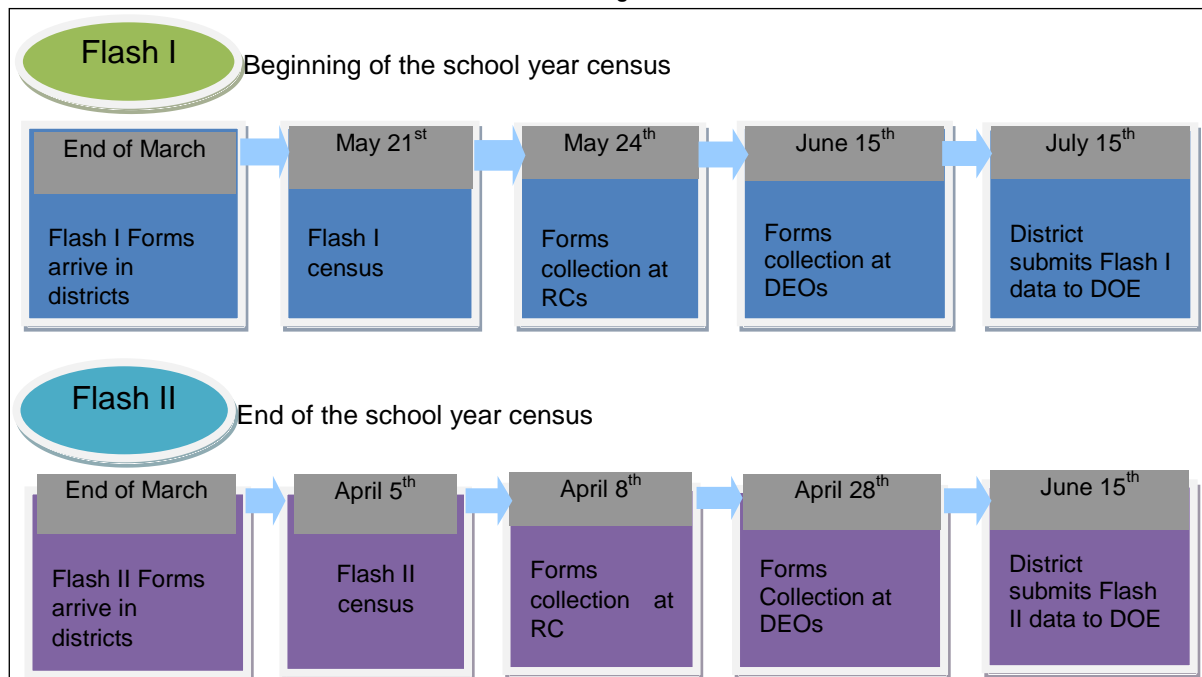

The current Flash Report I 2015-016 is prepared based on the both types of data: school level electronic based database and manual based of database reported by the Schools to RCs, RCs to DEOs and DEOs to DOE.

1.3 Methodology

- This report has been prepared based on the information gathered during the Flash I School Census covering all levels and types of schools – pre-primary to higher secondary (community aided, community unaided, community managed, private or institutional schools, religious schools and alternative schools) running in the country on the reference date of Jestha 7, 2072 (21 May, 2015). However, out of total 34,806 schools with all levels in the previous school year, 32,106 (92.6%) schools including 181 newly opened schools reported their information within the deadline of the Flash I school census 2015. As mentioned above, due to the political unrest in some parts of the country in total there were 2,700 schools which were not reported within the prescribed time line but these schools were reported after normalized the situation and incorporated in this final report. Of the total 34,806 schools, in total 148 schools were closed and merged in the school year 2015-016.
- Information and analyses are presented, mainly, on the basis of ecological belts: Mountain, Hills, Tarai, and a separate fourth category Valley summarises information for three districts (Kathmandu, Lalitpur and Bhaktapur). The detailed information with respect to each district is provided in annexes for the further references.
- The population used in the calculation of enrolment rates in Flash Reports is based on the National Population Census Report 2011 and the projected population by the Central Bureau of Statistics (CBS) 2011 National Population Census. Up to the Flash I Report 2012-013 the school age population was used based on the Population Projection for Nepal 2001-2021 publication, jointly published by the CBS and the Ministry of Population and Environment (MOPE) in the year 2003.

- Similarly, for the current Flash Report I, 2015-016, based on the population data received from CBS (National Population Census 2001 and 2011), the district wise single age group population was calculated by using the Sprague multiplier coefficient from a given five-year age group population data. After obtaining district level single age group population, the compound growth rate formula was applied to estimate the district level population for single year (i.e. for the year 2015-2016).
- The specified age groups for students in ECD/PPC, primary, lower secondary, basic, secondary, higher secondary and secondary levels are 4, 5-9, 10-12, 5-12, 13-14, 15-16 and 13-16 years respectively.
- Schools are counted according to the level/levels of education they offer and as a unit by the total grades they offer. For example, level-wise, a higher secondary school offering grades 1-12 is counted as having four levels of education – as primary, lower secondary, secondary and higher secondary level respectively.
- The Flash I and II School Census were implemented as per the following prescribed timeline and schedules.

Figure1
Time line for Flash Data collection through the Flash I and II School Census

1.4 Data reliability

In the Flash reporting system, responsibilities for each agency/level are well defined in order to ensure the uniformity, consistency and quality of data. At the school level, Head Teachers (HTs) are responsible to fill up the Flash I questionnaire as well as to complete the Electronic based School Level IEMIS and obtain approval from School Management Committee (SMC) Chairpersons and School Supervisors/Resource Persons on time. Likewise, SMC Chairpersons and School Supervisors/Resource Persons are responsible for assessing and approving the completed Flash I questionnaires before these are submitted to the DEO. Also, several measures are taken to verify the data by cross checking the accuracy and consistency of the data.

In order to minimize the reporting errors and prevent inconsistency in data entry, necessary validation rules have been incorporated into the Flash data entry software. Furthermore, the DOE has been providing continuous technical support to the district personnel through visits as well as through telephones and emails, which, to a large extent, has helped in improving the data quality. In addition, trainings and on-the-job orientations to the DEO personnel involved in data processing activities have been provided to enhance their capacity with a view to enabling them to ensure the quality, reliability and validity of data.

In addition to the above efforts to maintain reliability, validity and consistency in the data management at school level and improve the reporting process, the DOE has initiated the following mechanism:

With a point of view to improve the school record keeping and reporting system, the DOE has established a mechanism, which is initiated in all 75 districts. Of this, the schools of the 63 districts (including all earthquake affected districts) reported their electronic records which captured the individual student's, teacher's and other related information. This mechanism is compatible with the current Flash Software System which has been used since the school year 2004. The schools of these districts easily managed the detailed information of an individual student, teacher and other relevant information in the school level IEMIS software and reported the quality data within the given time-frame of the school census. Moreover, this mechanism provides an opportunity to the schools, RCs and DEOs to track the progress of the students, teachers and other information and also the schools can easily update their information based on the profile of an individual student, teacher and other information at the end of the school year (i.e. except new students, the schools do not need to re-enter the data in the school level IEMIS). As a whole, this new system has contributed to improve the current Flash Reporting System. However, the issue of assuring data-quality is strictly related with how schools have owned and used (e.g. for SIP and other resources) them. It is observed that since the electronic based school level IEMIS system captured the original records of the schools by individual students, teachers and other details that made drastic change in improving the more consistent and reliable data than in the previous years.

1.5 Lessons learnt

- Based on the last 11 years' experiences in the Flash reporting system, it is learned that the Electronic based School Level IEMIS should be strengthened and to be linked with the regular practice (especially at the school level) which contributes to improve the current EMIS system. 63 districts have already completed the Electronic based Flash I&II school census 2015/016 for the management and reporting system. The DOE has been putting its efforts to apply the simplified Electronic based school level data management and reporting and also make it mandatory to all 75 districts.
- The DEOs have been demonstrating a steady progress in timely reporting, verifying and validating the data by themselves at the district level. Installation and proper use of user-friendly and technically sound database management software developed by the DOE contributes to enhance the systemic capacity.
- Nevertheless, the capacity of schools, RCs and DEOs needs to be further strengthened in most aspects of EMIS activities, such as establishing the standardized school record keeping system at all schools, adequate logistic supports for producing quality data and disseminating accurate and timely information to key stakeholders at the local (school, community and district) level, contributing to better accountability, adherence to results and informed decision-making at all levels.

- In line with the new initiative of Data Must Speak (DMS), the DOE has planned to improve in the previously developed and used School, VDC and District Profiles for the establishment of two-way data flow system, for this the DOE has been coordinating and collaborating with the UNICEF Kathmandu Office. The coming School, VDC and District Profile will cover the main indicators (including the equity indexes) that will be helpful to the schools to prepare and implement the SIPs. The DOE has also developed a time-series Flash Database that has assisted the DEOs to check the consistency, reliability and validity of the data by assessing the data of each school.
- As a regular supporting to strengthening the School level EMIS the UNESCO office Kathmandu has provided the technical assistance to review the current mechanism and the coverage of the EMIS in line with the possibilities of incorporation of the current emerging issues related to the disasters. The report on the review of EMIS has suggested the possible ways to incorporate the new information for the further improvement of the current EMIS system.

1.6 Key findings

- The total number of community-based and school-based ECD/PPCs is 35,991 (35,121 in the last school year) of which 5,543 (5,087 in the last school year) pre-primary classes are running in institutional schools and the rest 30,448 (30,034 in the last school year) are running in community schools and as community-based ECDs.
- The average Enrolment Rate with regard to 4 years' population and enrolment in ECD/PPCs is 81.0% (77.7% in the last school year) with 80.9% for girls and 81.2% for boys.
- The proportion of students in Grade One with ECD/PPC experiences is 62.4% (59.6% in the last school year) with 62.3% for girls and 62.5% for boys.
- Of the total 34,806 schools in the last school year, in total 148 schools (especially in the Terai eco-belt) were closed and merged in the last school year and 181 new schools were opened in the current school year, so that the number of schools has changed in the current school year 2015-016.
- Out of the total 34,837 (34,806 in the last school year) schools 34,362 (34,335 in the last school year) are primary, 15,091 (14,924 in the last school year) are lower secondary, 34,537 (34,506 in the last school year) are basic, 8,968 (8,814 in the last school year) are secondary, 3,656 (3,596 in the last school year) are higher secondary and 9,263 (9,109 in the last school year) are secondary (Grades 9-12) levels.
- Out of the total 34,806 schools, 930 (895 in the last school year) are religious schools, which include Madarasa, Gumba/Vihar and Ashram/Gurukul.
- On average, the school student ratios are 1:123 at primary, 1:123 at lower secondary, 1:176 at basic (Grades 1-8), 1:105 at secondary, 1:123 at higher secondary and 1:150 at secondary (Grades 9-12) levels (Compared to 1:126, 1:123, 1:179, 1:102, 1:1116 and 1:145 respectively in the last school year).
- The total numbers of students at primary, lower secondary and basic levels are 4,264,942 (4,335,355 in the last school year) 1,862,873 (1,835,313 in the last school year) and 6,127,815 (6,170,668 in the last school year) respectively.
- Of the total enrolment at primary, lower secondary and basic levels, 84.7%, 83.8% and 84.4% (compared to 84.6%, 84.1% and 84.4% in the last school year) are in community

schools respectively. Similarly, 15.3% (15.4% in the last school year), 16.2% (15.9% in the last school year) and 15.6% (15.6% in the last school year) are in institutional schools.

- The total number of students at secondary, higher secondary and secondary (grades: 9-12) levels are 938,897; 450,753 and 1,389,650 (900,585; 416,995 and 1,317,580 in the last school year) respectively.
- Of the total enrolment at secondary, higher secondary and secondary (grades: 9-12), 80.7% (80.9%, in the last school year), 71.0% (71.1% in the last school year) and 77.6% (77.8% in the last school year) are in community schools, whereas 19.3% (19.1% in the last school year), 29.0% (28.9% in the last school year) and 22.4% (22.2% in the last school year) are in institutional schools.
- The girls' enrolment constitutes 50.8% (50.8% in the last school year) at primary level, 50.7% (50.7% in the last school year) at lower secondary level, and 50.8% (50.8 in the last school year) at basic level. Likewise, girls comprise 50.9% (51.0% in the last school year) at secondary level, 50.7% (50.7% in the last school year) at higher secondary level and 50.8% (50.9% in the last school year) at comprehensive secondary (grades: 9-12) level.
- The share of Dalit enrolment is 19.7% at primary, 14.4% at lower secondary, 11.0% at secondary and 6.6% at higher secondary level, which are almost similar to the previous school year.
- The share of Janajati enrolment is 34.4% (33.9% in the last school year) at primary level, 38.6% (38.7% in the last school year) at lower secondary, 38.4% (38.6% in the last school year) at secondary and 29.3% (29.8% in the last school year) at higher secondary level.
- The total number of student enrolment by extremely disadvantaged Janajati (22 ethnic groups) is 94,383 (96,333 in the last school year) at primary level, 31,885 (31,627 in the last school year) at lower secondary level, 15,389 (15,409 in the last school year) at secondary level and 2,859 at higher secondary level.
- Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One are 136.7% (137.0% in the last school year) and 93.9% (93.0% in the last school year) respectively.
- The Gross Enrolment Rate (GER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 135.4% (134.4% in the last school year) 95.4% (89.7% in the last school year), 120.1% (117.1% in the last school year), 75.1% (70.1% in the last school year), 37.6% (32.9% in the last school year) and 56.7% (51.6% in the last school year) respectively.
- The Net Enrolment Rate (NER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 96.6% (96.2% in the last school year), 77.7% (74.6% in the last school year), 89.4% (87.6% in the last school year), 57.9% (56.1% in the last school year), 16.6% (13.1% in the last school year) and 37.7% (34.7% in the last school year) respectively.
- The gender parity in school education has significantly improved. The Gender Parity Index (GPI) in NER at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 0.99; 1.03; 1.00; 0.98; 1.03 and 0.99 (0.99; 1.02; 1.00; 0.99; 1.03 and 1.00 in the last school year) respectively.
- The promotion and repetition rates in Grade One are 81.5% (78.4% in the last school year) and 13.9% (15.2% in the last school year).
- The promotion and repetition rates in grade 5 are 92.2% and 4.2%.

- The promotion and repetition rates in grade 8 are 90.9% and 4.0% (89.5% and 4.5% in the last school year).
- The overall survival rate to grade five is 87.5%, with 87.1% for boys and 87.9% for girls (Compared to total 86.8%, boys 86.5% and girls 87.5% in the last school year).
- The overall survival rate to grade eight is 76.6%, with 75.9% for boys and 77.4% for girls (compared to total 74.6%, boys 73.3% and girls 76.0% in the last school year).
- The overall survival rate to grade ten is 37.9%, with 37.0% for boys and 38.9% for girls.
- The overall Co-efficient of Internal Efficiency at Primary and Basic levels is: 81.8% and 75.9% (80.9% and 73.1% in the last school year). The Cohort Graduation rates at Primary and Basic levels are: 80.6% and 69.6% (77.6% and 63.8% in the last school year).
- According to the National Assessment of Student Achievement (NASA) report, 2013 the average students' learning achievements in Grade 8 are 35% in Mathematics, 48% in Nepali and 41% in Social studies subjects.
- According to the NASA report, 2012 the average students' learning achievements in Grade 5 are 53.3% in Mathematics, 59.7% in Nepali and 53.6% in English subjects.
- According to the NASA report, 2012 the average students' learning achievements in Grade 3 are 59.4% in Mathematics and 62.6% in Nepali subjects.
- Based on the NASA reports, 2011 and 2012 the districts: Achham, Bardiya, Jumla, Khotang, Mahottari, Rolpa, Saptari, Udayapur and also the Eastern- and Mid-Western development regions have low level of achievements. It is worth mentioning here that similar situations have been observed in these districts and regions with regard to their internal efficiency as demonstrated in the Flash I Report, 2015-016.
- The proportions of female teachers by levels, in all types of schools, are: 42.3% (41.9% in the last school year) at primary level, 27.9% (27.6% in the last school year) at lower secondary level and 17.7% (17.4% in the last school year) at secondary level.
- The proportions of female teachers in all types of community schools are: 38.4% (38.2% in the last school year) at primary level, 20.9% (20.8% in the last school year) at lower secondary level and 14.1% (13.9% in the last school year) at secondary level.
- The proportions of Dalit teachers at primary, lower secondary and secondary levels are: 5.3%, 4.2%, and 4.6% (5.1%, 4.0%, and 4.4% in the last school year) respectively.
- The proportions of Janajati teachers at primary, lower secondary and secondary levels are: 30.5%, 20.1% and 18.5% (30.4%, 19.9% and 18.3% in the last school year) respectively.
- The percentage of fully-trained teachers in all community schools is 97.3% (96.4% in the last school year) at primary level, 88.6% (82.8% in the last school year) at lower secondary level and 95.3% (93.0% in the last school year) at secondary level.
- The student-teacher ratios (based on the approved positions of teachers) in community schools are 35:1 (36:1 in the last school year) at primary level, 60:1 (60:1 in the last school year) at lower secondary level and 39:1, (30:1 in the last school year) at secondary level.
- Based on the PCF salary fund for community schools in the Fiscal year 2071/072 (by considering the PCF fund as the number of teachers and add this into the existing number of teachers by level) the STR 35:1 will be at primary level, 54:1 will be at the lower secondary level and 36:1 will be at the secondary level respectively.
- The average percentage of students who received the full sets of textbooks, within the second week of the academic year 2015-016, was 86.5% (81.1% in the last school year) at

primary level, 86.9% (80.6% in the last school year) at basic level and 89.5% (79.4% in the last school year) at secondary level.

- Altogether 69 local languages have been used in 12,584 grade 1 classes, 12,770 in grade 2 classes, 10,616 in grade 3 classes, 10,750 in grade 4 and 5,099 in grade 5 classes as the medium of instruction in the classroom teaching and learning activities at primary level.

1.7 Overall Progress Status on SSRP KPIs

The following table presents the overall progress on the SSRP Key Performance Indicators (KPIs) with the base year status (2007/08 and 2008/09) and year wise achievements against the set targets for the SSRP period 2009/-10 to 2015/016. Overall, the analysis of the indicator wise achievement against the targets shows that most of the indicators are optimistically improved, but there are some indicators namely: New entrants with ECED experience in grade 1, Gross and Net Intake Rates in Grade 1, Gross and Net Enrolment Rates in ECED/Pre-primary, Primary Education, Basic Education, Secondary Education (grade 9-12), Pupil Teacher Ratio at Basic level, Repetition Rate in Grade 1 and literacy rates are still lagging behind the set targets. Moreover, the analysis suggests that, for the improvement of these indicators (in particular indicators related to grade 1) there should be ample attentions in the next years' school education planning and programme implementation.

Table1.1: Summary of the SSRP Key Performance Indicators (base year status, progress status and targets)

Indicators	Base years		Targets and achievements

SECTION II

2.1 Early Childhood Development and Pre-Primary Classes (ECD/PPCs)

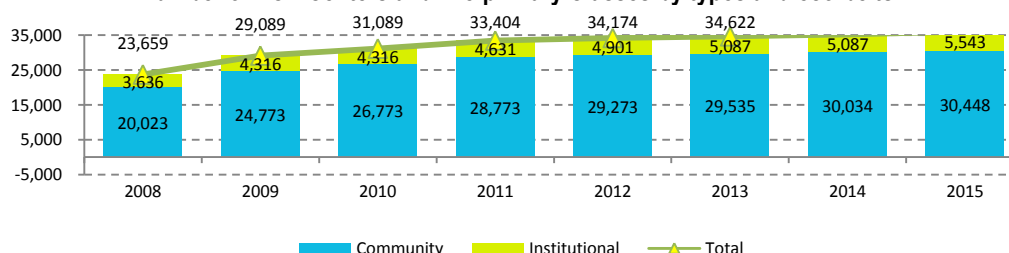

The early childhood education and development (ECED) goal stipulated in the EFA National Plan of Action (2001-15) provides a basis for the implementation of ECD/PPCs in the SSRP 2009/10-2015/16. In Nepal, the SSRP goal regarding the Early Childhood Development (ECD) activities is in line with the Dakar Framework of Action for EFA (2001-15). The Early Childhood Development / Pre-Primary Class (ECD/PPC) is regarded instrumental for the physical, intellectual, social and emotional development of children. Moreover, it helps to improve the internal efficiency of primary and basic education. One of the main strategies taken to achieve the EFA goals is to increase the number of ECD centers to ensure access for the most vulnerable and marginalized children. There are various forms of ECD/PPCs, which include school-based ECD centers, community-based ECD centers and privately managed pre-primary classes. Schools give different names to these classes such as Nursery, Kindergarten, and Montessori etc.

Table 2.1 and figure 2.1 below show that out of the total 35,991 (Compared to 35,121 in the last school year) ECD/PPCs in the country, 30,448 (84.6%) ECDs are running as community-based ECDs and community schools based ECD/PPCs. Accordingly, the rest 5,543 (15.4%) of the ECD/PPCs are operating under institutional schools (See Annex: I). The trend shows that there has been continuous increase in the ECD/PPCs facilities. Based on the set targets with regard to the ECD/PPCs GER and the Percentage of new children in Grade 1 with ECD/PPCs experience in the SSRP, the government has established new ECD/PPCs (Figure 2.1 a total 482 new ECD centers were established in the FY 2014/015 (2071/072) as per the DEOs' demand to provide ECD services to the un-served children. Although the data shows a low involvement of the private (institutional PPCs) sector in providing early childhood care and education services, the total number of ECD/PPCs has increased by 2.4% as compared to the number 35,121 in the last school year. Due to the implementation of the electronic based School Level EMIS the Institutional school based PPCs has also increased in the current school year.

Table 2.1
Total number of ECD/PPCs by types and eco-belts

Eco-belts	Community	Institutional	Total
Mountain	3,211	201	3,412
Hill	13,926	1,745	15,671
Valley	795	1,184	1,979
Terai	12,516	2,413	14,929
Total	30,448	5,543	35,991

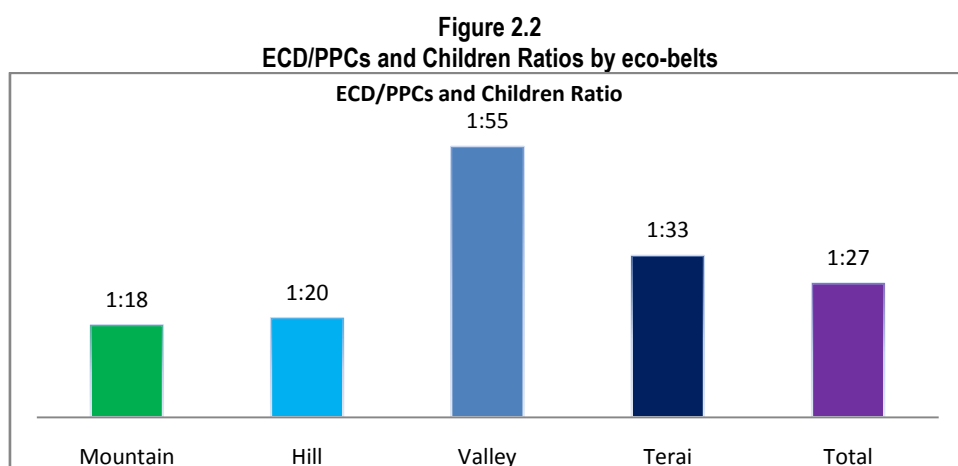

Figure 2.1
Number of ECD Centers and Pre-primary Classes by types and eco-belts

In total 977,365 children (Table 2.2_B) are catered by 35,991 ECD/PPCs (Table 2.1) in the current school year 2015-016. The present ratio of total children enrolled in the ECD/PPCs and the existing number of ECD/PPCs is 1:27 (compared to 1:29 in the last school year), indicating a need for a considerable expansion and strengthening of the ECD/PPCs to maintain the prescribed class size of ECD/PPCs and children ratio (i.e. 1:20). The analysis at the schools and district-level data shows if we calculate the Institutional school based PPCs offering 3 classes (i.e. Nursery, Lower KG and Upper KG) and compared with the students based on the standard class size (i.e. 1:20) in total 1,230 additional ECD/PPCs are needed. Of the total there are 21 districts, which have high ECD/PPCs and children ratio (more than 1:29), than other districts (See Annex: I).

Figure 2.2 below shows the ¹ECD/PPCs and children ratios by eco-belts. This indicator presents the extent of each ECD/PPC’s capacity to accommodate the children. It shows, on average, one ECD/PPC is serving 27 children. The highest ECD/PPCs and children ratio is in the Valley (1:55) followed by the Terai eco-belt (1:33) and the lowest is in the Mountain (1:18) and the Hill eco-belts (1:20). This analysis suggests that, since Terai and Valley are more populated areas and there are more institutional schools with pre-primary classes, the ratio of ECD/PPCs and children is higher in these eco-belts. The district-wise analysis with regard to community schools based and community based ECD/PPCs and children enrolled in ECD/PPCs also shows that there are 14 districts (including 10 Terai districts) with more than 1:25 ECD/PPCs and children ratio.

Like wise there are 28 districts (form the Hill and Mountain eco-belts) have a less than 1:15 ECD/PPCs and children ratio, highlighting the need of more efforts to revisit the existing ECDs facilities in the future to consolidate and build more effective and efficient ECD/PPCs (See Annex: V) facilities to serve in the needy areas of the country. For this, in the coming ASIP the DEOs need to present the needs of this facilities by having an in-depth analysis of the VDCs level ECD/PPCs population to address the current unnerved almost 20% (table 2.2 A) of the 4 years children and almost 10% (table 2.2 B) of the 3-4 years children based on the existing ECD/PPCs facilities.

The following map depicts the distribution of school and community-based ECDs in the school year 2072 (2015-2016) by districts, which are running from the financial and other support of the government.

¹ This indicator is calculated by taking the total number of children enrolled in ECD/PPCs and the total number of ECD/PPCs recorded in the Flash Reporting System in a specific academic year.

Map: 1 Number of school and community based ECD/PPCs

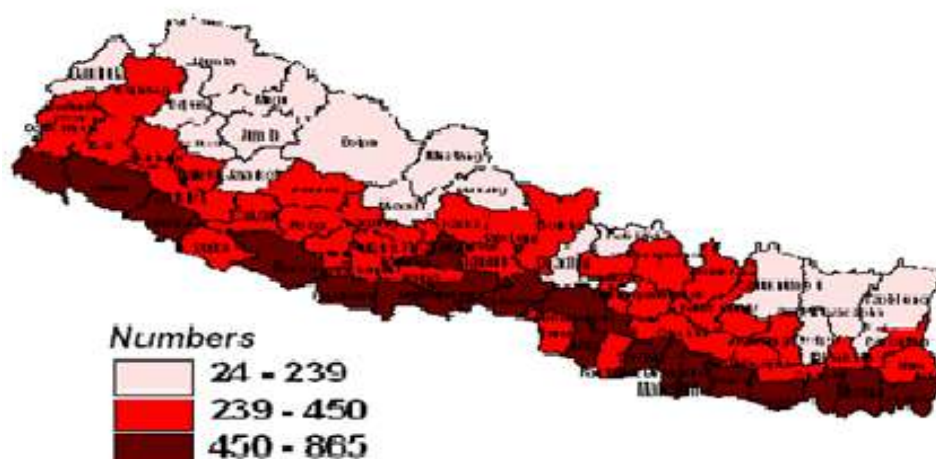

Table 2.2_A and 2.2_B below show the total number of 4 years age group population, total number of enrolment with 4 years age children in ECD/PPCs and also the total number of 3-4 years age group population and the total number of children enrolled in the ECD/PPCs with the percentage of children enrolled in the ECD/PPCs compared with the 4 years and 3-4 years age group population by eco-belts and sex. In addition, the figures 2.3 and 2.4 below further elaborate them. Based on the targeted age focusing to the one year EED/PPCs programme for children of four years age group in the SSRP 2009-015, the DOE has collected the ECD/PPCs enrolment by age/s through the Flash I 2015 school census.

Based on the 4-year age enrolment data compared with the 4-year age population, the table (2.2_A) below presents that the overall percentage of 4-year children enrolled in ECD/PPCs is 81.0%, with 80.9% girls and 81.2% boys (Compared to total 77.7%, with 77.3% girls and 78.1% boys in the last school year) in the current school year 2015-016, shows there is an increment by 3.3% than in the previous school year. Compared with the set target (82.0%) for 2015 in the SSRP, this achievement is close to the target.

The analysis by eco-belts also suggests, although the efforts made by the government towards the expansion of ECD programme to cater the targeted children is more encouraging, it is important to pay more attention to strengthening the programme for their retention and transition to grade 1 which is still low (62.4% table: 2.4 A) compared to the total enrolment of the ECD/PPCs in the last school year 2014-015.

Table 2.2_A
Percentage of 4 year's population, total enrolment and enrolment rates in ECD/PPCs by eco-belts

Eco-belts	4-year age population			4-year age children enrolled in ECD/PPCs			% of 4 years' children enrolled in ECD/PPCs		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	21,173	21,534	42,707	14,698	15,011	29,709	69.4	69.7	69.6
Hill	88,306	91,226	179,532	70,018	74,154	144,172	79.3	81.3	80.3
Valley	17,300	20,411	37,711	18,869	20,857	39,726	109.1	102.2	105.3
Terai	142,393	149,844	292,237	114,231	119,678	233,909	80.2	79.9	80.0
Total	269,172	283,015	552,187	217,816	229,700	447,516	80.9	81.2	81.0

In addition to the above, in line with the previous years, information regarding the percentage of total children enrolled in the ECD/PPCs compared with the 3-4 years' age group

population is presented in the Table 2.2_B. The table below shows, on average, the country has achieved 91.0% of total children enrolled in ECD/PCCs. A slight gender difference in ECD/PPC enrolment rate (90.0% for girls and 92.0% for boys) against girls is observed. As in the enrolment rate with the 4 year's age group population and children enrolled in the ECD/PPCs of the same age group, the Mountain eco-belt shows the lowest enrolment rate (69.6%) compared to the Valley (105.3%) and the Hill (80.3%) eco-belts (See Annex: I).

The highest enrolment rate is in the Valley (105.3%) as a result of more institutional (private) PPCs running in the Valley eco-belt. In addition, the PPCs run by private institutions mostly include three years' programme (Nursery classes, Lower K.G. and Upper K.G.), whereas the ECDs run by the community and community schools based (which are funded by government programme) include one-year programme. This explains why the Valley continued to have the highest percentage of enrolment among the stated eco-belts. Overall, the ratio of girls to boys is 0.93, which is same as (0.93) in the last school year 2014-015.

Table 2.2_B
3-4 years' population, total enrolments and enrolment rates in ECD/PPCs by eco-belts

Eco-belts	3-4 Years' Population			Total children in ECD/PPC			Enrolment Rate		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	41,221	42,220	83,442	31,036	31,483	62,519	75.3	74.6	74.9
Hill	171,913	178,228	350,139	150,445	159,848	310,293	87.5	89.7	88.6
Valley	33,901	40,032	73,935	51,688	57,878	109,566	152.5	144.6	148.2
Terai	275,793	290,319	566,113	237,351	257,636	494,987	86.1	88.7	87.4
Total	522,828	550,799	1,073,629	470,520	506,845	977,365	90.0	92.0	91.0

The Figure 2.3 below depicts the trends of total enrolment by gender during the school years 2009 to 2015. The total enrolment in 2009 was 947,278 which reached 977,365 in 2015. Thus, in this period on average it has increased by 0.5% per-annum, whereas it has decreased by 3.6% points than in the previous school year. The reason behind the decrease in enrolment is the decreasing trend of the population growth rates between the national censuses 2001-011. The figure shows the enrolment trend has steadily increased up to 2011 and a slight decline is observed since 2012, which is in line with the trends (decreasing) of age group wise population growth based on the current National population census 2011.

Figure 2.3
Trend of total number of enrolments in ECD/PPCs

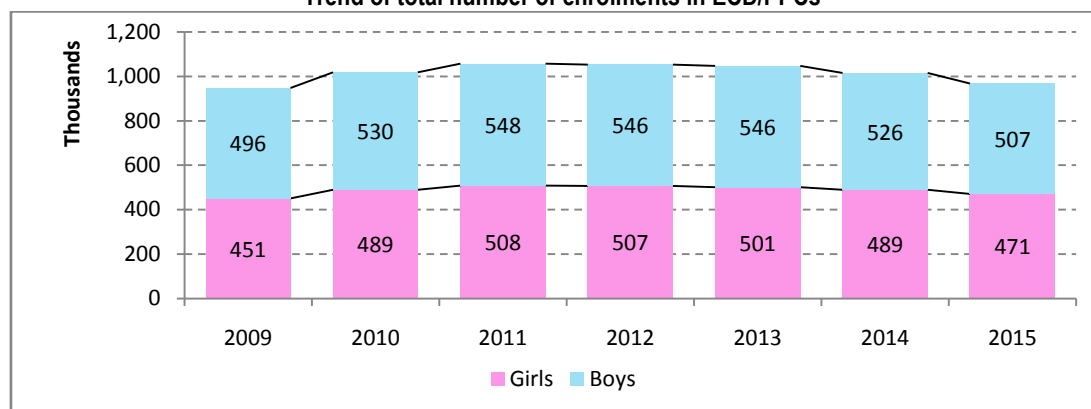

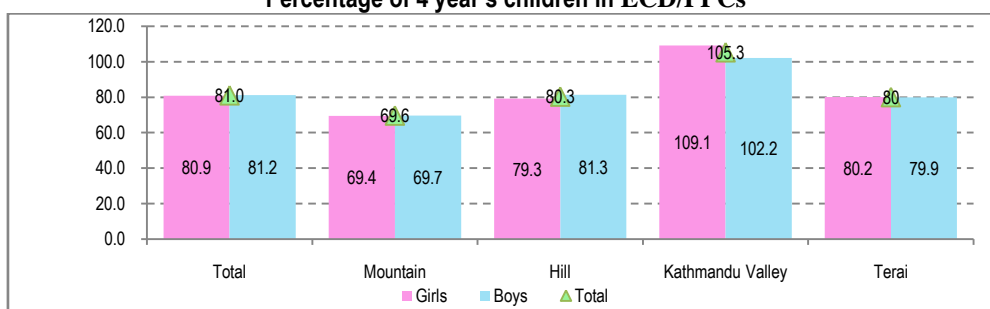

Figure 2.4 below shows the percentage of 4 year's children in ECD/PPCs by eco-belts against the population of 4 year age group. It shows that the highest enrolment rate is in the Valley (105.3%) and the lowest is in the Mountain eco-belt (69.6%). The Hill and the Terai eco-belts have 80.3% and 80.0% respectively. An analysis by district shows that there are 48 districts

with a low percentage of enrolment with regard to 4-year age children in ECD/PPCs (compared to the 81.0% national average) (See Annex: I).

Figure 2.4
Percentage of 4 year's children in ECD/PPCs

2.2 Dalit and Janajati children enrolled in ECD/PPCs

Table 2.3_A below shows that out of the total enrolment of 977,365 in 2015-016 in ECDs/PPCs 17.9% are Dalit (18.0% in the last school year) and 38.8% are Janajati (38.6% in the last school year). Among the Dalit children enrolled, 18.6% are girls and 17.2% are boys. Likewise, with regard to the Janajati 39.0% are girls and 38.7% are boys in the total enrolment. Children enrolled by types of schools shows that the share of Dalit in Institutional schools is only 9.8%, whereas it is 40.7% of the Janajati children. Likewise, this share in the community schools is 22.4% for Dalit and 37.8% for Janajati children indicates the access of Institutional schools service is depend on the socio-economic conditions of the parents. The GPI for ECD/PPC in total, Dalit and Janajati enrolment are 0.93, 1.0 and 0.94 which shows a lower level of participation of Total girls in comparison to the Dalit and Janajati girls. Hence, except for Dalit the data suggests that the gender situation need to be improved in ECD/PPCs enrolment. Figure 2.5 below presents the percentage of children in ECD/PPCs by social groups to the total children enrolled in ECD/PPCs (See Annex: I_A).

Table 2.3_A
Number of Dalit and Janajati children in ECD/PPCs

Students	Number of children in ECD/PPC			Percentage share in total children	
	Total	Dalit	Janajati	Dalit	Janajati
Girls	470,520	87,522	183,399	18.6	39.0
Boys	506,845	87,257	195,896	17.2	38.7
Total	977,365	174,779	379,295	17.9	38.8

Figure 2.5
Percentage of Dalit and Janajati in total children in ECD/PPCs

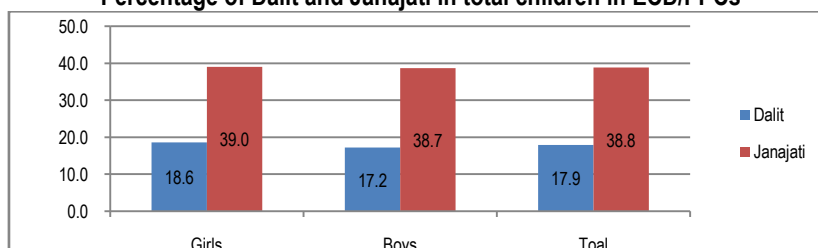

Table 2.3_B below shows the status of children with major types of disabilities in ECD/PPCs in the school year 2015-016. Of the total number of children enrolled in ECD/PPCs the total number of children by types of major disabilities is 2,034 (0.21%), which is decreased by 1.5% points than in the previous school. Of them (2,034 in total) 0.06%, 0.07%, 0.02%,

0.01%, 0.2%, 0.004% and 0.03 have a physical (disabilities on mobility of physical parts), intellectually impaired (children with psychological difficulties, intellectual limitations and autism), hearing impaired (children who are profoundly deaf and children with limited hearing and also those who use sign language for conversation), blind (visually impaired or children who are not able to see and make differences of size and color of any objects), low vision (with limited vision or children who are not able to see and read the E-chart/Vision chart from 10 yard), deaf and blind (both visually and hearing impaired children) and vocal and speech-related disability respectively in the school year 2015-016 (See Annex: I_B).

Table 2.3_B
Number of children by major types of disabilities in ECD/PPCs

Student	Major types of disabilities							Total Disabled
	Physical (affecting mobility)	Intellectually impaired	Hearing impaired	Visually impaired	Low Vision	Hearing and Visually impaired	Vocal and speech related disabilities	
Girls	269	325	118	21	69	12	153	967
Boys	293	331	122	30	87	25	179	1,067
Total	562	656	240	51	156	37	332	2,034
% in total enrolment	0.06	0.07	0.02	0.01	0.02	0.00	0.03	0.21

2.3_A Percentage of new entrants in Grade One with ECD/PPC experiences

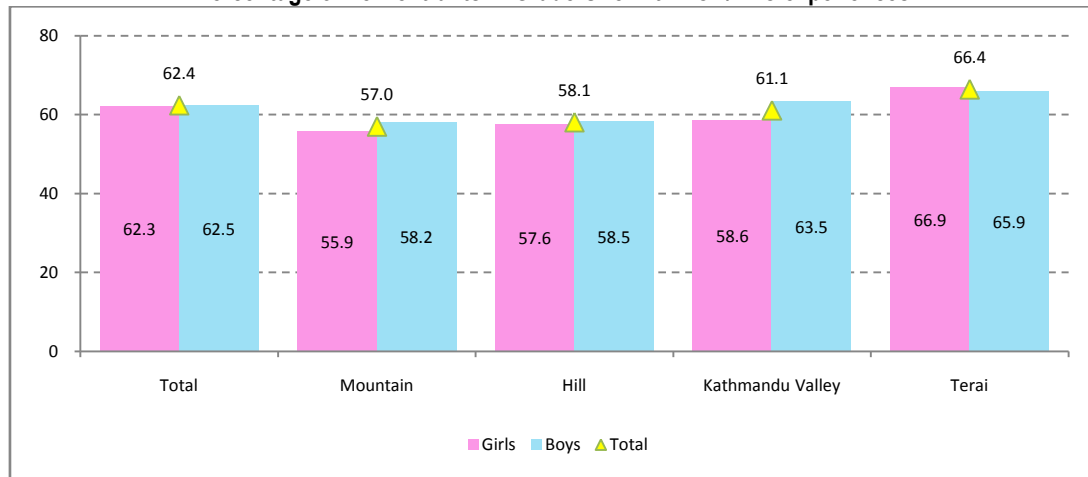

The indicator “Percentage of new entrants in Grade One with ECD/PPCs experiences” is instrumental for improving teaching learning and also it helps to improve the internal efficiency in early grades of primary education. The trend analysis of the percentage of new entrance in grade 1 with ECD/PPCs experiences against the trends of the Net Intake Rate in grade 1 and Repetition and Dropout rates in grade 1 proved that (i.e. there was a 51.1% new children with ECD/PPCs experiences with 29.5% repeaters in grade 1 in the school year 2010/011, that is 62.4% children with ECD/PPCs experiences with 13.7% repeaters in the current school year) the increasing number of children in grade 1 with the ECD/PPCs experience has a significant impact in the retention and further progression of the children in the school education. The following Table 2.4_A and figure 2.6 present the percentage of new children, with ECD/PPC experiences in Grade One, which is 62.4% (Compared to 59.6% in the last school year), higher by 2.9 percent points than the previous school year (59.6%). Among the eco-belts, the Terai eco-belt shows the highest intake (66.4%) of new children in Grade One with ECD/PPC experiences. Also, the variation in terms of the GER in ECD/PPCs and the percentage of new children in Grade One with ECD/PPC experiences, especially in the Valley eco-belt shows that the proportion of children with ECD/PPC experiences in Grade One is low compared to the GER (See Annex: II_A).

Table 2.4_A
Number and Percentage of new entrants in Grade One with ECD/PPC experiences by eco-belts

Eco-belts	New enrolment in Grade One			New enrolment in Grade One with ECD/PPC experiences			% of new students in Grade One with ECD/PPC experiences		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	38,191	36,240	74,431	21,349	21,075	42,424	55.9	58.2	57.0
Hill	143,646	147,224	290,870	82,775	86,146	168,921	57.6	58.5	58.1
Valley	25,426	25,281	50,707	14,904	16,061	30,965	58.6	63.5	61.1
Terai	221,709	216,985	438,694	148,432	143,002	291,434	66.9	65.9	66.4
Total	428,972	425,730	854,702	267,460	266,284	533,744	62.3	62.5	62.4

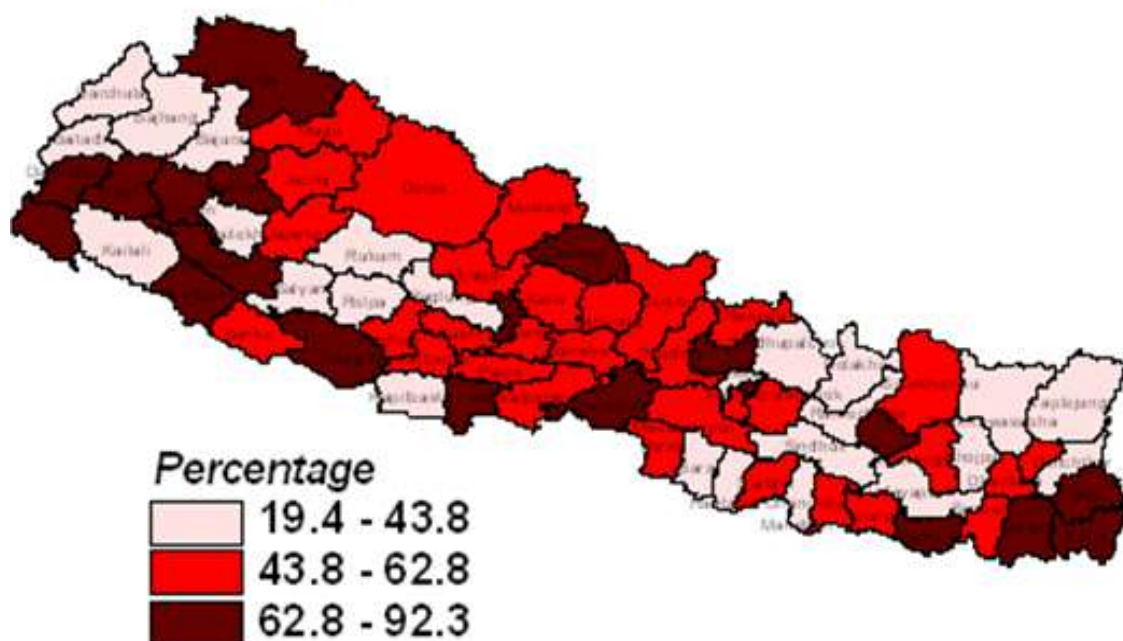

The availability of more Pre-primary classes in private institutions (e.g., Nursery, L.K.G, and U.K.G.) helps increase the GER in the Valley. It has been observed that, the increasing trend of ECD/PPC experiences in Grade One has contributed to reduce the repetition rates (i.e. from 29.4% in 2007 to 28.3% in 2008, 26.5% in 2009 and 22.6% in 2010, 21.3% in 2011, 19.9% in 2012, 17.5% in 2013, 15.2% in 2014 and 13.7% in the current school year 2015), dropout rates (i.e. from 16.1% in 2007 to 12.1% in 2008, 9.9% in 2009, 8.3% in 2010, 7.9% in 2011, 7.7% in 2012, 7.1% in 2013, 6.5% in 2014 and 4.8% in the school year 2015) and increase the retention rates for Grade One (See Table 3.24).

Figure 2.6
Percentage of new entrants in Grade One with ECD/PPC experiences

The Map 2, below, presents the overall percentage of new children in Grade One with ECD/PPC experiences by districts. Out of 75 districts, there are 43 districts (of these 5 districts: Khotang, Rukum, Bajhang and Achham show less than 50% of children are in grade 1 as the new entrants with the ECD/PPCs experiences) with low percentage (lower than the national target 62.4% for 2015 in SSRP) of new children with ECD/PPC experiences in Grade One in the school year 2015-2016.

Map:2 Percentage of new children enrolled in grade 1 with the ECD/PPCs Experiences

2.3_B Number of ECD/PPCs facilitators/teachers by sex, Dalit, Janajati, Others, qualification and percentage of training

Table 2.4_B below shows the total number of ECD/PPCs facilitators/teachers by sex, Dalit, Janajati, Others, qualifications and their percentage of training. Overall, the total number of ECD/PPCs facilitators/teachers is 47,086 with 42,441 (90.1%) females in all types of ECD/PPCs (35,991 ECD/PPCs including 5,543 PPCs of institutional schools). Of the total numbers of ECD/PPCs facilitators/teachers, the percentage shares of Dalit, Janajati and Others are 6.3%, 30.3% and 63.4% respectively. Compared to their share in the total population of the country, the percentage of Dalit facilitators is quite lower compared to the facilitators from the Janajati and others. Likewise, the status of the ECD/PPCs facilitators/teachers by their qualifications shows that almost 6.3% of facilitators/teachers are with under SLC, 56.9% are with SLC and 36.9% of the ECD/PPCs facilitators/teachers are with more than the SCL qualification. Furthermore, the table 2.4_B below shows the percentage of ECD/PPCs facilitators/teachers with their training status, where altogether 88.4% (Compared to 87.5% in the last school year) ECD/PPCs facilitators/teachers are trained and the rest are untrained in all types of ECD/PPCs (See Annex: II_B). Based on the qualifications and training status of the facilitators the districts from the Mountain and Hilly eco-belts need to focus to recruit the facilitators with a qualification of at least SLC passed.

Table 2.4_B
Number of ECD/PPCs facilitators by sex, Dalit, Janajati qualification and percentage of training

Eco-belts	ECD/PPC Facilitators by sex			ECD/PPC Facilitators by Dalit and Janajati			ECD/PPC Facilitators by qualification			Facilitators by training	
	Females	Males	Total	Dalit	Janajati	Others	< SLC	SLC	> SLC	Trained	Untrained
Mountain	3,328	435	3,763	276	1,188	2,295	305	2,136	1,322	84.0	16.1
Hill	17,314	1,739	19,053	1,244	6,285	11,523	1,779	10,609	6,665	84.3	15.7
Valley	3,803	839	4,642	154	1,258	3,231	111	2,165	2,366	95.8	4.2
Terai	17,996	1,632	19,628	1,303	5,513	12,816	751	11,865	7,012	91.5	8.5
Total	42,441	4,645	47,086	2,977	14,244	29,865	2,946	26,775	17,365	88.4	11.6

SECTION III

3.1 School education

Since the school year 2009/010, the government of Nepal has been implementing the School Sector Reform Programme (SSRP), aiming to restructure the school education system with basic education (consisting of grades 1-8, with 5-12 years) and secondary education (consisting of grades 9-12, with 13-16 years). Subsequently, in the school education system while primary and lower secondary levels are included in the basic education and secondary and higher secondary levels are included in the comprehensive secondary education of the country. Schools with primary level provide grade one to five years of education, whereas lower secondary schools provide further three years of education. Secondary schools offer two more years of education, while higher secondary schools also offer two more years of education after school leaving certificate (SLC) examinations. As described previously, early childhood development (ECD)/pre-primary classes (PPCs) are offered as building a foundation for children and preparing them for grade one. The prescribed population age groups for different levels of school education are 5-9 years for primary, 10-12 years for lower secondary, 13-14 years for secondary and 15-16 years for higher secondary education programme.

The majority of schools in the country include primary level (grades 1-5), i.e. most of the lower secondary, secondary and higher secondary schools include primary level. Very few of them offer only grades 6-8 (lower secondary level) or only grades 9-10 (secondary level). At the higher secondary level it is more common that some schools offer only grades 11-12.

Broadly, schools are categorized into two types: Community schools and institutional schools. Further, community schools are of three types: (i) community-aided (schools, which are fully supported by the government for teachers' salary and other expenses), (ii) community-managed (schools, which are fully supported by the government for teachers salary and other funds but their management responsibility lies with the community) and (iii) community-unaided (schools, which are either getting partial support or no support from the government). Besides, there are institutional schools, which are supported by founders, parents and trustees.

In addition to these broad categories, there are some schools running as religious schools such as Madarasa, Gumba/Vihar and Ashram/Gurukul that have received support from the government when they have been mainstreamed into the formal education system by registering with the DEO, following the Education Act and Regulation.

3.2 Basic Education

As the School Sector Reform Programme (2009-015) has institutionalized the education sector structure with basic (grades 1-8) level and secondary (grades 9-12) level, the information in the following sections reflects this new education structure. More particularly, this section presents the status of basic education in terms of schools, students, teachers and other indicators.

3.2.1 Number of Schools

The Table 3.1 and the figures 3.1 and 3.2 below present the total number of primary and lower secondary schools by units, levels and their percentage in total registered at DEOs

database throughout the country in the school year 2015-2016. Of the total 34,837 (compared to 34,806 in the last school year) schools, 34,362 are primary levels, 15,091 are lower secondary and 34,537 are basic levels of schools. It shows that, of the total 34,806 schools in the last school year in total 148 schools (especially in the Terai eco-belt) were closed and merged in the last school year and 181 new schools were opened in the current school year, so that the number of schools has changed in the current school year 2015-016. Compared to the last school year the lower secondary level has increased by 0.9% (138 levels) in the current school year. It indicates that of the total primary schools in the last school year, 138 primary schools were upgraded into lower secondary level. The ratio of primary level to the lower secondary level is 1:2, which suggests that 1 lower secondary level can serve 2 primary schools children for the lower secondary education. The distribution of schools' in unit by eco-belts shows that there are 4,222 schools in the Mountain, 17,571 are in the Hill, 2,200 are in the Valley and 10,844 are in the Terai eco-belt (See Annex: III_A).

Among the eco-belts, the highest number of schools is in the Hill and the lowest number is in the Valley eco-belts. Likewise, there are 34,537 basic level schools with Grades 1-8 in the country, with 4,215 levels in the Mountain, 17,519 levels in the Hill, 2,078 levels in the Valley and 10,725 levels in the Terai belt.

Table 3.1
Number of schools by eco-belts (in units and levels)

Eco-belts	Total School (Units)	Primary level (Grades 1-5)	Lower secondary level (Grades 6-8)	Basic level (Grades 1-8)
Mountain	4,222	4,184	1,613	4,215
Hill	17,571	17,432	6,911	17,519
Valley	2,200	2,064	1,686	2,078
Terai	10,844	10,682	4,881	10,725
Total	34,837	34,362	15,091	34,537

Figure 3.1
Number of schools by eco-belts (in levels)

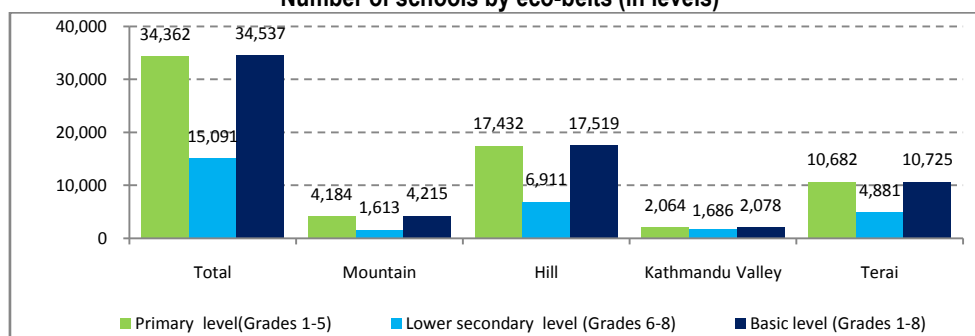

Figure 3.2
Percentage distribution of schools by eco-belts and levels in total levels

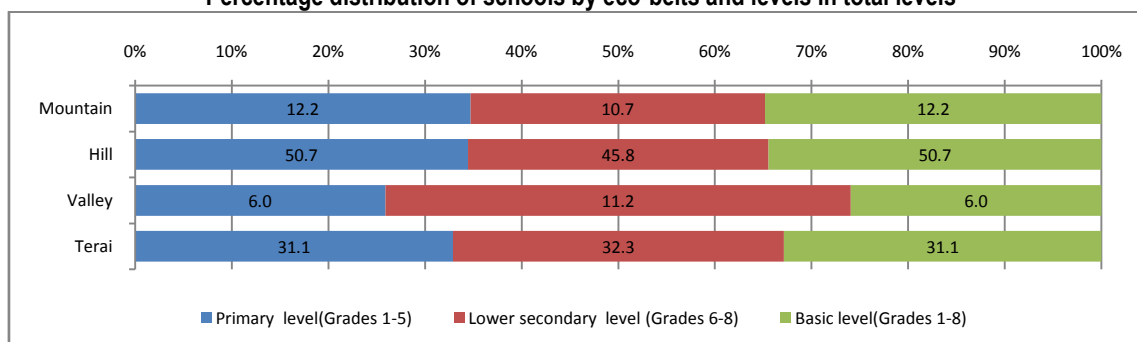

Table 3.2 below shows the distribution of schools running by grades in the school year 2015-016. Out of the total 25,574 schools in unit at the basic level (grades 1-8), the majority of schools (12,329 schools) are running with grades 1-5 (primary level). At the primary level, there are small schools with only grade(s) 1, 1-2 and 1-4, which will eventually upgrade in the successive year/s with the consent and approval of DEOs. At the lower secondary level, the majority of schools are running with grades 1-8; however, there is a significant number of schools with grades 1-7 and less number of schools with the running grades of 6-7 and 6-8 (Annex: III_A).

Table 3.2
Number of schools by units (running by grades)

Grade	Number of schools (in Unit)
1	396
1-2	624
1-3	4,685
1-4	1,412
1-5	12,329
1-6	511
1-7	781
1-8	4,820
6-7	7
6-8	9
Total	25,574

Table 3.3 and figure 3.3 below explain the number of school levels, excluding the religious schools by types and levels in the school year 2015-016. At primary level, out of the total 33,450 school levels, 27,950 are community schools and 5,500 are institutional schools. Similarly, at lower secondary level, out of the total 15,033 school levels, 11,187 are community schools and 3,846 are institutional schools. Likewise, among 33,607 basic school levels 28,082 are community and 5,525 are institutional schools (See Annex: III_A-C).

Table 3.3
Number of schools by levels and types (Excluding religious schools)

Levels and Types of Schools	Community (in levels)	Institutional (in levels)	Total (in levels)
Primary (1-5) level	27,950	5,500	33,450
Lower Secondary (6-8) level	11,187	3,846	15,033
Basic (1-8) level	28,082	5,525	33,607

Figure 3.3
Distribution of schools by level

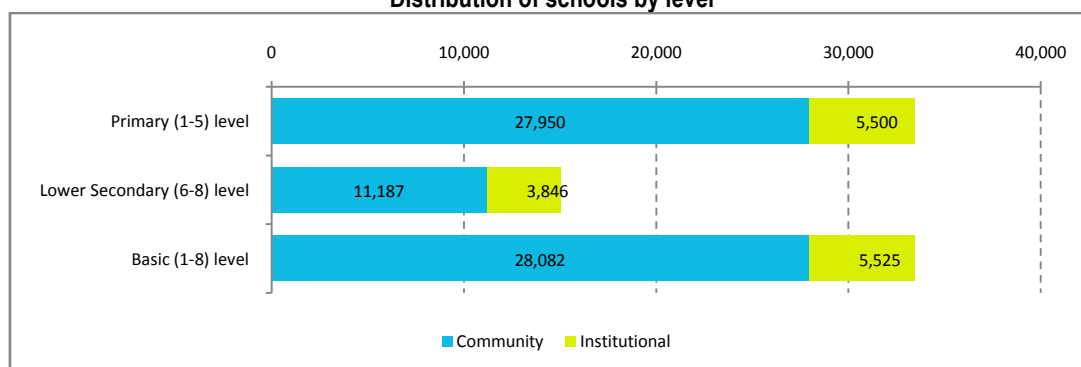

Table 3.4 below shows the number of religious primary, lower secondary and basic schools by types, units and levels. Out of the total 930 (Compared to 895 in the last school year) reported religious schools in the Flash I, 2015 school census, 912 primary levels, 58 lower secondary levels, and 930 basic education levels were reported. The Madarasa schools are mainly located in Terai, mostly the Gumba schools are located in Hill and Mountain, and the Ashram/Gurukul school are located in the Hill and Terai eco-belts (See Annex: IV_A-C).

Table 3.4
Distribution of religious schools by unit and levels

Religious Schools	Total number of schools (in Unit)	Number of school by level		
		Primary	Lower Secondary	Basic
Madarasa	765	764	27	765
Gumba/Vihar	82	80	8	82
Ashram/Gurukul	83	68	23	83
Total	930	912	58	930

Table 3.5 and figure 3.4 below show the School Student Ratio (SSR)² by levels and eco-belts at primary, lower secondary and basic levels. This indicator presents the extent of schools' capacity to accommodate the students. The national average of School Student Ratio at primary level is 1:123 (Compared to 1:126 in the last school year). That is, on average, a primary level school is serving 123 children. Similarly, the School Student Ratio at lower secondary level is 1:123 (Similar to 1:123 in the last school year) and at basic education level it is 1:176 (Compared to 1:179 in the last school year) (See Annex: V).

Though for the planning point of view this indicator will help to know the average capacity of existing schools to accommodate the students for teaching learning activities, it also equally important to know the actual status of School Student Ratio at the school level. Based on the school level database in the school year 2015-016 in total there are 6,803 primary levels with less than 45 students and 2,031 lower secondary levels with less than 45 students (especially districts from the Mountain and Hilly eco-belts). This suggests that in the future the DEOs need to have a detail analysis on needs of schools as such unit or level at the VDC or community level.

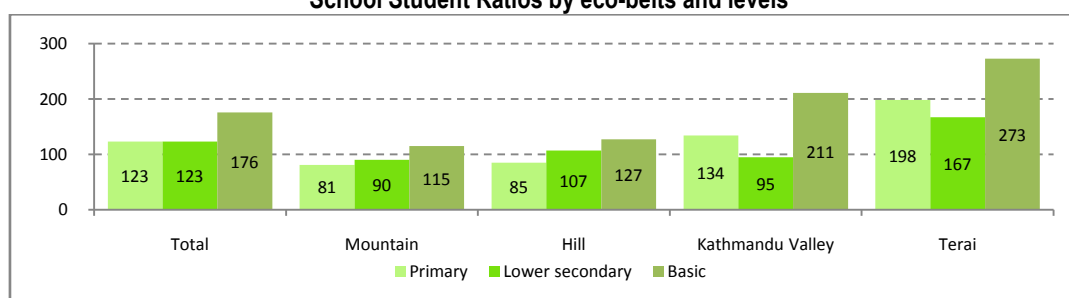

Table 3.5
School Student Ratios by eco-belts and levels

Eco-belts	Primary	Lower secondary	Basic
Mountain	81	90	115
Hill	85	107	127
Valley	134	95	211
Terai	198	167	273
Total	123	123	176

The highest School Student Ratios are found in the Terai at all levels. It is the only eco-belt which has higher rates than the national average at all levels. The lowest School Student Ratio is found in Mountain and Hill at the primary level and at the lower secondary level the Mountain and Valley eco-belts have the lowest School Student Ratios (See Annex: V).

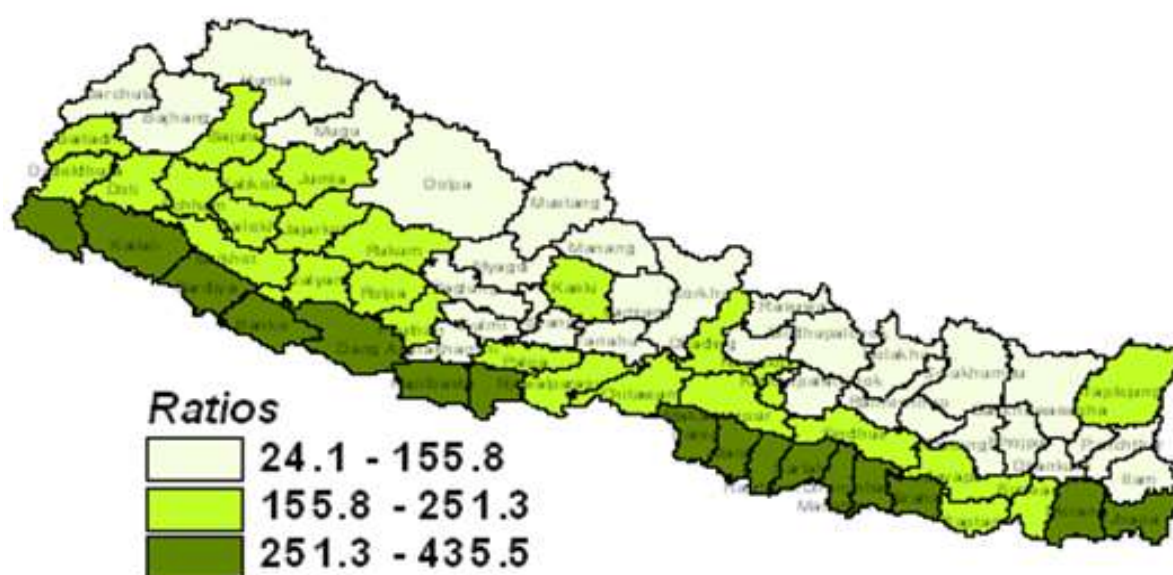

² This indicator is calculated by taking the total number of schools by level and the total number of students in the respective school level in a specific school year.

Figure 3.4
School Student Ratios by eco-belts and levels

The Map: 3 below presents the School Student Ratio at basic level in the school year 2012 (2015/016) by districts. All together, there are 26 districts at primary level and 27 districts at basic level with a high School Student Ratio (more than the national average). These districts are mostly in the Terai and some of them are in the Hill eco-belt.

Map:3 Basic level School Student Ratio

3.2.2 Enrolment

This section deals with enrolments at basic level with the disaggregated information of primary, lower secondary and basic levels and also by types of schools and other related indicators in the school year 2015-016.

(1) Total number of enrolments at primary, lower secondary and basic levels

Table 3.6 and figure 3.5 below show the trends of total enrolment at the primary, lower secondary and basic levels since the school year 2010. The overall enrolment at primary level in the school year 2015 is 4.26 million, which is less than 4.95 million in the school year 2010. The average annual growth rate in enrolment at primary level is -2.9% points in this period. However, the enrolment at the lower secondary level reached 1.86 million in the school year 2015 from 1.67 million in the school year 2010. Compared to the last school year this has increased by 1.5% in the school year 2015-016. At the lower secondary level the average annual growth rate in enrolment is 1.8% points in this period. Likewise, the average

annual growth rate for basic level in this period is -1.6%. It is worth noting that the average annual growth rates of girls are higher than the average annual growth rates of boys at both primary and lower secondary levels.

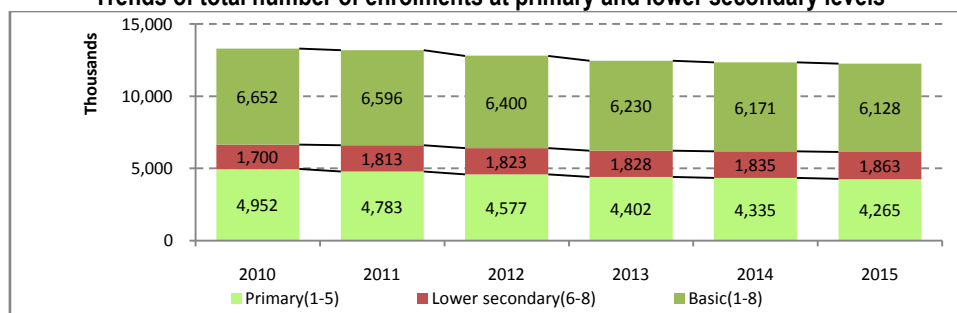

At the primary level, on average 1.6% (70,413 students) student has decreased in the current school year compared to the previous school year, which is slightly higher than the last school years trends of the students. The district level analysis shows that there are 61 districts, which reported a decreased enrolment at the primary level. Out of the remaining 14 districts, 12 districts (Bhaktapur, Bardiya, Chitwan, Dang, Humla, Jajarkot, Kailali, Kapilbastu, Kathmandu, Kavrepalanchok and Lalitpur) reported an increased enrolment by more than 1.0% at the same level. Similarly, there are 45 districts with an increment of enrolment at the lower secondary level, of this there are 9 districts with more than 5% increment of enrolment at this level. The increase in enrolment at the lower secondary level indicates a high transition from primary to lower secondary level. Likewise, there are 16 districts with more than 1% of decrease in enrolment at the lower secondary level. At the basic level, the trend of enrolment has observed similar pattern as in the primary and lower secondary level. Specifically, the decrease in student enrolment has observed in the earthquake affected districts, whereas the districts in the Valley, Kavrepalanchok and Chitwan districts have an experience of hubs of out-migration of those earthquake districts where the student enrolment at all level has increased than in the previous school year.

Overall, the reasons behind the decreasing in student enrolment than in the previous years' trends (especially at the primary level) are the: decreasing trend of population growth rates in the school age group population, the impacts of the devastated earth quakes ((i.e. with a 7.8 magnitude on 25 April 2015 and with a 7.3 magnitudes struck on 12th. May 2015) and also the series of aftershocks in the heavily affected districts.

Table 3.6
Trends of total number of enrolments at primary, lower secondary and basic levels

Level	2010	2011	2012	2013	2014	2015	Average annual growth rate
Primary(1-5)	4,951,956	4,782,885	4,576,693	4,401,780	4,335,355	4,264,942	-2.9
Lower secondary(6-8)	1,699,927	1,812,680	1,823,192	1,828,351	1,835,313	1,862,873	1.8
Basic(1-8)	6,651,883	6,595,565	6,399,885	6,230,131	6,170,668	6,127,815	-1.6

Figure 3.5
Trends of total number of enrolments at primary and lower secondary levels

As stated earlier with proper use of electronic based School Level IEMIS in all schools of the 63 districts, regular follow up and monitoring of the Flash Reporting System at school, RC and district level by the respective person and institution (i.e. Resource Person, School Supervisor, District Education Officer, REDs and DOE) and also well managed Flash data entry Software with necessary validation rules, the quality of data (with more consistency and accuracy) has improved. In addition, regarding the quality of data, as the DOE is succeed to

establish the “School Level IEMIS” with a viewpoint of improving the “School Record Keeping System” at the school level, among the 75 districts currently using this mechanism there are 63 districts that have submitted their Flash I& II data by using the new mechanism and this Flash I Report 2015-016 is prepared based on the data of new mechanism for these 63 districts.

Table 3.7 below shows the number and share of girls in total enrolment by levels in the school year 2015-16. Overall, the shares of girls at all levels have almost remained same in the current school year, which are 50.8% at the primary level, 50.7% at the lower secondary level and 50.8% at the basic level. The data shows that the share of enrollment by gender at all levels are the compatible with their share of population.

Table 3.7
Total number of enrolments at primary, lower secondary and basic levels by sex in 2015-016

Level	Girls	Boys	Total	% of girls' enrolment
Primary(1-5)	2,165,386	2,099,556	4,264,942	50.8
Lower secondary(6-8)	944,816	918,057	1,862,873	50.7
Basic(1-8)	3,110,202	3,017,613	6,127,815	50.8

Table 3.8 and figure 3.6 below show the grade-wise composition of enrolment at primary, lower secondary and basic levels. The grade-wise enrolment at the primary level shows that the trend of the highest share of Grade One in total enrolment is continuing. However, the grade-wise composition of enrolment shows a positive signs, indicating that the difference of shares within the primary level’s grades is narrowing down (i.e. 24.7% in Grade One and 17.6% in Grade Five in the current school year compared to 33.8% in Grade One and 14.4% in Grade Five in 2004-05). The continuous progress on grade-wise higher promotion, and lower repetition and drop-out rates seems to contribute to narrow the gaps in the share of enrolment among all grades of primary level.

Table: 3.8
Grade-wise composition of enrolment at the basic level

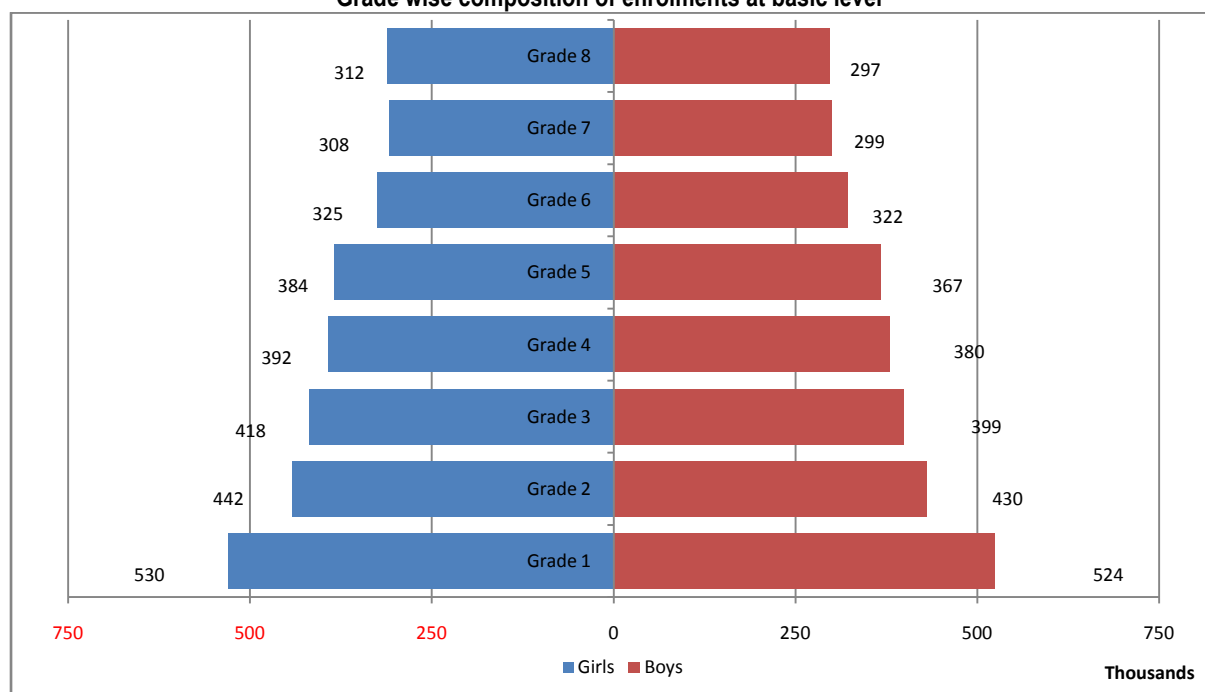

Grade	Girls	Boys	Total	Share of girls by grades and levels	Grade-wise share in total enrolment by levels	Grade-wise share in total enrolment of basic education
Grade 1	530,176	523,648	1,053,824	50.3	24.7	17.2
Grade 2	441,675	430,137	871,812	50.7	20.4	14.2
Grade 3	417,718	399,481	817,199	51.1	19.2	13.3
Grade 4	392,095	379,661	771,756	50.8	18.1	12.6
Grade 5	383,722	366,629	750,351	51.1	17.6	12.2
Grades 1-5	2,165,386	2,099,556	4,264,942	50.8	100.0	69.6
Grade 6	324,766	321,774	646,540	50.2	34.7	10.6
Grade 7	308,237	299,326	607,563	50.7	32.6	9.9
Grade 8	311,813	296,957	608,770	51.2	32.7	9.9
Grades 6-8	944,816	918,057	1,862,873	50.7	100.0	30.4
Total (G. 1-8)	3,110,202	3,017,613	6,127,815	50.8		100.0

Out of total enrolment at basic level (Grades 1-8) 17.2% of students are in Grade One and 14.2% in Grade Two. Likewise, 12.2% and 9.9% of students are in Grades Five and Eight respectively. The grade-wise composition at the basic level shows that almost 31% (compared to 32% in the last school year) of the total numbers of students are in Grades One and Two. From a gender perspective, the composition of grade-wise enrolments is fairly

balanced and the data shows that gender parity has been achieved in all grades at the basic level (See Annex: VI & XXX).

However, it is the challenges to improve the progression rates so that all children admitted in Grade One will retain and progress through the grades efficiently and complete the basic education with the quality expected learning outcomes as stated in the basic level curriculum and also achieve universal basic education (UBE) within the specified/stipulated time period.

Figure 3.6
Grade wise composition of enrolments at basic level

The table 3.9, 3.10, 3.11 and the figure 3.7 below show the number of students, their shares by types of schools and the percentage of girls, boys and GPI by types of schools. It reveals that 84.7% (Compared to 84.6% in the last school year) of total primary level children are in community schools and the remaining 15.3% are in institutional schools. Unlike the overall situation of gender, the proportion of girls' enrolment at primary level in institutional schools is lower (13.2%) as compared to the proportion of boys (17.6%), demonstrating unequal treatment between boys and girls.

For all types of community schools the situation is contrary; at all levels girls have a higher enrolment rate than boys. Compared to the previous school year the enrolment share of institutional schools in total enrolment has remained almost same in the current school year at all levels.

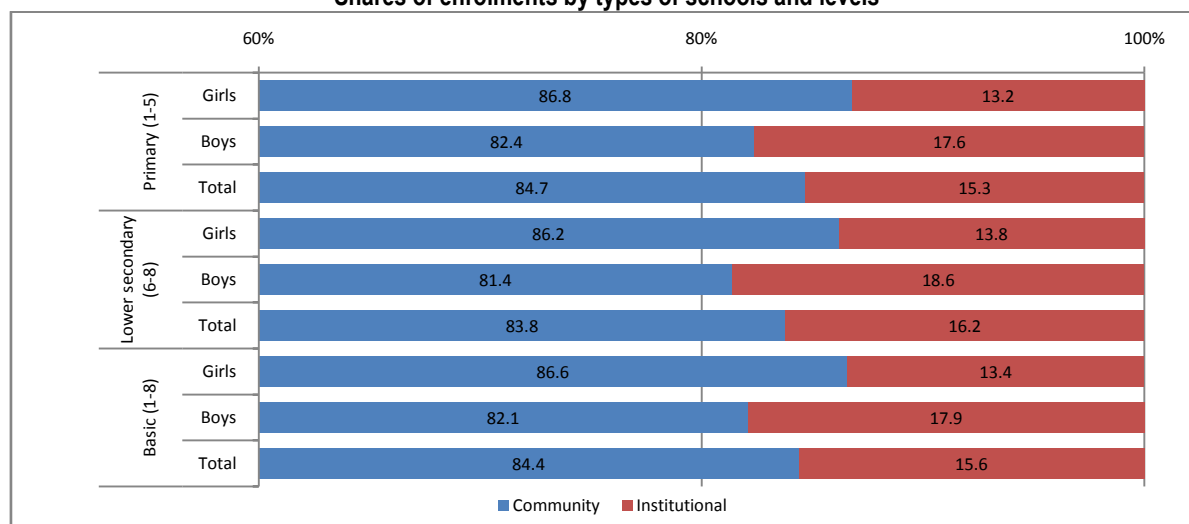

Table 3.9
Number of students' enrolment by types of schools and levels

Types of schools	Primary (1-5)			Lower secondary (6-8)			Basic (1-8)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
All types of Community	1,880,596	1,730,830	3,611,426	814,044	747,572	1,561,616	2,694,640	2,478,402	5,173,042
Institutional	284,790	368,726	653,516	130,772	170,485	301,257	415,562	539,211	954,773
Total	2,165,386	2,099,556	4,264,942	944,816	918,057	1,862,873	3,110,202	3,017,613	6,127,815

Table 3.10
Shares of enrolments by types of schools and levels

Types of schools	Primary (1-5)			Lower secondary (6-8)			Basic (1-8)		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
All types of Community	86.8	82.4	84.7	86.2	81.4	83.8	86.6	82.1	84.4
Institutional	13.2	17.6	15.3	13.8	18.6	16.2	13.4	17.9	15.6

Figure 3.7
Shares of enrolments by types of schools and levels

Interestingly, at all levels, the shares of girls are considerably low in institutional schools compared to the shares of enrolment in community schools in the current school year. The percentage of girls in institutional schools is 43.6% at the primary level, 43.4% at the lower secondary level and 43.5% at the basic level. On contrary to this, both the percentage of girls and the GPI are higher in all types of community schools, which reveal the different attitude of parents on choice of school education for girls and boys (See Annex: VII, VIII & XXXIII & XXXIV). It points out that if parents have to make a choice for the education of their children in a private school; their first preference seems for son than to daughter.

Table 3.11
Percentage of Girls and Boys in total enrolments by types of schools and levels

Types of schools	Primary (1-5)			Lower secondary (6-8)			Basic (1-8)		
	Girls	Boys	GPI	Girls	Boys	GPI	Girls	Boys	GPI
All types of Community	52.1	47.9	1.09	52.1	47.9	1.09	52.1	47.9	1.09
Institutional	43.6	56.4	0.77	43.4	56.6	0.77	43.5	56.5	0.77
Total	50.8	49.2	1.03	50.7	49.3	1.03	50.8	49.2	1.03

(2) Dalit and Janajati enrolments at primary, lower secondary and basic levels

Tables 3.12 and 3.13 together with figure 3.8 below show the enrolment of Dalit and Janajati students at primary, lower secondary and basic levels. At the primary level the enrolment share of Dalit is 19.7%, whereas the shares at lower secondary and basic levels are 14.4% and 18.1% respectively. When compared to the last year's status of Dalit student shares in total student, as mentioned in the analysis of the total student enrolment there is a slight decrease in Dalit enrolment at all levels of basic education (See Annex: IX & XXXI). Similarly, table 3.13 also depicts the shares of Janajati students in total students by levels. Compared to the share of Janajati enrolment in the previous school year, the share of enrolment in the total

students enrolment at primary level has remained almost same in the current school year; similarly, there has been a slight increase at lower secondary level (from 38.5% to 38.6%). The share at basic level is 35.7% (Compared to 35.2% in the last school year) (See Annex: X & XXXII). The shares of enrolment by social groups in total enrolment illustrate a gradual improvement in the accuracy of reporting for the last three school years.

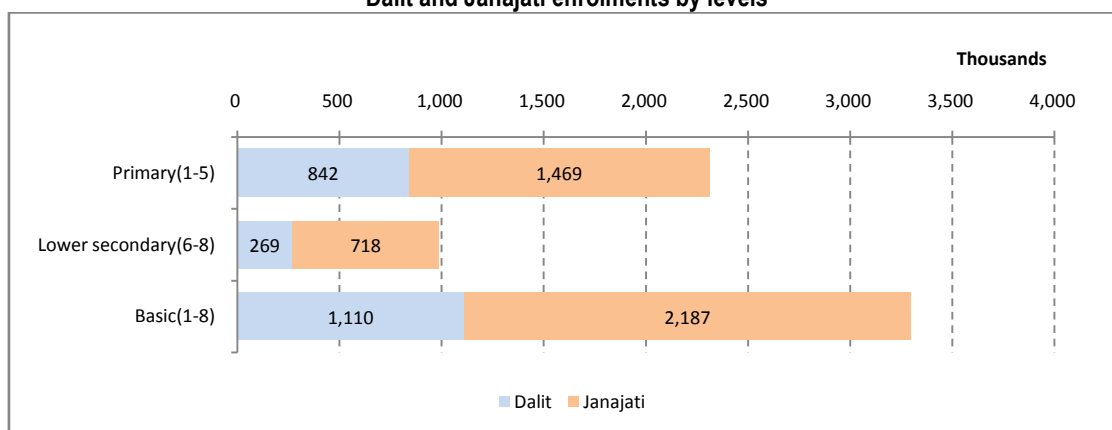

Table 3.12
Dalit enrolments at primary, lower secondary and basic levels

Level	Girls	Boys	Total	% of enrolment in total
Primary(1-5)	430,263	411,283	841,546	19.7
Lower secondary(6-8)	138,015	130,878	268,893	14.4
Basic(1-8)	568,278	542,161	1,110,439	18.1

Table 3.13
Janajati enrolments at primary, lower secondary and basic levels

Level	Girls	Boys	Total	% of enrolment in total
Primary(1-5)	743,219	725,638	1,468,857	34.4
Lower secondary(6-8)	375,348	343,151	718,499	38.6
Basic(1-8)	1,118,567	1,068,789	2,187,356	35.7

Figure 3.8
Dalit and Janajati enrolments by levels

(3) Percentage of girls and boys and gender parity indexes in enrolment at primary, lower secondary and basic levels by social groups.

The Gender Parity Index (GPI) explains the ratio of female to male values (or male to female in certain cases) of a given indicator. A GPI of 1 indicates parity between sexes; a GPI above or below 1 indicates a disparity in favor of one sex over the other. For gender parity to exist, the GPI value should be within the range of 0.97 and 1.03.

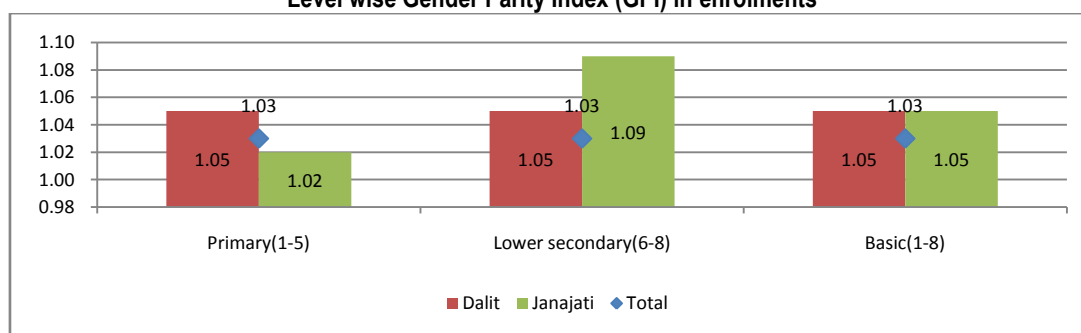

The following table 3.14 and figure 3.9 explain the percentage of girls and boys in total enrolment and measure progress towards gender equity in enrolment in the basic education by total, Dalit and Janajati categories and level based on the school census 2015-016. The shares of enrolment in total, Dalit and Janajati girls are 50.8%, 51.1% and 50.6% at primary level, whereas the shares of girls at lower secondary level are 50.7%, 51.3% and 52.2% , and 50.8%, 51.2 % and 51.1% at the basic level. It clearly demonstrates that the gender parity has been achieved in basic education, including primary and lower secondary education (1.03 at primary level, 1.03 at lower secondary level and 1.03 at basic level). It explains the GPI in

enrolment at all levels and social categories has been achieved. The GPI for Dalit students has remained same at 1.05 in the school year 2015 at all level of basic education. Similarly, an identical positive trend is noted for Janajati students as well (1.02 at primary and 1.09 at lower secondary level in the both school year 2014 and 2015). Likewise, the GPI for basic level in Janajati enrolment has reached to 1.05 in the school year 2015.

Table 3.14
Percentages of students by sex and Gender Parity Index (GPI)

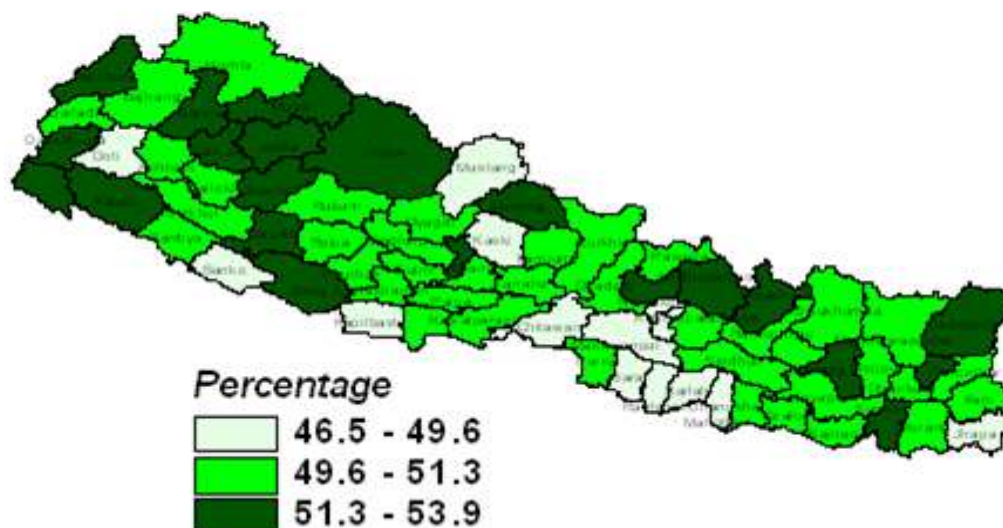

Level	Total			Dalit			Janajati		
	Girls	Boys	GPI	Girls	Boys	GPI	Girls	Boys	GPI
Primary(1-5)	50.8	49.2	1.03	51.1	48.9	1.05	50.6	49.4	1.02
Lower secondary(6-8)	50.7	49.3	1.03	51.3	48.7	1.05	52.2	47.8	1.09
Basic(1-8)	50.8	49.2	1.03	51.2	48.8	1.05	51.1	48.9	1.05

Figure 3.9
Level wise Gender Parity Index (GPI) in enrolments

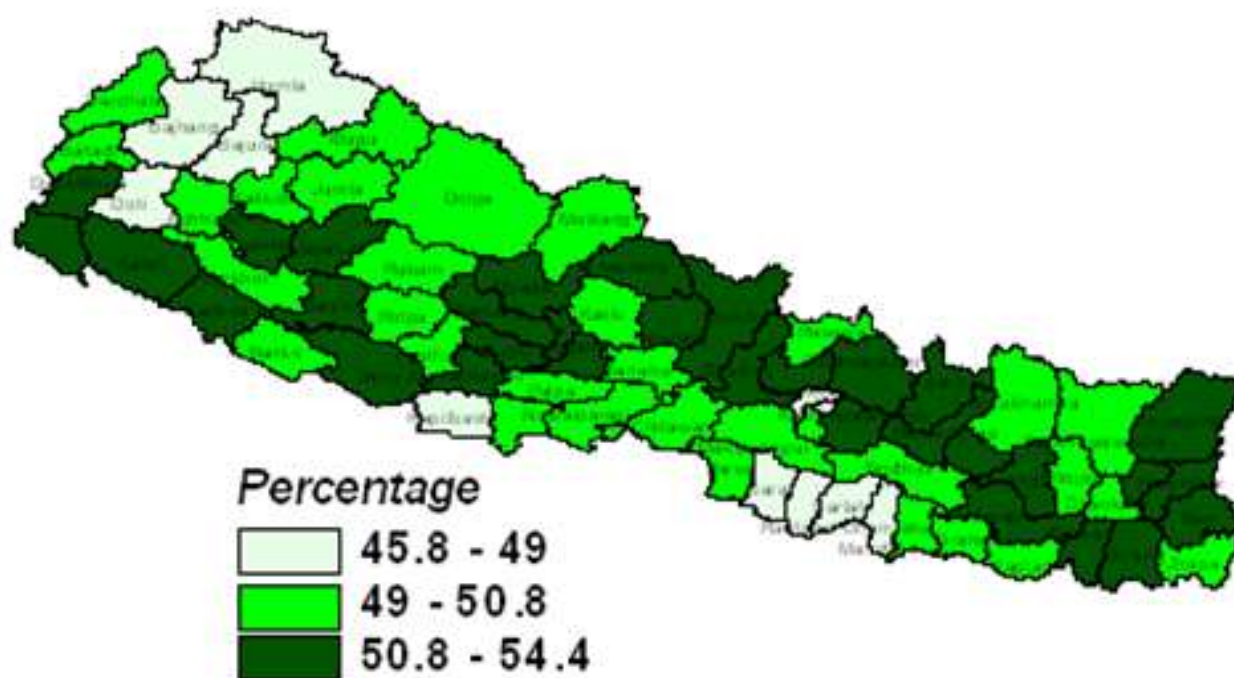

The following Maps 4 and 5 present the status of girls' percentage at primary and basic levels in total enrolments in the school year 2015-2016. At the primary level, there are 38 districts with girls' percentage below the national average (50.8%). Similarly, at the basic level, there are 36 districts with girls' percentage less than the national average (50.8%). Out of 75 districts, there are 13 districts: namely Arghakhanchi, Banke, Bhaktapur, Chitwan, Gulmi, Kapilbastu, Kaski, Kathmandu, Lalitpur, Makwanpur, Rautahat, Rupandehi and Sankhuwasabha with less than 50.0% of girls at the basic level.

Map: 4 Percentage of girls at primary level in total enrolment

Map: 5 Percentage of girls at basic level in total enrolment

(4) Enrolment at primary, lower secondary and basic levels by disadvantaged Janajati

Tables 3.15 and 3.16 below present the status of Janajati students from extremely deprived groups at primary and lower secondary levels in the school year 2015-016. Based on the category of 59 Janajati groups into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of 22 ethnic groups, who are classified as extremely-deprived groups (See Annex: XI_A-B & XXXV_A-B).

In total, from these 22 ethnic groups, there are 94,383 (Compared to the last school year 96,333 children) children at the primary level, 31,885 (Compared to the last school year 31,627 children) children at the lower secondary level and 126,268 children at the basic level registered at schools in the current school year 2015-2016. The 94,383 children at primary level and 31,885 at lower secondary level constitute 2.2% and 1.7% of the total enrolment at both levels.

Interestingly, the share of girls (51.6%) is higher than the share of boys in their total primary education enrolment. Even in the lower secondary education the share of girls (53.5%) is higher compared to the share of boys. The tables 3.15 and 3.16 below demonstrate that there are 6 ethnic groups at primary level and 7 ethnic groups at lower secondary level with less than 200 children, ranging between minimum 34 (Surel) and maximum 164 (Kusunda) at primary level and minimum 5 (Bankaria) and maximum 144 (Thunam) at lower secondary level. The total children of these 6 and 8 ethnic groups account for 681 at primary and 284 at lower secondary levels, necessitating a particular policy attention. While retention of all children enrolled in Grade One with a view to ensuring universal basic education (UBE) is vital, it is imperative to acknowledge the need to look at the profile of these children who are at risk of failing to complete basic education and identify strategies for preventing their dropout.

Table 3.15
Number of enrolment by extremely disadvantaged Janajati at primary level

Janajati Casts	Girls	Boys	Total	% in total enrolment	Janajati Casts	Girls	Boys	Total	% in total enrolment

Total of 22 Janajati						17,056	14,829	31,885	1.7

(5) Enrolment by major types of disabilities at primary, lower secondary and basic levels

Table 3.17 below shows the status of children with major types of disabilities at primary, lower secondary and basic levels in the school year 2015-016. The overall enrolment percentages of children by types of major disabilities in total enrolment at primary, lower secondary and basic levels are 1.1%, 0.9% and 1.0% respectively. Of them (46,739 in total) at primary level, 0.34%, 0.29%, 0.17%, 0.02%, 0.1%, 0.02% and 0.15 have a physical (disabilities on mobility of physical parts), intellectually impaired (includes children with psychological difficulties, intellectual limitations and autism), hearing impaired (children are profoundly deaf and children with limited hearing and also use sign language for conversation), blind (visually impaired or children who are not able to see and make differences between size and color of any objects), low vision (with limited vision or children who are not able to see and read the E-chart/Vision chart from 10 yard), deaf and blind (both

the visually and hearing impaired children) and vocal and speech-related disability respectively.

In the same way, out of the total 16,661 students with a disability at lower secondary level, 0.36%, 0.15%, 0.13, 0.02% 0.14%, 0.02% and 0.08% has a physical, mental, deaf, blind, low vision, deaf and blind, and vocal and speech-related disability respectively. Similarly, out of the total 63,400 students at basic level with a disability, 0.35%, 0.25%, 0.15%, 0.02%, 0.11%, 0.02 and 0.13% have a physical, mental, deaf, blind, low vision, deaf and blind, and vocal and speech-related disability respectively (See Annex: XII_A & XII_B).

Table 3.17_A
Total number of students by major types of disabilities at primary, lower secondary and basic level

Level		Major types of disabilities							
		Physical (affecting mobility)	Intellectually impaired	Hearing impaired	Visually impaired	Low Vision	Hearing and Visually impaired	Vocal and speech related disabilities	Total Disabled
Primary	Girls	6,892	5,979	3,435	460	2,097	467	2,936	22,266
	Boys	7,764	6,516	3,649	454	2,117	501	3,472	24,473

	Total	21,339	15,310	9,468	1,289	6,740	1,268	7,986	63,400
	% in total enrolment	0.35	0.25	0.15	0.02	0.11	0.02	0.13	1.03

The table 3.17_B below shows the total number of students enrolled in the Flexible schooling programme (FSP) in the school year 2015/016. Focusing on the school age children those who are out-of- schools, the DOE has designed and implemented the FSP to provide them educational opportunities in accordance with their flexible time. The DOE has also established a support scheme to provide learning facilities and facilitators as well. Of the total enrolment (Table 3.8) at primary level altogether 12,428 students with 3,040 Dalit and 4,482 Janajati students enrolled in 235 Flexible Schooling programme in the school year 2015/016 (See Annex: XII_C). Of the total the share of girls are 51.5%, 51.3 and 52.3 for total, Dalit and Janajati children enrolled in Flexible schooling programme in the school year 2015-016.

Table 3.17_B
Total, Dalit and Janajati number of students in Flexible Schooling Programme (FSP)

Eco-belts	Total			Dalit			Janajati		
	Girls	Boys	Total	Girls	Boys	Total	Girls	Boys	Total
Mountain	725	718	1,443	129	128	257	229	239	468

Valley	419	327	746	47	36	83	275	233	508
Terai	1,257	1,238	2,495	329	372	701	325	311	636
Total	6,406	6,022	12,428	1,559	1,481	3,040	2,343	2,139	4,482

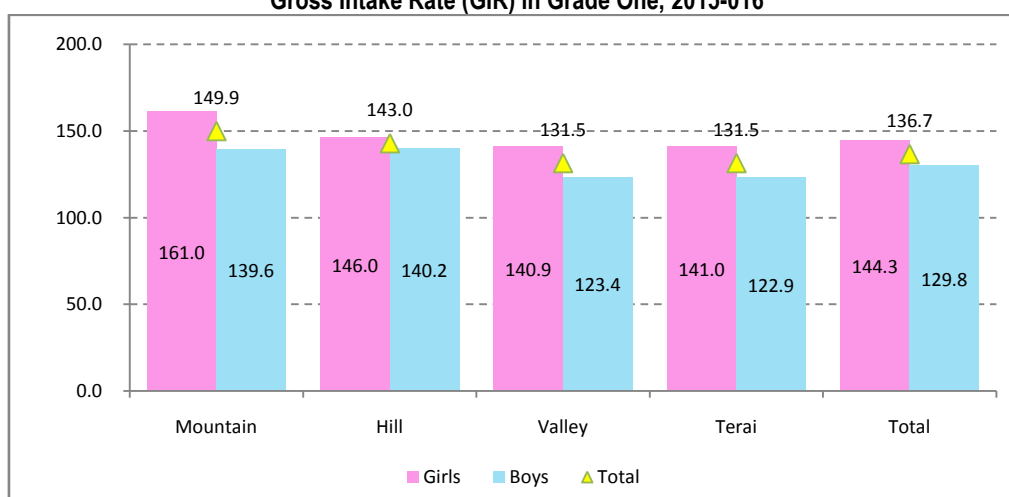

(6) Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One

The Gross Intake Rate (GIR) is an indicator relating to the new enrolment in the first grade at primary level. It explains the total number of new entrants in Grade One, regardless of age, expressed as a percentage of the population of five year age children (the official primary school-entrance age). It indicates the capacity of the education system to accommodate the new enrolled children in Grade One. Likewise, NIR is an indicator related to new entrants in Grade One who are five years of age, expressed as a percentage of the population of the same age. It shows the level of access to and admission in primary education of the eligible population of primary school-entrance age.

Table 3.18
Gross Intake Rate (GIR) in Grade One, 2015-016

Eco-belts	Girls	Boys	Total
Mountain	161.0	139.6	149.9
Hill	146.0	140.2	143.0
Valley	140.9	123.4	131.5
Terai	141.0	122.9	131.5
Total	144.3	129.8	136.7

Figure 3.10
Gross Intake Rate (GIR) in Grade One, 2015-016

The tables 3.18 and figure 3.10 above show the GIR in Grade One in the school year 2015-2016 by eco-belts and gender. Based on the total number of new enrolment in Grade One and the total number of 5 years' age group population³, the overall GIR for Grade One is **136.7⁴** (Compared to 137.0% in the last school year) with 144.3% for girls and 129.8% for boys (See Annex: XIII). Compared amongst the eco-belts, Mountain belt shows the highest GIR

³ The district wise single age group population was calculated for both the GIR and NIR in 2015-016 based on the data received from the CBS of current National Population Census 2011.

⁴ The population used in the calculation of enrolment rates in all Flash Reports is based on the National Population Census Reports and the projected population by the CBS. In this regard, up to the Flash I Report 2012/013 the school age population was used based on the Population Projection for Nepal 2001-2021 publication, jointly published by the Central Bureau of Statistics (CBS) and the Ministry of Population and Environment (MOPE) in the year 2003, which was used to calculate both the GIR and NIR for 2012-013. Compared to the projected population used up to 2012/013, the projected population based on the National Population Census 2011, shows the population of the age group 4-9 is in decreasing trend and the population of the age group 10-16 is in increasing trend. So, the fluctuations in the enrolment rates depend on the increasing and the decreasing trends of the respective age group population and respective age group enrollment.

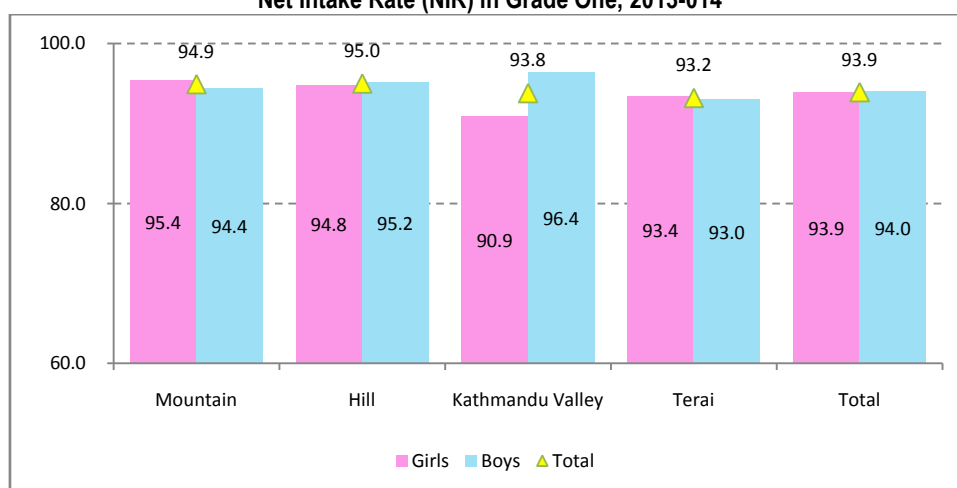

followed by Hill, whereas the Terai and Valley eco-belts show the lowest GIR (131.5%). The overall GIR 136.7% is lower than the last school year by 0.3 percent points. Though the GIR has decreased, still it is higher than the set target (133%) for 2015 in the SSRP. The higher GIR indicates a late admission of children into Grade One. This is likely to be affecting the overall internal efficiency of primary education.

Similarly, the tables 3.19 and figure 3.11 below show the NIR in Grade One in the school year 2015-016 by eco-belts and gender. The overall Net Intake Rate (NIR) in Grade One is 93.9% (Compared to 93.0% in the last school year), with 93.9% for girls and 94.0% for boys. Among the eco-belts, There is not much difference with regard to NIR in Grade One; however the Hill and Mountain eco-belts show the highest NIR (95.0% and 94.9%) followed by Valley eco-belt, the Terai eco-belt having the lowest NIR (93.2%). Compared with the NIR in the last school year, it has increased by 0.9 percent points. As compared to the national average there are 47 districts, mostly from the Mountain and Hill eco-belts, with a high NIR and 28 districts (including 9 Terai districts) with a low NIR (i.e. less than 93.9% of NIR) (See Annex: XIV).

Table 3.19
Net Intake Rate (NIR) in Grade One, 2013-014

Eco-belts	Girls	Boys	Total
Mountain	95.4	94.4	94.9
Hill	94.8	95.2	95.0
Valley	90.9	96.4	93.8
Terai	93.4	93.0	93.2
Total	93.9	94.0	93.9

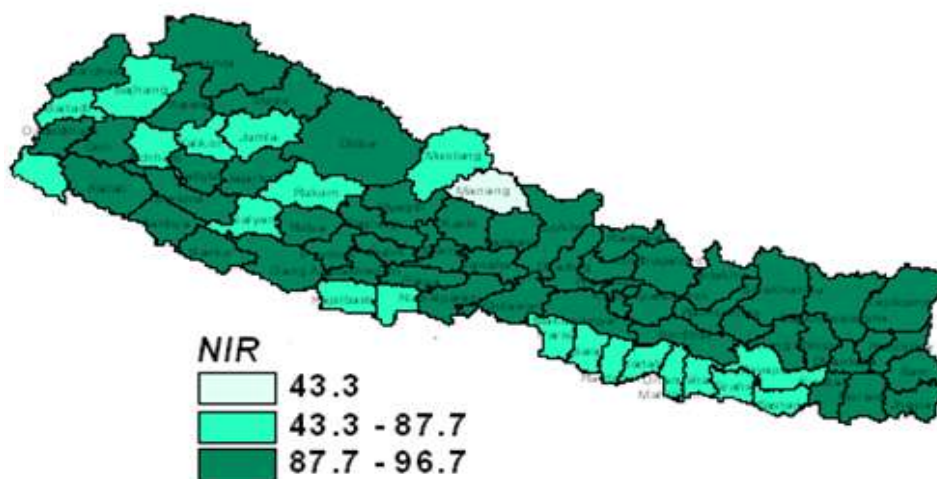

Figure 3.11
Net Intake Rate (NIR) in Grade One, 2013-014

The following Map 6 presents the Net Intake Rate in Grade One by districts. Compared to the national average of NIR (93.9%), altogether there are 47 districts, which have more than 93.9% of NIR, whereas there are 9 districts: DHANKUTA, DHANUSHA, DOLPA, ILAM, JAJARKOT, MAHOTTARI, MANANG, RAMECHHAP and SAPTARI, which have a low (less than 93.9% of NIR) NIR in Grade One in the current school year 2015/016. Overall, it suggests for more concentrated and sustainable efforts for the admission of all children of age five in Grade One in time, and ensure their universal retention, completion and learning of an acceptable quality. Overall, there has been an important impact of the well expansion of the ECD/PPCs facilities focusing to the deprived communities and locations, which increased the

more children in grade 1 with the ECD/PPCs experiences and improve the internal efficiency at primary level by reducing the repetition and dropout rates in grade 1.

Map 6 Net Intake Rate (NIR) in Grade One

(7) Gross and Net Enrolment Rates, and Gender Parity Index (GER, NER and GPI) at primary, lower secondary and basic levels

GER is an indicator related to total enrolment at a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population⁵ corresponding to the same level of education in a given school year. This indicator is widely used to show the general level of participation in a given level of education. Likewise, NER is an indicator related to total enrolment of the official age-group for a given level of education expressed as a percentage of the corresponding population. NER gives a more precise measurement of the extent of participation of children belonging to the official school age in a given level of education. In practice, a high NER denotes a high degree of participation by the official school-age population. The highest theoretical value is 100%. Increasing trends can be considered as reflecting improving participation at the specified level of education. When the NER is compared with the GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment.

The table 3.20 with figures 3.12 and 3.13 below show the level wise status of Gross Enrolment Rate (GER) and Net enrolment Rate (NER) of students at primary, lower secondary and basic levels by gender in the school year 2015-016. Based on the data presented in the table 3.20, the overall GER at primary level is 135.4% (Compared to 134.4% in the previous year) with 140.8% for girls and 130.2% for boys. When these figures are compared with the figures of the last year (134.4% total, 140.3% for girls and 128.9% for boys), the GERs in total as well as for both girls and boys have slightly increased (by almost 1.0% in total) at primary level (See Annex: XIII).

The overall NER at primary level is 96.6% with 96.3% and 96.9% for girls and boys respectively. When compared with the status of the last year (96.2% total, 95.7% for girls and 96.6% for boys), the NERs for both girls and boys as well as the total have increased. The present status of NER suggests that approximately 3.4% of 5-9 years' age group children

⁵ Regarding the population used in the calculation of enrolment rates (GER/NER), the same methods were applied as stated in earlier footnotes in the analysis of GIR and NIR.

(almost 106,307 children) are out of formal primary schooling, of them the majority are girls (53.6%) (See Annex: XIV). Compared to the both indicators (GER and NER) related to the status of participation in primary education, both indicators GER and NER has increased by almost 1.0% and 0.4% points respectively, indicating more correct age groups children were enrolled in all primary grades. However, the number of students by age composition has not changed significantly. The table 3.20 further shows that the total GER at lower secondary level is 95.4% with GER of 97.4% for girls and GER of 93.4% for boys. Compared with the status of the previous year (89.7% total, 92.0% for girls and 87.4% for boys) the GER in total as well as for both genders has increased in the current school year (almost by 5.7% points in total).

The total NER at the lower secondary level is 77.7% with 78.9% for girls and 76.5% for boys in the school year 2015-016. When compared to the status of the previous year (74.6% with 75.5% for girls and 73.8% for boys), the scenario of this year shows a significant increment has observed in total and by gender too. Based on the 10-12 years' age group population in the school year 2015-016, there are 77.7% students enrolled at lower secondary level. This suggests that almost 22.3% (Compared to 25.4% in the last school year) children of 10-12 years' age group population are not attending at lower secondary level.

However, considering the high level of GER in primary education it suggests that some of them are in lower grades (i.e. grades 1-5), which needs further analysis for improvement in the overall/universal enrolment and participation of children of 10-12 years in lower secondary education in correct time.

Similarly, the total GER and NER for the basic level are 120.1% and 89.4% (Compared to 117.1% and 87.6% in the last school year) respectively. This shows a slight increase both in the GER and NER at the basic level than in the last school year. Moreover, the GPIs in GER by level are 1.08 at primary level, 1.04 at lower secondary level and 1.07 at basic level. Likewise, the GPIs in NER by level are 0.99 at primary level, 1.03 at lower secondary level and 1.00 at basic level, which show the participations of girls and boys at all levels are equal in both the Gross and Net enrolment; and thus the Gender Parity Index at all levels is achieved.

The district level analysis shows that compared to the national average, there are 45 districts with a low GER at primary level and the rest 30 districts (mostly Mountain and Hill districts) have higher GER rates at primary level. Similarly, compared to the national average 30 districts show a low NER and the rest have high NER than the national average. Likewise, compared to the national average altogether 29 districts have lower GER and 30 districts have lower NER at lower secondary level. In addition, an almost similar situation is observed at the basic level. Overall, 32 districts mostly from the Hill and Mountain eco-belts (including 3 districts from Karnali zone) have more than 50% over-and under-age (including 5.7% of less than 5 years children in Grade One) children at primary level. This might be one of the causes of the low internal efficiency at primary level.

Finally, the analyses of the GER at both primary and lower secondary levels show that more over age children are enrolled at primary level, but by the age definition they should be at the lower secondary level's grades. This contributes to higher GER at the primary level and lower GER at the lower secondary level. In addition, compared to the set targets of GER and NER for 2015 in SSRP at primary (131% GER and 100.0% NER) and at the basic levels (115% GER and 90.0% NER), achievements at both levels have improved.

Table 3.20
Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) by levels

Level	GER				NER			
	Girls	Boys	Total	GPI	Girls	Boys	Total	GPI
Primary(1-5)	140.8	130.2	135.4	1.08	96.3	96.9	96.6	0.99
Lower secondary(6-8)	97.4	93.4	95.4	1.04	78.9	76.5	77.7	1.03
Basic(1-8)	124.1	116.3	120.1	1.07	89.6	89.2	89.4	1.00

Gross Enrolment Rate (GER) by levels

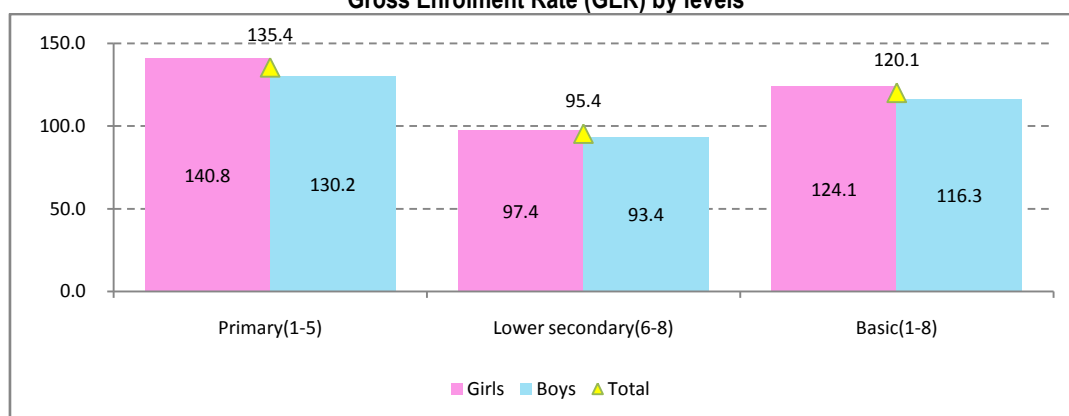

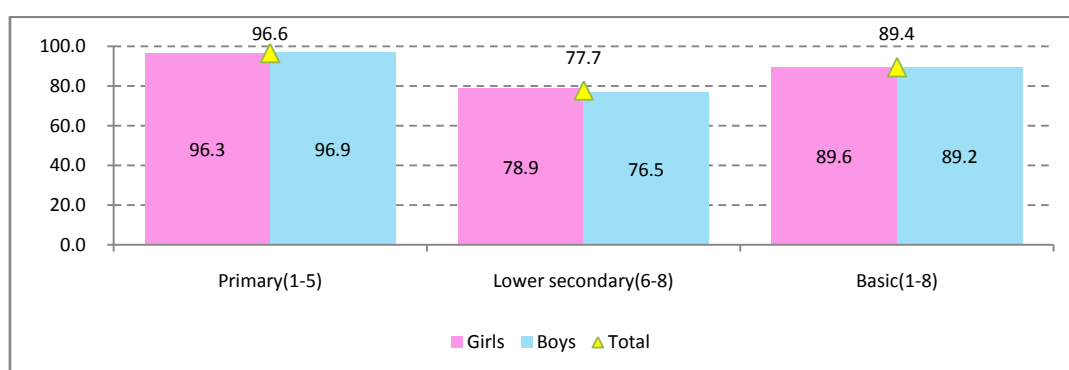

Figure 3.13
Net Enrolment Rate (NER) by levels

8) Scenario of out-of-school children

The following figures are based on the analysis of the data of National census received from the CBS, which could be updated for the current school year. Since there are no other sets of the database to compare by age, gender and casts/ethnicities at the VDC level it was difficult to estimate the out of school children for the VDC level. In the school education system, practically and characteristically; the out-of-school children are categorized into two types: the first one is never schooling children and the second one is ever schooling children (Dropped out children). The table 3.21_A below presents the percentage of out-of-school children by single age group (5-16 years' age group) in 2011. Based on the records of National Population and Housing Census 2011 received from the Central Bureau of Statistics, in total there were 7,978,913 children of the age group 5-16 in the country. The analysis by single age group shows that, the highest percentage of out-of-school children are in age groups 5, 6 and 16. The district level analysis shows, there are 18 districts with more than 10% out of school children of the age groups 5-12 years. Moreover, out of 18 districts there

are 9 districts: Kapilbastu, Saptari, Parsa, Bara, Siraha, Dhanusa, Sarlahi, Mahottari and Rautahat, which have more than 20% of out of school children in the same age groups.

Table 3.21_A
Based on National Population and Housing Census 2011, the percentage of out-of-school children by single age

Eco-belts	Gender	Percentage of children who are currently not in school by age groups											
		5	6	7	8	9	10	11	12	13	14	15	16
Mountain	Girls	20.1	13.8	8.2	5.8	3.7	8.5	8.0	8.7	10.6	14.6	16.5	25.3

Source: National Population and Housing Census 2011 (CBS)

It is worth mentioning here, regarding the out-of-school children the Nepal Living Standards Survey (NLSS III), 2010/11 Published by Central Bureau of Statistics Nepal (Tables 5.8 and 5.18) revealed the primary reasons for not attending school for population aged 6-24 years (those who never attended any school) and the Reason for Dropouts (those who ever attended any school at least once). The report presented that of the total population of the age group 6-24 years 8.7 percent of the population never attended school. Among these never attendees, 30.0 percent reported parents did not want to send school, followed by other reasons had to work at home 25.5 percent, not willing to attend 17.2 percent and the other reasons included too young 7.2 percent, too expensive 7.3 percent, disability 3.4 percent and school far way 3.1percent respectively. Similarly, regarding the reasons for dropouts from the schools and campus, the report cited that the 6-24 years population left the schools because of: poor academic progress (24.6%), help needed at home (22%), because of married (17 percent), parent did not want (7 percent), too expensive education (7percent) etc..

In addition to the above (3.21_A), based on the individual age wise (school age) population by castes and ethnicities of National Population and Housing Census 2011 received from the Central Bureau of Statistics (CBS) the table 3.21_B and the figure 3.13_B below present the percentage of out-of-school children by castes and ethnicities⁶ in 2011. Based on the records of National Population and Housing Census 2011 and the categorization of the castes/ethnicities in the “Resource book for District level orientation on Gender Equity and Social Inclusion” jointly prepared by the Government of Nepal, Ministry of Federal Affairs and Local Development and the Local Development Training Academy Jawalakhel, the analysis shows that the highest percentage of out of school children are in age groups 5, 6, 15 and 16 (See Annex: XIV_B-D). Among the castes and ethnicities the highest percentage of

⁶ Based on the categorization of the castes/ethnicities in “Resource book for District level orientation on Gender Equity and Social Inclusion” jointly prepared by the Government of Nepal, Ministry of Federal Affairs and Local Development and the Local Development Training Academy Jawalakhel, there are 59 Janajati castes and ethnicities, 23 Dalit castes and 24 disadvantaged communities)

out of school children is observed in disadvantaged communities than the children from Dalit and Janajati community in the country. This shows, though the overall achievements in access related indicators are encouraging in districts, geographical eco-belts, development regions and national levels, it is also equally important to see the status of the different communities at VDCs/Municipalities and pocket areas as well in the following years school education planning and programme implementation.

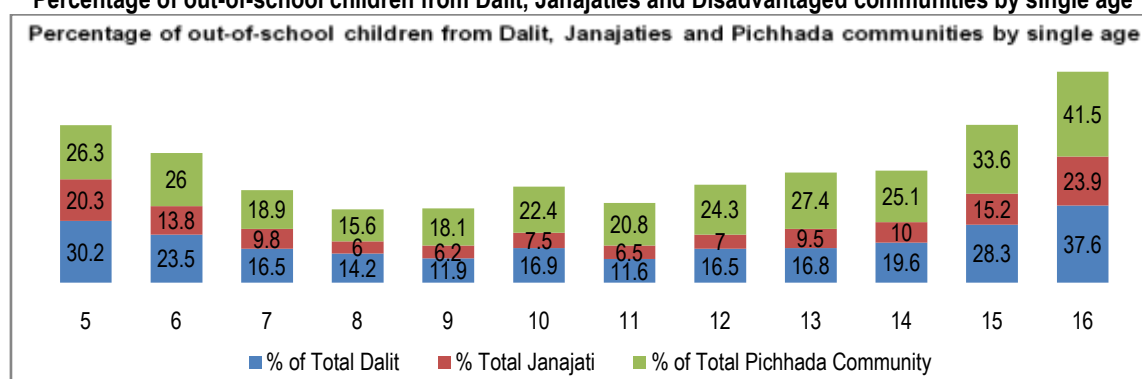

Table 3.21_B
Percentage of out-of-school children from Dalit, Janajatis and Disadvantaged communities by single age

Single Age	Percentage of Out of school children by Dalit, Janajati and Pichhada communities

Figure 3.13_B

Percentage of out-of-school children from Dalit, Janajatis and Disadvantaged communities by single age

(9) Internal efficiency at primary level

The term “efficiency” refers to the relationship between outputs and inputs. A process is described as technically efficient if it produces maximum outputs from a given combination of inputs. Internal efficiency deals with the use of resources and refers to the internal dynamics of the education system in transforming inputs and processes into outputs. Moreover, it can be defined as the system’s ability to educate the maximum number of children who have entered the system in a specific year in the optimum time with the

minimum possible use of human and financial resources. Operationally, internal efficiency can be described as the number of students graduating from an educational institution (at a particular grade and level of education) expressed as a percentage of the number of students who entered the institution at the beginning of the particular programme.

Table 3.22
Internal efficiency at primary level

Students	PRD	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Total of Grades 1-5
Total	Promotion rate	81.5	89.6	90.6	91.5	92.2	88.4
	Repetition rate	13.7	6.5	5.8	5.3	4.2	7.6
	Dropout rate	4.8	3.9	3.6	3.3	3.5	3.9
	Survival Rate to grades	-	-	-	-	87.5	-
	Coefficient of internal efficiency	-	-	-	-	-	81.8
	Cohort Graduation Rates						80.6
Boys	Promotion rate	81.1	89.4	90.6	91.1	92.0	88.2
	Repetition rate	14.0	6.5	5.8	5.5	4.3	7.8
	Dropout rate	4.9	4.1	3.6	3.4	3.7	4.0
	Survival Rate to grades	-	-	-	-	87.1	-
	Coefficient of internal efficiency	-	-	-	-	-	81.5
	Cohort Graduation Rates						80.1
Girls	Promotion rate	81.9	89.7	90.7	91.8	92.5	88.7
	Repetition rate	13.4	6.5	5.8	5.0	4.1	7.5
	Dropout rate	4.7	3.8	3.5	3.2	3.4	3.8
	Survival Rate to grades	-	-	-	-	87.9	-
	Coefficient of internal efficiency	-	-	-	-	-	82.4
	Cohort Graduation Rates						81.2

Table 3.22 above shows the grade wise flow rate of students from school year 2014-015 to 2015-016 for primary grades. These flow rates show the evaluation of internal efficiencies of the students as well as the overall effectiveness of the inputs provided. The table illustrates, out of the total students enrolled in the school year 2014-015 in Grade One, 81.5% (78.4% in the previous school year) promoted to Grade Two, 13.7% repeated the same Grade in the current school year, and 4.8% dropped out from the school education system (See Annexes XV_A-C).

In other words, altogether 18.5% of the total enrolled students in Grade One of the last school year could not continue in Grade Two in this school year. Although the promotion rate has improved as compared to the previous school year, it still demonstrates a high wastage of the inputs provided. However, the promotion rates for upper grades (Grades 2 to 5) are better than for Grade One. The table also suggests that the promotion rates for girls, as compared to that of boys, are slightly better in all Grades (See Annexes XV_A-C). This trend has continued since the school year 2007. The average survival rate to Grade 5 is 87.5% (86.8 in the last school year) with 87.9% for girls and 87.1% for boys. This shows an improvement over the previous school year (86.8), while the coefficient of internal efficiency is 81.8% (Compared to 80.9% of the previous school year) of this 82.4 for girls and 81.5 for boys. Similarly, the cohort graduation rate at primary level is 80.6% (compared to 79.7% in the

previous school year), with 81.2% for girls and 80.1% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2010-011, altogether 80.6% of the students successfully completed the primary level in the school year 2014-015.

(10_A) Internal efficiency at lower secondary level

The table below 3.23 presents the grade wise flow rates at lower secondary level from school year 2014-015 to 2015-016. The pattern of the grade wise student flow rates at lower secondary level is also similar to the primary level. Out of the total number of students enrolled in the school year 2014-15 in Grade Six, 91.8% (Compared to 90.4% in the last school year) promoted to Grade Seven, 4.1% repeated the same grade in the current school year, and 4.1% dropped out from the school education system completely.

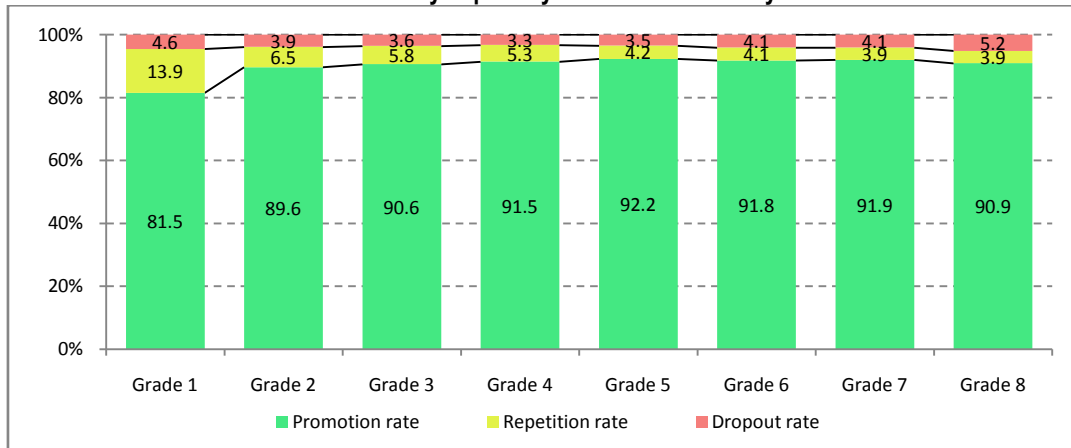

Likewise, the promotion rates in Grade Seven and Grade Eight are 92.0% and 90.9% (90.4% and 89.5% in the last school year) respectively. When the data given in the table are analyzed from the gender perspective, there is slight differences are noted (See Annexes XVI_A-C). The average survival rate to Grade 8 is 76.6% (Compared to 74.6% of the last school year) with 77.4% for girls and 75.9% for boys. The coefficient of internal efficiency is 75.9% (Compared to 73.1% of the last school year), of this 76.7% for girls and 75.3% for boys. Similarly, the cohort graduation rate of basic level (grades 1-8) is 69.6% (Compared to 66.7% of the last school year) with 70.5% for girls and 68.8% for boys, which suggests that out of 100 new students enrolled in Grade One in the school year 2007, almost 70.0% students successfully completed the basic level in the school year 2014-015.

As mentioned in the below tables the Figure 3.14 below shows the grade wise internal efficiencies at both primary and lower secondary levels and also presents the grade wise progress of students from Grade One to Grade Eight. The flow rates by districts show that the promotion, repetition and dropout rates vary from district to district (See Annexes: XV A-C and XVI A-C).

Table 3.23
Internal efficiency at lower secondary level

Students	PRD	Grade 6	Grade 7	Grade 8	Grade 6-8	
Total	Promotion rate	91.8	92.0	90.9	90.9	
	Repetition rate	4.1	3.9	3.9	4.0	
	Dropout rate	4.1	4.1	5.2	4.4	
	Survival rate to grade 8					76.6
	Coefficient of internal efficiency					75.9
	Cohort Graduation Rates					69.6
Boys	Promotion rate	91.3	91.8	90.8	90.8	
	Repetition rate	4.4	3.8	4.0	4.1	
	Dropout rate	4.3	4.4	5.2	4.6	
	Survival rate to grade 8					75.9
	Coefficient of internal efficiency					75.3
	Cohort Graduation Rates					68.8
Girls	Promotion rate	92.3	92.1	91.0	91.0	
	Repetition rate	3.8	4.0	3.8	3.9	
	Dropout rate	3.9	3.9	5.2	4.3	
	Survival rate to grade 8					77.4
	Coefficient of internal efficiency					76.7
	Cohort Graduation Rates					70.5

Figure 3.14
Internal efficiency at primary and lower secondary level

(10_B) The Quality of Basic Education based on the Findings and Recommendations of “National Assessment of Student Achievement (NASA) 2011, 2013 for grade 8, and for grades 3 and 5 in 2012”

The analysis of the internal efficiencies of the students based on the flow rates presented in the above tables (3.22 and 3.23) are based on the EMIS data, presented the succession of the students but the flow rates does not explain about the learning ability and performance of the students. In this regard, it is relevant to discuss about the findings of “National Assessment of Student Achievement (NASA) 2011 and 2013 the first and second rounds of the assessment report findings for grade 8 and the first round assessment reports for grades 3 and 5 in 2012”. The MOE has established the “National Assessment of Student Achievement (NASA) 2011 Unit within the regular structure of the Ministry of Education. This unit is set up as the most essential part of the Ministry of Education to fulfill the absence of school level educational quality research functions. The National Assessment of Student Achievement (NASA) is a research based effort to assess students’ subject wise learning achievement through a sample selection. The NASA is the most extensive and standard study carried out by the Ministry of Education. The aim of NASA is to identify its strengths, weaknesses, opportunities and challenges of the system with the following objectives:

- To determine the current national level achievement standard of students in Mathematics, Nepali, and Social Studies in the school education;
- To find out variations in student achievement between and among different diversity units and groups;
- To examine different factors that are related to learning achievement;
- To compare the improvement of student learning achievement between the 2008 study and the current study;
- To portray school resources;
- To compare the student learning achievement with some of the international studies like PISA and TIMSS;
- To create reliable baseline data for the future study in 2013;
- To explore the situation of inputs (teachers’ qualifications and training, classrooms’ and schools’ situation);
- To generate recommendations for policy making to improve educational quality as well as for other stakeholders of education community to improve their respective working areas including schools.

The NASA for grade 8 students was conducted in 2011, based on the report it presents that there is a great difference between the achievement levels of the students. The differences in achievement level are more pronounced in community schools than in institutional schools. The report clearly indicates that such a great difference in students' achievement level is due to the weak capacity of the current education system. It also indicates that schools' and students' individual effort is responsible for their achievement rather than the system. The differences were found in terms of districts, eco-belts, respective subject matters prescribed in curriculum and textbooks, school environment, house-hold activities, languages, socio-economic status of households, teachers' characteristics, timely availability of textbooks and other materials, castes and ethnicities, and other factors.

According to the study, the achievement level of the students has been found to be decreasing gradually while moving from knowledge level, comprehension level, application level and finally to higher ability level in the cognitive domain. In Social Studies, a similar but not entirely identical pattern emerged with the respective results as follows: knowledge level 52%, comprehension level 66%, and application level 40% higher ability level 34%. Likewise, in comparative situation of the achievement in 3 subject areas with the international situation the report shows, the average score was found to be quite higher in Mathematics and Social Studies, whereas in Nepali it was below the international average. But the reasons behind this situation were not clearly mentioned in the report and left it to further discussions within and outside the system.

Regarding the achievements, in Reading and Writing the study report reveals that the achievement level in writing skill is lower than that in reading skill, while the curriculum has emphasized to the writing skill by allocating more periods to teach this skill. Specially, the achievement level of students with non-Nepali mother language is comparatively lower in reading and writing skills. Another finding with regard to achievements by rural and urban based-schools shows the achievement level of schools from urban areas is 52% and that of rural areas 45%, which indicates the performance of rural schools is poorer. Similarly, same types of variation has been observed between the types of schools' (institutional and community schools) achievement level, it shows the average achievement of institutional schools is 63% whereas that of the community schools is 44%. Here, one of the contexts in the better performance of institutional school is the better socio-economic status of the students.

The tables 3.24 and 3.25 below show the summary of grade 8 students' achievement level based on the NASA 2011 and 2013 reports by gender. The average means show the boys are better performing than girls in Mathematics and Social studies, whereas, in Nepali girls are better than boys. Differences are not wide but they are significant and there should be an initiation to reduce the gap.

Table 3.24: students' subject wise learning achievements in Grade 8, NASA, 2011

Statistical functions	Subject wise students achievement								
	Mathematics			Nepali			Social studies		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Number	7,963	8,043	16,006	7,898	8,421	16,319	7,882	8,354	16,236
Mean	45	41	43	48	49	49	50	49	47
SD	21.4	21	21.3	19	19	19	15.3	15.3	15.9

Similarly, the second round of the NASA 2013 study report reveals that compared with the assessment of the students achievement in the same subjects in 2011, the achievement has not been improved over these years. For instance, in 2011 it was 49% for Nepali, whereas it is only 48% in 2013 - going further down by around 1% in 2013. In Mathematics, it is more worsening as the achievement score has gone down further by almost 8% from 2011 to 2013. But the report could not tell the reasons behind such downfall in the learning achievement and stated that it demand further enquiry to get the root of the fact.

Mathematics achievement in NASA 2013 is found 8 percent lower than the previous assessment 2011 (i.e from 43% in 2011 to 35% in 2013), which indicates compared to the 2011 assessment; the mathematics result is comparatively lower in all the content areas.

Furthermore, the report depict that except in Nepali subject there are gender differences in the achievement of various ethnic/caste groups in NASA 2013 in Mathematics. For example, the difference in achievements between boys and girls is the highest in Madhesi communities, that is, 10 percent. Similarly, in the Brahmins/Chhetris and "others" groups also have the similar status.

Table 3.25: students' subject wise learning achievements in Grade 8, NASA, 2013

Statistical functions	Subject wise students achievement								
	Mathematics			Nepali			Social studies		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Number	6,837	7,547	14,384			14750			14,231
Mean	38	33	35	48	48	48	43	39	41
SD	24.2	24	24.2						21.7

Overall, the second round of the NASA report 2013 presented some very important findings that need to be taking into account in the further policy, planning, programme and implementation of school education. The report presents that: Students' average achievement score in institutional schools is higher than that in the community schools (i.e. in Mathematics the average achievement score is 57% in the institutional schools whereas it is 26% in the community schools). There are wide differences in student achievement in terms of mother tongue, difference in Caste/ethnicity (i.e. achievement level of the Dalit students is lower in all the subjects comparing the students from other communities). Similarly, the achievement of Madhesi students is also lower than the total national average. The other important variances in the student achievement are the rural/urban and the status of timely availability of the textbooks. It reveals that there is a strong association regarding the timeliness in textbook availability and student achievement (i.e. the students reporting to have received textbook at the beginning of the academic session have scored 36% in Mathematics, 49% in Nepali and 42% in Science whereas those who did not receive textbooks even at the end of academic year have scored 24%, 35% and 34% respectively in the same subjects).

Similarly, based on its plan and regular functions, the NASA unit has completed the second round of study on "National Assessment of Student Achievement (NASA) 2012 for grades 3 and 5 in 2012." The methodologies and procedures of the study on "National Assessment of Student Achievement (NASA) 2012" for grades 3 and 5 were also applied same as in the "National Assessment of Student Achievement (NASA) 2011" for grade 8. The key findings

of the study reports of the “National Assessment of Student Achievement (NASA) 2012 for grades 3 and 5 are almost similar in nature. In general, the findings are based on differences between the districts, developmental regions, types of schools (institutional- and community), ecological belts and rural/urban backgrounds, where the differences in the students achievements are found remarkable as in the previous study report for grade 8. Similarly, there is an educational inequality between the language groups; students with very low socioeconomic status obtain remarkably lower-than-average learning achievement and also the status of timely availability of textbooks and other materials demonstrated the significant differences in the both reports’ findings.

Among the wide ranges of the findings of various dimensions, following tables 3.26 and 3.27 present the status of average achievement scores in Mathematics, Nepali and English subjects for grade 5 students and the average achievement scores in Mathematics and Nepali subjects for grade 3 students. In grade 5 the differences between boys and girls are not remarkable, where the proficiency in Mathematics and social studies are in favor of boys by 1.7% and 1.8% points higher than the girls, whereas, the average achievement scores in Nepali it shows girls are better than the boys (Table: 3.26).

Similarly, the table 3.27 below depicts the status of average achievement scores in Mathematics and Nepali subjects for grade 3 by gender. The differences between boys and girls in Mathematics proficiency are not seen. In Mountain zone, in the institutional schools, the boys seem to perform better than the girls with 13 percent point. Also, in the “Other” caste, the girls seem to outperform the boys by 7 percent points. The differences between boys and girls in Nepali proficiency are in favor of girls. In the both grades the tendency seems to be that the girls’ proficiency is slightly better than the boys in Nepali subject.

Table 3.26 Students’ subject wise learning achievements in Grade 5, NASA, 2012

Statistical functions	Subject wise students achievement								
	Mathematics			Nepali			English		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Number	6,570	6,302	12,872	6,449	6,977	13,426	6,604	6,519	13,123
Mean	54.4	52.7	53.3	59	60.7	59.7	54.8	53	53.6
SD	22.5	23.1	22.9	23	23.1	23.1	24.2	24.4	24.2

Table 3.27 students’ subject wise learning achievements in Grade 3, NASA, 2012

Statistical functions	Subject wise students achievement					
	Mathematics			Nepali		
	Boys	Girls	Total	Boys	Girls	Total
Number	8,304	8,670	16,974	8,586	8,861	17,447
Mean	59.5	59.5	59.4	62.7	64.2	62.6
SD	25.4	25.1	25.6	24.0	23.5	24.0

As a whole, the study suggests that the socioeconomic status plays a strong role in the educational processes. More efforts and resources should be put to the lowest-performing students in the very early grades of schooling. The efforts in the lowest level students at the early grades would most probably raise later the standard in the higher grades too. For this the MOE should prepare a strategic plan how this would happen and it needs to put a strong

positive emphasis, specially focusing to the remarkable supports to the districts of absolutely low achievement level such as Achham, Bardiya, Jumla, Khotang, Mahottari, Rolpa, Saptari, and Udayapur and also to the schools in Eastern- and Mid-Western development regions.

In this regard, the Global Monitoring Report, 2013-14 overviewed the current situation and suggests that it needs to “Monitoring global education targets after 2015” for the “goal on children learning” which is an indispensable part of a future global education monitoring framework. Further it presented that focusing only on learning assessments can be misleading if large numbers of children never make it to the grade where skills are tested. With an example of the United Republic of Tanzania, the GMR report reveals that the proportion of children in grade 6 who achieved a minimum standard in reading in 2007 ranged from 80% of the poorest rural girls to 97% of the richest urban boys. However, while 92% of the richest urban boys of grade 6 ages had reached that grade, only 40% of the poorest rural girls had done so. In this regard, the report suggested that “To make sure inequality is overcome by 2030, country plans need to include specific targets so that education participation and learning can be monitored for individual population of different groups and dimensions (Only 8 of 53 countries plan to monitor inequality in learning)” (GMR 2013-14, page 7-8).

Likewise the DOE has collected the average scores of final examination by subjects of each school through the Flash II school census, 2070 and 2071. The information related to average scores were extracted from the data of 26,832 community schools reported in Flash II school census 2070 and 28,221 community schools in school census 2071 for this information. The following table 3.28 presents the subject wise students’ average scores in the final examination 2070 and 2071, whereas, the table 3.29 presents the level wise students’ average scores in the final examination 2070 and 2071. The average scores by subjects show, though the schools are almost weak in English and Mathematics, there are not considerable differences between and within the subjects and even between boys and girls students in all grades in the final examination 2071. Similarly, the grade wise average score is slightly higher in grade 3 and the lowest one is in grade 4 and 6 in the school year 2071.

The school level analyses show at the primary level there are 13,644 schools with the average scores of students lower than the total (53.7%) and 5,356 schools with more than 75% of average scores in the final examination 2071. Similarly, at the lower secondary level there are 4,157 schools with the average scores of students lower than the total (52.9%) in the school year 2071. Moreover, at the primary level the maximum average score is 93.9% and the minimum is 37.2%, whereas, at the lower secondary level the maximum average score is 93.4% and the minimum is 41.0% (Annex: XXX_D-E).

Though, the students’ average scores in the following tables are not comparable with the NASA findings the scores regarding subjects, grades, level of schools and gender are not anchoring, for this, there will be various aspects (as mentioned in the NASA findings) to be improved in the future within the school education system.

Overall, as mentioned above the current EMIS system has captured the original records of each school that included the individual details of the students, teachers, schools' activities, existing school physical facilities and other information. Based on the individual student analysis of the sample schools present that the final exam marks obtained by the students are varies based on the different dimensions: that are students subject wise marks against their age, attendance rates, sex, casts/ethnicities, size/level of schools and teachers qualifications. For the further improvement of the class room teaching learning and the students' achievements the DEOs should instruct and support to the schools to utilize the electronic

based School Level IEMIS and incorporate in the SIPs for the school level regular planning and implementation.

Table 3.28: students' subject wise average scores by grade, Flash II 2013-14&2014-15

Subject	Students	Average scores by grade in the School year 2070										Average scores by grade in the School year 2071

3.2.3 Teachers information at primary, lower secondary and basic levels

This section presents the information on teachers at primary, lower secondary and basic levels by school type, level, sex and the specific indicators related to the teachers. Teachers are defined as persons whose professional activity involves transmitting knowledge, skills and attitudes, which are required as per the approved curriculum for students enrolled in a formal educational institution.

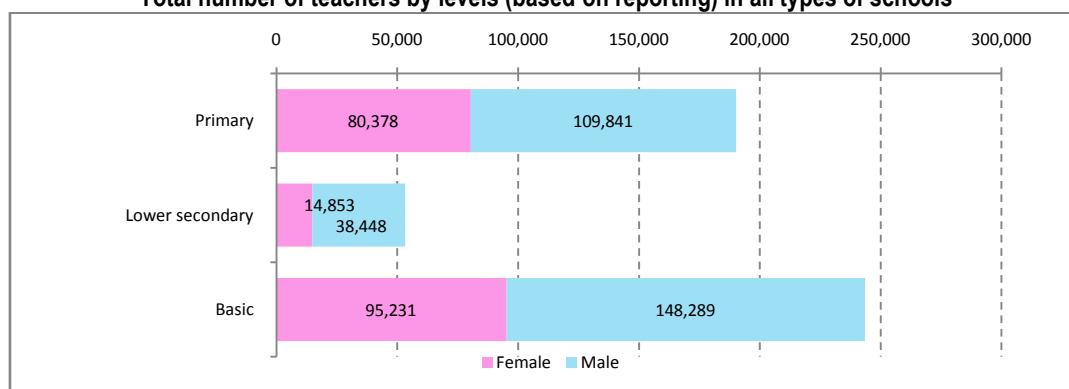

(1) Total reported number of teachers by sex at primary, lower secondary and basic levels in all types of schools

The table 3.30 and figure 3.15 below present the total number of teachers reported in the Flash I school census 2015-016 at primary, lower secondary and basic levels in the beginning of the school year 2015-016 in all types of schools (both in all types of community and institutional schools). As a whole, there are 190,219 teachers at primary level; 53,301 teachers at lower secondary level and 243,520 teachers are at basic level. Of them, the numbers of female teachers are 80,378; 14,853 and 95,231 respectively at primary, lower secondary and basic levels, which shows both the number of female and male teachers has increased compared to the previous school year. The shares of female teachers are 42.3%, 27.9% and 39.1% (similar to 41.9%, 27.6% and 38.8% in the last school year) at primary, lower secondary and basic levels respectively (See Annex: XVII & XXI).

Table 3.30
Total number of teachers by levels (based on reporting) in all types of schools

Level	Female	Male	Total
Primary(1-5)	80,378	109,841	190,219
Lower secondary(6-8)	14,853	38,448	53,301
Basic(1-8)	95,231	148,289	243,520

Figure 3.15
Total number of teachers by levels (based on reporting) in all types of schools

The table 3.31 below presents the total reported number of teachers in all types of institutional schools at primary, lower secondary and basic levels in the school year 2015-016. Out of total number of teachers (Table 3.30) reported in the beginning of the school year in the Flash I school census 2015, the total numbers of teachers in the institutional schools are 48,246; 16,217 and 64,463 at primary, lower secondary and basic levels. The shares of female teachers in total number of teachers at primary, lower secondary and basic levels are 53.6%, 43.7% and 51.1% (similar to 52.9%, 43.6% and 50.6% in the last school year) respectively. However, this is higher than the share of female teachers in community schools (Table 3.29) (See Annex: XVIII & XXII).

Table 3.31
Total number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Primary(1-5)	25,856	22,390	48,246
Lower secondary(6-8)	7,085	9,132	16,217
Basic(1-8)	32,941	31,522	64,463

Likewise, out of total number of teachers (table 3.30), the table 3.32 below shows the reported number of teachers in all types of community schools in the beginning of the school year at primary, lower secondary and basic level. The number of teachers given in the table includes all types of teachers (i.e. teachers working in approved positions, Rahat teachers and teachers hired by the community from their own sources). A total of 179,058 teachers with 62,290 female and 116,768 male teachers were reported for the basic level, of this 141,973 with 54,522 female at primary level and 37,085 with 7,768 female at lower secondary level (See Annex: XVIII & XXII). Out of the total numbers of teachers in community schools, the shares of female teachers are 38.4%, 20.9% and 34.8% (Compared to 38.2%, 20.8% and 34.5% in the last school year) at primary, lower secondary and basic levels respectively. The shares of female teachers at all levels have slightly improved as compared to the shares of female teachers in the last school year 2014-015.

The table also explains that, the contributions of the respective communities of the community schools are vital in the management of teachers and physical facilities. Based on the reporting from the schools currently at the primary level 40,023 teachers hired by the communities beside 101,950 teachers working in the approved and Rahat darbandi and at the lower secondary 11,314 teachers hired by the communities beside 25,772 teachers working in the approved and Rahat darbandi are in the community schools. Thus, there are significant share of community contribution in the teacher management that are 28.2% at primary level and 30.5% at the lower secondary.

Table 3.32
Total number of teachers in all types of community schools by levels (based on reporting)

Level	Female	Male	Total
Primary(1-5)	54,522	87,451	141,973
Lower secondary(6-8)	7,768	29,317	37,085
Basic(1-8)	62,290	116,768	179,058

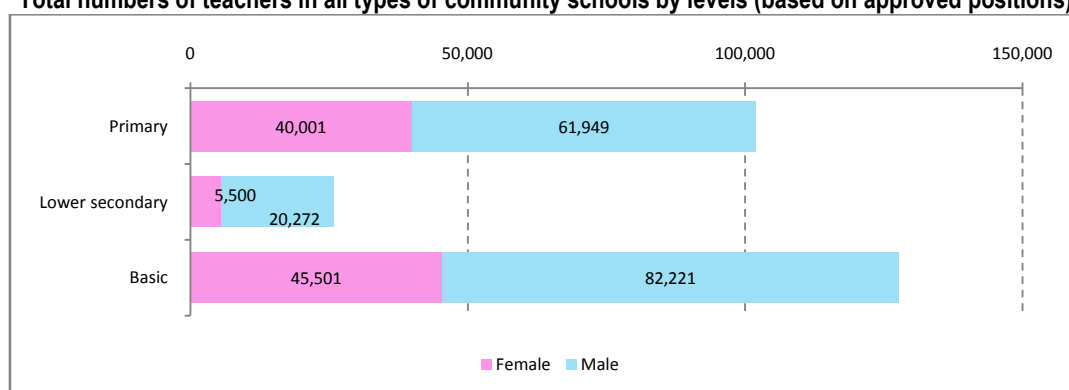

Table 3.33 and figure 3.16 below show the numbers of teachers in all types of community schools based on the numbers of teachers working in approved positions and Rahat positions by levels. Overall, 101,950 teachers with 40,001 female teachers at primary level, 25,772 teachers with 5,500 female teachers at lower secondary level and 127,722 teachers with 45,501 female teachers at basic level are working in the current school year. Out of the total numbers of teachers by levels 39.2% at primary, 21.3% at lower secondary and 35.6% at the basic level are female teachers, this shows the share of female teacher has slightly increased in the current school year (See Annex: XXIX).

Table 3.33
Total number of teachers in all types of community schools by levels (based on approved positions)

Level	Female ⁷	Male	Total
Primary(1-5)	40,001	61,949	101,950
Lower secondary(6-8)	5,500	20,272	25,772
Basic(1-8)	45,501	82,221	127,722

⁷ The numbers of female teachers are presented based on the reporting in the community schools working in the approved positions and Rahat Quotas.

Figure 3.16
Total numbers of teachers in all types of community schools by levels (based on approved positions)

(2) Percentage of teachers and the gender parity indexes in all types of schools

As discussed in the previous tables: 3.30, 3.31, 3.32 and 3.33, the table 3.34 below presents the percentage of teachers in total numbers of teachers and the Gender Parity Indexes (ratio of female to male) by level. Hence, to assess the level of participation of female teachers against male teachers in the education system, the GPI indicator is one of the most important indicators.

The table 3.34 below shows the GPI in total number of teachers is 0.73 at primary level, 0.39 at lower secondary and 0.64 at basic level respectively, which shows there is a slight change than in the previous school year. Likewise, the GPI for institutional schools is 1.15 at primary level, 0.78 at lower secondary level and 1.05 at basic level. Hence, the GPI for institutional schools is higher than the GPI in total number of teacher at all levels.

Though the share of Female teachers in community schools has slightly improved, compared to the GPIs in total and institutional schools, the GPIs in the reported number of teachers in community schools and the total number of teachers working in approved positions and Rahat quotas are comparatively low. Overall, compared to the community school the GPI in the share of teachers by level is higher in institutional schools, meaning there are more female teachers are working in the institutional schools.

Table 3.34
Shares of teachers by sex and GPI in types of schools and levels

Types of Schools	Primary(1-5)			Lower secondary(6-8)			Basic(1-8)		
	Female	Male	GPI	Female	Male	GPI	Female	Male	GPI
Share and GPI in total number of teachers (all types of schools)	42.3	57.7	0.73	27.9	72.1	0.39	39.1	60.9	0.64
Share and GPI in total number of teachers in Institutional Schools	53.6	46.4	1.15	43.7	56.3	0.78	51.1	48.9	1.05
Share and GPI in total number of teachers (all types of community schools based on reporting)	38.4	61.6	0.62	20.9	79.1	0.26	34.8	65.2	0.53
Share and GPI in total number of teachers (all types of community schools based on approved positions)	39.2	60.8	0.65	21.3	78.7	0.27	35.6	64.4	0.55

(3) Percentage of teachers by Dalit and Janajati

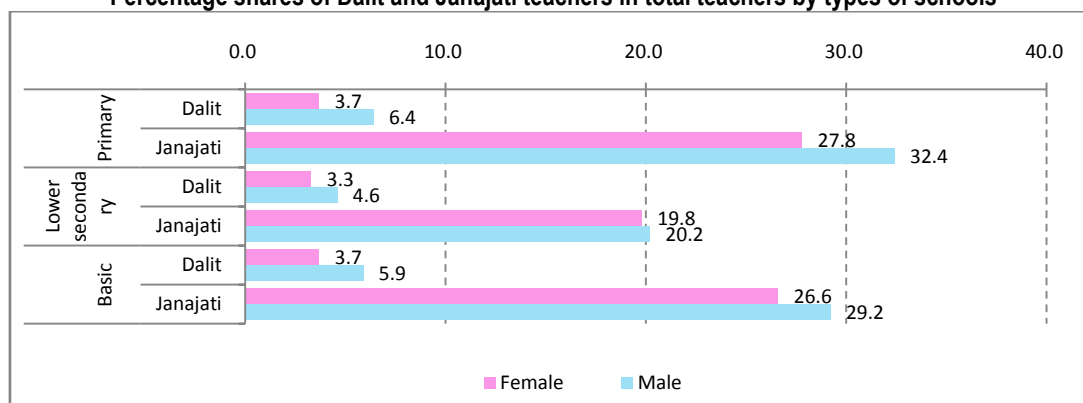

Table 3.35 and figure 3.17 below show the percentage shares of Dalit and Janajati teachers in total number of teachers by levels and sex. The proportion of Dalit and Janajati teachers remain low in teaching profession as compared to their overall proportion in the total population. The overall percentage shares of Dalit teachers at primary, lower secondary and basic levels are 5.3%, 4.2% and 5.0% (Compared to the share of Dalit teachers 5.1%, 4.0% and 4.9% in the previous school year) respectively.

Table 3.35
Percentage shares of Dalit and Janajati teachers in total teachers by levels

Social group	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Dalit	3.7	6.4	5.3	3.3	4.6	4.2	3.7	5.9	5.0
Janajati	27.8	32.4	30.5	19.8	20.2	20.1	26.6	29.2	28.2

Likewise, the overall percentage share of Janajati teachers at primary level is 30.5% (30.4% in the previous school year), at lower secondary level 20.1% (19.9% in the previous school year) and at the basic level it is 28.2% (28.1% in the previous school year) respectively. The status of Dalit and Janajati teachers in total number of teachers shows that while there is a huge need of increase/improvement in the numbers of Dalit teachers at both primary and lower secondary levels; there is also a need of increase of Janajati teachers, especially at lower secondary level. (See Annex: XVII & XXI).

Figure 3.17
Percentage shares of Dalit and Janajati teachers in total teachers by types of schools

(4) Teacher training

The analysis of this section presents the status of the teachers by their training status by types of schools and levels. The information related to the teacher training is the quality aspect of school education, which contributes to improve the classroom teaching learning activities and the learning efficiency of the students as well. Based on the definitions of teacher training, the following analysis on the status of teachers by training is categorized into fully trained, partially trained and untrained respectively.

Table 3.36 below shows the total number of teachers⁸ by training status and sex in the school year 2015-016 in all types of schools at primary, lower secondary and basic levels respectively. At the basic level, of the total 243,520 teachers, all together 224,012 teachers

⁸ The numbers of teachers at all levels are based on the reporting in the Flash I School Census 2015-016.

are trained, 6,747 are partially trained and 12,761 are untrained teachers. Under the basic education, out of the total 190,219 teachers at primary level, in total 180,749 are trained, 4,650 are partially trained, and 4,820 are untrained. Again, the figures by training status show that out of the total number of teachers at lower secondary level 43,263 are trained, 2,097 are partially trained and 7,941 teachers are untrained (See Annex: XIX & XXIII).

Table 3.36
Total number of teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	76,178	104,571	180,749	11905	31358	43,263	88,083	135,929	224,012
Partially trained	1,644	3,006	4,650	463	1634	2,097	2,107	4,640	6,747
Untrained	2,556	2,264	4,820	2485	5456	7,941	5,041	7,720	12,761
Total	80,378	109,841	190,219	14,853	38,448	53,301	95,231	148,289	243,520

The percentages of teachers at basic level by training status and sex are illustrated in Table 3.37 below. Based on the data of teacher training status presented in the above table 3.36, altogether 95.0%, 2.4% and 2.5% (94.4%, 2.9% and 2.6% compared to the last school year) of teachers are trained, partially trained and untrained at the primary level. Similarly, at the lower secondary level, 81.2% are trained, 3.9% are partially trained and 14.9% are untrained (whereas there were 80.6%, 4.4% and 15.1% in the last school year). Again, at the basic level, out of total number of teachers, 92.0% are trained, 2.8% are partially trained and 5.2% are untrained. The figures in the table suggest that while only 2.5% primary teachers are untrained, the situation needs enormous improvement at lower secondary level where almost 14.9% of the teachers are still untrained (See Annex: XX & XXIV).

Table 3.37
Percentage of teachers by training status (all types of schools)

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	94.8	95.2	95.0	80.2	81.6	81.2	92.5	91.7	92.0
Partially trained	2.0	2.7	2.4	3.1	4.2	3.9	2.2	3.1	2.8
Untrained	3.2	2.1	2.5	16.7	14.2	14.9	5.3	5.2	5.2

The tables 3.38 and 3.39 below show the number and percentage of teachers by training status in community schools at basic level. Out of the total 141,973 teachers at primary level 138,093 are trained, 2,687 are partially trained, and 1,193 are untrained. Similarly, the figures show that out of the total number of teachers at lower secondary level 32,870 are trained, 1,521 are partially trained and 2,694 teachers are untrained. Overall, at the basic level 170,963 teachers are trained, 4,208 are partially trained and 3,887 are untrained teachers (See Annex: XIX & XXIII).

The table 3.39 below presents the percentage of teachers in terms of training in community schools by level and sex. At the primary level in total 97.3% with 97.6% female and 97.0% male (compared to the 96.4% with 96.1% female and 95.5% male in the last school year) teachers are fully trained. Of the total teachers 1.9% teachers partially trained and 0.8% of the teachers are untrained. At lower secondary level 88.6% (83.8% in the last school year) of the teachers are trained, 4.1% are partially trained and 7.3% teachers are untrained. Similarly, at the basic level among the total number of teachers 95.5% (93.7% in the last school year) are trained, 2.4% are partially trained and 2.2% teachers are untrained. Hence, almost 96.0% of the teachers in community schools at basic level, with 97.3% at primary and 88.6% at lower

secondary level are trained in the current school year (See Annex: XX & XXIV). This also shows the significant improvement in the capacity development of the teacher, while there are still needs of efforts for the lower secondary levels' teachers.

Table 3.38
Number of community schools' teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	53,234	84,859	138,093	6872	25998	32,870	60,106	110,857	170,963
Partially trained	867	1,820	2,687	287	1234	1,521	1,154	3,054	4,208
Untrained	421	772	1,193	609	2085	2,694	1,030	2,857	3,887
Total	54,522	87,451	141,973	7,768	29,317	37,085	62,290	116,768	179,058

Table 3.39
Percentage of community schools' teachers by training status

Training status	Primary			Lower secondary			Basic		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	97.6	97.0	97.3	88.5	88.7	88.6	96.5	94.9	95.5
Partially trained	1.6	2.1	1.9	3.7	4.2	4.1	1.9	2.6	2.4
Untrained	0.8	0.9	0.8	7.8	7.1	7.3	1.7	2.4	2.2

(5) Student Teacher Ratios

This section deals with the Student Teacher Ratios (STRs) at basic level by types and levels of schools. This indicator is used to measure the level of human resources input in terms of number of teachers in relation to the size of the student/pupil population. It is normally used to compare with established national norms on the number of pupils per teacher for each level or type of school education. It is one of the most common indicators used in the educational planning for the projection of teachers required.

(5)-1 Student Teacher Ratio in all types of schools

Table 3.40 and figure 3.18 below present the STR⁹ for all types of schools by eco-belts and levels in the school year 2015-016 at basic level. On average the STR at primary level is 22:1, at lower secondary level 35:1 and at the basic level 25:1 (Compared to 23:1 at primary level, 35:1, at lower secondary level 26:1 and at the basic level in the previous school year). The highest STR at primary level is found in the Terai eco-belt with 32:1 while the lowest is in the Valley by 17:1. Similarly, at the lower secondary level the highest STR is in the Terai belt at 48:1 and the lowest is in the Valley at 19:1.

Likewise, at the basic level, the highest STR is in Terai (36:1) and the lowest is in the Valley (18:1). Hence, although the Student Teacher Ratio at all levels has decreased by almost 1%, as in previous years, the analysis shows that more crowded classes are observed in the Terai belt at all levels than in other eco-belts. It is worth mentioning that the STRs, at the primary and basic levels have decreased in the current school year (See Annex XXVII), necessitating

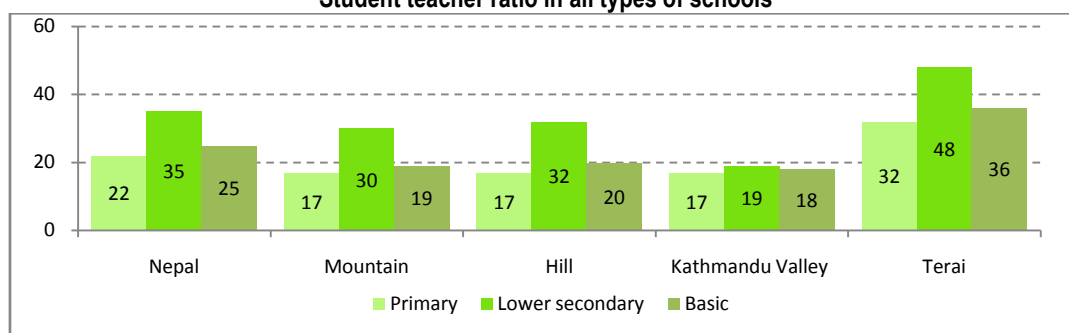

⁹ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2014-015.

the need to consider data based reform in policy/legal provision with regard to STR at all levels of school education post-2015.

Table 3.40
Student teacher ratio in all types of schools by level

Eco-belts	Primary	Lower secondary	Basic
Mountain	17	30	19
Hill	17	32	20
Valley	17	19	18
Terai	32	48	36
Total	22	35	25

Figure 3.18
Student teacher ratio in all types of schools

(5)-2 Student Teacher Ratios in community schools

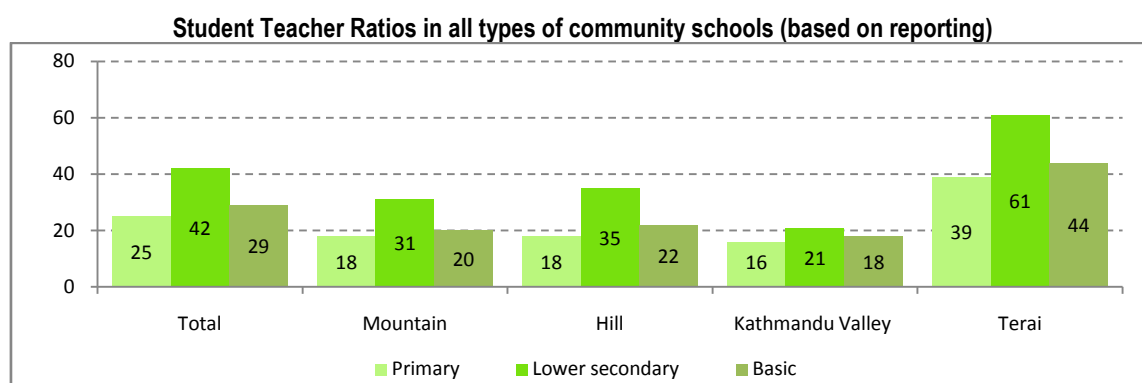

The table 3.41 and figure 3.19 below show the STRs by eco-belts for all types of community schools based on the reported number of all types of teachers (i.e. teachers working in the approved positions, Rahat Teachers and teachers hired by the community). On average, the STR in community schools is 25:1 at primary, 42:1 at lower secondary, and 29:1 at basic level (Compared to 26:1 at primary, 42:1 at lower secondary, and 30:1 at basic level in the previous school year). Even in the context of community schools the STR needs to be considered seriously taking into account to provide quality basic education to all, especially to the children from disadvantaged communities.

At the primary level the highest STR (39:1) is in the Terai eco-belt and the lowest (16:1) is in the Valley. Similarly, at both lower secondary and basic levels, the highest STR is observed in the Terai belt and the lowest one is in the Valley. The data reveals that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.40) and that the highest STR is in the Terai belt and the lowest STR is in the Valley (Table 3.41) at all levels of schools in both scenarios (See Annex XXVIII).

Table 3.41
Student Teacher Ratios in all types of community schools (based on reporting)

Eco-belts	Primary	Lower secondary	Basic
Mountain	18	31	20
Hill	18	35	22
Valley	16	21	18
Terai	39	61	44
Total	25	42	29

Figure 3.19

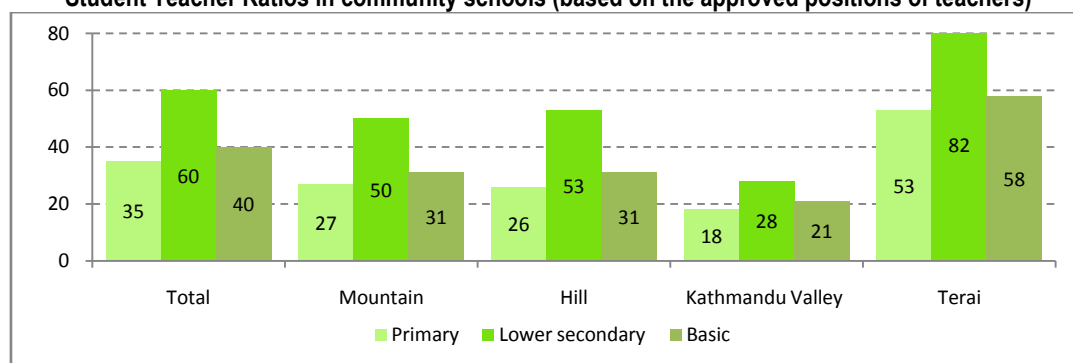

(5)-3 Student Teacher Ratios in community schools based on the approved teacher positions

Table 3.42 and figure 3.20 below show the STR for all types of community schools based on the approved positions and Rahat teachers by levels in the school year 2015-016. On average, the STRs at primary, lower secondary and basic levels are 35:1, 60:1 and 40:1 (Compared to 36:1, 60:1 and 41:1 in the previous school year) respectively. It shows there is a slight decrease in primary level and for the lower secondary level it has remained same as in the previous school years. The Terai belt shows the highest STR 53:1; 82:1; and 58:1 at primary, lower secondary and basic levels, whereas the lowest STR 18:1, 28:1 and 21:1 is found in the Valley at all levels. At the basic level it further illustrates that there are 26 districts (most of these districts are in the Terai belt) with a higher STR than the national average (See Annex XXVIII).

Table 3.42
Student Teacher Ratios in community schools (based on the approved positions of teachers)

Eco-belts	Primary	Lower secondary	Basic
Mountain	27	50	31
Hill	26	53	31
Valley	18	28	21
Terai	53	82	58
Total	35	60	40

Figure 3.20
Student Teacher Ratios in community schools (based on the approved positions of teachers)

Since the community contribution has been plaid a central role in the management of the community schools at the local level, the government has been supported to the community

schools based on the available envelop of the funds. Basically, those are non-salary and salary funds based on the existing status of the schools, students, teachers and the physical status of the schools. Since last 7 years, the government has been provided the salary PCF funds to the schools where the required number of teachers are not available. Though this support mechanism is temporary in nature, in this context, if we calculate the teacher number based on the current PCF salary fund and add into the existing number of teachers, the scenarios of the STRs (table 3.42) will be changed.

For example: in the current Fiscal Year the DOE has allocated the PCF salary fund to the DEOs/schools, which is equivalent to 5095 teachers (i.e. PCF equivalent to 408 teachers, 3,113 teachers and 1,574 teachers for primary, lower secondary and secondary level respectively). Hence, if we add the PCF salary as number of teachers then the STR (Table 3.42) 35:1 will be at primary level, 54:1 will be at the lower secondary level and 36:1 will be at the secondary level respectively. Overall, the analysis by district shows that there is a need of further efforts to revisit the status of the schools as mentioned in the analysis of the Student School Ratio.

3.3 Secondary Education

This section deals with information regarding secondary education (grade 9-12), with disaggregated information with regard to secondary and higher secondary levels in the school year 2015-016. In this report the secondary level refers to Grades 9-10 and the higher secondary level refers to Grades 11-12. In view of the school restructuring as envisaged in the SSRP 2009-2015, a comprehensive secondary education level refers to Grades 9 to 12.

3.3.1 Number of schools

The Table 3.43 and the figures 3.21 and 3.22 below present the distribution of secondary level (Grades 9-12) schools by eco-belt functioning throughout the country in the school year 2015-016. As stated in the basic level section, the total number of schools is 34,837. Of the total schools, 802 secondary with 320 higher secondary levels are in the Mountain belt, 3,937 secondary level with 1,628 higher secondary levels are in the Hilly belt, 1,360 secondary with 438 higher secondary levels are in the Valley and 2,869 secondary with 1,270 higher secondary levels are in the Terai belt.

Among the total schools, the highest numbers of secondary schools are concentrated in Hill, whereas the thinly populated Mountain belt has the lowest number of secondary school levels (See Annex: III_A). The figures 3.21 and 3.22 further elaborate the distribution of schools by eco-belt in number and their percentage in the total number of schools.

Table 3.43
Distribution of schools by eco-belts by units at secondary level

Eco-belts	Total School (Units)	Secondary level (Grades 9-10)	Higher secondary level (Grades 11-12)	Secondary level (Grades 9-12)
Mountain	4,222	802	320	809
Hill	17,571	3,937	1,628	3,988
Valley	2,200	1,360	438	1,479
Terai	10,844	2,869	1,270	2,987
Total	34,837	8,968	3,656	9,263

Figure 3.21
Distribution of schools by eco-belts at secondary level

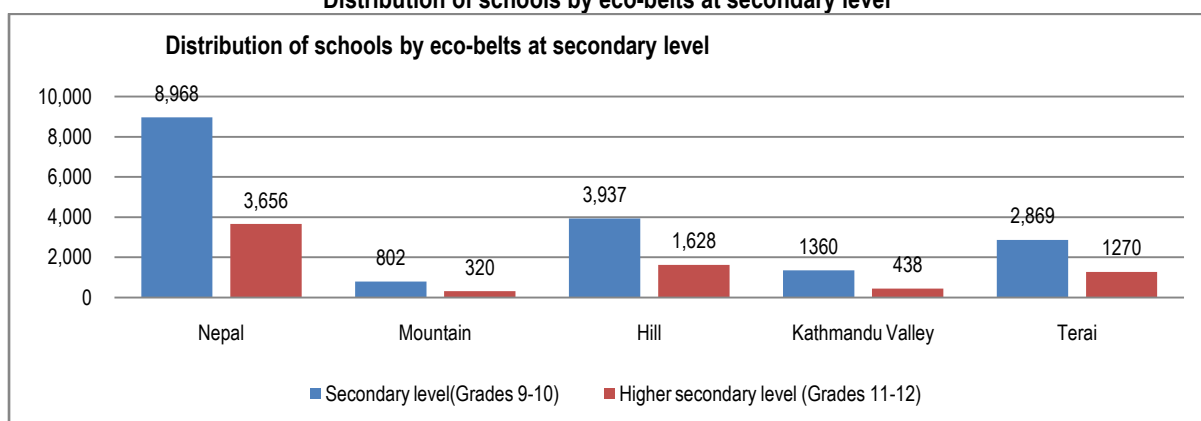

Figure 3.22
Percentage distribution of schools by eco-belts at secondary level

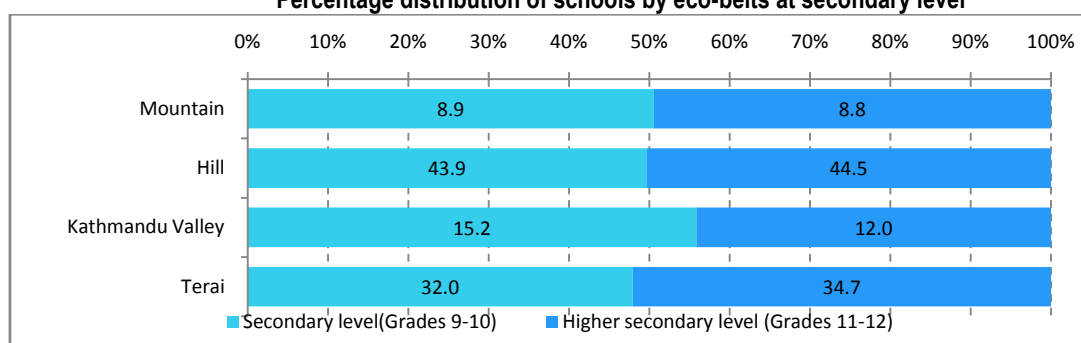

Table 3.44
Distribution of schools by unit (running by grades) at secondary level

Grade	Number of schools
1-9	342
1-10	5,216
1-11	63
1-12	3,183
6-9	1
6-10	45
6-11	0
6-12	113
9-10	3
9-11	0
9-12	2
11-12	295
Total	9,263

Table 3.44 above explains the distribution of schools running by grades in the school year 2015-016. Currently, none of the schools are running with Grades 6-11 and 9-11 at the secondary level. In total, 9,263 secondary schools are running throughout the country, with including 3,656 higher secondary grades (See Annex: III_A).

Table 3.45 below explains the distribution of schools, excluding religious schools, by types and levels of schools in the school year 2015-016. At secondary level, out of the total 8,945 secondary levels, 6,140 are community and 2,805 are institutional school levels. Similarly, at higher secondary level, out of the total 3,650 school levels, 2,698 are community school levels and 952 are institutional schools. Likewise, among 9,240 secondary (Grades 9-12) levels 6,140 are under community and 3,100 are under the institutional management (See Annex: III_A, B & C).

Table 3.45
Distribution of schools by levels (Excluding religious schools) at secondary level

Level	Community	Institutional	Total
Secondary (9-10) level	6,140	2,805	8,945
Higher secondary (11-12) level	2,698	952	3,650
Secondary (9-12) level	6,140	3,100	9,240

Table 3.46 below shows the number of religious schools by types and levels. A total of 23 secondary levels (grade 9-10) of religious schools are reported in the School Census 2015-

016. Of them, at secondary level 14 are Madarasas and 8 are Ashram/Gurukul, whereas 1 of the Gumbas/Vihars was reported at secondary level. Of the total, at higher secondary level 6 religious types of schools (4 Madarasas and 2 Ashram/Gurukul) were reported. Mostly, while the Madarasa schools are in the Terai eco-belt, the Gumbas/Vihars schools are in Hill and Mountain eco-belts (See Annex: IV_A-C).

Table 3.46
Distribution of religious schools by units and levels at secondary level

Religious Schools	Total number of schools (in Unit)	Number of school by level		
		Secondary	Higher secondary	Secondary
Madarasa	765	14	4	14
Gumba/Vihar	82	1	0	1
Ashram/Gurukul	83	8	2	8
Total	930	23	6	23

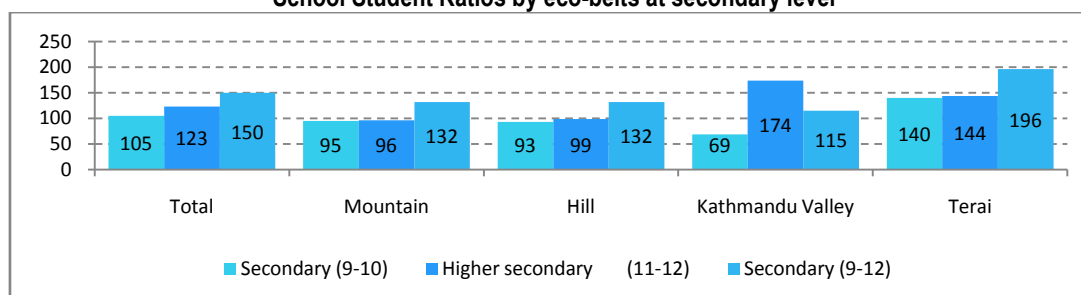

Table 3.47 and figure 3.23 below show the Student School Ratios by levels and eco-belts at the secondary level in the school year 2015-016. The national average of secondary level (Grade 9-10) School Student Ratio is 1:105 (Compared to 1:102 in the last school year). That is, on average, a secondary level is serving 105 students, which is slightly higher than the last school year. Similarly, the ratio at higher secondary level is 1:123 (compared to 1:116 in the last school year) and at secondary (Grades 9-12) as a whole it is 1:150 (compared to 1:145 in the last school year), shows there are changes of school student ratio in the higher secondary and secondary (grades 9-12) levels in the current school year (See Annex: V).

When analyzed by the eco-belt, the highest School Student Ratio is found in the Terai eco-belt at the secondary level (1:140), which is higher than the national average (1:105). The lowest School Student Ratio is found in the Valley at secondary (1:69) but highest at higher secondary (1:174) levels. This shows that schools in Terai and Valley are crowded in secondary and higher secondary levels, therefore, need ample attention for adequate facilities, including teachers, space, classrooms, furniture, laboratories, libraries, playgrounds, equipment etc.(See Annex: V).

Table 3.47
School Student Ratios by eco-belts at secondary level

Eco-belts	Secondary (9-10)	Higher secondary (11-12)	Secondary (9-12)
Mountain	95	96	132
Hill	93	99	132
Valley	69	174	115
Terai	140	144	196
Total	105	123	150

Figure 3.23
School Student Ratios by eco-belts at secondary level

3.3.2 Enrolment

This section cover the information on enrolment by types of schools, gender, casts/ethnicities, disabilities and enrolment-related indicators at secondary, higher secondary and secondary (Grades 9-12) levels.

(1) Total number of enrolment at secondary level

Table 3.48 below shows the total enrolment at secondary and higher secondary levels in the beginning of the school year 2015-016. The enrolment at secondary level is 938,897 which is higher than the total enrolment (900,585) in the previous school year 2014-015, whereas the enrolment at the higher secondary level in the current school year is 450,753¹⁰ (416,995 in the previous school year).

When the data are analyzed from the gender perspective, the share of girls in total enrolment at the secondary level (grades 9-10) is 50.9% (51.0% in the previous school year), whereas it is 50.7% (50.7% in the previous school year) at the higher secondary and 50.8% (50.9% in the previous school year) at secondary level (grades 9-12) (See Annex: XXX). The share of girls at secondary level is the higher than the share of boys in the secondary school education. The grade wise share in the total of secondary level (9-12) shows there is very narrow gap between grade 9-10 and 11-12 and also the share of higher secondary level is almost half of the secondary level (grade 9-10).

Overall the enrolment in both levels of secondary education is higher than in the previous school year. The district level analysis presents that, though the number of students has increased in the current school year, as stated in the analysis of basic education the districts affected by the earthquake have experience a decreased in enrolment. However, the districts in Valley eco-belt, Kavrepalanchok and Cthitwan show a high enrollment due to the in-migration of the students from other districts.

Table 3.48
Total number of enrolment at secondary level

Grade/level	Girls	Boys	Total	% of Girls	Grade wise share by level	Grade wise at secondary level (grade 9-12)
Grade 9	261,598	250,436	512,034	51.1	54.5	36.8
Grade 10	216,570	210,293	426,863	50.7	45.5	30.7
Secondary level (grade 9-10)	478,168	460,729	938,897	50.9	100.0	67.6
Grade 11	112,955	112,325	225,280	50.1	50.0	16.2
Grade 12	115,395	110,078	225,473	51.2	50.0	16.2
Higher Secondary level (grade 11-12)	228,350	222,403	450,753	50.7	100.0	32.4
Total of Secondary level (grade 9-12)	706,518	683,132	1,389,650	50.8	-	100.0

¹⁰ The number of enrolment is presented based on the reported number of higher secondary levels.

Tables 3.49 and 3.50 below show the numbers and shares of Dalit and Janajati enrolment in the total enrolment at the secondary level in the school year 2015-016. On average, the share of Dalit enrolment in the total enrolment at the secondary level (grade 9-10) is 11.0%; and 6.6% at the higher secondary level, which are almost similar to the previous school year (See Annex: XXX & XXXI). Although it has remained invariable, comparing to their share in population it is a satisfactory achievement, which needs to be sustained and continuously improved, contributing towards their increased participation in tertiary education.

Table 3.50 presents the total enrolment (360,924) of Janajati students at the secondary level (grade 9-10) in the school year 2015-016, which is 38.4% of the total enrolment (See Annexes: XXX & XXXII). Likewise, the enrolment of Janajati students at the higher secondary level (grade 11-12) is 131,962 in the school year 2015-016, which is 29.3% of the total enrolment at this level. The overall share of Janajati in the total enrolment at the secondary level (Grades 9-12) is 35.5%.

Regarding the participation and share of girls in secondary education, dalit girls with 48.5% at comprehensive secondary level (grade 9-12) are a little behind their boys counterparts. However, Janajati girls with their 53.0% share in secondary education are much ahead of janajati boys. Here the shares of Dalit and Janajati girls have increased in both levels of secondary education in the current school year.

(2) Total number of Dalit and Janajati enrolment at secondary level

Table 3.49
Dalit enrolment at secondary level

Grade/level	Girls	Boys	Total	% of Girls	Grade and level wise share in total enrolment
Grade 9	29,491	30,035	59,526	49.5	11.6
Grade 10	21,236	22,630	43,866	48.4	10.3
Secondary level (grade 9-10)	50,727	52,665	103,392	49.1	11.0
Grade 11	7,061	8,109	15,170	46.5	6.7
Grade 12	6,787	7,826	14,613	46.4	6.5
Higher Secondary level (grade 11-12)	13,848	15,935	29,783	46.5	6.6
Total of Secondary level (grade 9-12)	64,575	68,600	133,175	48.5	9.6

Table 3.50
Janajati enrolment at secondary level

Grade/level	Girls	Boys	Total	% of Girls	Grade and level wise share in total enrolment
Grade 9	105,218	93,121	198,339	53.0	38.7
Grade 10	86,259	76,326	162,585	53.1	38.1
Secondary level (grade 9-10)	191,477	169,447	360,924	53.1	38.4
Grade 11	35,175	32,269	67,444	52.2	29.9
Grade 12	34,528	29,990	64,518	53.5	28.6
Higher Secondary level (grade 11-12)	69,703	62,259	131,962	52.8	29.3
Total of Secondary level (grade 9-12)	261,180	231,706	492,886	53.0	35.5

(3) Total number of enrolment at secondary level by school types

Tables 3.51, 3.52, 3.53 and the figure 3.24 below show total enrolments, the percentage of enrolment by types of schools in total enrolment and the grade wise share of girls and boys in the total enrolment at secondary and higher secondary levels in the school year 2015-016. At the secondary level (grade 9-10), of the total 938,897 students reported in the Flash I, 2015-016, in total 80.7% (compared to 80.9% in the previous school year) students are in all types of community schools and the remaining 19.3% (Compared to 19.1% in the last school year) are in institutional schools. Compared to the last school year 2014-15, the share of enrolments in institutional schools has slightly increased in the current school year at the secondary level.

At the higher secondary level, of the total 450,753 students, 71.0% (Compared to 71.1% in the previous school year) are in all types of community schools and the rest (29.0%) are in institutional schools, which shows that the number of students enrolled in institutional schools has slightly decreased in the current school year. The data also reveal that the shares of girls in all types of community schools are higher than the shares of boys at both levels (See Annexes: XXX, XXXIII & XXXIV). The figure 3.24 provides information with respect to the share of enrolment by types of schools. As elucidated earlier, the shares of girls are considerably lower in institutional schools compared to the shares of enrolment in community schools in the current school year. The percentage of girls in institutional schools is 43.8% at the secondary level which is lower than in the previous school year, 44.2% at the higher secondary level and 43.9% at the comprehensive secondary level. On the contrary, both the percentage of girls and GPI are higher in community schools, which indicate the different attitude of parents on the choice of school education for their girls and boys children (See Annex: XXX, XXXIII & XXXIV).

Table 3.51
Enrolment in Institutional schools at secondary and higher secondary levels

Grade/level	Girls	Boys	Total	% of Girls	Grade wise share in total enrolment
Grade 9	40,700	52,669	93,369	43.6	18.2
Grade 10	38,569	49,239	87,808	43.9	20.6
Secondary level (grade 9-10)	79,269	101,908	181,177	43.8	19.3
Grade 11	29,091	37,180	66,271	43.9	29.4
Grade 12	28,628	35,679	64,307	44.5	28.5
Higher Secondary level (grade 11-12)	57,719	72,859	130,578	44.2	29.0
Total of Secondary level (grade 9-12)	136,988	174,767	311,755	43.9	22.4

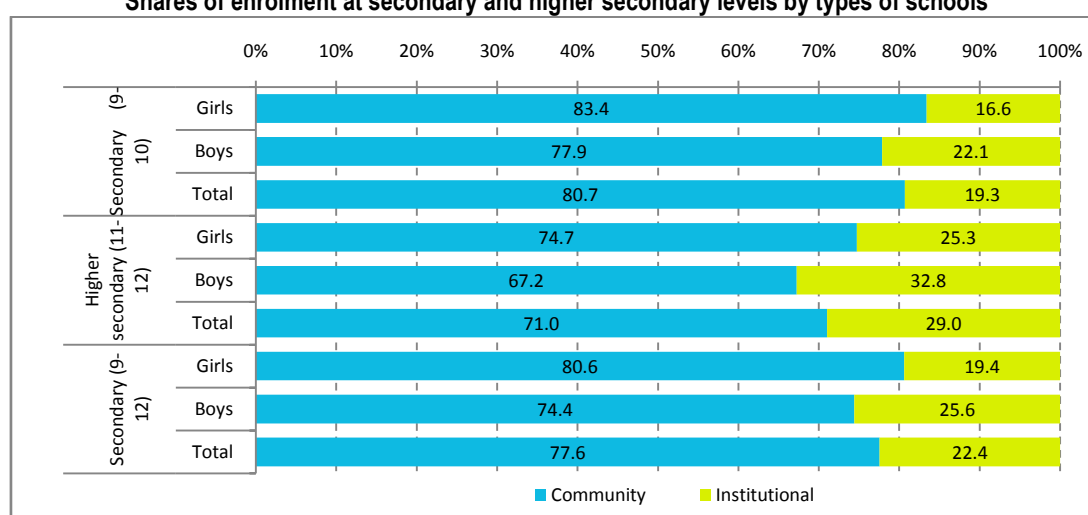

Table 3.52
Enrolment in Community schools at secondary and higher secondary levels

Grade/level	Girls	Boys	Total	% of Girls	Grade wise share in total enrolment
Grade 9	220,898	197,767	418,665	52.8	81.8
Grade 10	178,001	161,054	339,055	52.5	79.4
Secondary level (grade 9-10)	398,899	358,821	757,720	52.6	80.7
Grade 11	83,864	75,145	159,009	52.7	70.6
Grade 12	86,767	74,399	161,166	53.8	71.5
Higher Secondary level (grade 11-12)	170,631	149,544	320,175	53.3	71.0
Total of Secondary level (grade 9-12)	569,530	508,365	1,077,895	52.8	77.6

Table 3.53
Percentage of Girls and Boys in total enrolments by types of schools and levels

Grade/level	Total Schools			Community schools			Institutional schools		
	Girls %	Boys %	GPI	Girls %	Boys %	GPI	Girls %	Boys %	GPI
Grade 9	51.1	48.9	1.04	52.8	47.2	1.12	43.6	56.4	0.77
Grade 10	50.7	49.3	1.03	52.5	47.5	1.11	43.9	56.1	0.78
Secondary level (grade 9-10)	50.9	49.1	1.04	52.6	47.4	1.11	43.8	56.2	0.78
Grade 11	50.1	49.9	1.01	52.7	47.3	1.12	43.9	56.1	0.78
Grade 12	51.2	48.8	1.05	53.8	46.2	1.17	44.5	55.5	0.80
Higher Secondary level (grade 11-12)	50.7	49.3	1.03	53.3	46.7	1.14	44.2	55.8	0.79
Total of Secondary level (grade 9-12)	50.8	49.2	1.03	52.8	47.2	1.12	43.9	56.1	0.78

Figure 3.24
Shares of enrolment at secondary and higher secondary levels by types of schools

(4) Enrolment at secondary level by disadvantaged Janajati

Tables 3.54_A and 3.54_B below show the status of disadvantaged Janajati students at the secondary level (grades 9-12) and higher secondary levels. Based on the classification of 59 Janajati into 5 categories by the Nepal Adibasi Janajati Maha Sangha in 2003 (2060), the DOE has continued to capture the enrolment data of following 22 ethnic groups, who are classified as extremely deprived categories (See Annex: XXXVI).

In total, there are 15,389 students (i.e., 1.64% in the total enrolment) at the secondary level from the following groups/castes studying in the current school year 2015-016. The number of student from the following castes/ethnicities has slightly decreased than in the previous school year. From the gender point of view, it shows that the participation of girls from these groups (i.e. girls 8,182 compared to boys 7,207) in secondary education is 53.2% points.

Likewise, the following table 3.54_B presents in total, there are 2,859 students (i.e., 0.63% in the total enrolment) at the higher secondary level from the following groups/castes studying in the current school year 2015-016. Of the total students of the 22 casts/ethnicities, it shows the participation of girls (i.e. girls 1,383 compared to boys 1,476) in higher secondary education is 48.4% points, which is lower than in the secondary level.

Table 3.54_A
Total number of enrolment by extremely disadvantaged Janajati in Grades 9-10 (Secondary level)

Janajati/Castes	Girls	Boys	Total	% in total enrolment	Janajati/Castes	Girls	Boys	Total	% in total enrolment

(5) Enrolment by major types of disabilities at secondary level

Table 3.55 below shows the status of students with disabilities¹¹ at both secondary and higher secondary levels in the school year 2015-016. Overall share of the students with disabilities at secondary and higher secondary levels are 0.74% and 0.53% respectively in the total enrolment. When taken as a whole, the percentage of students at the secondary level (Grades 9-12) with disabilities is 0.68%. Out of the total 6,992 students with disabilities at secondary level, 0.34% students have physical (affecting mobility) disability, 0.10% is intellectually

¹¹ The Nepal Living Standards Survey III, 2010-2011 includes these types of disabilities – physical, visual, hearing, hearing and seeing, speaking, mental and multiple disabilities. Overall, 3.6 percent of people have some kind of disability. The disability rates for males and females are 4.2 percent and 3.0 percent respectively. Of all persons with some kind of disability, 29.2 percent are physically disabled, 22.3 percent have visual related disability, 23.4 percent hearing related disability, 2.4 percent vision/hearing related disability, 8.6 percent speech related disability, 6.8 percent mentally retarded and 7.3 percent have multiple disability.

impaired, 0.09% is hearing impaired, 0.02% is visually impaired, 0.12% has low vision, 0.01% is hearing and visually impaired and 0.06% has vocal and speech-related disability. Similarly, of the total 2,403 students with disabilities at the higher secondary level, 0.15% students have physical (affecting mobility) disability, 0.02% is intellectually impaired, 0.03% is hearing impaired, 0.01% is visually impaired, 0.03% has low vision, 0.01% is hearing and visually impaired and 0.28 has vocal and speech-related disability. Of the total students at the secondary level (Grades: 9-12), 0.68% (i.e., 9,395) of the students are with all types of disability (See Annex: XXXVIII & XXXIX).

Table 3.55
Total number of students by major types of disabilities at secondary level

Level		Types of disabilities							Total Disabled
		Physical (affecting mobility)	Intellectually impaired	Hearing impaired	Visually impaired	Low Vision	Hearing and Visually impaired	Vocal and speech related disabilities	
Secondary (9-10)	Girls	1,581	403	429	80	608	65	259	3,425
	Boys	1,642	496	444	86	526	69	304	3,567
	Total	3,223	899	873	166	1,134	134	563	6,992
	% in total enrolment	0.34	0.10	0.09	0.02	0.12	0.01	0.06	0.74
Higher secondary (11-12)	Girls	341	37	74	25	79	15	621	1,192
	Boys	336	50	79	25	76	10	635	1,211
	Total	677	87	153	50	155	25	1,256	2,403
	% in total enrolment	0.15	0.02	0.03	0.01	0.03	0.01	0.28	0.53
Secondary (9-12)	Girls	1,922	440	503	105	687	80	880	4,617
	Boys	1,978	546	523	111	602	79	939	4,778
	Total	3,900	986	1,026	216	1,289	159	1,819	9,395
	% in total enrolment	0.28	0.07	0.07	0.02	0.09	0.01	0.13	0.68

6) Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level

The table 3.56 and the figures 3.25 and 3.26 below show the GER and NER at secondary and higher secondary levels in the school year 2015-016. At secondary level, on average, the GER is 75.1% ¹²(Same as to 75.1% in the previous school year), of this 74.7% GER is for girls and 75.5% GER is for boys. Likewise, the average NER at secondary level is 57.9% (Compared to 56.1% in the previous school year), of this 57.3% is for girls and 58.6% is for boys. The NER suggests that, based on the 13-14 age group students enrolled at secondary

¹² 12) The district-wise single age group population calculated for both GER and NER in 2015-016 is based on the data received from the CBS on the new National Population Census 2011.

12) Populations, used in the calculation of enrolment rates in all Flash Reports, are based on the National Population Census Reports and the projected population by the CBS. In this regard, for the calculation of both GER and NER up to the Flash I Report 2012/013 the school age population was used based on the Population Projection for Nepal 2001-2021 publication, jointly published by the Central Bureau of Statistics (CBS) and the Ministry of Population and Environment (MOPE) in the year 2003. Compared to the projected population used up to 2012/013, the projected population based on the National Population Census 2011, shows increasing trends with regard to the population of the age group 13-14 and 15-16. Hence, the fluctuations in the enrolment rates depend on the increasing and decreasing trends of the respective age group population.

level in the school year 2015-016, a big number of secondary age group population is out of school or enrolled as overage students at the lower secondary level.

Similarly, the average GER at the higher secondary level is 37.6% (Compared to 32.9% of the previous school year), of this 37.6% is for girls and 37.6% is for boys. Also, the NER at the higher secondary level is 16.6% (Compared to 13.1% of the previous school year); of this 16.9% NER is for girls and 16.4% NER is for boys. Thus, the data illustrate that more attention needs to be paid to enhance the efficiency of basic education and expand the opportunities of education for secondary and higher secondary level school going age group population. It is worth-mentioning here that a very narrow gender gap is noticed between girls and boys at secondary and higher secondary levels with respect to NER. Compared to the status of the previous school year at the secondary and higher secondary levels, both the enrolment rates - GER and NER have increased significantly in the current school year (See Annex: XIII & XIV). In this respect, figures 3.25 and 3.26 present the status of GER and NER by levels in the school year 2015-016.

Moreover, the GPIs in GER by level are 0.99 at secondary level, 1.00 at higher secondary level and 1.00 at secondary level. Likewise, the GPIs in NER by level are 0.98 at secondary level, 1.03 at higher secondary level and 0.99 at secondary level, which show the participations of girls and boys at all levels are equal in both the Gross and Net enrolment and the Gender Parity Index at all levels is achieved.

Table 3.56
Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) at secondary level

Level	GER				NER			
	Girls	Boys	Total	GPI	Girls	Boys	Total	GPI
Secondary (9-10)	74.7	75.5	75.1	0.99	57.3	58.6	57.9	0.98
Higher secondary (11-12)	37.6	37.6	37.6	1.00	16.9	16.4	16.6	1.03
Secondary (9-12)	56.6	56.8	56.7	1.00	37.6	37.8	37.7	0.99

Figure 3.25
Gross Enrolment Rate (GER) at secondary level

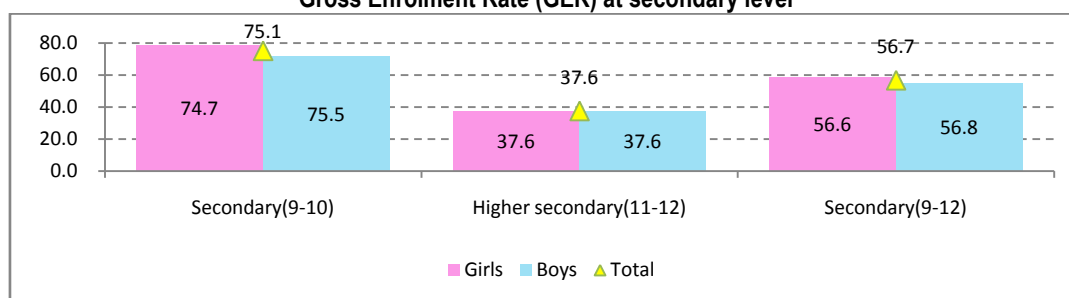

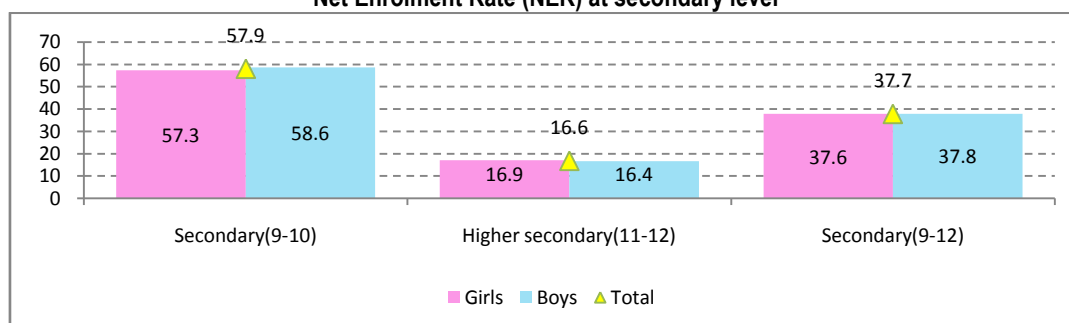

Figure 3.26
Net Enrolment Rate (NER) at secondary level

3.3.3 Teachers' information at secondary, higher secondary and secondary levels

This section contains information on teachers at secondary, higher secondary and secondary (grade 9-12) levels by school types, levels, sex and other indicators related to teachers.

(1) Distribution of teachers by sex at secondary, higher secondary and secondary levels

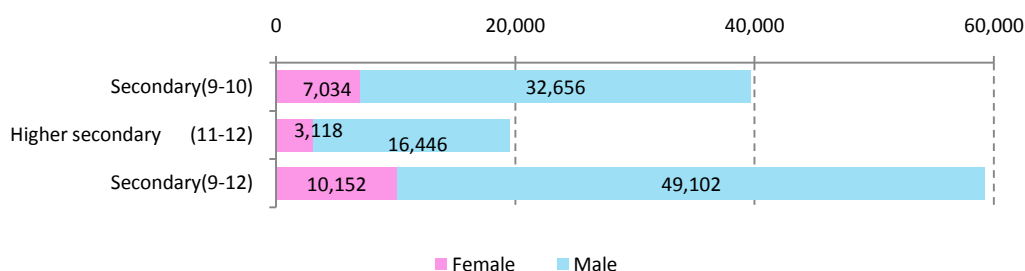

The table 3.57 and figure 3.27, below, show the total numbers of teachers (Teachers working in the approved positions, Rahat teachers, teachers hired by the community in community schools and teachers working in institutional schools) reported at secondary, higher secondary and secondary levels in the Flash I school census 2015-016. In total, there are 39,690 teachers at secondary level, 19,564 teachers are at higher secondary level and altogether 59,254 teachers are in the secondary level (Grades 9-12). Of them, the numbers of female teachers are 7034; 3,118 and 10,152 respectively at secondary, higher secondary and secondary (Grades 9-12) levels.

The shares of female participation in total number of teachers are 17.7%; 15.9% and 17.1% at secondary, higher secondary and secondary level respectively. It shows a slight increment in the share of female teachers at secondary level compared to the previous school year (See Annex: XXI).

Table 3.57
Distribution of total teachers at secondary level (based on reporting)

Level	Female	Male	Total
Secondary (9-10)	7,034	32,656	39,690
Higher secondary (11-12)	3,118	16,446	19,564
Secondary (9-12)	10,152	49,102	59,254

Figure 3.27
Distribution of total teachers at secondary level (based on reporting)

Out of the total number of teachers (Table 3.57), the table 3.58 below depicts the number of teachers in institutional schools, wherein the total 15,357; 4,323 and 19,680 teachers were reported at secondary, higher secondary and secondary levels in the Flash I, 2015-016. The percentages of female teachers in total number of teachers at secondary, higher secondary and secondary levels are 23.4%, 13.8% and 21.3% respectively, which are higher than the percentage of female teachers in the total and community schools (See Annex: XXII).

Table 3.58
Number of teachers in institutional schools by levels (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	3,596	11,761	15,357
Higher secondary(11-12)	598	3,725	4,323
Secondary(9-12)	4,194	15,486	19,680

Likewise, the table 3.59 below shows the number of teachers reported in the Flash I, 2015-016 school census in all types of community schools. The numbers of teachers given in the table are based on reporting in the Flash I, 2015-016 school census, which include all types of teachers (i.e. teachers working in the approved positions, Rahat teachers and teachers appointed by the community from their own sources).

In total 24,334 with 3,438 female, 15,241 with 2,520 female and 39,575 with 5,958 female teachers were reported at secondary, higher secondary and secondary (Grades 9-12) levels in the Flash I, 2015-016 school census. Out of total, the percentages of female teachers are 14.1%, 16.5% and 15.1% (compared to 13.9%, 16.4% and 14.9% in the last school year) at secondary, higher secondary and secondary levels respectively. The share of female teachers has slightly increased at all levels of the secondary education as compared to the previous school year (See Annex: XXII).

Table 3.59
Distribution of teachers in all types of community schools at secondary level (based on reporting)

Level	Female	Male	Total
Secondary(9-10)	3,438	20,896	24,334
Higher secondary(11-12)	2,520	12,721	15,241
Secondary(9-12)	5,958	33,617	39,575

Table 3.60 below provides the number of teachers in all types of community schools based on the number of teachers working in the approved number of positions and Rahat quotas by levels. Overall, there are 19,584 with 3,003 (15.3%) female teachers at the secondary level, 5,773 teachers with 496 female teachers at the higher secondary level and altogether 25,357 teachers at the total secondary (Grades 9-12) level working in the current school year (See Annex: XXIX). Compared to the number of community higher secondary level and the students enrolled in the community higher secondary level, the number of teacher is very low in this level. Till the school year 2072 in total there are 1,922 approved positions and 3,851 Rahat quota teachers supported by the government to the higher secondary level community schools.

Table 3.60
Number of teachers in all types of community schools by levels (based on approved positions)

Level	Female ¹³	Male	Total
Secondary(9-10)	3,003	16,581	19,584
Higher secondary(11-12)	496	5,277	5,773
Secondary(9-12)	3,499	21,858	25,357

(2) Percentages of teachers and the gender parity indexes in all types of schools by levels

Tables 3.61 and 3.62 below demonstrate the percentage of teachers by sex and GPI at secondary, higher secondary and secondary levels by types and levels of schools based on the reporting in the Flash I, 2015-016 school census. The overall GPI in total number of teachers

¹³ The numbers of female teachers are presented based on the reporting of community schools working in the approved positions and Rahat Quotas.

is 0.22 at secondary level, 0.19 at higher secondary and 0.21 at secondary level respectively. Moreover, a slightly different situation of GPI is found in the shares of female teachers in total number of teachers in community schools (table: 3.59). Compared to the GPIs at primary, lower secondary and basic levels, the GPI at secondary and higher secondary levels are considerably low. This shows the need of greater equity with regard to the participation of females in teaching profession at secondary level.

Table 3.61
Percentage shares of teachers in all types of schools at secondary level

Level	Female	Male	GPI
Secondary(9-10)	17.7	82.3	0.22
Higher secondary(11-12)	15.9	84.1	0.19
Secondary(9-12)	17.1	82.9	0.21

Table 3.62
Percentage shares of teachers in all types of community schools at secondary level

Level	Female	Male	GPI
Secondary(9-10)	14.1	85.9	0.16
Higher secondary(11-12)	16.5	83.5	0.20
Secondary(9-12)	15.1	84.9	0.18

(3) Percentage of Dalit and Janajati teachers

Table 3.63
Shares of Dalit and Janajati teachers in total teachers in all types of schools

Social group	Secondary			Higher secondary			Secondary		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Dalit	5.3	4.4	4.6	3.2	3.5	3.5	4.7	4.1	4.2
Janajati	17.1	18.8	18.5	17.5	13.3	14.0	17.2	17.0	17.0

Figure 3.28
Percentage of Dalit, Janajati teachers in total teachers at secondary level

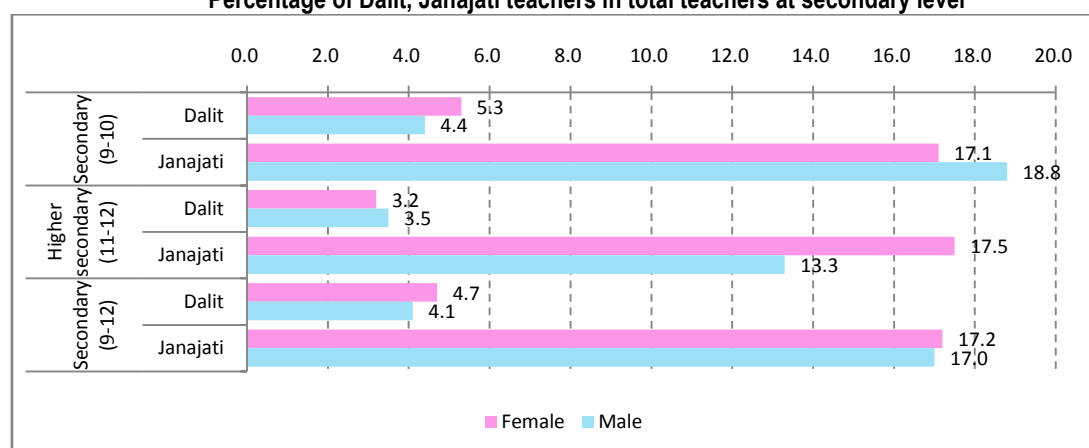

Table 3.63 and figure 3.28 above present the shares of teachers by social groups (Dalit and Janajati) and gender in total number of teachers at secondary level. The shares of Dalit teachers at secondary, higher secondary and secondary (Grades 9-12) levels are 4.6% (4.4 in the last school year); 3.5% (3.4% in the last school year) and 4.2% (4.1% in the last school year) respectively. Likewise, the shares of Janajati teachers at secondary level are 18.5%

(18.3% in the last school year), with 14.0% (13.8% in the last school year) at higher secondary level and 17.0% (16.8% in the last school year) at the secondary (Grades 9-12) level. Compared to the figures of the last school year, shares of both Dalit and Janajati teachers have slightly increased at all levels of the secondary education in the current school year 2015-016 (See Annex: XXI). Moreover, compared to the female in total teachers the female participation of both Dalit and Janajati are low in the secondary education.

(4) Teacher training

Table 3.64 below, shows the total number of teachers¹⁴ by training status and sex in the school year 2015-016 in all types of schools at secondary, higher secondary and secondary levels. Out of the total 39,690 teachers at secondary level (9-10) 37,092 are trained, 1,253 are partially trained, and 1,345 are untrained. Again, the figures by training status show that out of the total number of teachers 19,564 at the higher secondary level, 14,444 are trained, 1,127 are partially trained and 3,993 teachers are untrained. At the secondary level (9-12) out of the total teachers 59,254, all together 51,536 teachers are trained, 2,380 are partially trained and 5,338 teachers are untrained (See Annex: XXV).

Table 3.64
Number of teachers by training status (all types of school) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	6,470	30,622	37,092	2,382	12,062	14,444	8,852	42,684	51,536
Partially trained	276	977	1,253	170	957	1,127	446	1,934	2,380
Untrained	288	1057	1,345	566	3,427	3,993	854	4,484	5,338
Total	7,034	32,656	39,690	3,118	16,446	19,564	10,152	49,102	59,254

The percentages of teachers by training status and sex are illustrated in Table 3.65 below. At the secondary level (9-10) 93.5%, 3.2% and 3.4% of teachers are trained, partially trained and untrained respectively. Similarly, at the higher secondary level, 73.8% are trained, 5.8% are partially trained, and 20.4% are untrained. Again, at the secondary level (9-12), out of total number of teachers, in total 87.0% are trained, 4.0% are partially trained and 9.0% teachers are untrained. The figures in the table suggest that more teachers at the higher secondary level (20.4%) are untrained than at the secondary level (3.4%) (See Annex: XXVI_A & XXVI_B).

Table 3.65
Percentage of teachers by training status (all types of schools) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	92.0	93.8	93.5	76.4	73.3	73.8	87.2	86.9	87.0
Partially trained	3.9	3.0	3.2	5.5	5.8	5.8	4.4	3.9	4.0
Untrained	4.1	3.2	3.4	18.2	20.8	20.4	8.4	9.1	9.0

¹⁴ The numbers of teachers at all levels are based on the reporting in the Flash I school census 2014-15.

Table 3.66 below, shows the total number of teachers by training status and sex in the school year 2015-016 in all types of community schools at secondary, higher secondary and secondary levels. Out of the total 24,331 teachers at the secondary level (9-10), 23,201 are trained, 825 are partially trained, and 305 are untrained. Again, the figures by training status show that out of the total number of teachers 15,240 at the higher secondary level, 12,879 are trained, 776 are partially trained and 1,585 teachers are untrained. At the secondary level (9-12) out of the total teachers 39,571; 36,080 teachers are trained, 1,601 are partially trained and 1,890 teachers are untrained (See Annex: XXV).

Table 3.66
Number of teachers by training status (all types of community schools) at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	3,240	19,961	23,201	1,977	10,902	12,879	5,217	30,863	36,080
Partially trained	153	672	825	154	622	776	307	1,294	1,601
Untrained	45	260	305	389	1,197	1,585	434	1,456	1,890
Total	3,438	20,896	24,331	2,520	12,721	15,240	5,958	33,617	39,571

Table 3.67
Percentage of community schools' teachers by training status at secondary level

Training status	Secondary (9-10)			Higher secondary			Secondary (9-12)		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
Trained	94.2	95.5	95.3	78.5	85.7	84.5	87.6	91.8	91.2
Partially trained	4.5	3.2	3.4	6.1	4.9	5.1	5.2	3.9	4.1
Untrained	1.3	1.2	1.3	15.4	9.4	10.4	7.3	4.3	4.8

The percentage of teachers in terms of training in community schools at secondary level (9-12) by sex are shown in the table 3.67 above. At the secondary level (9-10), in total 95.3%, 3.4%, and 1.3% of the teachers are trained, partially trained and untrained respectively. At the higher secondary level, 84.5% of the teachers are trained, 5.1% are partially trained and 10.4% are untrained. Similarly, at the secondary level (9-12) among the total number of teachers 91.2% are trained, 4.1% are partially trained and 4.8% are untrained (See Annex: XXVI_A & XXVI_B).

(5) Teacher Ratios

(5)-1 Student Teacher Ratios in all types of schools

This section deals with the Student Teacher Ratios (STRs) at all levels: secondary, higher secondary and secondary level by types of schools. The STR assesses the level of human resources input in terms of the number of teachers in relation to the number of students.

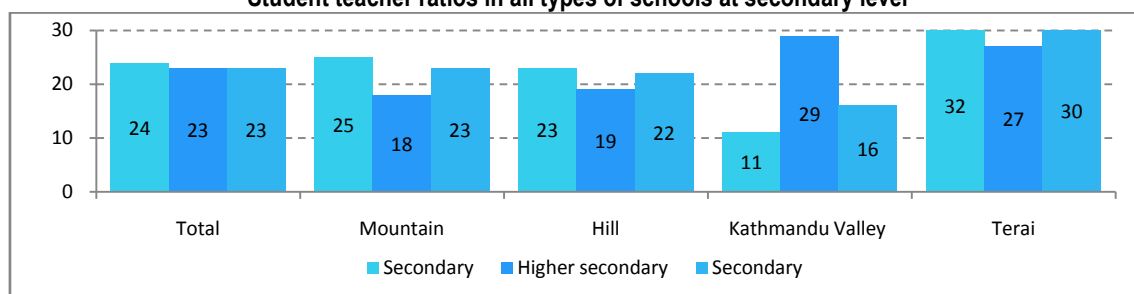

The following Table 3.68 and figure 3.29 present the STR¹⁵ in all types of schools by eco-belts and levels in the school year 2015-016. On average, the STR at the secondary level is 24:1, at the higher secondary level 23:1 and at the secondary (Grades 9-12) level 23:1 respectively. It reveals that the highest STR at the secondary level is found in the Terai eco-belt than in other eco-belts (See Annex XXVII).

¹⁵ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and the teachers in all types of schools by level in the school year 2014-015.

Table 3.68
Student teacher ratios in all types of schools at secondary level

Eco-belts	Secondary	Higher secondary	Secondary
Mountain	25	18	23
Hill	23	19	22
Valley	11	29	16
Terai	32	27	30
Total	24	23	23

Figure 3.29
Student teacher ratios in all types of schools at secondary level

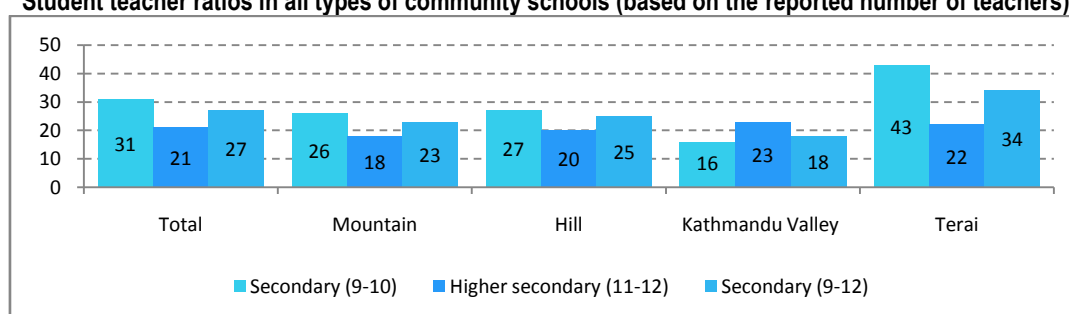

(5)-2 Student Teacher Ratios in community schools

Table 3.69 and figure 3.30 below present the STR¹⁶ in all types of community schools by eco-belts and levels in the school year 2015-016 based on the reported number of teachers in the Flash I, 2015-016 school census. On average, the STR at the secondary level is 31:1, at the higher secondary level 21:1 and at the secondary (Grades 9-12) level 27:1 respectively. As in the previous situation, the highest STR at the secondary level is found in the Terai eco-belt (See Annex XXVIII).

Table 3.69
Student Teacher Ratios in all types of community schools (based on the reported number of teachers)

Eco-belts	Secondary	Higher secondary	Secondary
Mountain	26	18	23
Hill	27	20	25
Valley	16	23	18
Terai	43	22	34
Total	31	21	27

Figure 3.30
Student teacher ratios in all types of community schools (based on the reported number of teachers)

¹⁶ The Student Teacher Ratio (STR) is calculated on the basis of reported number of students and teachers in all types of schools by level in the school year 2014-15.

(5)-3 Student Teacher Ratios in community schools based on approved teachers' positions

Table 3.70 below shows the STR by eco-belts for all types of community schools at the secondary (Grades 9-10) level based on the number of approved teacher positions (including the teachers working in Rahat Quota). On average, the STR in secondary community schools is 39:1 (Compared to the 37:1 in the last school year). As the table depicts, at the secondary level, the highest STR (50:1) is in the Terai eco-belt and the lowest one (21:1) is in the Valley. The data also reveal that the STR is highest at all levels of education in community schools compared to the STR in all types of schools (Table 3.68 & 3.69) (See Annex XXVIII). Based on STRs at both the secondary and higher secondary levels show that the number of teachers is still low, however in practice the management of the teachers at secondary and higher secondary levels are based on the subject teachers and the subjects offered in the schools.

Table 3.70
Student Teacher Ratios in community schools (based on the approved positions of teachers)

Eco-belts	Secondary level (Grade 9-10)	Secondary level (Grade 11-12)	Secondary level (Grade 9-12)
Mountain	35	35	35
Hill	34	48	38
Valley	21	103	32
Terai	50	68	54
Total	39	54	42

(6) Internal efficiency at secondary level

Table 3.71
Internal efficiency at secondary level

Students	PRD	Grade 9	Grade 10	Grade 9-10
Total	Promotion rate	92.3	92.0	92.2
	Repetition rate	3.6	2.1	2.9
	Dropout rate	4.1	5.9	4.9
	Survival rate		37.9	
	Coefficient of efficiency		50.8	
Boys	Promotion rate	92.3	92.2	92.2
	Repetition rate	3.7	2.0	2.9
	Dropout rate	4.0	5.8	4.8
	Survival rate		37.0	
	Coefficient of efficiency		50.2	
Girls	Promotion rate	92.4	91.8	92.2
	Repetition rate	3.5	2.2	2.9
	Dropout rate	4.1	6.0	4.9
	Survival rate		38.9	
	Coefficient of efficiency		51.4	

Table 3.71 above shows the flow rates of students from the school year 2014-015 to the school year 2015-016 in grade 9 and the percentage of students appeared in the final exam

from grade 10 at the secondary level. The table illustrates, out of the total students enrolled in the school year 2014-015 in Grade Nine, 92.3% (Compared to 91.5% in the last school year) promoted to Grade Ten, 3.6% repeated the same grade in the current school year, and 4.1% dropped out from the school education system. The table also indicates that the girls' dropout rate in Grade 9 is similar to the dropout rate of boys (See Annexes XVI_A-C). Similarly, in total 92.0% of grade 10 students appeared in the final exam in the school year 2014-015.

In addition, the internal efficiency related indicators: Survival rate to grade 10 and Coefficient of efficiency indicate that of the total students enrolled in grade 1 in the 10 years ago (i.e. school year 2005) almost 38 percent of the student reached to the grade 10, illustrates that every 3 children enrolled in grade 1 almost only one children reached up to grade 10. This indicates there should be given ample attentions on students' retention and their further progression from very beginning of the school education (i.e. especially in grade 1).

SECTION IV

4.1 Availability of textbooks at primary, lower secondary and secondary levels in community schools

Textbooks are the main instructional materials for classroom teaching/learning activities in schools. The Ministry of Education is committed, especially for primary school children, to deliver all textbooks by the second week of the 1st. month of each new school year. Due to the consequences and the impacts of the two main devastated earthquakes (i.e. with a 7.8 magnitude on 25 April 2015 and with a 7.3 magnitudes struck on 12th. May 2015) and the series of the aftershocks of those earthquakes, the Flash I school census data were under reported so that the Draft Flash report I, 2015-016 shared in the JCM was not covered all the school data. This Final Draft Flash I Report 2015-016 is presented based on the updated information of the all schools after the JCM 2015-016.

Table 4.1
Availability of textbooks at primary, lower secondary and secondary levels by grades

Grade	Total Enrolment	Number of Students by the status of Text books availability							
		Student number				Percentage			
		Full sets	Partial	Re-used	None	Full	Partial	Reused	None
1	915,575	764,491	41,252	46,212	63,620	83.5	4.5	5.0	6.9
2	731,118	628,572	28,495	27,250	46,801	86.0	3.9	3.7	6.4

1-8	5,173,042	4,493,078	195,058	170,200	314,706	86.9	3.8	3.3	6.1
9	418,665	370,334	22,812	10,601	14,918	88.5	5.4	2.5	3.6
10	339,055	307,454	15,681	6,385	9,535	90.7	4.6	1.9	2.8
9-10	757,720	677,788	38,493	16,986	24,453	89.5	5.1	2.2	3.2
1-10	5,930,762	5,170,866	233,551	187,186	339,159	87.2	3.9	3.2	5.7

Table 4.1 above presents the status of availability of a full set of new textbooks within the second week of the 1st month (by 2072/01/15) of this school year in the community primary, lower secondary and secondary school levels. It shows that out of the total number of enrolled students at the primary level in the country, 86.5% (compared to 81.1% in the last school year) students received a full set of textbooks within the second week of the school year 2015-016 (i.e. 2072/01/15), 3.9% students received a partial set of textbooks, 3.6% students reused the old text books and the rest 6.1% (compared to 19.6% students in the last school year) students did not receive even a single textbook by the above reference date (See Annex: XXXX_A & XXXX_B).

When compared with the status of the previous school year, the percentage of students at the primary level receiving a full set of textbooks increased from 81.1% to 86.5% in the current

school year. The highest percentage of students receiving a full set of textbooks by the reference date was Grade 10 students with 90.7% and Grade Eight students with 88.9%. The highest percentage of the students not receiving even a single textbook was the Grade six with 9.3%. With 86.9% students (excluding additional 3.8% partial and 3.3% reused) at basic level and 89.5% of students with full set of textbooks received in time at secondary level. The figures suggest that including the status of the students with Full sets, Partial sets and Re-used the text-books almost 6.1% of students at basic level and 3.2% of students at secondary level did not received even a single textbooks by the particular date of 2072/01/15 in the school year 2015/016. This indicates that the respective organizations including parents and students need to be more pro-active in the future to make ensure that every student will get full sets of text-books within the prescribed time-line.

4.2 Number of classes with transitional language support at primary level

Nepal is a multilingual country, where groups of people speak many different languages as their mother tongue in daily practices. Table 4.2 above shows the number of schools which used a local language in the teaching and learning process at the primary level as a transitional language to make better interpretation of the subject matters for those students who did not have Nepali language as their mother tongue.

The provision of teaching through local language/s is line with the government initiation to promote the local languages/mother tongues for teaching and learning activities at primary

level. Altogether 21 textbooks were developed by the Curriculum Development Center (CDC) in different languages, based on the curriculum. Accordingly, to promote the use of local language/s in teaching and learning the National Center for Educational Development (NCED) developed training packages and provided training to teachers through the 10-day Teacher Professional Development (TPD) modules. In-addition to this there are text-books developed in some local languages for early grades.

In total there are 69 local languages, which have been used as the medium of instruction in the classroom teaching and learning activities at primary level. Out of total 29,133 community schools in the school year 2015-016 the following local languages were used as the medium of instruction by grade at primary level in teaching and learning activities. The data shows that the local languages were mainly used in the early grades at primary level. Among the reported local languages, Maithili, Tamang, Doteli, Awadhi, Bhojpuri, Tharu, Magar, Limbu, Bajjika etc. were usually used in the Terai and Hill districts.

Table 4.3 below presents the total number of schools, number of languages and students by grade where the local languages have been used as the medium of instruction in the classroom teaching and learning activities at primary level. Of the total 69 local languages used as the medium of instruction in the classroom teaching and learning activities at primary level, nearly 248,131 students in grade 1 of 7,390 schools, 179,329 students in grade 2 of 6,760 schools, 157,283 students in grade 3 of 6,211 schools, 128,729 students in grade 4 of 4,711 schools and 110,855 students in grade 5 of 4,623 primary schools benefitted from the facilitation by trained teachers, contributing to their enhanced understanding of the prescribed subject matters in their local language/s. In addition to the above table (Table 4.2) the table 4.4 below presents the number of languages used in the same schools in grade 1-5. In total, almost 6,081 schools used one local language, 729 schools used two local languages, 372 schools used three local languages, 467 schools used four local languages and 221 schools used five local languages as the medium of instruction in the classroom teaching and learning activities at primary level in the school year 2015-016.

Table 4.3
Summary of transitional local languages by number of schools, languages, and students

₁NASA I round Report findings for grade 5 in Math, Nepali & English subjects, and ₂ NASA I&II rounds Reports findings for grade 8 in Math, Nepali & Social Studies subjects.

1.6 Key findings

- The total number of community-based and school-based ECD/PPCs is 35,991 (35,121 in the last school year) of which 5,543 (5,087 in the last school year) pre-primary classes are running in institutional schools and the rest 30,448 (30,034 in the last school year) are running in community schools and as community-based ECDs.
- The average Enrolment Rate with regard to 4 years' population and enrolment in ECD/PPCs is 81.0% (77.7% in the last school year) with 80.9% for girls and 81.2% for boys.
- The proportion of students in Grade One with ECD/PPC experiences is 62.4% (59.6% in the last school year) with 62.3% for girls and 62.5% for boys.
- Of the total 34,806 schools in the last school year, in total 148 schools (especially in the Terai eco-belt) were closed and merged in the last school year and 181 new schools were opened in the current school year, so that the number of schools has changed in the current school year 2015-016.
- Out of the total 34,837 (34,806 in the last school year) schools 34,362 (34,335 in the last school year) are primary, 15,091 (14,924 in the last school year) are lower secondary, 34,537 (34,506 in the last school year) are basic, 8,968 (8,814 in the last school year) are secondary, 3,656 (3,596 in the last school year) are higher secondary and 9,263 (9,109 in the last school year) are secondary (Grades 9-12) levels.
- Out of the total 34,806 schools, 930 (895 in the last school year) are religious schools, which include Madarasa, Gumba/Vihar and Ashram/Gurukul.
- On average, the school student ratios are 1:123 at primary, 1:123 at lower secondary, 1:176 at basic (Grades 1-8), 1:105 at secondary, 1:123 at higher secondary and 1:150 at secondary (Grades 9-12) levels (Compared to 1:126, 1:123, 1:179, 1:102, 1:1116 and 1:145 respectively in the last school year).
- The total numbers of students at primary, lower secondary and basic levels are 4,264,942 (4,335,355 in the last school year) 1,862,873 (1,835,313 in the last school year) and 6,127,815 (6,170,668 in the last school year) respectively.
- Of the total enrolment at primary, lower secondary and basic levels, 84.7%, 83.8% and 84.4% (compared to 84.6%, 84.1% and 84.4% in the last school year) are in community schools respectively. Similarly, 15.3% (15.4% in the last school year), 16.2% (15.9% in the last school year) and 15.6% (15.6% in the last school year) are in institutional schools.

- The total number of students at secondary, higher secondary and secondary (grades: 9-12) levels are 938,897; 450,753 and 1,389,650 (900,585; 416,995 and 1,317,580 in the last school year) respectively.
- Of the total enrolment at secondary, higher secondary and secondary (grades: 9-12), 80.7% (80.9%, in the last school year), 71.0% (71.1% in the last school year) and 77.6% (77.8% in the last school year) are in community schools, whereas 19.3% (19.1% in the last school year), 29.0% (28.9% in the last school year) and 22.4% (22.2% in the last school year) are in institutional schools.
- The girls' enrolment constitutes 50.8% (50.8% in the last school year) at primary level, 50.7% (50.7% in the last school year) at lower secondary level, and 50.8% (50.8 in the last school year) at basic level. Likewise, girls comprise 50.9% (51.0% in the last school year) at secondary level, 50.7% (50.7% in the last school year) at higher secondary level and 50.8% (50.9% in the last school year) at comprehensive secondary (grades: 9-12) level.
- The share of Dalit enrolment is 19.7% at primary, 14.4% at lower secondary, 11.0% at secondary and 6.6% at higher secondary level, which are almost similar to the previous school year.
- The share of Janajati enrolment is 34.4% (33.9% in the last school year) at primary level, 38.6% (38.7% in the last school year) at lower secondary, 38.4% (38.6% in the last school year) at secondary and 29.3% (29.8% in the last school year) at higher secondary level.
- The total number of student enrolment by extremely disadvantaged Janajati (22 ethnic groups) is 94,383 (96,333 in the last school year) at primary level, 31,885 (31,627 in the last school year) at lower secondary level, 15,389 (15,409 in the last school year) at secondary level and 2,859 at higher secondary level.
- Gross Intake Rate (GIR) and Net Intake Rate (NIR) in Grade One are 136.7% (137.0% in the last school year) and 93.9% (93.0% in the last school year) respectively.
- The Gross Enrolment Rate (GER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 135.4% (134.4% in the last school year) 95.4% (89.7% in the last school year), 120.1% (117.1% in the last school year), 75.1% (70.1% in the last school year), 37.6% (32.9% in the last school year) and 56.7% (51.6% in the last school year) respectively.
- The Net Enrolment Rate (NER) at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 96.6% (96.2% in the last school year), 77.7% (74.6% in the last school year), 89.4% (87.6% in the last school year),

57.9% (56.1% in the last school year), 16.6% (13.1% in the last school year) and 37.7% (34.7% in the last school year) respectively.

- The gender parity in school education has significantly improved. The Gender Parity Index (GPI) in NER at primary, lower secondary, basic, secondary, higher secondary and secondary levels are 0.99; 1.03; 1.00; 0.98; 1.03 and 0.99 (0.99; 1.02; 1.00; 0.99; 1.03 and 1.00 in the last school year) respectively.
- The promotion and repetition rates in Grade One are 81.5% (78.4% in the last school year) and 13.9% (15.2% in the last school year).
- The promotion and repetition rates in grade 5 are 92.2% and 4.2%.
- The promotion and repetition rates in grade 8 are 90.9% and 4.0% (89.5% and 4.5% in the last school year).
- The overall survival rate to grade five is 87.5%, with 87.1% for boys and 87.9% for girls (Compared to total 86.8%, boys 86.5% and girls 87.5% in the last school year).
- The overall survival rate to grade eight is 76.6%, with 75.9% for boys and 77.4% for girls (compared to total 74.6%, boys 73.3% and girls 76.0% in the last school year).
- The overall survival rate to grade ten is 37.9%, with 37.0% for boys and 38.9% for girls.
- The overall Co-efficient of Internal Efficiency at Primary and Basic levels is: 81.8% and 75.9% (80.9% and 73.1% in the last school year). The Cohort Graduation rates at Primary and Basic levels are: 80.6% and 69.6% (77.6% and 63.8% in the last school year).
- According to the National Assessment of Student Achievement (NASA) report, 2013 the average students' learning achievements in Grade 8 are 35% in Mathematics, 48% in Nepali and 41% in Social studies subjects.
- According to the NASA report, 2012 the average students' learning achievements in Grade 5 are 53.3% in Mathematics, 59.7% in Nepali and 53.6% in English subjects.
- According to the NASA report, 2012 the average students' learning achievements in Grade 3 are 59.4% in Mathematics and 62.6% in Nepali subjects.
- Based on the NASA reports, 2011 and 2012 the districts: Achham, Bardiya, Jumla, Khotang, Mahottari, Rolpa, Saptari, Udayapur and also the Eastern- and Mid-Western development regions have low level of achievements. It is worth mentioning here that similar situations have been observed in these districts and

regions with regard to their internal efficiency as demonstrated in the Flash I Report, 2015-016.

- The proportions of female teachers by levels, in all types of schools, are: 42.3% (41.9% in the last school year) at primary level, 27.9% (27.6% in the last school year) at lower secondary level and 17.7% (17.4% in the last school year) at secondary level.
- The proportions of female teachers in all types of community schools are: 38.4% (38.2% in the last school year) at primary level, 20.9% (20.8% in the last school year) at lower secondary level and 14.1% (13.9% in the last school year) at secondary level.
- The proportions of Dalit teachers at primary, lower secondary and secondary levels are: 5.3%, 4.2%, and 4.6% (5.1%, 4.0%, and 4.4% in the last school year) respectively.
- The proportions of Janajati teachers at primary, lower secondary and secondary levels are: 30.5%, 20.1% and 18.5% (30.4%, 19.9% and 18.3% in the last school year) respectively.
- The percentage of fully-trained teachers in all community schools is 97.3% (96.4% in the last school year) at primary level, 88.6% (82.8% in the last school year) at lower secondary level and 95.3% (93.0% in the last school year) at secondary level.
- The student-teacher ratios (based on the approved positions of teachers) in community schools are 35:1 (36:1 in the last school year) at primary level, 60:1 (60:1 in the last school year) at lower secondary level and 39:1, (30:1 in the last school year) at secondary level.
- Based on the PCF salary fund for community schools in the Fiscal year 2071/072 (by considering the PCF fund as the number of teachers and add this into the existing number of teachers by level) the STR 35:1 will be at primary level, 54:1 will be at the lower secondary level and 36:1 will be at the secondary level respectively.
- The average percentage of students who received the full sets of textbooks, within the second week of the academic year 2015-016, was 86.5% (81.1% in the last school year) at primary level, 86.9% (80.6% in the last school year) at basic level and 89.5% (79.4% in the last school year) at secondary level.
- Altogether 69 local languages have been used in 12,584 grade 1 classes, 12,770 in grade 2 classes, 10,616 in grade 3 classes, 10,750 in grade 4 and 5,099 in grade

5 classes as the medium of instruction in the classroom teaching and learning activities at primary level.
